

New and Changed Information

This chapter contains the following sections:

- [New and Changed Information, on page 1](#)

New and Changed Information

The following table provides an overview of the significant changes to this guide up to this current release. The table does not provide an exhaustive list of all changes made to the guide or of the new features up to this release.

Table 1: New and Changed Information

Cisco ACI Multi-Site Version	Feature	Description	Where Documented
2.2(3)	Proxy configuration	A proxy server can be configured and enabled for Multi-Site Orchestrator connections to cloud sites.	For more information, see Proxy Server .
2.2(1)	Cisco ACI Multi-Site and Cisco APIC Interoperability Support	Mixed operation support has been added to allow different release versions of Multi-Site Orchestrator and APIC to function within the same environment	For more information, see DHCP Relay Policy .
2.2(1)	Object Migration Between Schemas and Templates	Bridge Domains and EPGs can now be moved between templates within the same or different schemas	For more information, see Migrating Objects Between Templates .
2.2(1)	Intersite L3Out	A site can use another site's L3Out	For more information, see Intersite L3Out .

Cisco ACI Multi-Site Version	Feature	Description	Where Documented
2.2(1)	DHCP Relay	A DHCP relay can be configured for endpoints in one EPG to access a DHCP server in another EPG or external EPG	For more information, see DHCP Relay Policy .
2.2(1)	Remote Backup	Remote back up locations can be configured in the Orchestrator GUI.	For more information, see Remote Backups .
