

Format for Importing the .CSV Files

Overview

This appendix explains about the format of .csv files that can be imported for the various features of the CPC solution.

The topics in this appendix includes:

- [File Format for Locations](#)
- [File Format for Relaxation Videos](#)
- [File Format for Education Videos](#)
- [File Format for Custom Channel Program Airings](#)
- [File Format for Custom Channel Program Details](#)
- [File Format for Food Menu](#)
- [File Format for Messages](#)
- [File Format for FAQs](#)
- [File Format for Requests](#)

File Format for Locations

The location details can be imported into Admin View using a .csv file that has been provided to you. The sample import location csv file format details are provided in the following table:

Table A-1 **Import Location File Format Details (location-iec-mapping-export.csv file)**

Column	Description
Facility Id	Id for the facility.
Facility Description	Description for the facility.
Building Id	Id for the building.
Building Description	Description for the building.
Floor Id	Id for the hospital floor.

Table A-1 *Import Location File Format Details (location-iec-mapping-export.csv file)*

Column	Description
Floor Description	Description for the hospital floor.
Department Id	Id for the hospital department.
Department Description	Description for the hospital department.
Room Id	Id for the hospital room.
Room Description	Description for the hospital room.
Bed Id	Id for the hospital bed.
Bed Description	Description for the hospital bed.
Extension Id	Extension Id
Extension Description	Description for the extension.
RB Location Id	Location Id for RB.
RTLS Location Id	Location Id for RTLS.
Location Type	Location type. For example, PATIENT_ROOM
Device Serial Number	Serial Number of the IEC device.
Directory Number	Directory number.

File Format for Relaxation Videos

The video metadata is imported into Admin View using a .csv file that has been provided to you. The sample relaxation video csv file format details are provided in the following table:

Table A-2 *Relaxation Video File Format Details (HealingHealth_Sample.csv file)*

Column	Description
File Name	The video file name that is stored in Apache.
Common Key	Name of the relaxation video which appears in Nurse Dashboard and Admin UI.
Language	Language of the video. For example, English.
Title	Title of the video. For example, Shoulder (AC) Arthritis.
Gender	Gender of the patient who can watch the video.
Min Age	Minimum age of the patient to watch the video.
Max Age	Maximum age of the patient to watch the video.
Condition	Condition of the patient. For example, general.
Description	Description of the video. For example, Orthopedics, Primary Care, Rheumatology, Senior Health.

File Format for Education Videos

The video metadata is imported into Admin View using a .csv file that has been provided to you. The sample education video .csv file format details are provided in the following table:

Table A-3 Education Video File Format Details (Education.csv file)

Column	Description
SKU	A product and service identification code.
Title	Title of the video. For example, Shoulder (AC) Arthritis.
Native Language Title	Name with respect to the local language of the video. For example, Spanish and English.
LangName	Language. For example, English or Spanish.
Min Age	Minimum age of the patient to watch the video.
Max Age	Maximum age of the patient to watch the video.

Table A-3 Education Video File Format Details (*Education.csv file*)

Column	Description
RxNorm	A catalog of the standard names given to clinical drugs and drug delivery devices
SNOMED	A standardized, multilingual vocabulary of clinical terminology.

File Format for Custom Channel Program Airings

The custom channel program airings can be imported into Admin View using a .csv file that has been provided to you. The sample .csv file format details are provided in the following table:

Table A-4 Custom Channel Program Airings File Format Details (*ChannelScheduled-mapping-import.csv File*)

Column	Description
Provider Id	Service Provider ID.
Channel Number	Channel Number from the service provider.
Program Id	ID of the program.
Program Title	Title of the program.
Program Duration	Duration of the program.
Program Airing Time	Telecast time of the program.

File Format for Custom Channel Program Details

The custom channel program details can be imported into Admin View using a .csv file that has been provided to you. The sample .csv file format details are provided in the following table:

Table A-5 Custom Channel Program Details File Format (*ProgramDetails.csv File*)

Column	Description
Provider Id	Service Provider ID.
Program Id	ID of the program.
Program Title	Title of the program.
Description	Description of the program.

File Format for Food Menu

The food menu details can be imported into Admin View using a .csv file that has been provided to you. The sample .csv file format details are provided in the following table:

Table A-6 Food Menu File Format Details (*FoodMenu_enUS.csv File*)

Column	Description
Id	This is the Id which is getting called from CPC CMS.
Service	By default, the service is displayed as FoodMenu.
Module	By default, the module is displayed as FoodMenu.
ResourceId	Displays to indicate whether the menu is for dinner, breakfast, and so on.
Locale	Displays en_US to indicate that the food menu displays in English.
ResourceText	Displays to indicate whether the menu is for dinner, breakfast, and so on.

File Format for Messages

The messages can be imported into Admin View using a .csv file that has been provided to you. The sample .csv file format details are provided in the following table:

Table A-7 Messages File Format Details (*predefinedmessages_enUS.csv File*)

Column	Description
RECORD_NUMBER	Serial number of the message.
PREDEFINED_MESSAGEID	This is the predefined message ID. When you add a new message, message ID gets generated automatically.
PREDEFINED_MESSAGETEXT	This is the predefined message text which will be displayed for the Patient View.
UNITID	This is the Department ID.
AGE	Age of the patient who can view the predefined message.
GENDER	Gender of the patient who can view the predefined message.

File Format for FAQs

The FAQs can be imported into Admin View using a .csv file that has been provided to you. The sample .csv file format details are provided in the following table:

Table A-8 FAQs File Format Details (*faqs_enUS.csv File*)

Column	Description
RECORD_NUMBER	Serial number of the FAQ.
QUESTIONID	ID of the FAQ.

Table A-8 *FAQs File Format Details (faqs_enUS.csv File)*

Column	Description
QUESTIONTEXT	Question text.
ANSWER	Answer text for the question.
UNITID	Department ID.
AGE	Age of the patient who can view the FAQ.
GENDER	Gender of the patient who can view the FAQ.

File Format for Requests

The requests can be imported into Admin View using a .csv file that has been provided to you. The sample .csv file format details are provided in the following table:

Table A-9 *Requests File Format Details (requests_enUS.csv File)*

Column	Description
RECORD_NUMBER	Serial number of the FAQ.
TASKID	ID for the request.
TASK_DESCRIPTION	Description for the task.
ICON_URL	URL for the icon.
UNITID	Department ID.
AGE	Age of the patient who can raise the request.
GENDER	Gender of the patient who can raise the request.
