ACI F4x Messages

- ACI F4* Commands, on page 1

ACI F4* Commands

F4003: fltHcloudRouteTableEntryOperCloudRouteTableEntrySvcEpStateDown

Severity: major

Explanation: This fault occurs Service device is not present/discovered in the local region.

Recommended Action: None set.

F4004: fltHcloudRsToRouteTableEntryIntraCtxProfileRedirRoute

Severity: major

Explanation: This fault occurs service graph with redirect node is used with consumer and provider from same context profile(VNET/VPC).

Recommended Action: If you see this fault, remove the epgs from the contract.

F4005: fltHcloudSvcFaultInfoCloudPeeringRouteOverride

Severity: warning

Explanation: This fault occurs when peering installed route is over-written by Services UDR.

Recommended Action: None set.

F4006: fltFvExtRoutableUcastConnPInvalidConfiguration

Severity: major

Explanation: This fault occurs when there are specific configuration errors on a ucast tep IP.

Recommended Action: If you see this fault, take the one of following actions based on error shown:

1. Please delete and reconfigure ucast tep IP or routable subnet (fabricExtRoutablePodSubnet) so that ucast tep doesnt overlapping with the unreserved portion of any routable subnet configured.
2. Please delete and reconfigure one of the duplicate ucast tep IPs configured.

3. Please delete and reconfigure corresponding ucast tep IP or rl pool (fabricExtSetupP) so that they dont overlap.
4. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC

F4007: fltCloudNamingNamingPolicyNotReviewed

Severity: warning

Explanation: This fault occurs when cloudNaming Policy has not been reviewed and accepted. Cloud Resources will not deployed till this configuration is done.

Recommended Action: If you see this fault, take the following actions:

1. Navigate to the First time Setup Wizard.
2. Navigate to the cloudNaming Rules, review the naming policy, deploy the Policy and save the config
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F4008: fltHcloudSGRuleGroupOperCloudNSGOperStateDown

Severity: minor

Explanation: This fault occurs when an erroneous configuration is pushed for creating a CloudEPg.

Recommended Action: If you see this fault, take the following actions:

1. Please check the fault message and make necessary changes to the config for creating the CloudEPg.
2. In case of error in delete operation, please check if any pending dependent resources have to be cleaned up first on cloud provider.
3. If fault still has not cleared, please contact Cisco TAC.

F4011: fltFabricRsFLinkFlapPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4012: fltPtpACfgFabricPtpDisabled

Severity: warning

Explanation: This fault occurs when the fabric PTP is disabled.

Recommended Action: Enable Fabric PTP for the PTP FP policy

1. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F401296: fltTcaIsisIsisCsnpErrStats5minCsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401297: fltTcaIsisIsisCsnpErrStats15minCsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401298: fltTcaIsisIsisCsnpErrStats1hCsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401299: fltTcaIsisIsisCsnpErrStats1dCsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4013: fltPtpRsLatencyPtpModeResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F401300: fltTcaIsisIsisCsnpErrStats1wCsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401301: fltTcaIsisIsisCsnpErrStats1moCsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401302: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401303: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401312: fltTcaIsisIsisCsnpErrStats5minCsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401313: fltTcaIsisIsisCsnpErrStats15minCsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401314: fltTcaIsisIsisCsnpErrStats1hCsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401315: fltTcaIsisIsisCsnpErrStats1dCsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401316: fltTcaIsisIsisCsnpErrStats1wCsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401317: fltTcaIsisIsisCsnpErrStats1moCsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401318: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401319: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401320: fltTcaIsisIsisCsnpErrStats5minCsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401321: fltTcaIsisIsisCsnpErrStats15minCsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401322: fltTcaIsisIsisCsnpErrStats1hCsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401323: fltTcaIsisIsisCsnpErrStats1dCsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401324: fltTcaIsisIsisCsnpErrStats1wCsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401325: fltTcaIsisIsisCsnpErrStats1moCsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401326: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401327: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401328: fltTcaIsisIsisCsnpErrStats5minCsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401329: fltTcaIsisIsisCsnpErrStats15minCsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401330: fltTcaIsisIsisCsnpErrStats1hCsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401331: fltTcaIsisIsisCsnpErrStats1dCsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401332: fltTcaIsisIsisCsnpErrStats1wCsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401333: fltTcaIsisIsisCsnpErrStats1moCsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401334: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401335: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401336: fltTcaIsisIsisCsnpErrStats5minCsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401337: fltTcaIsisIsisCsnpErrStats15minCsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401338: fltTcaIsisIsisCsnpErrStats1hCsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401339: fltTcaIsisIsisCsnpErrStats1dCsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401340: fltTcaIsisIsisCsnpErrStats1wCsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401341: fltTcaIsisIsisCsnpErrStats1moCsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401342: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401343: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401344: fltTcaIsisIsisCsnpErrStats5minCsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401345: fltTcaIsisIsisCsnpErrStats15minCsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401346: fltTcaIsisIsisCsnpErrStats1hCsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401347: fltTcaIsisIsisCsnpErrStats1dCsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401348: fltTcaIsisIsisCsnpErrStats1wCsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401349: fltTcaIsisIsisCsnpErrStats1moCsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401350: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401351: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401376: fltTcaIsisIsisCsnpErrStats5minCsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401377: fltTcaIsisIsisCsnpErrStats15minCsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401378: fltTcaIsisIsisCsnpErrStats1hCsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401379: fltTcaIsisIsisCsnpErrStats1dCsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401380: fltTcaIsisIsisCsnpErrStats1wCsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401381: fltTcaIsisIsisCsnpErrStats1moCsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401382: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401383: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401384: fltTcaIsisIsisCsnpErrStats5minCsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401385: fltTcaIsisIsisCsnpErrStats15minCsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401386: fltTcaIsisIsisCsnpErrStats1hCsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401387: fltTcaIsisIsisCsnpErrStats1dCsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401388: fltTcaIsisIsisCsnpErrStats1wCsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401389: fltTcaIsisIsisCsnpErrStats1moCsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401390: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401391: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4014: fltQosRsEgressDppPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F401464: fltTcaIsisIsisCsnpErrStats5minCsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401465: fltTcaIsisIsisCsnpErrStats15minCsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401466: fltTcaIsisIsisCsnpErrStats1hCsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401467: fltTcaIsisIsisCsnpErrStats1dCsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401468: fltTcaIsisIsisCsnpErrStats1wCsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401469: fltTcaIsisIsisCsnpErrStats1moCsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401470: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401471: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401480: fltTcaIsisIsisCsnpErrStats5minCsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401481: fltTcaIsisIsisCsnpErrStats15minCsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401482: fltTcaIsisIsisCsnpErrStats1hCsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401483: fltTcaIsisIsisCsnpErrStats1dCsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401484: fltTcaIsisIsisCsnpErrStats1wCsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401485: fltTcaIsisIsisCsnpErrStats1moCsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401486: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401487: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401488: fltTcaIsisIsisCsnpErrStats5minCsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401489: fltTcaIsisIsisCsnpErrStats15minCsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401490: fltTcaIsisIsisCsnpErrStats1hCsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401491: fltTcaIsisIsisCsnpErrStats1dCsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401492: fltTcaIsisIsisCsnpErrStats1wCsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401493: fltTcaIsisIsisCsnpErrStats1moCsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401494: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401495: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401496: fltTcaIsisIsisCsnpErrStats5minCsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401497: fltTcaIsisIsisCsnpErrStats15minCsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401498: fltTcaIsisIsisCsnpErrStats1hCsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401499: fltTcaIsisIsisCsnpErrStats1dCsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4015: fltQosRsIngressDppPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F401500: fltTcaIsisIsisCsnpErrStats1wCsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401501: fltTcaIsisIsisCsnpErrStats1moCsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401502: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401503: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401504: fltTcaIsisIsisCsnpErrStats5minCsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401505: fltTcaIsisIsisCsnpErrStats15minCsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401506: fltTcaIsisIsisCsnpErrStats1hCsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401507: fltTcaIsisIsisCsnpErrStats1dCsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401508: fltTcaIsisIsisCsnpErrStats1wCsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401509: fltTcaIsisIsisCsnpErrStats1moCsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401510: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401511: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401512: fltTcaIsisIsisCsnpErrStats5minCsnpPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401513: fltTcaIsisIsisCsnpErrStats15minCsnpPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401514: fltTcaIsisIsisCsnpErrStats1hCsnpPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401515: fltTcaIsisIsisCsnpErrStats1dCsnpPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401516: fltTcaIsisIsisCsnpErrStats1wCsnpPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401517: fltTcaIsisIsisCsnpErrStats1moCsnpPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401518: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401519: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401544: fltTcaIsisIsisCsnpErrStats5minCsnpPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401545: fltTcaIsisIsisCsnpErrStats15minCsnpPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401546: fltTcaIsisIsisCsnpErrStats1hCsnpPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401547: fltTcaIsisIsisCsnpErrStats1dCsnpPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401548: fltTcaIsisIsisCsnpErrStats1wCsnpPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401549: fltTcaIsisIsisCsnpErrStats1moCsnpPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401550: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401551: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401552: fltTcaIsisIsisCsnpErrStats5minCsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401553: fltTcaIsisIsisCsnpErrStats15minCsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401554: fltTcaIsisIsisCsnpErrStats1hCsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401555: fltTcaIsisIsisCsnpErrStats1dCsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401556: fltTcaIsisIsisCsnpErrStats1wCsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401557: fltTcaIsisIsisCsnpErrStats1moCsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401558: fltTcaIsisIsisCsnpErrStats1qtrCsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401559: fltTcaIsisIsisCsnpErrStats1yearCsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4016: fltQospClassMicroburstUnsupportedHw

Severity: minor

Explanation: This fault occurs when Microburst config is pushed to unsupported hardware

Recommended Action: To recover from this fault, try the following actions

1. Look at any configuration issues
2. Microburst not supported on this hardware,could upgrade to newer hardware

F401632: fltTcaIsisIsisCsnpStats5minCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401633: fltTcaIsisIsisCsnpStats15minCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401634: fltTcaIsisIsisCsnpStats1hCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401635: fltTcaIsisIsisCsnpStats1dCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401636: fltTcaIsisIsisCsnpStats1wCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401637: fltTcaIsisIsisCsnpStats1moCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401638: fltTcaIsisIsisCsnpStats1qtrCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401639: fltTcaIsisIsisCsnpStats1yearCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401648: fltTcaIsisIsisCsnpStats5minCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401649: fltTcaIsisIsisCsnpStats15minCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401650: fltTcaIsisIsisCsnpStats1hCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401651: fltTcaIsisIsisCsnpStats1dCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401652: fltTcaIsisIsisCsnpStats1wCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401653: fltTcaIsisIsisCsnpStats1moCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401654: fltTcaIsisIsisCsnpStats1qtrCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401655: fltTcaIsisIsisCsnpStats1yearCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401656: fltTcaIsisIsisCsnpStats5minCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401657: fltTcaIsisIsisCsnpStats15minCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401658: fltTcaIsisIsisCsnpStats1hCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401659: fltTcaIsisIsisCsnpStats1dCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401660: fltTcaIsisIsisCsnpStats1wCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401661: fltTcaIsisIsisCsnpStats1moCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401662: fltTcaIsisIsisCsnpStats1qtrCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401663: fltTcaIsisIsisCsnpStats1yearCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401664: fltTcaIsisIsisCsnpStats5minCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401665: fltTcaIsisIsisCsnpStats15minCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401666: fltTcaIsisIsisCsnpStats1hCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401667: fltTcaIsisIsisCsnpStats1dCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401668: fltTcaIsisIsisCsnpStats1wCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401669: fltTcaIsisIsisCsnpStats1moCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401670: fltTcaIsisIsisCsnpStats1qtrCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401671: fltTcaIsisIsisCsnpStats1yearCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401672: fltTcaIsisIsisCsnpStats5minCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401673: fltTcaIsisIsisCsnpStats15minCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401674: fltTcaIsisIsisCsnpStats1hCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401675: fltTcaIsisIsisCsnpStats1dCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401676: fltTcaIsisIsisCsnpStats1wCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401677: fltTcaIsisIsisCsnpStats1moCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401678: fltTcaIsisIsisCsnpStats1qtrCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401679: fltTcaIsisIsisCsnpStats1yearCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401680: fltTcaIsisIsisCsnpStats5minCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401681: fltTcaIsisIsisCsnpStats15minCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401682: fltTcaIsisIsisCsnpStats1hCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401683: fltTcaIsisIsisCsnpStats1dCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401684: fltTcaIsisIsisCsnpStats1wCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401685: fltTcaIsisIsisCsnpStats1moCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401686: fltTcaIsisIsisCsnpStats1qtrCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401687: fltTcaIsisIsisCsnpStats1yearCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401712: fltTcaIsisIsisCsnpStats5minCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401713: fltTcaIsisIsisCsnpStats15minCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401714: fltTcaIsisIsisCsnpStats1hCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401715: fltTcaIsisIsisCsnpStats1dCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401716: fltTcaIsisIsisCsnpStats1wCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401717: fltTcaIsisIsisCsnpStats1moCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401718: fltTcaIsisIsisCsnpStats1qtrCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401719: fltTcaIsisIsisCsnpStats1yearCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401720: fltTcaIsisIsisCsnpStats5minCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401721: fltTcaIsisIsisCsnpStats15minCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401722: fltTcaIsisIsisCsnpStats1hCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401723: fltTcaIsisIsisCsnpStats1dCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401724: fltTcaIsisIsisCsnpStats1wCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401725: fltTcaIsisIsisCsnpStats1moCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401726: fltTcaIsisIsisCsnpStats1qtrCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401727: fltTcaIsisIsisCsnpStats1yearCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4018: fltFvRsQosRequirementResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F401800: fltTcaIsisIsisCsnpStats5minCsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401801: fltTcaIsisIsisCsnpStats15minCsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401802: fltTcaIsisIsisCsnpStats1hCsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401803: fltTcaIsisIsisCsnpStats1dCsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401804: fltTcaIsisIsisCsnpStats1wCsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401805: fltTcaIsisIsisCsnpStats1moCsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401806: fltTcaIsisIsisCsnpStats1qtrCsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401807: fltTcaIsisIsisCsnpStats1yearCsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401816: fltTcaIsisIsisCsnpStats5minCsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401817: fltTcaIsisIsisCsnpStats15minCsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401818: fltTcaIsisIsisCsnpStats1hCsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401819: fltTcaIsisIsisCsnpStats1dCsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401820: fltTcaIsisIsisCsnpStats1wCsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401821: fltTcaIsisIsisCsnpStats1moCsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401822: fltTcaIsisIsisCsnpStats1qtrCsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401823: fltTcaIsisIsisCsnpStats1yearCsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401824: fltTcaIsisIsisCsnpStats5minCsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401825: fltTcaIsisIsisCsnpStats15minCsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401826: fltTcaIsisIsisCsnpStats1hCsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401827: fltTcaIsisIsisCsnpStats1dCsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401828: fltTcaIsisIsisCsnpStats1wCsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401829: fltTcaIsisIsisCsnpStats1moCsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401830: fltTcaIsisIsisCsnpStats1qtrCsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401831: fltTcaIsisIsisCsnpStats1yearCsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401832: fltTcaIsisIsisCsnpStats5minCsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401833: fltTcaIsisIsisCsnpStats15minCsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401834: fltTcaIsisIsisCsnpStats1hCsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401835: fltTcaIsisIsisCsnpStats1dCsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401836: fltTcaIsisIsisCsnpStats1wCsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401837: fltTcaIsisIsisCsnpStats1moCsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401838: fltTcaIsisIsisCsnpStats1qtrCsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401839: fltTcaIsisIsisCsnpStats1yearCsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401840: fltTcaIsisIsisCsnpStats5minCsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401841: fltTcaIsisIsisCsnpStats15minCsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401842: fltTcaIsisIsisCsnpStats1hCsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401843: fltTcaIsisIsisCsnpStats1dCsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401844: fltTcaIsisIsisCsnpStats1wCsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401845: fltTcaIsisIsisCsnpStats1moCsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401846: fltTcaIsisIsisCsnpStats1qtrCsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401847: fltTcaIsisIsisCsnpStats1yearCsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401848: fltTcaIsisIsisCsnpStats5minCsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401849: fltTcaIsisIsisCsnpStats15minCsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401850: fltTcaIsisIsisCsnpStats1hCsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401851: fltTcaIsisIsisCsnpStats1dCsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401852: fltTcaIsisIsisCsnpStats1wCsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401853: fltTcaIsisIsisCsnpStats1moCsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401854: fltTcaIsisIsisCsnpStats1qtrCsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401855: fltTcaIsisIsisCsnpStats1yearCsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401880: fltTcaIsisIsisCsnpStats5minCsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401881: fltTcaIsisIsisCsnpStats15minCsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401882: fltTcaIsisIsisCsnpStats1hCsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401883: fltTcaIsisIsisCsnpStats1dCsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401884: fltTcaIsisIsisCsnpStats1wCsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401885: fltTcaIsisIsisCsnpStats1moCsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401886: fltTcaIsisIsisCsnpStats1qtrCsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401887: fltTcalsisIsisCsnpStats1yearCsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401888: fltTcalsisIsisCsnpStats5minCsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401889: fltTcalsisIsisCsnpStats15minCsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401890: fltTcalsisIsisCsnpStats1hCsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401891: fltTcalsisIsisCsnpStats1dCsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401892: fltTcalsisIsisCsnpStats1wCsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401893: fltTcaIsisIsisCsnpStats1moCsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401894: fltTcaIsisIsisCsnpStats1qtrCsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401895: fltTcaIsisIsisCsnpStats1yearCsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "CSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "CSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401968: fltTcaIsisIsisCsnpStats5minFastCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401969: fltTcaIsisIsisCsnpStats15minFastCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401970: fltTcaIsisIsisCsnpStats1hFastCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401971: fltTcaIsisIsisCsnpStats1dFastCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401972: fltTcaIsisIsisCsnpStats1wFastCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401973: fltTcaIsisIsisCsnpStats1moFastCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401974: fltTcaIsisIsisCsnpStats1qtrFastCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401975: fltTcaIsisIsisCsnpStats1yearFastCsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401984: fltTcaIsisIsisCsnpStats5minFastCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401985: fltTcaIsisIsisCsnpStats15minFastCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401986: fltTcaIsisIsisCsnpStats1hFastCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401987: fltTcaIsisIsisCsnpStats1dFastCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401988: fltTcaIsisIsisCsnpStats1wFastCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401989: fltTcaIsisIsisCsnpStats1moFastCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401990: fltTcaIsisIsisCsnpStats1qtrFastCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401991: fltTcaIsisIsisCsnpStats1yearFastCsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401992: fltTcaIsisIsisCsnpStats5minFastCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401993: fltTcaIsisIsisCsnpStats15minFastCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401994: fltTcaIsisIsisCsnpStats1hFastCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401995: fltTcaIsisIsisCsnpStats1dFastCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401996: fltTcaIsisIsisCsnpStats1wFastCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401997: fltTcaIsisIsisCsnpStats1moFastCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401998: fltTcaIsisIsisCsnpStats1qtrFastCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F401999: fltTcaIsisIsisCsnpStats1yearFastCsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402000: fltTcaIsisIsisCsnpStats5minFastCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402001: fltTcaIsisIsisCsnpStats15minFastCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402002: fltTcaIsisIsisCsnpStats1hFastCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402003: fltTcaIsisIsisCsnpStats1dFastCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402004: fltTcaIsisIsisCsnpStats1wFastCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402005: fltTcaIsisIsisCsnpStats1moFastCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402006: fltTcaIsisIsisCsnpStats1qtrFastCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402007: fltTcaIsisIsisCsnpStats1yearFastCsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402008: fltTcaIsisIsisCsnpStats5minFastCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402009: fltTcaIsisIsisCsnpStats15minFastCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402010: fltTcaIsisIsisCsnpStats1hFastCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402011: fltTcaIsisIsisCsnpStats1dFastCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402012: fltTcaIsisIsisCsnpStats1wFastCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402013: fltTcaIsisIsisCsnpStats1moFastCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402014: fltTcaIsisIsisCsnpStats1qtrFastCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402015: fltTcaIsisIsisCsnpStats1yearFastCsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402016: fltTcaIsisIsisCsnpStats5minFastCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402017: fltTcaIsisIsisCsnpStats15minFastCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402018: fltTcaIsisIsisCsnpStats1hFastCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402019: fltTcaIsisIsisCsnpStats1dFastCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402020: fltTcaIsisIsisCsnpStats1wFastCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402021: fltTcaIsisIsisCsnpStats1moFastCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402022: fltTcaIsisIsisCsnpStats1qtrFastCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402023: fltTcaIsisIsisCsnpStats1yearFastCsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402048: fltTcaIsisIsisCsnpStats5minFastCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402049: fltTcaIsisIsisCsnpStats15minFastCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402050: fltTcaIsisIsisCsnpStats1hFastCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402051: fltTcaIsisIsisCsnpStats1dFastCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402052: fltTcaIsisIsisCsnpStats1wFastCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402053: fltTcaIsisIsisCsnpStats1moFastCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402054: fltTcaIsisIsisCsnpStats1qtrFastCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402055: fltTcaIsisIsisCsnpStats1yearFastCsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402056: fltTcaIsisIsisCsnpStats5minFastCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402057: fltTcaIsisIsisCsnpStats15minFastCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402058: fltTcaIsisIsisCsnpStats1hFastCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402059: fltTcaIsisIsisCsnpStats1dFastCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402060: fltTcaIsisIsisCsnpStats1wFastCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402061: fltTcaIsisIsisCsnpStats1moFastCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402062: fltTcaIsisIsisCsnpStats1qtrFastCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402063: fltTcaIsisIsisCsnpStats1yearFastCsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast CSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast CSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402136: fltTcaIsisIsisLanStats5minLanIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402137: fltTcaIsisIsisLanStats15minLanIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402138: fltTcaIsisIsisLanStats1hLanIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402139: fltTcaIsisIsisLanStats1dLanIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402140: fltTcaIsisIsisLanStats1wLanIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402141: fltTcaIsisIsisLanStats1moLanIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402142: fltTcaIsisIsisLanStats1qtrLanIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402143: fltTcaIsisIsisLanStats1yearLanIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402152: fltTcaIsisIsisLanStats5minLanIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402153: fltTcaIsisIsisLanStats15minLanIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402154: fltTcaIsisIsisLanStats1hLanIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402155: fltTcaIsisIsisLanStats1dLanIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402156: fltTcaIsisIsisLanStats1wLanIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402157: fltTcaIsisIsisLanStats1moLanIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402158: fltTcaIsisIsisLanStats1qtrLanIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402159: fltTcaIsisIsisLanStats1yearLanIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402160: fltTcaIsisIsisLanStats5minLanIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402161: fltTcaIsisIsisLanStats15minLanIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402162: fltTcaIsisIsisLanStats1hLanIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402163: fltTcaIsisIsisLanStats1dLanIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402164: fltTcaIsisIsisLanStats1wLanIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402165: fltTcaIsisIsisLanStats1moLanIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402166: fltTcaIsisIsisLanStats1qtrLanIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402167: fltTcaIsisIsisLanStats1yearLanIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402168: fltTcaIsisIsisLanStats5minLanIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402169: fltTcaIsisIsisLanStats15minLanIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402170: fltTcaIsisIsisLanStats1hLanIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402171: fltTcaIsisIsisLanStats1dLanIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402172: fltTcaIsisIsisLanStats1wLanIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402173: fltTcaIsisIsisLanStats1moLanIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402174: fltTcaIsisIsisLanStats1qtrLanIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402175: fltTcaIsisIsisLanStats1yearLanIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402176: fltTcaIsisIsisLanStats5minLanIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402177: fltTcaIsisIsisLanStats15minLanIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402178: fltTcaIsisIsisLanStats1hLanIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402179: fltTcaIsisIsisLanStats1dLanIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402180: fltTcaIsisIsisLanStats1wLanIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402181: fltTcaIsisIsisLanStats1moLanIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402182: fltTcaIsisIsisLanStats1qtrLanIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402183: fltTcaIsisIsisLanStats1yearLanIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402184: fltTcaIsisIsisLanStats5minLanIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402185: fltTcaIsisIsisLanStats15minLanIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402186: fltTcaIsisIsisLanStats1hLanIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402187: fltTcaIsisIsisLanStats1dLanIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402188: fltTcaIsisIsisLanStats1wLanIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402189: fltTcaIsisIsisLanStats1moLanIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402190: fltTcaIsisIsisLanStats1qtrLanIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402191: fltTcaIsisIsisLanStats1yearLanIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4022: fltCloudRsSubnetToCtxResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F402216: fltTcaIsisIsisLanStats5minLanIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402217: fltTcaIsisIsisLanStats15minLanIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402218: fltTcaIsisIsisLanStats1hLanIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402219: fltTcaIsisIsisLanStats1dLanIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402220: fltTcaIsisIsisLanStats1wLanIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402221: fltTcaIsisIsisLanStats1moLanIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402222: fltTcaIsisIsisLanStats1qtrLanIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402223: fltTcaIsisIsisLanStats1yearLanIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402224: fltTcaIsisIsisLanStats5minLanIIHPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402225: fltTcaIsisIsisLanStats15minLanIIHPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402226: fltTcaIsisIsisLanStats1hLanIIHPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402227: fltTcaIsisIsisLanStats1dLanIIHPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402228: fltTcaIsisIsisLanStats1wLanIIHPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402229: fltTcaIsisIsisLanStats1moLanIIHPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402230: fltTcaIsisIsisLanStats1qtrLanIIHPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402231: fltTcaIsisIsisLanStats1yearLanIIHPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402304: fltTcaIsisIsisLanStats5minLanIIHPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402305: fltTcaIsisIsisLanStats15minLanIIHPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402306: fltTcaIsisIsisLanStats1hLanIIHPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402307: fltTcaIsisIsisLanStats1dLanIIHPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402308: fltTcaIsisIsisLanStats1wLanIIHPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402309: fltTcaIsisIsisLanStats1moLanIIHPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402310: fltTcaIsisIsisLanStats1qtrLanIIHPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402311: fltTcaIsisIsisLanStats1yearLanIIHPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402320: fltTcaIsisIsisLanStats5minLanIIHPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402321: fltTcaIsisIsisLanStats15minLanIIHPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402322: fltTcaIsisIsisLanStats1hLanIIHPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402323: fltTcaIsisIsisLanStats1dLanIIHPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402324: fltTcaIsisIsisLanStats1wLanIIHPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402325: fltTcaIsisIsisLanStats1moLanIIHPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402326: fltTcaIsisIsisLanStats1qtrLanIIHPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402327: fltTcaIsisIsisLanStats1yearLanIIHPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402328: fltTcaIsisIsisLanStats5minLanIIHPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402329: fltTcaIsisIsisLanStats15minLanIIHPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402330: fltTcaIsisIsisLanStats1hLanIIHPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402331: fltTcaIsisIsisLanStats1dLanIIHPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402332: fltTcaIsisIsisLanStats1wLanIIHPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402333: fltTcaIsisIsisLanStats1moLanIIHPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402334: fltTcaIsisIsisLanStats1qtrLanIIHPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402335: fltTcaIsisIsisLanStats1yearLanIIHPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402336: fltTcaIsisIsisLanStats5minLanIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402337: fltTcaIsisIsisLanStats15minLanIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402338: fltTcaIsisIsisLanStats1hLanIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402339: fltTcaIsisIsisLanStats1dLanIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402340: fltTcaIsisIsisLanStats1wLanIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402341: fltTcaIsisIsisLanStats1moLanIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402342: fltTcaIsisIsisLanStats1qtrLanIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402343: fltTcaIsisIsisLanStats1yearLanIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402344: fltTcaIsisIsisLanStats5minLanIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402345: fltTcaIsisIsisLanStats15minLanIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402346: fltTcaIsisIsisLanStats1hLanIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402347: fltTcaIsisIsisLanStats1dLanIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402348: fltTcaIsisIsisLanStats1wLanIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402349: fltTcaIsisIsisLanStats1moLanIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402350: fltTcaIsisIsisLanStats1qtrLanIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402351: fltTcaIsisIsisLanStats1yearLanIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402352: fltTcaIsisIsisLanStats5minLanIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402353: fltTcaIsisIsisLanStats15minLanIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402354: fltTcaIsisIsisLanStats1hLanIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402355: fltTcaIsisIsisLanStats1dLanIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402356: fltTcaIsisIsisLanStats1wLanIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402357: fltTcaIsisIsisLanStats1moLanIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402358: fltTcaIsisIsisLanStats1qtrLanIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402359: fltTcaIsisIsisLanStats1yearLanIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402384: fltTcaIsisIsisLanStats5minLanIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402385: fltTcaIsisIsisLanStats15minLanIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402386: fltTcaIsisIsisLanStats1hLanIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402387: fltTcaIsisIsisLanStats1dLanIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402388: fltTcaIsisIsisLanStats1wLanIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402389: fltTcaIsisIsisLanStats1moLanIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402390: fltTcaIsisIsisLanStats1qtrLanIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402391: fltTcaIsisIsisLanStats1yearLanIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402392: fltTcaIsisIsisLanStats5minLanIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402393: fltTcaIsisIsisLanStats15minLanIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402394: fltTcaIsisIsisLanStats1hLanIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402395: fltTcaIsisIsisLanStats1dLanIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402396: fltTcaIsisIsisLanStats1wLanIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402397: fltTcaIsisIsisLanStats1moLanIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402398: fltTcaIsisIsisLanStats1qtrLanIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402399: fltTcaIsisIsisLanStats1yearLanIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4024: fltHcloudDiscVendorCInstOperDiscVendorCInstOperStateDown

Severity: major

Explanation: This fault occurs when 3rd party FW and LB VM has issue.

Recommended Action: None set.

F402472: fltTcaIsisIsisLanStats5minLanIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402473: fltTcaIsisIsisLanStats15minLanIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402474: fltTcaIsisIsisLanStats1hLanIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402475: fltTcaIsisIsisLanStats1dLanIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402476: fltTcaIsisIsisLanStats1wLanIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402477: fltTcaIsisIsisLanStats1moLanIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402478: fltTcaIsisIsisLanStats1qtrLanIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402479: fltTcaIsisIsisLanStats1yearLanIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402488: fltTcaIsisIsisLanStats5minLanIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402489: fltTcaIsisIsisLanStats15minLanIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402490: fltTcaIsisIsisLanStats1hLanIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402491: fltTcaIsisIsisLanStats1dLanIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402492: fltTcaIsisIsisLanStats1wLanIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402493: fltTcaIsisIsisLanStats1moLanIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402494: fltTcaIsisIsisLanStats1qtrLanIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402495: fltTcaIsisIsisLanStats1yearLanIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402496: fltTcaIsisIsisLanStats5minLanIIHPktsRxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402497: fltTcaIsisIsisLanStats15minLanIIHPktsRxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402498: fltTcaIsisIsisLanStats1hLanIIHPktsRxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402499: fltTcaIsisIsisLanStats1dLanIIHPktsRxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4025: fltHcloudDiscEpOperDiscEpOperStateDown

Severity: major

Explanation: This fault occurs when 3rd party FW and LB NIC has issue.

Recommended Action: None set.

F402500: fltTcaIsisIsisLanStats1wLanIIHPktsRxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402501: fltTcaIsisIsisLanStats1moLanIIHPktsRxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402502: fltTcaIsisIsisLanStats1qtrLanIIHPktsRxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402503: fltTcaIsisIsisLanStats1yearLanIIHPktsRxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402504: fltTcaIsisIsisLanStats5minLanIIHPktsRxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402505: fltTcaIsisIsisLanStats15minLanIIHPktsRxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402506: fltTcaIsisIsisLanStats1hLanIIHPktsRxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402507: fltTcaIsisIsisLanStats1dLanIIHPktsRxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402508: fltTcaIsisIsisLanStats1wLanIIHPktsRxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402509: fltTcaIsisIsisLanStats1moLanIIHPktsRxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402510: fltTcaIsisIsisLanStats1qtrLanIIHPktsRxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402511: fltTcaIsisIsisLanStats1yearLanIIHPktsRxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402512: fltTcaIsisIsisLanStats5minLanIIHPktsRxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402513: fltTcaIsisIsisLanStats15minLanIIHPktsRxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402514: fltTcaIsisIsisLanStats1hLanIIHPktsRxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402515: fltTcaIsisIsisLanStats1dLanIIHPktsRxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402516: fltTcaIsisIsisLanStats1wLanIIHPktsRxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402517: fltTcaIsisIsisLanStats1moLanIIHPktsRxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402518: fltTcaIsisIsisLanStats1qtrLanIIHPktsRxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402519: fltTcaIsisIsisLanStats1yearLanIIHPktsRxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402520: fltTcaIsisIsisLanStats5minLanIIHPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402521: fltTcaIsisIsisLanStats15minLanIIHPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402522: fltTcaIsisIsisLanStats1hLanIIHPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402523: fltTcaIsisIsisLanStats1dLanIIHPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402524: fltTcaIsisIsisLanStats1wLanIIHPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402525: fltTcaIsisIsisLanStats1moLanIIHPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402526: fltTcaIsisIsisLanStats1qtrLanIIHPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402527: fltTcaIsisIsisLanStats1yearLanIIHPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402552: fltTcaIsisIsisLanStats5minLanIIHPktsRxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402553: fltTcaIsisIsisLanStats15minLanIIHPktsRxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402554: fltTcaIsisIsisLanStats1hLanIIHPktsRxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402555: fltTcaIsisIsisLanStats1dLanIIHPktsRxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402556: fltTcaIsisIsisLanStats1wLanIIHPktsRxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402557: fltTcaIsisIsisLanStats1moLanIIHPktsRxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402558: fltTcaIsisIsisLanStats1qtrLanIIHPktsRxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402559: fltTcaIsisIsisLanStats1yearLanIIHPktsRxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402560: fltTcaIsisIsisLanStats5minLanIIHPktsRxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402561: fltTcaIsisIsisLanStats15minLanIIHPktsRxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402562: fltTcaIsisIsisLanStats1hLanIIHPktsRxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402563: fltTcaIsisIsisLanStats1dLanIIHPktsRxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402564: fltTcaIsisIsisLanStats1wLanIIHPktsRxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402565: fltTcaIsisIsisLanStats1moLanIIHPktsRxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402566: fltTcaIsisIsisLanStats1qtrLanIIHPktsRxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402567: fltTcaIsisIsisLanStats1yearLanIIHPktsRxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4026: fltCloudRsExtCtxProfileToCtxResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F402640: fltTcaIsisIsisLanStats5minLanIIHPktsTxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402641: fltTcaIsisIsisLanStats15minLanIIHPktsTxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402642: fltTcaIsisIsisLanStats1hLanIIHPktsTxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402643: fltTcaIsisIsisLanStats1dLanIIHPktsTxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402644: fltTcaIsisIsisLanStats1wLanIIHPktsTxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402645: fltTcaIsisIsisLanStats1moLanIIHPktsTxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402646: fltTcaIsisIsisLanStats1qtrLanIIHPktsTxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402647: fltTcaIsisIsisLanStats1yearLanIIHPktsTxLast

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402656: fltTcaIsisIsisLanStats5minLanIIHPktsTxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402657: fltTcaIsisIsisLanStats15minLanIIHPktsTxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402658: fltTcaIsisIsisLanStats1hLanIIHPktsTxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402659: fltTcaIsisIsisLanStats1dLanIIHPktsTxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402660: fltTcaIsisIsisLanStats1wLanIIHPktsTxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402661: fltTcaIsisIsisLanStats1moLanIIHPktsTxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402662: fltTcaIsisIsisLanStats1qtrLanIIHPktsTxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402663: fltTcaIsisIsisLanStats1yearLanIIHPktsTxCum

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402664: fltTcaIsisIsisLanStats5minLanIIHPktsTxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402665: fltTcaIsisIsisLanStats15minLanIIHPktsTxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402666: fltTcaIsisIsisLanStats1hLanIIHPktsTxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402667: fltTcaIsisIsisLanStats1dLanIIHPktsTxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402668: fltTcaIsisIsisLanStats1wLanIIHPktsTxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402669: fltTcaIsisIsisLanStats1moLanIIHPktsTxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402670: fltTcaIsisIsisLanStats1qtrLanIIHPktsTxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402671: fltTcaIsisIsisLanStats1yearLanIIHPktsTxPer

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402672: fltTcaIsisIsisLanStats5minLanIIHPktsTxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402673: fltTcaIsisIsisLanStats15minLanIIHPktsTxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402674: fltTcaIsisIsisLanStats1hLanIIHPktsTxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402675: fltTcaIsisIsisLanStats1dLanIIHPktsTxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402676: fltTcaIsisIsisLanStats1wLanIIHPktsTxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402677: fltTcaIsisIsisLanStats1moLanIIHPktsTxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402678: fltTcaIsisIsisLanStats1qtrLanIIHPktsTxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402679: fltTcaIsisIsisLanStats1yearLanIIHPktsTxMin

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402680: fltTcaIsisIsisLanStats5minLanIIHPktsTxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402681: fltTcaIsisIsisLanStats15minLanIIHPktsTxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402682: fltTcaIsisIsisLanStats1hLanIIHPktsTxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402683: fltTcaIsisIsisLanStats1dLanIIHPktsTxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402684: fltTcaIsisIsisLanStats1wLanIIHPktsTxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402685: fltTcaIsisIsisLanStats1moLanIIHPktsTxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402686: fltTcaIsisIsisLanStats1qtrLanIIHPktsTxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402687: fltTcaIsisIsisLanStats1yearLanIIHPktsTxMax

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402688: fltTcaIsisIsisLanStats5minLanIIHPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402689: fltTcaIsisIsisLanStats15minLanIIHPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402690: fltTcaIsisIsisLanStats1hLanIIHPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402691: fltTcaIsisIsisLanStats1dLanIIHPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402692: fltTcaIsisIsisLanStats1wLanIIHPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402693: fltTcaIsisIsisLanStats1moLanIIHPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402694: fltTcaIsisIsisLanStats1qtrLanIIHPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402695: fltTcaIsisIsisLanStats1yearLanIIHPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4027: fltCloudRsExtCtxProfileToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F402720: fltTcaIsisIsisLanStats5minLanIIHPktsTxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402721: fltTcaIsisIsisLanStats15minLanIIHPktsTxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402722: fltTcaIsisIsisLanStats1hLanIIHPktsTxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402723: fltTcaIsisIsisLanStats1dLanIIHPktsTxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402724: fltTcaIsisIsisLanStats1wLanIIHPktsTxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402725: fltTcaIsisIsisLanStats1moLanIIHPktsTxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402726: fltTcaIsisIsisLanStats1qtrLanIIHPktsTxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402727: fltTcaIsisIsisLanStats1yearLanIIHPktsTxTr

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402728: fltTcaIsisIsisLanStats5minLanIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402729: fltTcaIsisIsisLanStats15minLanIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402730: fltTcaIsisIsisLanStats1hLanIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402731: fltTcaIsisIsisLanStats1dLanIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402732: fltTcaIsisIsisLanStats1wLanIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402733: fltTcaIsisIsisLanStats1moLanIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402734: fltTcaIsisIsisLanStats1qtrLanIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402735: fltTcaIsisIsisLanStats1yearLanIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "LAN IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LAN IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402808: fltTcaIsisIsisLspErrStats5minLspPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402809: fltTcaIsisIsisLspErrStats15minLspPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402810: fltTcaIsisIsisLspErrStats1hLspPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402811: fltTcaIsisIsisLspErrStats1dLspPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402812: fltTcaIsisIsisLspErrStats1wLspPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402813: fltTcaIsisIsisLspErrStats1moLspPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402814: fltTcaIsisIsisLspErrStats1qtrLspPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402815: fltTcaIsisIsisLspErrStats1yearLspPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402824: fltTcaIsisIsisLspErrStats5minLspPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402825: fltTcaIsisIsisLspErrStats15minLspPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402826: fltTcaIsisIsisLspErrStats1hLspPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402827: fltTcaIsisIsisLspErrStats1dLspPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402828: fltTcaIsisIsisLspErrStats1wLspPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402829: fltTcaIsisIsisLspErrStats1moLspPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402830: fltTcaIsisIsisLspErrStats1qtrLspPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402831: fltTcaIsisIsisLspErrStats1yearLspPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402832: fltTcaIsisIsisLspErrStats5minLspPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402833: fltTcaIsisIsisLspErrStats15minLspPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402834: fltTcaIsisIsisLspErrStats1hLspPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402835: fltTcaIsisIsisLspErrStats1dLspPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402836: fltTcaIsisIsisLspErrStats1wLspPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402837: fltTcaIsisIsisLspErrStats1moLspPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402838: fltTcaIsisIsisLspErrStats1qtrLspPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402839: fltTcaIsisIsisLspErrStats1yearLspPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402840: fltTcaIsisIsisLspErrStats5minLspPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402841: fltTcaIsisIsisLspErrStats15minLspPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402842: fltTcaIsisIsisLspErrStats1hLspPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402843: fltTcaIsisIsisLspErrStats1dLspPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402844: fltTcaIsisIsisLspErrStats1wLspPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402845: fltTcaIsisIsisLspErrStats1moLspPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402846: fltTcaIsisIsisLspErrStats1qtrLspPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402847: fltTcaIsisIsisLspErrStats1yearLspPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402848: fltTcaIsisIsisLspErrStats5minLspPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402849: fltTcaIsisIsisLspErrStats15minLspPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402850: fltTcaIsisIsisLspErrStats1hLspPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402851: fltTcaIsisIsisLspErrStats1dLspPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402852: fltTcaIsisIsisLspErrStats1wLspPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402853: fltTcaIsisIsisLspErrStats1moLspPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402854: fltTcaIsisIsisLspErrStats1qtrLspPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402855: fltTcaIsisIsisLspErrStats1yearLspPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402856: fltTcaIsisIsisLspErrStats5minLspPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402857: fltTcaIsisIsisLspErrStats15minLspPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402858: fltTcaIsisIsisLspErrStats1hLspPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402859: fltTcaIsisIsisLspErrStats1dLspPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402860: fltTcaIsisIsisLspErrStats1wLspPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402861: fltTcaIsisIsisLspErrStats1moLspPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402862: fltTcaIsisIsisLspErrStats1qtrLspPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402863: fltTcaIsisIsisLspErrStats1yearLspPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402888: fltTcaIsisIsisLspErrStats5minLspPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402889: fltTcaIsisIsisLspErrStats15minLspPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402890: fltTcaIsisIsisLspErrStats1hLspPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402891: fltTcaIsisIsisLspErrStats1dLspPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402892: fltTcaIsisIsisLspErrStats1wLspPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402893: fltTcaIsisIsisLspErrStats1moLspPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402894: fltTcaIsisIsisLspErrStats1qtrLspPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402895: fltTcaIsisIsisLspErrStats1yearLspPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402896: fltTcaIsisIsisLspErrStats5minLspPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402897: fltTcaIsisIsisLspErrStats15minLspPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402898: fltTcaIsisIsisLspErrStats1hLspPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402899: fltTcaIsisIsisLspErrStats1dLspPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402900: fltTcaIsisIsisLspErrStats1wLspPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402901: fltTcaIsisIsisLspErrStats1moLspPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402902: fltTcaIsisIsisLspErrStats1qtrLspPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402903: fltTcaIsisIsisLspErrStats1yearLspPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402976: fltTcaIsisIsisLspErrStats5minLspPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402977: fltTcaIsisIsisLspErrStats15minLspPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402978: fltTcaIsisIsisLspErrStats1hLspPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402979: fltTcaIsisIsisLspErrStats1dLspPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402980: fltTcaIsisIsisLspErrStats1wLspPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402981: fltTcaIsisIsisLspErrStats1moLspPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402982: fltTcaIsisIsisLspErrStats1qtrLspPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402983: fltTcaIsisIsisLspErrStats1yearLspPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402992: fltTcaIsisIsisLspErrStats5minLspPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402993: fltTcaIsisIsisLspErrStats15minLspPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402994: fltTcaIsisIsisLspErrStats1hLspPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402995: fltTcaIsisIsisLspErrStats1dLspPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402996: fltTcaIsisIsisLspErrStats1wLspPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402997: fltTcaIsisIsisLspErrStats1moLspPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402998: fltTcaIsisIsisLspErrStats1qtrLspPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F402999: fltTcaIsisIsisLspErrStats1yearLspPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403000: fltTcaIsisIsisLspErrStats5minLspPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403001: fltTcaIsisIsisLspErrStats15minLspPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403002: fltTcaIsisIsisLspErrStats1hLspPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403003: fltTcaIsisIsisLspErrStats1dLspPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403004: fltTcaIsisIsisLspErrStats1wLspPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403005: fltTcaIsisIsisLspErrStats1moLspPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403006: fltTcaIsisIsisLspErrStats1qtrLspPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403007: fltTcaIsisIsisLspErrStats1yearLspPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403008: fltTcaIsisIsisLspErrStats5minLspPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403009: fltTcaIsisIsisLspErrStats15minLspPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403010: fltTcaIsisIsisLspErrStats1hLspPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403011: fltTcaIsisIsisLspErrStats1dLspPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403012: fltTcaIsisIsisLspErrStats1wLspPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403013: fltTcaIsisIsisLspErrStats1moLspPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403014: fltTcaIsisIsisLspErrStats1qtrLspPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403015: fltTcaIsisIsisLspErrStats1yearLspPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403016: fltTcaIsisIsisLspErrStats5minLspPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403017: fltTcaIsisIsisLspErrStats15minLspPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403018: fltTcaIsisIsisLspErrStats1hLspPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403019: fltTcaIsisIsisLspErrStats1dLspPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403020: fltTcaIsisIsisLspErrStats1wLspPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403021: fltTcaIsisIsisLspErrStats1moLspPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403022: fltTcaIsisIsisLspErrStats1qtrLspPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403023: fltTcaIsisIsisLspErrStats1yearLspPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403024: fltTcaIsisIsisLspErrStats5minLspPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403025: fltTcaIsisIsisLspErrStats15minLspPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403026: fltTcaIsisIsisLspErrStats1hLspPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403027: fltTcaIsisIsisLspErrStats1dLspPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403028: fltTcaIsisIsisLspErrStats1wLspPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403029: fltTcaIsisIsisLspErrStats1moLspPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403030: fltTcaIsisIsisLspErrStats1qtrLspPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403031: fltTcaIsisIsisLspErrStats1yearLspPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403056: fltTcaIsisIsisLspErrStats5minLspPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403057: fltTcaIsisIsisLspErrStats15minLspPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403058: fltTcaIsisIsisLspErrStats1hLspPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403059: fltTcaIsisIsisLspErrStats1dLspPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403060: fltTcaIsisIsisLspErrStats1wLspPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403061: fltTcaIsisIsisLspErrStats1moLspPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403062: fltTcaIsisIsisLspErrStats1qtrLspPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403063: fltTcaIsisIsisLspErrStats1yearLspPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403064: fltTcaIsisIsisLspErrStats5minLspPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403065: fltTcaIsisIsisLspErrStats15minLspPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403066: fltTcaIsisIsisLspErrStats1hLspPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403067: fltTcaIsisIsisLspErrStats1dLspPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403068: fltTcaIsisIsisLspErrStats1wLspPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403069: fltTcaIsisIsisLspErrStats1moLspPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403070: fltTcaIsisIsisLspErrStats1qtrLspPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403071: fltTcaIsisIsisLspErrStats1yearLspPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "LSP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403144: fltTcaIsisIsisLspStats5minFastLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403145: fltTcaIsisIsisLspStats15minFastLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403146: fltTcaIsisIsisLspStats1hFastLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403147: fltTcaIsisIsisLspStats1dFastLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403148: fltTcaIsisIsisLspStats1wFastLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403149: fltTcaIsisIsisLspStats1moFastLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403150: fltTcaIsisIsisLspStats1qtrFastLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403151: fltTcaIsisIsisLspStats1yearFastLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403160: fltTcaIsisIsisLspStats5minFastLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403161: fltTcaIsisIsisLspStats15minFastLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403162: fltTcaIsisIsisLspStats1hFastLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403163: fltTcaIsisIsisLspStats1dFastLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403164: fltTcaIsisIsisLspStats1wFastLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403165: fltTcaIsisIsisLspStats1moFastLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403166: fltTcaIsisIsisLspStats1qtrFastLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403167: fltTcaIsisIsisLspStats1yearFastLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403168: fltTcaIsisIsisLspStats5minFastLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403169: fltTcaIsisIsisLspStats15minFastLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403170: fltTcaIsisIsisLspStats1hFastLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403171: fltTcaIsisIsisLspStats1dFastLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403172: fltTcaIsisIsisLspStats1wFastLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403173: fltTcaIsisIsisLspStats1moFastLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403174: fltTcaIsisIsisLspStats1qtrFastLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403175: fltTcaIsisIsisLspStats1yearFastLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403176: fltTcaIsisIsisLspStats5minFastLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403177: fltTcaIsisIsisLspStats15minFastLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403178: fltTcaIsisIsisLspStats1hFastLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403179: fltTcaIsisIsisLspStats1dFastLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403180: fltTcaIsisIsisLspStats1wFastLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403181: fltTcaIsisIsisLspStats1moFastLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403182: fltTcaIsisIsisLspStats1qtrFastLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403183: fltTcaIsisIsisLspStats1yearFastLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403184: fltTcaIsisIsisLspStats5minFastLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403185: fltTcaIsisIsisLspStats15minFastLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403186: fltTcaIsisIsisLspStats1hFastLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403187: fltTcaIsisIsisLspStats1dFastLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403188: fltTcaIsisIsisLspStats1wFastLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403189: fltTcaIsisIsisLspStats1moFastLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403190: fltTcaIsisIsisLspStats1qtrFastLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403191: fltTcaIsisIsisLspStats1yearFastLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403192: fltTcaIsisIsisLspStats5minFastLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403193: fltTcaIsisIsisLspStats15minFastLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403194: fltTcaIsisIsisLspStats1hFastLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403195: fltTcaIsisIsisLspStats1dFastLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403196: fltTcaIsisIsisLspStats1wFastLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403197: fltTcaIsisIsisLspStats1moFastLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403198: fltTcaIsisIsisLspStats1qtrFastLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403199: fltTcaIsisIsisLspStats1yearFastLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403224: fltTcaIsisIsisLspStats5minFastLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403225: fltTcaIsisIsisLspStats15minFastLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403226: fltTcaIsisIsisLspStats1hFastLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403227: fltTcaIsisIsisLspStats1dFastLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403228: fltTcaIsisIsisLspStats1wFastLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403229: fltTcaIsisIsisLspStats1moFastLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403230: fltTcaIsisIsisLspStats1qtrFastLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403231: fltTcaIsisIsisLspStats1yearFastLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403232: fltTcaIsisIsisLspStats5minFastLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403233: fltTcaIsisIsisLspStats15minFastLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403234: fltTcaIsisIsisLspStats1hFastLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403235: fltTcaIsisIsisLspStats1dFastLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403236: fltTcaIsisIsisLspStats1wFastLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403237: fltTcaIsisIsisLspStats1moFastLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403238: fltTcaIsisIsisLspStats1qtrFastLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403239: fltTcaIsisIsisLspStats1yearFastLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "Fast LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Fast LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403312: fltTcaIsisIsisLspStats5minLspPktsRetxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403313: fltTcaIsisIsisLspStats15minLspPktsRetxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403314: fltTcaIsisIsisLspStats1hLspPktsRetxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403315: fltTcaIsisIsisLspStats1dLspPktsRetxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403316: fltTcaIsisIsisLspStats1wLspPktsRetxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403317: fltTcaIsisIsisLspStats1moLspPktsRetxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403318: fltTcaIsisIsisLspStats1qtrLspPktsRetxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403319: fltTcaIsisIsisLspStats1yearLspPktsRetxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403328: fltTcaIsisIsisLspStats5minLspPktsRetxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403329: fltTcaIsisIsisLspStats15minLspPktsRetxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403330: fltTcaIsisIsisLspStats1hLspPktsRetxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403331: fltTcaIsisIsisLspStats1dLspPktsRetxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403332: fltTcaIsisIsisLspStats1wLspPktsRetxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403333: fltTcaIsisIsisLspStats1moLspPktsRetxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403334: fltTcaIsisIsisLspStats1qtrLspPktsRetxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403335: fltTcaIsisIsisLspStats1yearLspPktsRetxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403336: fltTcaIsisIsisLspStats5minLspPktsRetxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403337: fltTcaIsisIsisLspStats15minLspPktsRetxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403338: fltTcaIsisIsisLspStats1hLspPktsRetxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403339: fltTcaIsisIsisLspStats1dLspPktsRetxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403340: fltTcaIsisIsisLspStats1wLspPktsRetxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403341: fltTcaIsisIsisLspStats1moLspPktsRetxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403342: fltTcaIsisIsisLspStats1qtrLspPktsRetxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403343: fltTcaIsisIsisLspStats1yearLspPktsRetxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403344: fltTcaIsisIsisLspStats5minLspPktsRetxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403345: fltTcaIsisIsisLspStats15minLspPktsRetxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403346: fltTcaIsisIsisLspStats1hLspPktsRetxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403347: fltTcaIsisIsisLspStats1dLspPktsRetxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403348: fltTcaIsisIsisLspStats1wLspPktsRetxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403349: fltTcaIsisIsisLspStats1moLspPktsRetxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403350: fltTcaIsisIsisLspStats1qtrLspPktsRetxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403351: fltTcaIsisIsisLspStats1yearLspPktsRetxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403352: fltTcaIsisIsisLspStats5minLspPktsRetxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403353: fltTcaIsisIsisLspStats15minLspPktsRetxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403354: fltTcaIsisIsisLspStats1hLspPktsRetxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403355: fltTcaIsisIsisLspStats1dLspPktsRetxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403356: fltTcaIsisIsisLspStats1wLspPktsRetxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403357: fltTcaIsisIsisLspStats1moLspPktsRetxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403358: fltTcaIsisIsisLspStats1qtrLspPktsRetxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403359: fltTcaIsisIsisLspStats1yearLspPktsRetxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403360: fltTcaIsisIsisLspStats5minLspPktsRetxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403361: fltTcaIsisIsisLspStats15minLspPktsRetxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403362: fltTcaIsisIsisLspStats1hLspPktsRetxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403363: fltTcaIsisIsisLspStats1dLspPktsRetxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403364: fltTcaIsisIsisLspStats1wLspPktsRetxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403365: fltTcaIsisIsisLspStats1moLspPktsRetxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403366: fltTcaIsisIsisLspStats1qtrLspPktsRetxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403367: fltTcaIsisIsisLspStats1yearLspPktsRetxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403392: fltTcaIsisIsisLspStats5minLspPktsRetxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403393: fltTcaIsisIsisLspStats15minLspPktsRetxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403394: fltTcaIsisIsisLspStats1hLspPktsRetxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403395: fltTcaIsisIsisLspStats1dLspPktsRetxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403396: fltTcaIsisIsisLspStats1wLspPktsRetxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403397: fltTcaIsisIsisLspStats1moLspPktsRetxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403398: fltTcaIsisIsisLspStats1qtrLspPktsRetxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403399: fltTcaIsisIsisLspStats1yearLspPktsRetxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4034: fltHcloudRsSvcResToSvcEPgResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F403400: fltTcaIsisIsisLspStats5minLspPktsRetxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403401: fltTcaIsisIsisLspStats15minLspPktsRetxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403402: fltTcaIsisIsisLspStats1hLspPktsRetxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403403: fltTcaIsisIsisLspStats1dLspPktsRetxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403404: fltTcaIsisIsisLspStats1wLspPktsRetxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403405: fltTcaIsisIsisLspStats1moLspPktsRetxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403406: fltTcaIsisIsisLspStats1qtrLspPktsRetxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403407: fltTcaIsisIsisLspStats1yearLspPktsRetxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Retransmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Retransmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403480: fltTcaIsisIsisLspStats5minLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403481: fltTcaIsisIsisLspStats15minLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403482: fltTcaIsisIsisLspStats1hLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403483: fltTcaIsisIsisLspStats1dLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403484: fltTcaIsisIsisLspStats1wLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403485: fltTcaIsisIsisLspStats1moLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403486: fltTcaIsisIsisLspStats1qtrLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403487: fltTcaIsisIsisLspStats1yearLspPktsRxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403496: fltTcaIsisIsisLspStats5minLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403497: fltTcaIsisIsisLspStats15minLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403498: fltTcaIsisIsisLspStats1hLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403499: fltTcaIsisIsisLspStats1dLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4035: fltHcloudRsEpToPrivateEpResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F403500: fltTcaIsisIsisLspStats1wLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403501: fltTcaIsisIsisLspStats1moLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403502: fltTcaIsisIsisLspStats1qtrLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403503: fltTcaIsisIsisLspStats1yearLspPktsRxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403504: fltTcaIsisIsisLspStats5minLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403505: fltTcaIsisIsisLspStats15minLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403506: fltTcaIsisIsisLspStats1hLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403507: fltTcaIsisIsisLspStats1dLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403508: fltTcaIsisIsisLspStats1wLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403509: fltTcaIsisIsisLspStats1moLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403510: fltTcaIsisIsisLspStats1qtrLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403511: fltTcaIsisIsisLspStats1yearLspPktsRxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403512: fltTcaIsisIsisLspStats5minLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403513: fltTcaIsisIsisLspStats15minLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403514: fltTcaIsisIsisLspStats1hLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403515: fltTcaIsisIsisLspStats1dLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403516: fltTcaIsisIsisLspStats1wLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403517: fltTcaIsisIsisLspStats1moLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403518: fltTcaIsisIsisLspStats1qtrLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403519: fltTcaIsisIsisLspStats1yearLspPktsRxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403520: fltTcaIsisIsisLspStats5minLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403521: fltTcaIsisIsisLspStats15minLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403522: fltTcaIsisIsisLspStats1hLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403523: fltTcaIsisIsisLspStats1dLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403524: fltTcaIsisIsisLspStats1wLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403525: fltTcaIsisIsisLspStats1moLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403526: fltTcaIsisIsisLspStats1qtrLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403527: fltTcaIsisIsisLspStats1yearLspPktsRxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403528: fltTcaIsisIsisLspStats5minLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403529: fltTcaIsisIsisLspStats15minLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403530: fltTcaIsisIsisLspStats1hLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403531: fltTcaIsisIsisLspStats1dLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403532: fltTcaIsisIsisLspStats1wLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403533: fltTcaIsisIsisLspStats1moLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403534: fltTcaIsisIsisLspStats1qtrLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403535: fltTcaIsisIsisLspStats1yearLspPktsRxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403560: fltTcaIsisIsisLspStats5minLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403561: fltTcaIsisIsisLspStats15minLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403562: fltTcaIsisIsisLspStats1hLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403563: fltTcaIsisIsisLspStats1dLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403564: fltTcaIsisIsisLspStats1wLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403565: fltTcaIsisIsisLspStats1moLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403566: fltTcaIsisIsisLspStats1qtrLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403567: fltTcaIsisIsisLspStats1yearLspPktsRxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403568: fltTcaIsisIsisLspStats5minLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403569: fltTcaIsisIsisLspStats15minLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403570: fltTcaIsisIsisLspStats1hLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403571: fltTcaIsisIsisLspStats1dLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403572: fltTcaIsisIsisLspStats1wLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403573: fltTcaIsisIsisLspStats1moLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403574: fltTcaIsisIsisLspStats1qtrLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403575: fltTcaIsisIsisLspStats1yearLspPktsRxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403648: fltTcaIsisIsisLspStats5minLspPktsTxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403649: fltTcaIsisIsisLspStats15minLspPktsTxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403650: fltTcaIsisIsisLspStats1hLspPktsTxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403651: fltTcaIsisIsisLspStats1dLspPktsTxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403652: fltTcaIsisIsisLspStats1wLspPktsTxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403653: fltTcaIsisIsisLspStats1moLspPktsTxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403654: fltTcaIsisIsisLspStats1qtrLspPktsTxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403655: fltTcaIsisIsisLspStats1yearLspPktsTxLast

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403664: fltTcaIsisIsisLspStats5minLspPktsTxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403665: fltTcaIsisIsisLspStats15minLspPktsTxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403666: fltTcaIsisIsisLspStats1hLspPktsTxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403667: fltTcaIsisIsisLspStats1dLspPktsTxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403668: fltTcaIsisIsisLspStats1wLspPktsTxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403669: fltTcaIsisIsisLspStats1moLspPktsTxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403670: fltTcaIsisIsisLspStats1qtrLspPktsTxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403671: fltTcaIsisIsisLspStats1yearLspPktsTxCum

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403672: fltTcaIsisIsisLspStats5minLspPktsTxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403673: fltTcaIsisIsisLspStats15minLspPktsTxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403674: fltTcaIsisIsisLspStats1hLspPktsTxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403675: fltTcaIsisIsisLspStats1dLspPktsTxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403676: fltTcaIsisIsisLspStats1wLspPktsTxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403677: fltTcaIsisIsisLspStats1moLspPktsTxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403678: fltTcaIsisIsisLspStats1qtrLspPktsTxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403679: fltTcaIsisIsisLspStats1yearLspPktsTxPer

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403680: fltTcaIsisIsisLspStats5minLspPktsTxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403681: fltTcaIsisIsisLspStats15minLspPktsTxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403682: fltTcaIsisIsisLspStats1hLspPktsTxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403683: fltTcaIsisIsisLspStats1dLspPktsTxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403684: fltTcaIsisIsisLspStats1wLspPktsTxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403685: fltTcaIsisIsisLspStats1moLspPktsTxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403686: fltTcaIsisIsisLspStats1qtrLspPktsTxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403687: fltTcaIsisIsisLspStats1yearLspPktsTxMin

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403688: fltTcaIsisIsisLspStats5minLspPktsTxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403689: fltTcaIsisIsisLspStats15minLspPktsTxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403690: fltTcaIsisIsisLspStats1hLspPktsTxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403691: fltTcaIsisIsisLspStats1dLspPktsTxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403692: fltTcaIsisIsisLspStats1wLspPktsTxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403693: fltTcaIsisIsisLspStats1moLspPktsTxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403694: fltTcaIsisIsisLspStats1qtrLspPktsTxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403695: fltTcaIsisIsisLspStats1yearLspPktsTxMax

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403696: fltTcaIsisIsisLspStats5minLspPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403697: fltTcaIsisIsisLspStats15minLspPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403698: fltTcaIsisIsisLspStats1hLspPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403699: fltTcaIsisIsisLspStats1dLspPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4037: fltHcloudRsNetworkSecurityGroupToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F403700: fltTcaIsisIsisLspStats1wLspPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403701: fltTcaIsisIsisLspStats1moLspPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403702: fltTcaIsisIsisLspStats1qtrLspPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403703: fltTcaIsisIsisLspStats1yearLspPktsTxAvg

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403728: fltTcaIsisIsisLspStats5minLspPktsTxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403729: fltTcaIsisIsisLspStats15minLspPktsTxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403730: fltTcaIsisIsisLspStats1hLspPktsTxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403731: fltTcaIsisIsisLspStats1dLspPktsTxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403732: fltTcaIsisIsisLspStats1wLspPktsTxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403733: fltTcaIsisIsisLspStats1moLspPktsTxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403734: fltTcaIsisIsisLspStats1qtrLspPktsTxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403735: fltTcaIsisIsisLspStats1yearLspPktsTxTr

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403736: fltTcaIsisIsisLspStats5minLspPktsTxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403737: fltTcaIsisIsisLspStats15minLspPktsTxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403738: fltTcaIsisIsisLspStats1hLspPktsTxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403739: fltTcaIsisIsisLspStats1dLspPktsTxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403740: fltTcaIsisIsisLspStats1wLspPktsTxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403741: fltTcaIsisIsisLspStats1moLspPktsTxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403742: fltTcaIsisIsisLspStats1qtrLspPktsTxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403743: fltTcaIsisIsisLspStats1yearLspPktsTxRate

Severity: variable

Explanation: This fault is caused by "LSP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4038: fltHcloudRsServiceepToSvcEPgResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F403816: fltTcaIsisIsisP2pStats5minP2pIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403817: fltTcaIsisIsisP2pStats15minP2pIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403818: fltTcaIsisIsisP2pStats1hP2pIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403819: fltTcaIsisIsisP2pStats1dP2pIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403820: fltTcaIsisIsisP2pStats1wP2pIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403821: fltTcaIsisIsisP2pStats1moP2pIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403822: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403823: fltTcaIsisIsisP2pStats1yearP2pIIHPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403832: fltTcaIsisIsisP2pStats5minP2pIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403833: fltTcaIsisIsisP2pStats15minP2pIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403834: fltTcaIsisIsisP2pStats1hP2pIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403835: fltTcaIsisIsisP2pStats1dP2pIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403836: fltTcaIsisIsisP2pStats1wP2pIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403837: fltTcaIsisIsisP2pStats1moP2pIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403838: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403839: fltTcaIsisIsisP2pStats1yearP2pIIHPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403840: fltTcaIsisIsisP2pStats5minP2pIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403841: fltTcaIsisIsisP2pStats15minP2pIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403842: fltTcaIsisIsisP2pStats1hP2pIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403843: fltTcaIsisIsisP2pStats1dP2pIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403844: fltTcaIsisIsisP2pStats1wP2pIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403845: fltTcaIsisIsisP2pStats1moP2pIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403846: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403847: fltTcaIsisIsisP2pStats1yearP2pIIHPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403848: fltTcaIsisIsisP2pStats5minP2pIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403849: fltTcaIsisIsisP2pStats15minP2pIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403850: fltTcaIsisIsisP2pStats1hP2pIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403851: fltTcaIsisIsisP2pStats1dP2pIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403852: fltTcaIsisIsisP2pStats1wP2pIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403853: fltTcaIsisIsisP2pStats1moP2pIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403854: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403855: fltTcaIsisIsisP2pStats1yearP2pIIHPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403856: fltTcaIsisIsisP2pStats5minP2pIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403857: fltTcaIsisIsisP2pStats15minP2pIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403858: fltTcaIsisIsisP2pStats1hP2pIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403859: fltTcaIsisIsisP2pStats1dP2pIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403860: fltTcaIsisIsisP2pStats1wP2pIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403861: fltTcaIsisIsisP2pStats1moP2pIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403862: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403863: fltTcaIsisIsisP2pStats1yearP2pIIHPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403864: fltTcaIsisIsisP2pStats5minP2pIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403865: fltTcaIsisIsisP2pStats15minP2pIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403866: fltTcaIsisIsisP2pStats1hP2pIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403867: fltTcaIsisIsisP2pStats1dP2pIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403868: fltTcaIsisIsisP2pStats1wP2pIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403869: fltTcaIsisIsisP2pStats1moP2pIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403870: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403871: fltTcaIsisIsisP2pStats1yearP2pIIHPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403896: fltTcaIsisIsisP2pStats5minP2pIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403897: fltTcaIsisIsisP2pStats15minP2pIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403898: fltTcaIsisIsisP2pStats1hP2pIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403899: fltTcaIsisIsisP2pStats1dP2pIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4039: fltHcloudRsSubnetToAppSecurityGroupResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F403900: fltTcaIsisIsisP2pStats1wP2pIIHPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F403901: fltTcaIsisIsisP2pStats1moP2pIIHPktsAuthErrTr

F404018: fltTcaIsisIsisP2pStats1hP2pIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404019: fltTcaIsisIsisP2pStats1dP2pIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404020: fltTcaIsisIsisP2pStats1wP2pIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404021: fltTcaIsisIsisP2pStats1moP2pIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404022: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404023: fltTcaIsisIsisP2pStats1yearP2pIIHPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404024: fltTcaIsisIsisP2pStats5minP2pIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404025: fltTcaIsisIsisP2pStats15minP2pIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404026: fltTcaIsisIsisP2pStats1hP2pIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404027: fltTcaIsisIsisP2pStats1dP2pIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404028: fltTcaIsisIsisP2pStats1wP2pIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404029: fltTcaIsisIsisP2pStats1moP2pIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404030: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404031: fltTcaIsisIsisP2pStats1yearP2pIIHPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404032: fltTcaIsisIsisP2pStats5minP2pIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404033: fltTcaIsisIsisP2pStats15minP2pIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404034: fltTcaIsisIsisP2pStats1hP2pIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404035: fltTcaIsisIsisP2pStats1dP2pIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404036: fltTcaIsisIsisP2pStats1wP2pIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404037: fltTcaIsisIsisP2pStats1moP2pIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404038: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404039: fltTcaIsisIsisP2pStats1yearP2pIIHPktsMiscErrAvg

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404064: fltTcaIsisIsisP2pStats5minP2pIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404065: fltTcaIsisIsisP2pStats15minP2pIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404066: fltTcaIsisIsisP2pStats1hP2pIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404067: fltTcaIsisIsisP2pStats1dP2pIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404068: fltTcaIsisIsisP2pStats1wP2pIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404069: fltTcaIsisIsisP2pStats1moP2pIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404070: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404071: fltTcaIsisIsisP2pStats1yearP2pIIHPktsMiscErrTr

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404072: fltTcaIsisIsisP2pStats5minP2pIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404073: fltTcaIsisIsisP2pStats15minP2pIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404074: fltTcaIsisIsisP2pStats1hP2pIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404075: fltTcaIsisIsisP2pStats1dP2pIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404076: fltTcaIsisIsisP2pStats1wP2pIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404077: fltTcaIsisIsisP2pStats1moP2pIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404078: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404079: fltTcaIsisIsisP2pStats1yearP2pIIHPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets with Miscellaneous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets with Miscellaneous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4041: fltHcloudRsSvcEPgToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F404152: fltTcaIsisIsisP2pStats5minP2pIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404153: fltTcaIsisIsisP2pStats15minP2pIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404154: fltTcaIsisIsisP2pStats1hP2pIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404155: fltTcaIsisIsisP2pStats1dP2pIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404156: fltTcaIsisIsisP2pStats1wP2pIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404157: fltTcaIsisIsisP2pStats1moP2pIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404158: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404159: fltTcaIsisIsisP2pStats1yearP2pIIHPktsRxLast

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404168: fltTcaIsisIsisP2pStats5minP2pIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404169: fltTcaIsisIsisP2pStats15minP2pIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404170: fltTcaIsisIsisP2pStats1hP2pIIHPktsRxCum

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Recevied cumulative" statistical property crossing threshold level.

F404413: fltTcaIsisIsisP2pStats1moP2pIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404414: fltTcaIsisIsisP2pStats1qtrP2pIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404415: fltTcaIsisIsisP2pStats1yearP2pIIHPktsTxRate

Severity: variable

Explanation: This fault is caused by "P2P IIH Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "P2P IIH Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404488: fltTcaIsisIsisPsnpStats5minPsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404489: fltTcaIsisIsisPsnpStats15minPsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404490: fltTcaIsisIsisPsnpStats1hPsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404491: fltTcaIsisIsisPsnpStats1dPsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404492: fltTcaIsisIsisPsnpStats1wPsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404493: fltTcaIsisIsisPsnpStats1moPsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404494: fltTcaIsisIsisPsnpStats1qtrPsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404495: fltTcaIsisIsisPsnpStats1yearPsnpPktsAuthErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4045: fltHinventoryRsCosmosToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F404504: fltTcaIsisIsisPsnpStats5minPsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404505: fltTcaIsisIsisPsnpStats15minPsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404506: fltTcaIsisIsisPsnpStats1hPsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404507: fltTcaIsisIsisPsnpStats1dPsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404508: fltTcaIsisIsisPsnpStats1wPsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404509: fltTcaIsisIsisPsnpStats1moPsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404510: fltTcaIsisIsisPsnpStats1qtrPsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404511: fltTcaIsisIsisPsnpStats1yearPsnpPktsAuthErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404512: fltTcaIsisIsisPsnpStats5minPsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404513: fltTcaIsisIsisPsnpStats15minPsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404514: fltTcaIsisIsisPsnpStats1hPsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404515: fltTcaIsisIsisPsnpStats1dPsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404516: fltTcaIsisIsisPsnpStats1wPsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404517: fltTcaIsisIsisPsnpStats1moPsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404518: fltTcaIsisIsisPsnpStats1qtrPsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404519: fltTcaIsisIsisPsnpStats1yearPsnpPktsAuthErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404520: fltTcaIsisIsisPsnpStats5minPsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404521: fltTcaIsisIsisPsnpStats15minPsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404522: fltTcaIsisIsisPsnpStats1hPsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404523: fltTcaIsisIsisPsnpStats1dPsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404524: fltTcaIsisIsisPsnpStats1wPsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404525: fltTcaIsisIsisPsnpStats1moPsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404526: fltTcaIsisIsisPsnpStats1qtrPsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404527: fltTcaIsisIsisPsnpStats1yearPsnpPktsAuthErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404528: fltTcaIsisIsisPsnpStats5minPsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404529: fltTcaIsisIsisPsnpStats15minPsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404530: fltTcaIsisIsisPsnpStats1hPsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404531: fltTcaIsisIsisPsnpStats1dPsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404532: fltTcaIsisIsisPsnpStats1wPsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404533: fltTcaIsisIsisPsnpStats1moPsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404534: fltTcaIsisIsisPsnpStats1qtrPsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404535: fltTcaIsisIsisPsnpStats1yearPsnpPktsAuthErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404536: fltTcaIsisIsisPsnpStats5minPsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404537: fltTcaIsisIsisPsnpStats15minPsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404538: fltTcaIsisIsisPsnpStats1hPsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404539: fltTcaIsisIsisPsnpStats1dPsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404540: fltTcaIsisIsisPsnpStats1wPsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404541: fltTcaIsisIsisPsnpStats1moPsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404542: fltTcaIsisIsisPsnpStats1qtrPsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404543: fltTcaIsisIsisPsnpStats1yearPsnpPktsAuthErrAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404568: fltTcaIsisIsisPsnpStats5minPsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404569: fltTcaIsisIsisPsnpStats15minPsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404570: fltTcaIsisIsisPsnpStats1hPsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404571: fltTcaIsisIsisPsnpStats1dPsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404572: fltTcaIsisIsisPsnpStats1wPsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404573: fltTcaIsisIsisPsnpStats1moPsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404574: fltTcaIsisIsisPsnpStats1qtrPsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404575: fltTcaIsisIsisPsnpStats1yearPsnpPktsAuthErrTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404576: fltTcaIsisIsisPsnpStats5minPsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404577: fltTcaIsisIsisPsnpStats15minPsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404578: fltTcaIsisIsisPsnpStats1hPsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404579: fltTcaIsisIsisPsnpStats1dPsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404580: fltTcaIsisIsisPsnpStats1wPsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404581: fltTcaIsisIsisPsnpStats1moPsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404582: fltTcaIsisIsisPsnpStats1qtrPsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404583: fltTcaIsisIsisPsnpStats1yearPsnpPktsAuthErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Authentication Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Authentication Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4046: fltHinventoryRsCosmosToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F404656: fltTcaIsisIsisPsnpStats5minPsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404657: fltTcaIsisIsisPsnpStats15minPsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404658: fltTcaIsisIsisPsnpStats1hPsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404659: fltTcaIsisIsisPsnpStats1dPsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404660: fltTcaIsisIsisPsnpStats1wPsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404661: fltTcaIsisIsisPsnpStats1moPsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404662: fltTcaIsisIsisPsnpStats1qtrPsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404663: fltTcaIsisIsisPsnpStats1yearPsnpPktsMiscErrLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404672: fltTcaIsisIsisPsnpStats5minPsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404673: fltTcaIsisIsisPsnpStats15minPsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404674: fltTcaIsisIsisPsnpStats1hPsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404675: fltTcaIsisIsisPsnpStats1dPsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404676: fltTcaIsisIsisPsnpStats1wPsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404677: fltTcaIsisIsisPsnpStats1moPsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404678: fltTcaIsisIsisPsnpStats1qtrPsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404679: fltTcaIsisIsisPsnpStats1yearPsnpPktsMiscErrCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404680: fltTcaIsisIsisPsnpStats5minPsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404681: fltTcaIsisIsisPsnpStats15minPsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404682: fltTcaIsisIsisPsnpStats1hPsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404683: fltTcaIsisIsisPsnpStats1dPsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404684: fltTcaIsisIsisPsnpStats1wPsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404685: fltTcaIsisIsisPsnpStats1moPsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404686: fltTcaIsisIsisPsnpStats1qtrPsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404687: fltTcaIsisIsisPsnpStats1yearPsnpPktsMiscErrPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404688: fltTcaIsisIsisPsnpStats5minPsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404689: fltTcaIsisIsisPsnpStats15minPsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404690: fltTcaIsisIsisPsnpStats1hPsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404691: fltTcaIsisIsisPsnpStats1dPsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404692: fltTcaIsisIsisPsnpStats1wPsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404693: fltTcaIsisIsisPsnpStats1moPsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404694: fltTcaIsisIsisPsnpStats1qtrPsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404695: fltTcaIsisIsisPsnpStats1yearPsnpPktsMiscErrMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404696: fltTcaIsisIsisPsnpStats5minPsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404697: fltTcaIsisIsisPsnpStats15minPsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404698: fltTcaIsisIsisPsnpStats1hPsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404699: fltTcaIsisIsisPsnpStats1dPsnpPktsMiscErrMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404747: fltTcaIsisIsisPsnpStats1dPsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404748: fltTcaIsisIsisPsnpStats1wPsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404749: fltTcaIsisIsisPsnpStats1moPsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404750: fltTcaIsisIsisPsnpStats1qtrPsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404751: fltTcaIsisIsisPsnpStats1yearPsnpPktsMiscErrRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets with Miscelcsnpeous Error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets with Miscelcsnpeous Error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4048: fltHinventoryRsClusterToPvtEndpointResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F404824: fltTcaIsisIsisPsnpStats5minPsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404825: fltTcaIsisIsisPsnpStats15minPsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404826: fltTcaIsisIsisPsnpStats1hPsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404827: fltTcaIsisIsisPsnpStats1dPsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404828: fltTcaIsisIsisPsnpStats1wPsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404829: fltTcaIsisIsisPsnpStats1moPsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404830: fltTcaIsisIsisPsnpStats1qtrPsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404831: fltTcaIsisIsisPsnpStats1yearPsnpPktsRxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404840: fltTcaIsisIsisPsnpStats5minPsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404841: fltTcaIsisIsisPsnpStats15minPsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404842: fltTcaIsisIsisPsnpStats1hPsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404843: fltTcaIsisIsisPsnpStats1dPsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404844: fltTcaIsisIsisPsnpStats1wPsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404845: fltTcaIsisIsisPsnpStats1moPsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404846: fltTcaIsisIsisPsnpStats1qtrPsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404847: fltTcaIsisIsisPsnpStats1yearPsnpPktsRxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404848: fltTcaIsisIsisPsnpStats5minPsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404849: fltTcaIsisIsisPsnpStats15minPsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404850: fltTcaIsisIsisPsnpStats1hPsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404851: fltTcaIsisIsisPsnpStats1dPsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404852: fltTcaIsisIsisPsnpStats1wPsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404853: fltTcaIsisIsisPsnpStats1moPsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404854: fltTcaIsisIsisPsnpStats1qtrPsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404855: fltTcaIsisIsisPsnpStats1yearPsnpPktsRxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404856: fltTcaIsisIsisPsnpStats5minPsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404857: fltTcaIsisIsisPsnpStats15minPsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404858: fltTcaIsisIsisPsnpStats1hPsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404859: fltTcaIsisIsisPsnpStats1dPsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404860: fltTcaIsisIsisPsnpStats1wPsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404861: fltTcaIsisIsisPsnpStats1moPsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404862: fltTcaIsisIsisPsnpStats1qtrPsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404863: fltTcaIsisIsisPsnpStats1yearPsnpPktsRxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404864: fltTcaIsisIsisPsnpStats5minPsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404865: fltTcaIsisIsisPsnpStats15minPsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404866: fltTcaIsisIsisPsnpStats1hPsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404867: fltTcaIsisIsisPsnpStats1dPsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404868: fltTcaIsisIsisPsnpStats1wPsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404869: fltTcaIsisIsisPsnpStats1moPsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404870: fltTcaIsisIsisPsnpStats1qtrPsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404871: fltTcaIsisIsisPsnpStats1yearPsnpPktsRxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404872: fltTcaIsisIsisPsnpStats5minPsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404873: fltTcaIsisIsisPsnpStats15minPsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404874: fltTcaIsisIsisPsnpStats1hPsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404875: fltTcaIsisIsisPsnpStats1dPsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404876: fltTcaIsisIsisPsnpStats1wPsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404877: fltTcaIsisIsisPsnpStats1moPsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404878: fltTcaIsisIsisPsnpStats1qtrPsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404879: fltTcaIsisIsisPsnpStats1yearPsnpPktsRxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4049: fltHinventoryRsClusterToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F404904: fltTcaIsisIsisPsnpStats5minPsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404905: fltTcaIsisIsisPsnpStats15minPsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404906: fltTcaIsisIsisPsnpStats1hPsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404907: fltTcaIsisIsisPsnpStats1dPsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404908: fltTcaIsisIsisPsnpStats1wPsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404909: fltTcaIsisIsisPsnpStats1moPsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404910: fltTcaIsisIsisPsnpStats1qtrPsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404911: fltTcaIsisIsisPsnpStats1yearPsnpPktsRxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404912: fltTcaIsisIsisPsnpStats5minPsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404913: fltTcaIsisIsisPsnpStats15minPsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404914: fltTcaIsisIsisPsnpStats1hPsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404915: fltTcaIsisIsisPsnpStats1dPsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404916: fltTcaIsisIsisPsnpStats1wPsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404917: fltTcaIsisIsisPsnpStats1moPsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404918: fltTcaIsisIsisPsnpStats1qtrPsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404919: fltTcaIsisIsisPsnpStats1yearPsnpPktsRxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Recevied rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Recevied" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404992: fltTcaIsisIsisPsnpStats5minPsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404993: fltTcaIsisIsisPsnpStats15minPsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404994: fltTcaIsisIsisPsnpStats1hPsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404995: fltTcaIsisIsisPsnpStats1dPsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404996: fltTcaIsisIsisPsnpStats1wPsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404997: fltTcaIsisIsisPsnpStats1moPsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404998: fltTcaIsisIsisPsnpStats1qtrPsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F404999: fltTcaIsisIsisPsnpStats1yearPsnpPktsTxLast

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4050: fltHinventoryRsEpToNicResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F405008: fltTcaIsisIsisPsnpStats5minPsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405009: fltTcaIsisIsisPsnpStats15minPsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405010: fltTcaIsisIsisPsnpStats1hPsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405011: fltTcaIsisIsisPsnpStats1dPsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405012: fltTcaIsisIsisPsnpStats1wPsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405013: fltTcaIsisIsisPsnpStats1moPsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405014: fltTcaIsisIsisPsnpStats1qtrPsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405015: fltTcaIsisIsisPsnpStats1yearPsnpPktsTxCum

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405016: fltTcaIsisIsisPsnpStats5minPsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405017: fltTcaIsisIsisPsnpStats15minPsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405018: fltTcalsisIsisPsnpStats1hPsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405019: fltTcalsisIsisPsnpStats1dPsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405020: fltTcalsisIsisPsnpStats1wPsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405021: fltTcalsisIsisPsnpStats1moPsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405022: fltTcalsisIsisPsnpStats1qtrPsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405023: fltTcalsisIsisPsnpStats1yearPsnpPktsTxPer

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405024: fltTcaIsisIsisPsnpStats5minPsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405025: fltTcaIsisIsisPsnpStats15minPsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405026: fltTcaIsisIsisPsnpStats1hPsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405027: fltTcaIsisIsisPsnpStats1dPsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405028: fltTcaIsisIsisPsnpStats1wPsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405029: fltTcaIsisIsisPsnpStats1moPsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405030: fltTcaIsisIsisPsnpStats1qtrPsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405031: fltTcaIsisIsisPsnpStats1yearPsnpPktsTxMin

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405032: fltTcaIsisIsisPsnpStats5minPsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405033: fltTcaIsisIsisPsnpStats15minPsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405034: fltTcaIsisIsisPsnpStats1hPsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405035: fltTcaIsisIsisPsnpStats1dPsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405036: fltTcaIsisIsisPsnpStats1wPsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405037: fltTcaIsisIsisPsnpStats1moPsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405038: fltTcaIsisIsisPsnpStats1qtrPsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405039: fltTcaIsisIsisPsnpStats1yearPsnpPktsTxMax

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405040: fltTcaIsisIsisPsnpStats5minPsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405041: fltTcaIsisIsisPsnpStats15minPsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405042: fltTcaIsisIsisPsnpStats1hPsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405043: fltTcaIsisIsisPsnpStats1dPsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405044: fltTcaIsisIsisPsnpStats1wPsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405045: fltTcaIsisIsisPsnpStats1moPsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405046: fltTcaIsisIsisPsnpStats1qtrPsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405047: fltTcaIsisIsisPsnpStats1yearPsnpPktsTxAvg

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405072: fltTcaIsisIsisPsnpStats5minPsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405073: fltTcaIsisIsisPsnpStats15minPsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405074: fltTcalsisIsisPsnpStats1hPsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405075: fltTcalsisIsisPsnpStats1dPsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405076: fltTcalsisIsisPsnpStats1wPsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405077: fltTcalsisIsisPsnpStats1moPsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405078: fltTcalsisIsisPsnpStats1qtrPsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405079: fltTcalsisIsisPsnpStats1yearPsnpPktsTxTr

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405080: fltTcaIsisIsisPsnpStats5minPsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405081: fltTcaIsisIsisPsnpStats15minPsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405082: fltTcaIsisIsisPsnpStats1hPsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405083: fltTcaIsisIsisPsnpStats1dPsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405084: fltTcaIsisIsisPsnpStats1wPsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405085: fltTcaIsisIsisPsnpStats1moPsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405086: fltTcaIsisIsisPsnpStats1qtrPsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F405087: fltTcaIsisIsisPsnpStats1yearPsnpPktsTxRate

Severity: variable

Explanation: This fault is caused by "PSNP Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PSNP Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4051: fltHinventoryRsEpToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4052: fltHinventoryRsSqlServerToPvtEndpointResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4053: fltHinventoryRsStorageToPvtEndpointResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4055: fltHcloudNativeLBOperNativeLBOperHealthDown

Severity: major

Explanation: This fault occurs when an erroneous configuration is pushed for creating Health status of Native load balancer.

Recommended Action: If you see this fault, take the following actions:

1. Please check the fault message and make necessary changes to the config for creating health status of Native Load balancer.
2. If fault still has not cleared, please contact Cisco TAC.

F4060: fltHcloudRsSelectorToTagParentResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4061: fltAnalyticsRecordPRecordParamMismatch

Severity: major

Explanation: This fault occurs when the record is incompatible with monitor

Recommended Action: To recover from this fault, try the following actions

1. Check the record match parameters for eg: Source IP, IPv6

F4062: fltHcloudPrivateEndpointOperPrivateEndpointOperError

Severity: minor

Explanation: This fault occurs where there are errors encountered while creating/updating/deleting private endpoints

Recommended Action: If you see this fault, take the following actions:

1. If the error indicates Access Denied or permissions related issues, check the access permissions.
2. If the error indicates resource id errors for a custom service, check the name of the resource.
3. For other errors, please take action based on the error message.
4. If fault still has not cleared, please contact Cisco TAC.

F4063: fltHcloudRsPrivateEpToSvcResResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4065: fltInfraRsQosLlfcIfPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4066: fltHcloudRsToRedirDestResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4067: fltHinventoryRsRegistryToPvtEndpointResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4068: fltHinventoryRsRegistryToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4069: fltHinventoryRsRegistryToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4070: fltFvIfConfigIssuesNode-config-failure

Severity: minor

Explanation: This fault occurs when different netflow policy for a particular netflow type is configured under the same interface

Recommended Action: If you see this fault, take the following actions:

1. Remove the conflicting netflow policy.
2. If the above action did not resolve the issue, delete and create the interface.
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F4071: fltFvIfConfigIssuesInterface-config-failure

Severity: minor

Explanation: This fault occurs when different netflow policy for a particular netflow type is configured under the same interface

Recommended Action: If you see this fault, take the following actions:

1. Remove the conflicting netflow policy.
2. If the above action did not resolve the issue, delete and create the interface.
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F4072: fltHinventoryRsVaultToPvtEndpointResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4073: fltHinventoryRsVaultToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4074: fltHinventoryRsVaultToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4080: fltHcloudRsBricksToPubSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4081: fltHcloudRsBricksToPvtSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4082: fltHinventoryRsBricksToPubSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4083: fltHinventoryRsBricksToPvtSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4084: fltHinventoryRsBricksToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4085: fltHcloudRsSvcResToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4089: fltHinventoryRsRedisToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4090: fltHinventoryRsRedisToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4091: fltL1PrioFlowCtrlPConfigMismatch

Severity: warning

Explanation: This fault occurs when PriorityFlowControl/LinkLevelFLowControl is configured on same interface.

Recommended Action: To recover from this fault, try the following actions

1. Remove either PriorityFlowControl or LinkLevelFLowControl configuration

F4092: fltL1LinkLevelFlowCtrlPConfigMismatchLlfc

Severity: warning

Explanation: This fault occurs when PriorityFlowControl/LinkLevelFLowControl is configured on same interface.

Recommended Action: To recover from this fault, try the following actions

1. Remove either PriorityFlowControl or LinkLevelFLowControl configuration

F4093: fltL1LinkLevelFlowCtrlPPolicyConfigMissing

Severity: warning

Explanation: This fault occurs when LLFC is configured without slow-drain policy.

Recommended Action: To recover from this fault, try the following actions

1. slow-drain configuration is required for LLFC to work

F4096: fltHcloudRsEpToSecurityGroupErrorRsEpToSecurityGroupError

Severity: minor

Explanation: This fault occurs where the Endpoint Group could not be attached to the target Endpoint even if it was matching the Selector's expression.

Recommended Action: If you see this fault, take the following actions:

1. Depending on the cloud provider and your configuration, an Endpoint can be attached to at most one EPG. Make sure that the EPG's Selector is matching the intended Endpoint.
2. If fault still has not cleared, please contact Cisco TAC.

F4097: fltHinventoryRsAddsToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4098: fltHinventoryRsAddsToSubnetResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F409864: fltTcaTunnelEgrTepCntrs5minDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409865: fltTcaTunnelEgrTepCntrs15minDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409866: fltTcaTunnelEgrTepCntrs1hDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409867: fltTcaTunnelEgrTepCntrs1dDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409868: fltTcaTunnelEgrTepCntrs1wDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409869: fltTcaTunnelEgrTepCntrs1moDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409870: fltTcaTunnelEgrTepCntrs1qtrDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409871: fltTcaTunnelEgrTepCntrs1yearDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409880: fltTcaTunnelEgrTepCntrs5minDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409881: fltTcaTunnelEgrTepCntrs15minDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409882: fltTcaTunnelEgrTepCntrs1hDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409883: fltTcaTunnelEgrTepCntrs1dDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409884: fltTcaTunnelEgrTepCntrs1wDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409885: fltTcaTunnelEgrTepCntrs1moDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409886: fltTcaTunnelEgrTepCntrs1qtrDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409887: fltTcaTunnelEgrTepCntrs1yearDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409888: fltTcaTunnelEgrTepCntrs5minDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409889: fltTcaTunnelEgrTepCntrs15minDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409890: fltTcaTunnelEgrTepCntrs1hDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409891: fltTcaTunnelEgrTepCntrs1dDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409892: fltTcaTunnelEgrTepCntrs1wDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409893: fltTcaTunnelEgrTepCntrs1moDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409894: fltTcaTunnelEgrTepCntrs1qtrDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409895: fltTcaTunnelEgrTepCntrs1yearDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409896: fltTcaTunnelEgrTepCntrs5minDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409897: fltTcaTunnelEgrTepCntrs15minDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409898: fltTcaTunnelEgrTepCntrs1hDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409899: fltTcaTunnelEgrTepCntrs1dDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4099: fltCoopDomCoopCoopAssertHit

Severity: major

Explanation: This fault occurs when the coop assert is hit

Recommended Action: Try the following action

1. Generate the **show tech-support** file and contact Cisco TAC.

F409900: fltTcaTunnelEgrTepCntrs1wDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409901: fltTcaTunnelEgrTepCntrs1moDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409902: fltTcaTunnelEgrTepCntrs1qtrDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409903: fltTcaTunnelEgrTepCntrs1yearDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409904: fltTcaTunnelEgrTepCntrs5minDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409905: fltTcaTunnelEgrTepCntrs15minDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409906: fltTcaTunnelEgrTepCntrs1hDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409907: fltTcaTunnelEgrTepCntrs1dDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409908: fltTcaTunnelEgrTepCntrs1wDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409909: fltTcaTunnelEgrTepCntrs1moDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409910: fltTcaTunnelEgrTepCntrs1qtrDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409911: fltTcaTunnelEgrTepCntrs1yearDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409912: fltTcaTunnelEgrTepCntrs5minDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409913: fltTcaTunnelEgrTepCntrs15minDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409914: fltTcaTunnelEgrTepCntrs1hDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409915: fltTcaTunnelEgrTepCntrs1dDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409916: fltTcaTunnelEgrTepCntrs1wDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409917: fltTcaTunnelEgrTepCntrs1moDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409918: fltTcaTunnelEgrTepCntrs1qtrDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409919: fltTcaTunnelEgrTepCntrs1yearDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409944: fltTcaTunnelEgrTepCntrs5minDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409945: fltTcaTunnelEgrTepCntrs15minDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409946: fltTcaTunnelEgrTepCntrs1hDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409947: fltTcaTunnelEgrTepCntrs1dDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409948: fltTcaTunnelEgrTepCntrs1wDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409949: fltTcaTunnelEgrTepCntrs1moDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409950: fltTcaTunnelEgrTepCntrs1qtrDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409951: fltTcaTunnelEgrTepCntrs1yearDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409952: fltTcaTunnelEgrTepCntrs5minDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409953: fltTcaTunnelEgrTepCntrs15minDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409954: fltTcaTunnelEgrTepCntrs1hDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409955: fltTcaTunnelEgrTepCntrs1dDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409956: fltTcaTunnelEgrTepCntrs1wDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409957: fltTcaTunnelEgrTepCntrs1moDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409958: fltTcaTunnelEgrTepCntrs1qtrDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F409959: fltTcaTunnelEgrTepCntrs1yearDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4100: fltTopSystemRouteTableModifyFail

Severity: minor

Explanation: This fault occurs when a configured static route cannot be created.

Recommended Action: If you see this fault, take the following actions:

1. Verify the route table for a similar route.
2. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F410032: fltTcaTunnelEgrTepCntrs5minDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410033: fltTcaTunnelEgrTepCntrs15minDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410034: fltTcaTunnelEgrTepCntrs1hDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410035: fltTcaTunnelEgrTepCntrs1dDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410036: fltTcaTunnelEgrTepCntrs1wDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410037: fltTcaTunnelEgrTepCntrs1moDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410038: fltTcaTunnelEgrTepCntrs1qtrDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410039: fltTcaTunnelEgrTepCntrs1yearDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410048: fltTcaTunnelEgrTepCntrs5minDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410049: fltTcaTunnelEgrTepCntrs15minDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410050: fltTcaTunnelEgrTepCntrs1hDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410051: fltTcaTunnelEgrTepCntrs1dDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410052: fltTcaTunnelEgrTepCntrs1wDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410053: fltTcaTunnelEgrTepCntrs1moDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410054: fltTcaTunnelEgrTepCntrs1qtrDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410055: fltTcaTunnelEgrTepCntrs1yearDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410056: fltTcaTunnelEgrTepCntrs5minDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410057: fltTcaTunnelEgrTepCntrs15minDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410058: fltTcaTunnelEgrTepCntrs1hDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410059: fltTcaTunnelEgrTepCntrs1dDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410060: fltTcaTunnelEgrTepCntrs1wDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410061: fltTcaTunnelEgrTepCntrs1moDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410062: fltTcaTunnelEgrTepCntrs1qtrDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410063: fltTcaTunnelEgrTepCntrs1yearDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410064: fltTcaTunnelEgrTepCntrs5minDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410065: fltTcaTunnelEgrTepCntrs15minDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410066: fltTcaTunnelEgrTepCntrs1hDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410067: fltTcaTunnelEgrTepCntrs1dDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410068: fltTcaTunnelEgrTepCntrs1wDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410069: fltTcaTunnelEgrTepCntrs1moDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410070: fltTcaTunnelEgrTepCntrs1qtrDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410071: fltTcaTunnelEgrTepCntrs1yearDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410072: fltTcaTunnelEgrTepCntrs5minDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410073: fltTcaTunnelEgrTepCntrs15minDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410074: fltTcaTunnelEgrTepCntrs1hDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410075: fltTcaTunnelEgrTepCntrs1dDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410076: fltTcaTunnelEgrTepCntrs1wDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410077: fltTcaTunnelEgrTepCntrs1moDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410078: fltTcaTunnelEgrTepCntrs1qtrDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410079: fltTcaTunnelEgrTepCntrs1yearDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410080: fltTcaTunnelEgrTepCntrs5minDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410081: fltTcaTunnelEgrTepCntrs15minDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410082: fltTcaTunnelEgrTepCntrs1hDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410083: fltTcaTunnelEgrTepCntrs1dDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410084: fltTcaTunnelEgrTepCntrs1wDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410085: fltTcaTunnelEgrTepCntrs1moDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410086: fltTcaTunnelEgrTepCntrs1qtrDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410087: fltTcaTunnelEgrTepCntrs1yearDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4101: fltTopSystemCimcAddrSetFailure

Severity: minor

Explanation: This fault occurs when the controller's CIMC IP/Mask/Gateway cannot be update.

Recommended Action: If you see this fault, take the following actions:

1. Verify that IP/Mask/Gateway are valid.
2. Verify that CIMC IP/Mask/Gateway have not been updated by checking the CIMC UI or running ipmitool command on the controller.
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F410112: fltTcaTunnelEgrTepCntrs5minDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410113: fltTcaTunnelEgrTepCntrs15minDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410114: fltTcaTunnelEgrTepCntrs1hDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410115: fltTcaTunnelEgrTepCntrs1dDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410116: fltTcaTunnelEgrTepCntrs1wDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410117: fltTcaTunnelEgrTepCntrs1moDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410118: fltTcaTunnelEgrTepCntrs1qtrDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410119: fltTcaTunnelEgrTepCntrs1yearDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410120: fltTcaTunnelEgrTepCntrs5minDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410121: fltTcaTunnelEgrTepCntrs15minDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410122: fltTcaTunnelEgrTepCntrs1hDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410123: fltTcaTunnelEgrTepCntrs1dDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410124: fltTcaTunnelEgrTepCntrs1wDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410125: fltTcaTunnelEgrTepCntrs1moDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410126: fltTcaTunnelEgrTepCntrs1qtrDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410127: fltTcaTunnelEgrTepCntrs1yearDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410200: fltTcaTunnelEgrTepCntrs5minFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410201: fltTcaTunnelEgrTepCntrs15minFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410202: fltTcaTunnelEgrTepCntrs1hFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410203: fltTcaTunnelEgrTepCntrs1dFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410204: fltTcaTunnelEgrTepCntrs1wFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410205: fltTcaTunnelEgrTepCntrs1moFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410206: fltTcaTunnelEgrTepCntrs1qtrFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410207: fltTcaTunnelEgrTepCntrs1yearFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410216: fltTcaTunnelEgrTepCntrs5minFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410217: fltTcaTunnelEgrTepCntrs15minFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410218: fltTcaTunnelEgrTepCntrs1hFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410219: fltTcaTunnelEgrTepCntrs1dFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410220: fltTcaTunnelEgrTepCntrs1wFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410221: fltTcaTunnelEgrTepCntrs1moFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410222: fltTcaTunnelEgrTepCntrs1qtrFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410223: fltTcaTunnelEgrTepCntrs1yearFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410224: fltTcaTunnelEgrTepCntrs5minFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410225: fltTcaTunnelEgrTepCntrs15minFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410226: fltTcaTunnelEgrTepCntrs1hFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410227: fltTcaTunnelEgrTepCntrs1dFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410228: fltTcaTunnelEgrTepCntrs1wFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410229: fltTcaTunnelEgrTepCntrs1moFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410230: fltTcaTunnelEgrTepCntrs1qtrFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410231: fltTcaTunnelEgrTepCntrs1yearFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410232: fltTcaTunnelEgrTepCntrs5minFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410233: fltTcaTunnelEgrTepCntrs15minFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410234: fltTcaTunnelEgrTepCntrs1hFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410235: fltTcaTunnelEgrTepCntrs1dFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410236: fltTcaTunnelEgrTepCntrs1wFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410237: fltTcaTunnelEgrTepCntrs1moFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410238: fltTcaTunnelEgrTepCntrs1qtrFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410239: fltTcaTunnelEgrTepCntrs1yearFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410240: fltTcaTunnelEgrTepCntrs5minFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410241: fltTcaTunnelEgrTepCntrs15minFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410242: fltTcaTunnelEgrTepCntrs1hFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410243: fltTcaTunnelEgrTepCntrs1dFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410244: fltTcaTunnelEgrTepCntrs1wFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410245: fltTcaTunnelEgrTepCntrs1moFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410246: fltTcaTunnelEgrTepCntrs1qtrFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410247: fltTcaTunnelEgrTepCntrs1yearFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410248: fltTcaTunnelEgrTepCntrs5minFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410249: fltTcaTunnelEgrTepCntrs15minFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410250: fltTcaTunnelEgrTepCntrs1hFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410251: fltTcaTunnelEgrTepCntrs1dFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410252: fltTcaTunnelEgrTepCntrs1wFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410253: fltTcaTunnelEgrTepCntrs1moFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410254: fltTcaTunnelEgrTepCntrs1qtrFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410255: fltTcaTunnelEgrTepCntrs1yearFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410280: fltTcaTunnelEgrTepCntrs5minFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410281: fltTcaTunnelEgrTepCntrs15minFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410282: fltTcaTunnelEgrTepCntrs1hFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410283: fltTcaTunnelEgrTepCntrs1dFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410284: fltTcaTunnelEgrTepCntrs1wFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410285: fltTcaTunnelEgrTepCntrs1moFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410286: fltTcaTunnelEgrTepCntrs1qtrFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410287: fltTcaTunnelEgrTepCntrs1yearFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410288: fltTcaTunnelEgrTepCntrs5minFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410289: fltTcaTunnelEgrTepCntrs15minFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410290: fltTcaTunnelEgrTepCntrs1hFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410291: fltTcaTunnelEgrTepCntrs1dFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410292: fltTcaTunnelEgrTepCntrs1wFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410293: fltTcaTunnelEgrTepCntrs1moFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410294: fltTcaTunnelEgrTepCntrs1qtrFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410295: fltTcaTunnelEgrTepCntrs1yearFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4103: fltDatetimeRsNtpProvToNtpAuthKey2ResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F410368: fltTcaTunnelEgrTepCntrs5minFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410369: fltTcaTunnelEgrTepCntrs15minFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410370: fltTcaTunnelEgrTepCntrs1hFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410371: fltTcaTunnelEgrTepCntrs1dFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410372: fltTcaTunnelEgrTepCntrs1wFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410373: fltTcaTunnelEgrTepCntrs1moFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410374: fltTcaTunnelEgrTepCntrs1qtrFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410375: fltTcaTunnelEgrTepCntrs1yearFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410384: fltTcaTunnelEgrTepCntrs5minFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410385: fltTcaTunnelEgrTepCntrs15minFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410386: fltTcaTunnelEgrTepCntrs1hFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410387: fltTcaTunnelEgrTepCntrs1dFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410388: fltTcaTunnelEgrTepCntrs1wFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410389: fltTcaTunnelEgrTepCntrs1moFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410390: fltTcaTunnelEgrTepCntrs1qtrFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410391: fltTcaTunnelEgrTepCntrs1yearFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410392: fltTcaTunnelEgrTepCntrs5minFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410393: fltTcaTunnelEgrTepCntrs15minFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410394: fltTcaTunnelEgrTepCntrs1hFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410395: fltTcaTunnelEgrTepCntrs1dFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410396: fltTcaTunnelEgrTepCntrs1wFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410397: fltTcaTunnelEgrTepCntrs1moFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410398: fltTcaTunnelEgrTepCntrs1qtrFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410399: fltTcaTunnelEgrTepCntrs1yearFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4104: fltL3extRsPathL3OutAttMtuMacMismatch

Severity: warning

Explanation: This fault occurs when identical l3extRsPathL3OutAtt are configured with different MTU/MAC values. l3extRsPathL3OutAtt are identical when their IP, VLAN and node/interface values are same. Only one of the configured MTU/MAC values will be used on the interface.

Recommended Action: If you see this fault, take the following actions:

1. Confgure the same MTU/MAC on all l3extRsPathL3OutAtt with identical IP, VLAN and interface.

F410400: fltTcaTunnelEgrTepCntrs5minFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410401: fltTcaTunnelEgrTepCntrs15minFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410402: fltTcaTunnelEgrTepCntrs1hFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410403: fltTcaTunnelEgrTepCntrs1dFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410404: fltTcaTunnelEgrTepCntrs1wFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410405: fltTcaTunnelEgrTepCntrs1moFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410406: fltTcaTunnelEgrTepCntrs1qtrFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410407: fltTcaTunnelEgrTepCntrs1yearFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410408: fltTcaTunnelEgrTepCntrs5minFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410409: fltTcaTunnelEgrTepCntrs15minFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410410: fltTcaTunnelEgrTepCntrs1hFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410411: fltTcaTunnelEgrTepCntrs1dFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410412: fltTcaTunnelEgrTepCntrs1wFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410413: fltTcaTunnelEgrTepCntrs1moFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410414: fltTcaTunnelEgrTepCntrs1qtrFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410415: fltTcaTunnelEgrTepCntrs1yearFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410416: fltTcaTunnelEgrTepCntrs5minFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410417: fltTcaTunnelEgrTepCntrs15minFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410418: fltTcaTunnelEgrTepCntrs1hFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410419: fltTcaTunnelEgrTepCntrs1dFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410420: fltTcaTunnelEgrTepCntrs1wFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410421: fltTcaTunnelEgrTepCntrs1moFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410422: fltTcaTunnelEgrTepCntrs1qtrFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410423: fltTcaTunnelEgrTepCntrs1yearFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410448: fltTcaTunnelEgrTepCntrs5minFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410449: fltTcaTunnelEgrTepCntrs15minFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410450: fltTcaTunnelEgrTepCntrs1hFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410451: fltTcaTunnelEgrTepCntrs1dFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410452: fltTcaTunnelEgrTepCntrs1wFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410453: fltTcaTunnelEgrTepCntrs1moFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410454: fltTcaTunnelEgrTepCntrs1qtrFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410455: fltTcaTunnelEgrTepCntrs1yearFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410456: fltTcaTunnelEgrTepCntrs5minFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410457: fltTcaTunnelEgrTepCntrs15minFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410458: fltTcaTunnelEgrTepCntrs1hFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410459: fltTcaTunnelEgrTepCntrs1dFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410460: fltTcaTunnelEgrTepCntrs1wFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410461: fltTcaTunnelEgrTepCntrs1moFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410462: fltTcaTunnelEgrTepCntrs1qtrFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410463: fltTcaTunnelEgrTepCntrs1yearFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410536: fltTcaTunnelIngrTepCntrs5minDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410537: fltTcaTunnelIngrTepCntrs15minDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410538: fltTcaTunnelIngrTepCntrs1hDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410539: fltTcaTunnelIngrTepCntrs1dDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410540: fltTcaTunnelIngrTepCntrs1wDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410541: fltTcaTunnelIngrTepCntrs1moDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410542: fltTcaTunnelIngrTepCntrs1qtrDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410543: fltTcaTunnelIngrTepCntrs1yearDropBytesLast

Severity: variable

Explanation: This fault is caused by "Drop Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410552: fltTcaTunnelIngrTepCntrs5minDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410553: fltTcaTunnelIngrTepCntrs15minDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410554: fltTcaTunnelIngrTepCntrs1hDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410555: fltTcaTunnelIngrTepCntrs1dDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410556: fltTcaTunnelIngrTepCntrs1wDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410557: fltTcaTunnelIngrTepCntrs1moDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410558: fltTcaTunnelIngrTepCntrs1qtrDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410559: fltTcaTunnelIngrTepCntrs1yearDropBytesCum

Severity: variable

Explanation: This fault is caused by "Drop Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410560: fltTcaTunnelIngrTepCntrs5minDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410561: fltTcaTunnelIngrTepCntrs15minDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410562: fltTcaTunnelIngrTepCntrs1hDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410563: fltTcaTunnelIngrTepCntrs1dDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410564: fltTcaTunnelIngrTepCntrs1wDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410565: fltTcaTunnelIngrTepCntrs1moDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410566: fltTcaTunnelIngrTepCntrs1qtrDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410567: fltTcaTunnelIngrTepCntrs1yearDropBytesPer

Severity: variable

Explanation: This fault is caused by "Drop Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410568: fltTcaTunnelIngrTepCntrs5minDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410569: fltTcaTunnelIngrTepCntrs15minDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410570: fltTcaTunnelIngrTepCntrs1hDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410571: fltTcaTunnelIngrTepCntrs1dDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410572: fltTcaTunnelIngrTepCntrs1wDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410573: fltTcaTunnelIngrTepCntrs1moDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410574: fltTcaTunnelIngrTepCntrs1qtrDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410575: fltTcaTunnelIngrTepCntrs1yearDropBytesMin

Severity: variable

Explanation: This fault is caused by "Drop Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410576: fltTcaTunnelIngrTepCntrs5minDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410577: fltTcaTunnelIngrTepCntrs15minDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410578: fltTcaTunnelIngrTepCntrs1hDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410579: fltTcaTunnelIngrTepCntrs1dDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410580: fltTcaTunnelIngrTepCntrs1wDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410581: fltTcaTunnelIngrTepCntrs1moDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410582: fltTcaTunnelIngrTepCntrs1qtrDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410583: fltTcaTunnelIngrTepCntrs1yearDropBytesMax

Severity: variable

Explanation: This fault is caused by "Drop Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410584: fltTcaTunnelIngrTepCntrs5minDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410585: fltTcaTunnelIngrTepCntrs15minDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410586: fltTcaTunnelIngrTepCntrs1hDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410587: fltTcaTunnelIngrTepCntrs1dDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410588: fltTcaTunnelIngrTepCntrs1wDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410589: fltTcaTunnelIngrTepCntrs1moDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410590: fltTcaTunnelIngrTepCntrs1qtrDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410591: fltTcaTunnelIngrTepCntrs1yearDropBytesAvg

Severity: variable

Explanation: This fault is caused by "Drop Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410616: fltTcaTunnelIngrTepCntrs5minDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410617: fltTcaTunnelIngrTepCntrs15minDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410618: fltTcaTunnelIngrTepCntrs1hDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410619: fltTcaTunnelIngrTepCntrs1dDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410620: fltTcaTunnelIngrTepCntrs1wDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410621: fltTcaTunnelIngrTepCntrs1moDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410622: fltTcaTunnelIngrTepCntrs1qtrDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410623: fltTcaTunnelIngrTepCntrs1yearDropBytesTr

Severity: variable

Explanation: This fault is caused by "Drop Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410624: fltTcaTunnelIngrTepCntrs5minDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410625: fltTcaTunnelIngrTepCntrs15minDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410626: fltTcaTunnelIngrTepCntrs1hDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410627: fltTcaTunnelIngrTepCntrs1dDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410628: fltTcaTunnelIngrTepCntrs1wDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410629: fltTcaTunnelIngrTepCntrs1moDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410630: fltTcaTunnelIngrTepCntrs1qtrDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410631: fltTcaTunnelIngrTepCntrs1yearDropBytesRate

Severity: variable

Explanation: This fault is caused by "Drop Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4107: fltApPluginHighPrivilegeAppNotSigned

Severity: minor

Explanation: This fault occurs when there is a signature verification failure for a high privilege app.

Recommended Action: If you see this fault, please make sure that app was not modified after downloading from Cisco. Re-download the app from cisco app center and try again.

F410704: fltTcaTunnelIngrTepCntrs5minDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410705: fltTcaTunnelIngrTepCntrs15minDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410706: fltTcaTunnelIngrTepCntrs1hDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410707: fltTcaTunnelIngrTepCntrs1dDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410708: fltTcaTunnelIngrTepCntrs1wDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410709: fltTcaTunnelIngrTepCntrs1moDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410710: fltTcaTunnelIngrTepCntrs1qtrDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410711: fltTcaTunnelIngrTepCntrs1yearDropPktsLast

Severity: variable

Explanation: This fault is caused by "Drop Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410720: fltTcaTunnelIngrTepCntrs5minDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410721: fltTcaTunnelIngrTepCntrs15minDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410722: fltTcaTunnelIngrTepCntrs1hDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410723: fltTcaTunnelIngrTepCntrs1dDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410724: fltTcaTunnelIngrTepCntrs1wDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410725: fltTcaTunnelIngrTepCntrs1moDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410726: fltTcaTunnelIngrTepCntrs1qtrDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410727: fltTcaTunnelIngrTepCntrs1yearDropPktsCum

Severity: variable

Explanation: This fault is caused by "Drop Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410728: fltTcaTunnelIngrTepCntrs5minDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410729: fltTcaTunnelIngrTepCntrs15minDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410730: fltTcaTunnelIngrTepCntrs1hDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410731: fltTcaTunnelIngrTepCntrs1dDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410732: fltTcaTunnelIngrTepCntrs1wDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410733: fltTcaTunnelIngrTepCntrs1moDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410734: fltTcaTunnelIngrTepCntrs1qtrDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410735: fltTcaTunnelIngrTepCntrs1yearDropPktsPer

Severity: variable

Explanation: This fault is caused by "Drop Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410736: fltTcaTunnelIngrTepCntrs5minDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410737: fltTcaTunnelIngrTepCntrs15minDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410738: fltTcaTunnelIngrTepCntrs1hDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410739: fltTcaTunnelIngrTepCntrs1dDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410740: fltTcaTunnelIngrTepCntrs1wDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410741: fltTcaTunnelIngrTepCntrs1moDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410742: fltTcaTunnelIngrTepCntrs1qtrDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410743: fltTcaTunnelIngrTepCntrs1yearDropPktsMin

Severity: variable

Explanation: This fault is caused by "Drop Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410744: fltTcaTunnelIngrTepCntrs5minDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410745: fltTcaTunnelIngrTepCntrs15minDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410746: fltTcaTunnelIngrTepCntrs1hDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410747: fltTcaTunnelIngrTepCntrs1dDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410748: fltTcaTunnelIngrTepCntrs1wDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410749: fltTcaTunnelIngrTepCntrs1moDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410750: fltTcaTunnelIngrTepCntrs1qtrDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410751: fltTcaTunnelIngrTepCntrs1yearDropPktsMax

Severity: variable

Explanation: This fault is caused by "Drop Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410752: fltTcaTunnelIngrTepCntrs5minDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410753: fltTcaTunnelIngrTepCntrs15minDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410754: fltTcaTunnelIngrTepCntrs1hDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410755: fltTcaTunnelIngrTepCntrs1dDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410756: fltTcaTunnelIngrTepCntrs1wDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410757: fltTcaTunnelIngrTepCntrs1moDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410758: fltTcaTunnelIngrTepCntrs1qtrDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410759: fltTcaTunnelIngrTepCntrs1yearDropPktsAvg

Severity: variable

Explanation: This fault is caused by "Drop Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410784: fltTcaTunnelIngrTepCntrs5minDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410785: fltTcaTunnelIngrTepCntrs15minDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410786: fltTcaTunnelIngrTepCntrs1hDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410787: fltTcaTunnelIngrTepCntrs1dDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410788: fltTcaTunnelIngrTepCntrs1wDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410789: fltTcaTunnelIngrTepCntrs1moDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410790: fltTcaTunnelIngrTepCntrs1qtrDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410791: fltTcaTunnelIngrTepCntrs1yearDropPktsTr

Severity: variable

Explanation: This fault is caused by "Drop Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410792: fltTcaTunnelIngrTepCntrs5minDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410793: fltTcaTunnelIngrTepCntrs15minDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410794: fltTcaTunnelIngrTepCntrs1hDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410795: fltTcaTunnelIngrTepCntrs1dDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410796: fltTcaTunnelIngrTepCntrs1wDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410797: fltTcaTunnelIngrTepCntrs1moDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410798: fltTcaTunnelIngrTepCntrs1qtrDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410799: fltTcaTunnelIngrTepCntrs1yearDropPktsRate

Severity: variable

Explanation: This fault is caused by "Drop Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Drop Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4108: fltDbgacRsToEsgForEpgToEpgResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F410872: fltTcaTunnelIngrTepCntrs5minFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410873: fltTcaTunnelIngrTepCntrs15minFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410874: fltTcaTunnelIngrTepCntrs1hFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410875: fltTcaTunnelIngrTepCntrs1dFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410876: fltTcaTunnelIngrTepCntrs1wFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410877: fltTcaTunnelIngrTepCntrs1moFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410878: fltTcaTunnelIngrTepCntrs1qtrFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410879: fltTcaTunnelIngrTepCntrs1yearFwdBytesLast

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410888: fltTcaTunnelIngrTepCntrs5minFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410889: fltTcaTunnelIngrTepCntrs15minFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410890: fltTcaTunnelIngrTepCntrs1hFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410891: fltTcaTunnelIngrTepCntrs1dFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410892: fltTcaTunnelIngrTepCntrs1wFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410893: fltTcaTunnelIngrTepCntrs1moFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410894: fltTcaTunnelIngrTepCntrs1qtrFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410895: fltTcaTunnelIngrTepCntrs1yearFwdBytesCum

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410896: fltTcaTunnelIngrTepCntrs5minFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410897: fltTcaTunnelIngrTepCntrs15minFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410898: fltTcaTunnelIngrTepCntrs1hFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410899: fltTcaTunnelIngrTepCntrs1dFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4109: fltDbgacRsFromEsgResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F410900: fltTcaTunnelIngrTepCntrs1wFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410901: fltTcaTunnelIngrTepCntrs1moFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410902: fltTcaTunnelIngrTepCntrs1qtrFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410903: fltTcaTunnelIngrTepCntrs1yearFwdBytesPer

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410904: fltTcaTunnelIngrTepCntrs5minFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410905: fltTcaTunnelIngrTepCntrs15minFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410906: fltTcaTunnelIngrTepCntrs1hFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410907: fltTcaTunnelIngrTepCntrs1dFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410908: fltTcaTunnelIngrTepCntrs1wFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410909: fltTcaTunnelIngrTepCntrs1moFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410910: fltTcaTunnelIngrTepCntrs1qtrFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410911: fltTcaTunnelIngrTepCntrs1yearFwdBytesMin

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410912: fltTcaTunnelIngrTepCntrs5minFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410913: fltTcaTunnelIngrTepCntrs15minFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410914: fltTcaTunnelIngrTepCntrs1hFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410915: fltTcaTunnelIngrTepCntrs1dFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410916: fltTcaTunnelIngrTepCntrs1wFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410917: fltTcaTunnelIngrTepCntrs1moFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410918: fltTcaTunnelIngrTepCntrs1qtrFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410919: fltTcaTunnelIngrTepCntrs1yearFwdBytesMax

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410920: fltTcaTunnelIngrTepCntrs5minFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410921: fltTcaTunnelIngrTepCntrs15minFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410922: fltTcaTunnelIngrTepCntrs1hFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410923: fltTcaTunnelIngrTepCntrs1dFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410924: fltTcaTunnelIngrTepCntrs1wFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410925: fltTcaTunnelIngrTepCntrs1moFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410926: fltTcaTunnelIngrTepCntrs1qtrFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410927: fltTcaTunnelIngrTepCntrs1yearFwdBytesAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410952: fltTcaTunnelIngrTepCntrs5minFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410953: fltTcaTunnelIngrTepCntrs15minFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410954: fltTcaTunnelIngrTepCntrs1hFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410955: fltTcaTunnelIngrTepCntrs1dFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410956: fltTcaTunnelIngrTepCntrs1wFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410957: fltTcaTunnelIngrTepCntrs1moFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410958: fltTcaTunnelIngrTepCntrs1qtrFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410959: fltTcaTunnelIngrTepCntrs1yearFwdBytesTr

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410960: fltTcaTunnelIngrTepCntrs5minFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410961: fltTcaTunnelIngrTepCntrs15minFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410962: fltTcaTunnelIngrTepCntrs1hFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410963: fltTcaTunnelIngrTepCntrs1dFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410964: fltTcaTunnelIngrTepCntrs1wFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410965: fltTcaTunnelIngrTepCntrs1moFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410966: fltTcaTunnelIngrTepCntrs1qtrFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F410967: fltTcaTunnelIngrTepCntrs1yearFwdBytesRate

Severity: variable

Explanation: This fault is caused by "Forwarded Bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4110: fltFvEpMacTagConfigurationFailed

Severity: minor

Explanation: This fault occurs when an Endpoint (fvEpMacTag) is not correctly configured.

Recommended Action: If you see this fault, take the following actions:

1. The specific Bridge Domain (bd-does-not-exist) or VRF (vrf-does-not-exist) does not exist. As a result, the configuration is not applied. Verify that the specific Bridge Domain or VRF exists.
2. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F411040: fltTcaTunnelIngrTepCntrs5minFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411041: fltTcaTunnelIngrTepCntrs15minFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411042: fltTcaTunnelIngrTepCntrs1hFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411043: fltTcaTunnelIngrTepCntrs1dFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411044: fltTcaTunnelIngrTepCntrs1wFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411045: fltTcaTunnelIngrTepCntrs1moFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411046: fltTcaTunnelIngrTepCntrs1qtrFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411047: fltTcaTunnelIngrTepCntrs1yearFwdPktsLast

Severity: variable

Explanation: This fault is caused by "Forwarded Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411056: fltTcaTunnelIngrTepCntrs5minFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411057: fltTcaTunnelIngrTepCntrs15minFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411058: fltTcaTunnelIngrTepCntrs1hFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411059: fltTcaTunnelIngrTepCntrs1dFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411060: fltTcaTunnelIngrTepCntrs1wFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411061: fltTcaTunnelIngrTepCntrs1moFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411062: fltTcaTunnelIngrTepCntrs1qtrFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411063: fltTcaTunnelIngrTepCntrs1yearFwdPktsCum

Severity: variable

Explanation: This fault is caused by "Forwarded Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411064: fltTcaTunnelIngrTepCntrs5minFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411065: fltTcaTunnelIngrTepCntrs15minFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411066: fltTcaTunnelIngrTepCntrs1hFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411067: fltTcaTunnelIngrTepCntrs1dFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411068: fltTcaTunnelIngrTepCntrs1wFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411069: fltTcaTunnelIngrTepCntrs1moFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411070: fltTcaTunnelIngrTepCntrs1qtrFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411071: fltTcaTunnelIngrTepCntrs1yearFwdPktsPer

Severity: variable

Explanation: This fault is caused by "Forwarded Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411072: fltTcaTunnelIngrTepCntrs5minFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411073: fltTcaTunnelIngrTepCntrs15minFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411074: fltTcaTunnelIngrTepCntrs1hFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411075: fltTcaTunnelIngrTepCntrs1dFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411076: fltTcaTunnelIngrTepCntrs1wFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411077: fltTcaTunnelIngrTepCntrs1moFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411078: fltTcaTunnelIngrTepCntrs1qtrFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411079: fltTcaTunnelIngrTepCntrs1yearFwdPktsMin

Severity: variable

Explanation: This fault is caused by "Forwarded Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411080: fltTcaTunnelIngrTepCntrs5minFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411081: fltTcaTunnelIngrTepCntrs15minFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411082: fltTcaTunnelIngrTepCntrs1hFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411083: fltTcaTunnelIngrTepCntrs1dFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411084: fltTcaTunnelIngrTepCntrs1wFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411085: fltTcaTunnelIngrTepCntrs1moFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411086: fltTcaTunnelIngrTepCntrs1qtrFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411087: fltTcaTunnelIngrTepCntrs1yearFwdPktsMax

Severity: variable

Explanation: This fault is caused by "Forwarded Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411088: fltTcaTunnelIngrTepCntrs5minFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411089: fltTcaTunnelIngrTepCntrs15minFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411090: fltTcaTunnelIngrTepCntrs1hFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411091: fltTcaTunnelIngrTepCntrs1dFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411092: fltTcaTunnelIngrTepCntrs1wFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411093: fltTcaTunnelIngrTepCntrs1moFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411094: fltTcaTunnelIngrTepCntrs1qtrFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411095: fltTcaTunnelIngrTepCntrs1yearFwdPktsAvg

Severity: variable

Explanation: This fault is caused by "Forwarded Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411120: fltTcaTunnelIngrTepCntrs5minFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411121: fltTcaTunnelIngrTepCntrs15minFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411122: fltTcaTunnelIngrTepCntrs1hFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411123: fltTcaTunnelIngrTepCntrs1dFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411124: fltTcaTunnelIngrTepCntrs1wFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411125: fltTcaTunnelIngrTepCntrs1moFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411126: fltTcaTunnelIngrTepCntrs1qtrFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411127: fltTcaTunnelIngrTepCntrs1yearFwdPktsTr

Severity: variable

Explanation: This fault is caused by "Forwarded Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411128: fltTcaTunnelIngrTepCntrs5minFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411129: fltTcaTunnelIngrTepCntrs15minFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411130: fltTcaTunnelIngrTepCntrs1hFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411131: fltTcaTunnelIngrTepCntrs1dFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411132: fltTcaTunnelIngrTepCntrs1wFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411133: fltTcaTunnelIngrTepCntrs1moFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411134: fltTcaTunnelIngrTepCntrs1qtrFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411135: fltTcaTunnelIngrTepCntrs1yearFwdPktsRate

Severity: variable

Explanation: This fault is caused by "Forwarded Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Forwarded Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411208: fltTcaTunnelTunnelFlapCntrs5minFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411209: fltTcaTunnelTunnelFlapCntrs15minFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411210: fltTcaTunnelTunnelFlapCntrs1hFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411211: fltTcaTunnelTunnelFlapCntrs1dFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411212: fltTcaTunnelTunnelFlapCntrs1wFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411213: fltTcaTunnelTunnelFlapCntrs1moFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411214: fltTcaTunnelTunnelFlapCntrs1qtrFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411215: fltTcaTunnelTunnelFlapCntrs1yearFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411224: fltTcaTunnelTunnelFlapCntrs5minFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411225: fltTcaTunnelTunnelFlapCntrs15minFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411226: fltTcaTunnelTunnelFlapCntrs1hFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411227: fltTcaTunnelTunnelFlapCntrs1dFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411228: fltTcaTunnelTunnelFlapCntrs1wFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411229: fltTcaTunnelTunnelFlapCntrs1moFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411230: fltTcaTunnelTunnelFlapCntrs1qtrFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411231: fltTcaTunnelTunnelFlapCntrs1yearFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411232: fltTcaTunnelTunnelFlapCntrs5minFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411233: fltTcaTunnelTunnelFlapCntrs15minFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411234: fltTcaTunnelTunnelFlapCntrs1hFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411235: fltTcaTunnelTunnelFlapCntrs1dFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411236: fltTcaTunnelTunnelFlapCntrs1wFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411237: fltTcaTunnelTunnelFlapCntrs1moFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411238: fltTcaTunnelTunnelFlapCntrs1qtrFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411239: fltTcaTunnelTunnelFlapCntrs1yearFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411240: fltTcaTunnelTunnelFlapCntrs5minFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411241: fltTcaTunnelTunnelFlapCntrs15minFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411242: fltTcaTunnelTunnelFlapCntrs1hFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411243: fltTcaTunnelTunnelFlapCntrs1dFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411244: fltTcaTunnelTunnelFlapCntrs1wFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411245: fltTcaTunnelTunnelFlapCntrs1moFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411246: fltTcaTunnelTunnelFlapCntrs1qtrFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411247: fltTcaTunnelTunnelFlapCntrs1yearFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411248: fltTcaTunnelTunnelFlapCntrs5minFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411249: fltTcaTunnelTunnelFlapCntrs15minFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411250: fltTcaTunnelTunnelFlapCntrs1hFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411251: fltTcaTunnelTunnelFlapCntrs1dFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411252: fltTcaTunnelTunnelFlapCntrs1wFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411253: fltTcaTunnelTunnelFlapCntrs1moFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411254: fltTcaTunnelTunnelFlapCntrs1qtrFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411255: fltTcaTunnelTunnelFlapCntrs1yearFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411256: fltTcaTunnelTunnelFlapCntrs5minFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411257: fltTcaTunnelTunnelFlapCntrs15minFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411258: fltTcaTunnelTunnelFlapCntrs1hFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411259: fltTcaTunnelTunnelFlapCntrs1dFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411260: fltTcaTunnelTunnelFlapCntrs1wFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411261: fltTcaTunnelTunnelFlapCntrs1moFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411262: fltTcaTunnelTunnelFlapCntrs1qtrFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411263: fltTcaTunnelTunnelFlapCntrs1yearFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411288: fltTcaTunnelTunnelFlapCntrs5minFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411289: fltTcaTunnelTunnelFlapCntrs15minFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411290: fltTcaTunnelTunnelFlapCntrs1hFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411291: fltTcaTunnelTunnelFlapCntrs1dFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411292: fltTcaTunnelTunnelFlapCntrs1wFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411293: fltTcaTunnelTunnelFlapCntrs1moFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411294: fltTcaTunnelTunnelFlapCntrs1qtrFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411295: fltTcaTunnelTunnelFlapCntrs1yearFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411296: fltTcaTunnelTunnelFlapCntrs5minFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411297: fltTcaTunnelTunnelFlapCntrs15minFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411298: fltTcaTunnelTunnelFlapCntrs1hFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411299: fltTcaTunnelTunnelFlapCntrs1dFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411300: fltTcaTunnelTunnelFlapCntrs1wFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411301: fltTcaTunnelTunnelFlapCntrs1moFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411302: fltTcaTunnelTunnelFlapCntrs1qtrFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F411303: fltTcaTunnelTunnelFlapCntrs1yearFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of Tunnel Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Tunnel Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4114: fltHcloudTargetGroupOperTargetGroupOperHealthDown

Severity: minor

Explanation: This fault occurs when an erroneous configuration is pushed for creating a Native service Target Group.

Recommended Action: If you see this fault, take the following actions:

1. Please check the fault message and make necessary changes to the config for creating the Native service provider Epg representing target server pool.
2. If fault still has not cleared, please contact Cisco TAC.

F4119: fltVmmClusterFaultInfoMajorOperationalIssues

Severity: major

Explanation: This fault is raised when there is an operational issue with respect to VmmMgr Cluster

Recommended Action: If you see this fault, take the following actions:

1. From the fault description resolve the issue on the cluster
2. If the above actions did not resolve the issue, collect **avs-tech-support** file and contact Cisco TAC.

F4120: fltVmmClusterFaultInfoMinorOperationalIssues

Severity: minor

Explanation: This fault is raised when there is an operational issue with respect to VmmMgr Cluster

Recommended Action: If you see this fault, take the following actions:

1. From the fault description resolve the issue on the cluster
2. If the above actions did not resolve the issue, collect **avs-tech-support** file and contact Cisco TAC.

F4121: fltVmmClusterFaultInfoCriticalOperationalIssues

Severity: critical

Explanation: This fault is raised when there is an operational issue with respect to VmmMgr Cluster

Recommended Action: If you see this fault, take the following actions:

1. From the fault description resolve the issue on the cluster
2. If the above actions did not resolve the issue, collect **avs-tech-support** file and contact Cisco TAC.

F4122: fltInfraRsSynceInstPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4123: fltInfraRsSynceEthIfPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4124: fltFvEpIpTagConfigurationFailed

Severity: minor

Explanation: This fault occurs when an Endpoint (fvEpIpTag) is not correctly configured.

Recommended Action: If you see this fault, take the following actions:

1. vrf-does-not-exist: The specific VRF does not exist. As a result, the configuration is not applied. Verify that the specific VRF exists.
2. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F4125: fltFvSubnetConfigurationFailed

Severity: major

Explanation: This fault occurs when an Subnet (fvSubnet) Tag is not correctly configured.

Recommended Action: If you see this fault, take the following actions:

1. multiple-tag-selector-match: The configured Policy Tag(s) match more than one ESG TagSelctor *when there is no pre-existing match*. As a result, the subnet is not classified into any ESGs because each subnet can be associated to only one ESG TagSelector. Remove or update Policy Tag(s) (tagTag) or ESG TagSelctor (fvTagSelector) so that there is only one Policy Tag matching an ESG TagSelector for this subnet.

2. multiple-tag-selector-match-after-single-match: The configured Policy Tag(s) match more than one ESG TagSelctor *after the subnet was already classified to an ESG via a previously configured tag*. As a result, the subnet remains classified to the original ESG and the new Tag(s) matching other ESG TagSelectors will be ignored at the moment. Remove or update Policy Tag(s) (tagTag) or ESG TagSelctor (fvTagSelector) so that there is only one Policy Tag matching an ESG TagSelector for this endpoint.
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F412632: fltTcaEqptcapacityBdUsage5minTotalCapLast

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412633: fltTcaEqptcapacityBdUsage15minTotalCapLast

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412634: fltTcaEqptcapacityBdUsage1hTotalCapLast

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412635: fltTcaEqptcapacityBdUsage1dTotalCapLast

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412636: fltTcaEqptcapacityBdUsage1wTotalCapLast

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412637: fltTcaEqptcapacityBdUsage1moTotalCapLast

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412638: fltTcaEqptcapacityBdUsage1qtrTotalCapLast

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412639: fltTcaEqptcapacityBdUsage1yearTotalCapLast

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412648: fltTcaEqptcapacityBdUsage5minTotalCapCum

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412649: fltTcaEqptcapacityBdUsage15minTotalCapCum

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412650: fltTcaEqptcapacityBdUsage1hTotalCapCum

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412651: fltTcaEqptcapacityBdUsage1dTotalCapCum

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412652: fltTcaEqptcapacityBdUsage1wTotalCapCum

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412653: fltTcaEqptcapacityBdUsage1moTotalCapCum

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412654: fltTcaEqptcapacityBdUsage1qtrTotalCapCum

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412655: fltTcaEqptcapacityBdUsage1yearTotalCapCum

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412656: fltTcaEqptcapacityBdUsage5minTotalCapPer

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412657: fltTcaEqptcapacityBdUsage15minTotalCapPer

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412658: fltTcaEqptcapacityBdUsage1hTotalCapPer

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412659: fltTcaEqptcapacityBdUsage1dTotalCapPer

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412660: fltTcaEqptcapacityBdUsage1wTotalCapPer

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412661: fltTcaEqptcapacityBdUsage1moTotalCapPer

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412662: fltTcaEqptcapacityBdUsage1qtrTotalCapPer

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412663: fltTcaEqptcapacityBdUsage1yearTotalCapPer

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412664: fltTcaEqptcapacityBdUsage5minTotalCapMin

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412665: fltTcaEqptcapacityBdUsage15minTotalCapMin

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412666: fltTcaEqptcapacityBdUsage1hTotalCapMin

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412667: fltTcaEqptcapacityBdUsage1dTotalCapMin

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412668: fltTcaEqptcapacityBdUsage1wTotalCapMin

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412669: fltTcaEqptcapacityBdUsage1moTotalCapMin

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412670: fltTcaEqptcapacityBdUsage1qtrTotalCapMin

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412671: fltTcaEqptcapacityBdUsage1yearTotalCapMin

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412672: fltTcaEqptcapacityBdUsage5minTotalCapMax

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412673: fltTcaEqptcapacityBdUsage15minTotalCapMax

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412674: fltTcaEqptcapacityBdUsage1hTotalCapMax

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412675: fltTcaEqptcapacityBdUsage1dTotalCapMax

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412676: fltTcaEqptcapacityBdUsage1wTotalCapMax

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412677: fltTcaEqptcapacityBdUsage1moTotalCapMax

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412678: fltTcaEqptcapacityBdUsage1qtrTotalCapMax

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412679: fltTcaEqptcapacityBdUsage1yearTotalCapMax

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412680: fltTcaEqptcapacityBdUsage5minTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412681: fltTcaEqptcapacityBdUsage15minTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412682: fltTcaEqptcapacityBdUsage1hTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412683: fltTcaEqptcapacityBdUsage1dTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412684: fltTcaEqptcapacityBdUsage1wTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412685: fltTcaEqptcapacityBdUsage1moTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412686: fltTcaEqptcapacityBdUsage1qtrTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412687: fltTcaEqptcapacityBdUsage1yearTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4127: fltTrigSchedPConfigurationFailed

Severity: major

Explanation: This fault occurs when schelduer is attached to 2 or more techsupport policy with same nodes

Recommended Action: None set.

F412712: fltTcaEqptcapacityBdUsage5minTotalCapTr

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412713: fltTcaEqptcapacityBdUsage15minTotalCapTr

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412714: fltTcaEqptcapacityBdUsage1hTotalCapTr

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412715: fltTcaEqptcapacityBdUsage1dTotalCapTr

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412716: fltTcaEqptcapacityBdUsage1wTotalCapTr

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412717: fltTcaEqptcapacityBdUsage1moTotalCapTr

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412718: fltTcaEqptcapacityBdUsage1qtrTotalCapTr

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412719: fltTcaEqptcapacityBdUsage1yearTotalCapTr

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412720: fltTcaEqptcapacityBdUsage5minTotalCapRate

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412721: fltTcaEqptcapacityBdUsage15minTotalCapRate

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412722: fltTcaEqptcapacityBdUsage1hTotalCapRate

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412723: fltTcaEqptcapacityBdUsage1dTotalCapRate

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412724: fltTcaEqptcapacityBdUsage1wTotalCapRate

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412725: fltTcaEqptcapacityBdUsage1moTotalCapRate

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412726: fltTcaEqptcapacityBdUsage1qtrTotalCapRate

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412727: fltTcaEqptcapacityBdUsage1yearTotalCapRate

Severity: variable

Explanation: This fault is caused by "Bridge domain entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bridge domain entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4128: fltSlaOperationOverThreshold

Severity: minor

Explanation: This fault occurs when an IP SLA response time goes over threshold.

Recommended Action: To recover from this fault, try the following actions

1. Check if there are any network delay issues.
2. Confirm if the configured threshold value is correct.

F412800: fltTcaEqptcapacityBdUsage5minTotalLast

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412801: fltTcaEqptcapacityBdUsage15minTotalLast

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412802: fltTcaEqptcapacityBdUsage1hTotalLast

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412803: fltTcaEqptcapacityBdUsage1dTotalLast

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412804: fltTcaEqptcapacityBdUsage1wTotalLast

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412805: fltTcaEqptcapacityBdUsage1moTotalLast

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412806: fltTcaEqptcapacityBdUsage1qtrTotalLast

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412807: fltTcaEqptcapacityBdUsage1yearTotalLast

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412816: fltTcaEqptcapacityBdUsage5minTotalCum

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412817: fltTcaEqptcapacityBdUsage15minTotalCum

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412818: fltTcaEqptcapacityBdUsage1hTotalCum

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412819: fltTcaEqptcapacityBdUsage1dTotalCum

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412820: fltTcaEqptcapacityBdUsage1wTotalCum

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412821: fltTcaEqptcapacityBdUsage1moTotalCum

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412822: fltTcaEqptcapacityBdUsage1qtrTotalCum

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412823: fltTcaEqptcapacityBdUsage1yearTotalCum

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412824: fltTcaEqptcapacityBdUsage5minTotalPer

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412825: fltTcaEqptcapacityBdUsage15minTotalPer

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412826: fltTcaEqptcapacityBdUsage1hTotalPer

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412827: fltTcaEqptcapacityBdUsage1dTotalPer

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412828: fltTcaEqptcapacityBdUsage1wTotalPer

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412829: fltTcaEqptcapacityBdUsage1moTotalPer

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412830: fltTcaEqptcapacityBdUsage1qtrTotalPer

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412831: fltTcaEqptcapacityBdUsage1yearTotalPer

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412832: fltTcaEqptcapacityBdUsage5minTotalMin

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412833: fltTcaEqptcapacityBdUsage15minTotalMin

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412834: fltTcaEqptcapacityBdUsage1hTotalMin

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412835: fltTcaEqptcapacityBdUsage1dTotalMin

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412836: fltTcaEqptcapacityBdUsage1wTotalMin

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412837: fltTcaEqptcapacityBdUsage1moTotalMin

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412838: fltTcaEqptcapacityBdUsage1qtrTotalMin

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412839: fltTcaEqptcapacityBdUsage1yearTotalMin

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412840: fltTcaEqptcapacityBdUsage5minTotalMax

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412841: fltTcaEqptcapacityBdUsage15minTotalMax

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412842: fltTcaEqptcapacityBdUsage1hTotalMax

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412843: fltTcaEqptcapacityBdUsage1dTotalMax

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412844: fltTcaEqptcapacityBdUsage1wTotalMax

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412845: fltTcaEqptcapacityBdUsage1moTotalMax

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412846: fltTcaEqptcapacityBdUsage1qtrTotalMax

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412847: fltTcaEqptcapacityBdUsage1yearTotalMax

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412848: fltTcaEqptcapacityBdUsage5minTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412849: fltTcaEqptcapacityBdUsage15minTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412850: fltTcaEqptcapacityBdUsage1hTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412851: fltTcaEqptcapacityBdUsage1dTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412852: fltTcaEqptcapacityBdUsage1wTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412853: fltTcaEqptcapacityBdUsage1moTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412854: fltTcaEqptcapacityBdUsage1qtrTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412855: fltTcaEqptcapacityBdUsage1yearTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412880: fltTcaEqptcapacityBdUsage5minTotalTr

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412881: fltTcaEqptcapacityBdUsage15minTotalTr

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412882: fltTcaEqptcapacityBdUsage1hTotalTr

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412883: fltTcaEqptcapacityBdUsage1dTotalTr

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412884: fltTcaEqptcapacityBdUsage1wTotalTr

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412885: fltTcaEqptcapacityBdUsage1moTotalTr

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412886: fltTcaEqptcapacityBdUsage1qtrTotalTr

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412887: fltTcaEqptcapacityBdUsage1yearTotalTr

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412888: fltTcaEqptcapacityBdUsage5minTotalRate

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412889: fltTcaEqptcapacityBdUsage15minTotalRate

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412890: fltTcaEqptcapacityBdUsage1hTotalRate

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412891: fltTcaEqptcapacityBdUsage1dTotalRate

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412892: fltTcaEqptcapacityBdUsage1wTotalRate

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412893: fltTcaEqptcapacityBdUsage1moTotalRate

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412894: fltTcaEqptcapacityBdUsage1qtrTotalRate

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412895: fltTcaEqptcapacityBdUsage1yearTotalRate

Severity: variable

Explanation: This fault is caused by "Total Bridge domain entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Bridge domain entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412968: fltTcaEqptcapacityEpgUsage5minTotalCapLast

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412969: fltTcaEqptcapacityEpgUsage15minTotalCapLast

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412970: fltTcaEqptcapacityEpgUsage1hTotalCapLast

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412971: fltTcaEqptcapacityEpgUsage1dTotalCapLast

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412972: fltTcaEqptcapacityEpgUsage1wTotalCapLast

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412973: fltTcaEqptcapacityEpgUsage1moTotalCapLast

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412974: fltTcaEqptcapacityEpgUsage1qtrTotalCapLast

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412975: fltTcaEqptcapacityEpgUsage1yearTotalCapLast

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412984: fltTcaEqptcapacityEpgUsage5minTotalCapCum

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412985: fltTcaEqptcapacityEpgUsage15minTotalCapCum

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412986: fltTcaEqptcapacityEpgUsage1hTotalCapCum

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412987: fltTcaEqptcapacityEpgUsage1dTotalCapCum

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412988: fltTcaEqptcapacityEpgUsage1wTotalCapCum

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412989: fltTcaEqptcapacityEpgUsage1moTotalCapCum

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412990: fltTcaEqptcapacityEpgUsage1qtrTotalCapCum

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412991: fltTcaEqptcapacityEpgUsage1yearTotalCapCum

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412992: fltTcaEqptcapacityEpgUsage5minTotalCapPer

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412993: fltTcaEqptcapacityEpgUsage15minTotalCapPer

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412994: fltTcaEqptcapacityEpgUsage1hTotalCapPer

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412995: fltTcaEqptcapacityEpgUsage1dTotalCapPer

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412996: fltTcaEqptcapacityEpgUsage1wTotalCapPer

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412997: fltTcaEqptcapacityEpgUsage1moTotalCapPer

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412998: fltTcaEqptcapacityEpgUsage1qtrTotalCapPer

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F412999: fltTcaEqptcapacityEpgUsage1yearTotalCapPer

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4130: fltFvNwIssuesExtendedConfig-failed

Severity: minor

Explanation: This fault occurs when an End Point Group / End Point Security Group is incompletely or incorrectly configured.

Recommended Action: If you see this fault, take the following actions:

1. Look at the configuration for issues
2. For multipodDirect-portState-mismatch issue, LLDP Oper state on the usage field of l1PhysIf is not set to 'direct-mpod'
3. For FBR-route-not-present issue, add FBR route before configuring FBR member
4. For further details, refer to the documentation for fv:NwIssuesExtended
5. Verify the End Point Group configuration is correct and complete
6. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F413000: fltTcaEqptcapacityEpgUsage5minTotalCapMin

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413001: fltTcaEqptcapacityEpgUsage15minTotalCapMin

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413002: fltTcaEqptcapacityEpgUsage1hTotalCapMin

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413003: fltTcaEqptcapacityEpgUsage1dTotalCapMin

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413004: fltTcaEqptcapacityEpgUsage1wTotalCapMin

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413005: fltTcaEqptcapacityEpgUsage1moTotalCapMin

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413006: fltTcaEqptcapacityEpgUsage1qtrTotalCapMin

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413007: fltTcaEqptcapacityEpgUsage1yearTotalCapMin

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413008: fltTcaEqptcapacityEpgUsage5minTotalCapMax

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413009: fltTcaEqptcapacityEpgUsage15minTotalCapMax

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413010: fltTcaEqptcapacityEpgUsage1hTotalCapMax

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413011: fltTcaEqptcapacityEpgUsage1dTotalCapMax

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413012: fltTcaEqptcapacityEpgUsage1wTotalCapMax

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413013: fltTcaEqptcapacityEpgUsage1moTotalCapMax

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413014: fltTcaEqptcapacityEpgUsage1qtrTotalCapMax

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413015: fltTcaEqptcapacityEpgUsage1yearTotalCapMax

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413016: fltTcaEqptcapacityEpgUsage5minTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413017: fltTcaEqptcapacityEpgUsage15minTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413018: fltTcaEqptcapacityEpgUsage1hTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413019: fltTcaEqptcapacityEpgUsage1dTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413020: fltTcaEqptcapacityEpgUsage1wTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413021: fltTcaEqptcapacityEpgUsage1moTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413022: fltTcaEqptcapacityEpgUsage1qtrTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413023: fltTcaEqptcapacityEpgUsage1yearTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413048: fltTcaEqptcapacityEpgUsage5minTotalCapTr

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413049: fltTcaEqptcapacityEpgUsage15minTotalCapTr

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413050: fltTcaEqptcapacityEpgUsage1hTotalCapTr

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413051: fltTcaEqptcapacityEpgUsage1dTotalCapTr

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413052: fltTcaEqptcapacityEpgUsage1wTotalCapTr

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413053: fltTcaEqptcapacityEpgUsage1moTotalCapTr

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413054: fltTcaEqptcapacityEpgUsage1qtrTotalCapTr

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413055: fltTcaEqptcapacityEpgUsage1yearTotalCapTr

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413056: fltTcaEqptcapacityEpgUsage5minTotalCapRate

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413057: fltTcaEqptcapacityEpgUsage15minTotalCapRate

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413058: fltTcaEqptcapacityEpgUsage1hTotalCapRate

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413059: fltTcaEqptcapacityEpgUsage1dTotalCapRate

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413060: fltTcaEqptcapacityEpgUsage1wTotalCapRate

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413061: fltTcaEqptcapacityEpgUsage1moTotalCapRate

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413062: fltTcaEqptcapacityEpgUsage1qtrTotalCapRate

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413063: fltTcaEqptcapacityEpgUsage1yearTotalCapRate

Severity: variable

Explanation: This fault is caused by "Endpoint groups capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Endpoint groups capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413136: fltTcaEqptcapacityEpgUsage5minTotalLast

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413137: fltTcaEqptcapacityEpgUsage15minTotalLast

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413138: fltTcaEqptcapacityEpgUsage1hTotalLast

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413139: fltTcaEqptcapacityEpgUsage1dTotalLast

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413140: fltTcaEqptcapacityEpgUsage1wTotalLast

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413141: fltTcaEqptcapacityEpgUsage1moTotalLast

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413142: fltTcaEqptcapacityEpgUsage1qtrTotalLast

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413143: fltTcaEqptcapacityEpgUsage1yearTotalLast

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413152: fltTcaEqptcapacityEpgUsage5minTotalCum

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413153: fltTcaEqptcapacityEpgUsage15minTotalCum

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413154: fltTcaEqptcapacityEpgUsage1hTotalCum

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413155: fltTcaEqptcapacityEpgUsage1dTotalCum

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413156: fltTcaEqptcapacityEpgUsage1wTotalCum

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413157: fltTcaEqptcapacityEpgUsage1moTotalCum

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413158: fltTcaEqptcapacityEpgUsage1qtrTotalCum

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413159: fltTcaEqptcapacityEpgUsage1yearTotalCum

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413160: fltTcaEqptcapacityEpgUsage5minTotalPer

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413161: fltTcaEqptcapacityEpgUsage15minTotalPer

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413162: fltTcaEqptcapacityEpgUsage1hTotalPer

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413163: fltTcaEqptcapacityEpgUsage1dTotalPer

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413164: fltTcaEqptcapacityEpgUsage1wTotalPer

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413165: fltTcaEqptcapacityEpgUsage1moTotalPer

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413166: fltTcaEqptcapacityEpgUsage1qtrTotalPer

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413167: fltTcaEqptcapacityEpgUsage1yearTotalPer

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413168: fltTcaEqptcapacityEpgUsage5minTotalMin

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413169: fltTcaEqptcapacityEpgUsage15minTotalMin

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413170: fltTcaEqptcapacityEpgUsage1hTotalMin

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413171: fltTcaEqptcapacityEpgUsage1dTotalMin

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413172: fltTcaEqptcapacityEpgUsage1wTotalMin

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413173: fltTcaEqptcapacityEpgUsage1moTotalMin

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413174: fltTcaEqptcapacityEpgUsage1qtrTotalMin

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413175: fltTcaEqptcapacityEpgUsage1yearTotalMin

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413176: fltTcaEqptcapacityEpgUsage5minTotalMax

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413177: fltTcaEqptcapacityEpgUsage15minTotalMax

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413178: fltTcaEqptcapacityEpgUsage1hTotalMax

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413179: fltTcaEqptcapacityEpgUsage1dTotalMax

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413180: fltTcaEqptcapacityEpgUsage1wTotalMax

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413181: fltTcaEqptcapacityEpgUsage1moTotalMax

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413182: fltTcaEqptcapacityEpgUsage1qtrTotalMax

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413183: fltTcaEqptcapacityEpgUsage1yearTotalMax

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413184: fltTcaEqptcapacityEpgUsage5minTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413185: fltTcaEqptcapacityEpgUsage15minTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413186: fltTcaEqptcapacityEpgUsage1hTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413187: fltTcaEqptcapacityEpgUsage1dTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413188: fltTcaEqptcapacityEpgUsage1wTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413189: fltTcaEqptcapacityEpgUsage1moTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413190: fltTcaEqptcapacityEpgUsage1qtrTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413191: fltTcaEqptcapacityEpgUsage1yearTotalAvg

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413216: fltTcaEqptcapacityEpgUsage5minTotalTr

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413217: fltTcaEqptcapacityEpgUsage15minTotalTr

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413218: fltTcaEqptcapacityEpgUsage1hTotalTr

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413219: fltTcaEqptcapacityEpgUsage1dTotalTr

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413220: fltTcaEqptcapacityEpgUsage1wTotalTr

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413221: fltTcaEqptcapacityEpgUsage1moTotalTr

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413222: fltTcaEqptcapacityEpgUsage1qtrTotalTr

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413223: fltTcaEqptcapacityEpgUsage1yearTotalTr

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413224: fltTcaEqptcapacityEpgUsage5minTotalRate

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413225: fltTcaEqptcapacityEpgUsage15minTotalRate

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413226: fltTcaEqptcapacityEpgUsage1hTotalRate

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413227: fltTcaEqptcapacityEpgUsage1dTotalRate

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413228: fltTcaEqptcapacityEpgUsage1wTotalRate

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413229: fltTcaEqptcapacityEpgUsage1moTotalRate

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413230: fltTcaEqptcapacityEpgUsage1qtrTotalRate

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413231: fltTcaEqptcapacityEpgUsage1yearTotalRate

Severity: variable

Explanation: This fault is caused by "Total Endpoint groups rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Endpoint groups" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4133: fltFvStCEpConfigurationError

Severity: major

Explanation: This fault occurs when a Static Endpoint (fvStCEp) Tag is not correctly configured.

Recommended Action: If you see this fault, take the following actions:

1. multiple-tag-selector-match: The configured Policy Tag(s) match more than one ESG TagSelctor *when there is no pre-existing match*. As a result, the endpoint is not classified into any ESGs because each endpoint can be associated to only one ESG TagSelector. Remove or update Policy Tag(s) (tagTag) or ESG TagSelctor (fvTagSelector) so that there is only one Policy Tag matching an ESG TagSelector for this endpoint.
2. multiple-tag-selector-match-after-single-match: The configured Policy Tag(s) match more than one ESG TagSelctor *after the endpoint was already classified to an ESG via a previously configured tag*. As a result, the endpoint remains classified to the original ESG and the new Tag(s) matching other ESG TagSelectors will be ignored at the moment. Remove or update Policy Tag(s) (tagTag) or ESG TagSelctor (fvTagSelector) so that there is only one Policy Tag matching an ESG TagSelector for this endpoint.
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F413304: fltTcaEqptcapacityPortUsage5minTotalCapLast

Severity: variable

Explanation: This fault is caused by "Physical ports capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413305: fltTcaEqptcapacityPortUsage15minTotalCapLast

Severity: variable

Explanation: This fault is caused by "Physical ports capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413306: fltTcaEqptcapacityPortUsage1hTotalCapLast

Severity: variable

Explanation: This fault is caused by "Physical ports capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413307: fltTcaEqptcapacityPortUsage1dTotalCapLast

Severity: variable

Explanation: This fault is caused by "Physical ports capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413308: fltTcaEqptcapacityPortUsage1wTotalCapLast

Severity: variable

Explanation: This fault is caused by "Physical ports capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413309: fltTcaEqptcapacityPortUsage1moTotalCapLast

Severity: variable

Explanation: This fault is caused by "Physical ports capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413310: fltTcaEqptcapacityPortUsage1qtrTotalCapLast

Severity: variable

Explanation: This fault is caused by "Physical ports capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413311: fltTcaEqptcapacityPortUsage1yearTotalCapLast

Severity: variable

Explanation: This fault is caused by "Physical ports capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413320: fltTcaEqptcapacityPortUsage5minTotalCapCum

Severity: variable

Explanation: This fault is caused by "Physical ports capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413321: fltTcaEqptcapacityPortUsage15minTotalCapCum

Severity: variable

Explanation: This fault is caused by "Physical ports capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413322: fltTcaEqptcapacityPortUsage1hTotalCapCum

Severity: variable

Explanation: This fault is caused by "Physical ports capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413323: fltTcaEqptcapacityPortUsage1dTotalCapCum

Severity: variable

Explanation: This fault is caused by "Physical ports capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413324: fltTcaEqptcapacityPortUsage1wTotalCapCum

Severity: variable

Explanation: This fault is caused by "Physical ports capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413325: fltTcaEqptcapacityPortUsage1moTotalCapCum

Severity: variable

Explanation: This fault is caused by "Physical ports capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413326: fltTcaEqptcapacityPortUsage1qtrTotalCapCum

Severity: variable

Explanation: This fault is caused by "Physical ports capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413327: fltTcaEqptcapacityPortUsage1yearTotalCapCum

Severity: variable

Explanation: This fault is caused by "Physical ports capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413328: fltTcaEqptcapacityPortUsage5minTotalCapPer

Severity: variable

Explanation: This fault is caused by "Physical ports capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413329: fltTcaEqptcapacityPortUsage15minTotalCapPer

Severity: variable

Explanation: This fault is caused by "Physical ports capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413330: fltTcaEqptcapacityPortUsage1hTotalCapPer

Severity: variable

Explanation: This fault is caused by "Physical ports capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413331: fltTcaEqptcapacityPortUsage1dTotalCapPer

Severity: variable

Explanation: This fault is caused by "Physical ports capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413332: fltTcaEqptcapacityPortUsage1wTotalCapPer

Severity: variable

Explanation: This fault is caused by "Physical ports capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413333: fltTcaEqptcapacityPortUsage1moTotalCapPer

Severity: variable

Explanation: This fault is caused by "Physical ports capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413334: fltTcaEqptcapacityPortUsage1qtrTotalCapPer

Severity: variable

Explanation: This fault is caused by "Physical ports capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413335: fltTcaEqptcapacityPortUsage1yearTotalCapPer

Severity: variable

Explanation: This fault is caused by "Physical ports capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413336: fltTcaEqptcapacityPortUsage5minTotalCapMin

Severity: variable

Explanation: This fault is caused by "Physical ports capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413337: fltTcaEqptcapacityPortUsage15minTotalCapMin

Severity: variable

Explanation: This fault is caused by "Physical ports capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413338: fltTcaEqptcapacityPortUsage1hTotalCapMin

Severity: variable

Explanation: This fault is caused by "Physical ports capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413339: fltTcaEqptcapacityPortUsage1dTotalCapMin

Severity: variable

Explanation: This fault is caused by "Physical ports capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413340: fltTcaEqptcapacityPortUsage1wTotalCapMin

Severity: variable

Explanation: This fault is caused by "Physical ports capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413341: fltTcaEqptcapacityPortUsage1moTotalCapMin

Severity: variable

Explanation: This fault is caused by "Physical ports capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413342: fltTcaEqptcapacityPortUsage1qtrTotalCapMin

Severity: variable

Explanation: This fault is caused by "Physical ports capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413343: fltTcaEqptcapacityPortUsage1yearTotalCapMin

Severity: variable

Explanation: This fault is caused by "Physical ports capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413344: fltTcaEqptcapacityPortUsage5minTotalCapMax

Severity: variable

Explanation: This fault is caused by "Physical ports capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413345: fltTcaEqptcapacityPortUsage15minTotalCapMax

Severity: variable

Explanation: This fault is caused by "Physical ports capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413346: fltTcaEqptcapacityPortUsage1hTotalCapMax

Severity: variable

Explanation: This fault is caused by "Physical ports capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413347: fltTcaEqptcapacityPortUsage1dTotalCapMax

Severity: variable

Explanation: This fault is caused by "Physical ports capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413348: fltTcaEqptcapacityPortUsage1wTotalCapMax

Severity: variable

Explanation: This fault is caused by "Physical ports capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413349: fltTcaEqptcapacityPortUsage1moTotalCapMax

Severity: variable

Explanation: This fault is caused by "Physical ports capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413350: fltTcaEqptcapacityPortUsage1qtrTotalCapMax

Severity: variable

Explanation: This fault is caused by "Physical ports capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413351: fltTcaEqptcapacityPortUsage1yearTotalCapMax

Severity: variable

Explanation: This fault is caused by "Physical ports capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413352: fltTcaEqptcapacityPortUsage5minTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Physical ports capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413353: fltTcaEqptcapacityPortUsage15minTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Physical ports capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413354: fltTcaEqptcapacityPortUsage1hTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Physical ports capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413355: fltTcaEqptcapacityPortUsage1dTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Physical ports capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413356: fltTcaEqptcapacityPortUsage1wTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Physical ports capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413357: fltTcaEqptcapacityPortUsage1moTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Physical ports capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413358: fltTcaEqptcapacityPortUsage1qtrTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Physical ports capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413359: fltTcaEqptcapacityPortUsage1yearTotalCapAvg

Severity: variable

Explanation: This fault is caused by "Physical ports capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413384: fltTcaEqptcapacityPortUsage5minTotalCapTr

Severity: variable

Explanation: This fault is caused by "Physical ports capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413385: fltTcaEqptcapacityPortUsage15minTotalCapTr

Severity: variable

Explanation: This fault is caused by "Physical ports capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413386: fltTcaEqptcapacityPortUsage1hTotalCapTr

Severity: variable

Explanation: This fault is caused by "Physical ports capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413387: fltTcaEqptcapacityPortUsage1dTotalCapTr

Severity: variable

Explanation: This fault is caused by "Physical ports capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413388: fltTcaEqptcapacityPortUsage1wTotalCapTr

Severity: variable

Explanation: This fault is caused by "Physical ports capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413389: fltTcaEqptcapacityPortUsage1moTotalCapTr

Severity: variable

Explanation: This fault is caused by "Physical ports capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413390: fltTcaEqptcapacityPortUsage1qtrTotalCapTr

Severity: variable

Explanation: This fault is caused by "Physical ports capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413391: fltTcaEqptcapacityPortUsage1yearTotalCapTr

Severity: variable

Explanation: This fault is caused by "Physical ports capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413392: fltTcaEqptcapacityPortUsage5minTotalCapRate

Severity: variable

Explanation: This fault is caused by "Physical ports capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413393: fltTcaEqptcapacityPortUsage15minTotalCapRate

Severity: variable

Explanation: This fault is caused by "Physical ports capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413394: fltTcaEqptcapacityPortUsage1hTotalCapRate

Severity: variable

Explanation: This fault is caused by "Physical ports capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413395: fltTcaEqptcapacityPortUsage1dTotalCapRate

Severity: variable

Explanation: This fault is caused by "Physical ports capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413396: fltTcaEqptcapacityPortUsage1wTotalCapRate

Severity: variable

Explanation: This fault is caused by "Physical ports capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413397: fltTcaEqptcapacityPortUsage1moTotalCapRate

Severity: variable

Explanation: This fault is caused by "Physical ports capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413398: fltTcaEqptcapacityPortUsage1qtrTotalCapRate

Severity: variable

Explanation: This fault is caused by "Physical ports capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413399: fltTcaEqptcapacityPortUsage1yearTotalCapRate

Severity: variable

Explanation: This fault is caused by "Physical ports capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Physical ports capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4134: fltFvEpMacTagConfigurationError

Severity: major

Explanation: This fault occurs when an Endpoint (fvEpMacTag) Tag is not correctly configured.

Recommended Action: If you see this fault, take the following actions:

1. multiple-tag-selector-match: The configured Policy Tag(s) match more than one ESG TagSelctor *when there is no pre-existing match*. As a result, the endpoint is not classified into any ESGs because each endpoint can be associated to only one ESG TagSelector. Remove or update Policy Tag(s) (tagTag) or ESG TagSelctor (fvTagSelector) so that there is only one Policy Tag matching an ESG TagSelector for this endpoint.
2. multiple-tag-selector-match-after-single-match: The configured Policy Tag(s) match more than one ESG TagSelctor *after the endpoint was already classified to an ESG via a previously configured tag*. As a result, the endpoint remains classified to the original ESG and the new Tag(s) matching other ESG TagSelectors will be ignored at the moment. Remove or update Policy Tag(s) (tagTag) or ESG TagSelctor (fvTagSelector) so that there is only one Policy Tag matching an ESG TagSelector for this endpoint.
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F413472: fltTcaEqptcapacityPortUsage5minTotalLast

Severity: variable

Explanation: This fault is caused by "Total physical ports used current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413473: fltTcaEqptcapacityPortUsage15minTotalLast

Severity: variable

Explanation: This fault is caused by "Total physical ports used current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413474: fltTcaEqptcapacityPortUsage1hTotalLast

Severity: variable

Explanation: This fault is caused by "Total physical ports used current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413475: fltTcaEqptcapacityPortUsage1dTotalLast

Severity: variable

Explanation: This fault is caused by "Total physical ports used current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413476: fltTcaEqptcapacityPortUsage1wTotalLast

Severity: variable

Explanation: This fault is caused by "Total physical ports used current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413477: fltTcaEqptcapacityPortUsage1moTotalLast

Severity: variable

Explanation: This fault is caused by "Total physical ports used current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413478: fltTcaEqptcapacityPortUsage1qtrTotalLast

Severity: variable

Explanation: This fault is caused by "Total physical ports used current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413479: fltTcaEqptcapacityPortUsage1yearTotalLast

Severity: variable

Explanation: This fault is caused by "Total physical ports used current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413488: fltTcaEqptcapacityPortUsage5minTotalCum

Severity: variable

Explanation: This fault is caused by "Total physical ports used cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413489: fltTcaEqptcapacityPortUsage15minTotalCum

Severity: variable

Explanation: This fault is caused by "Total physical ports used cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413490: fltTcaEqptcapacityPortUsage1hTotalCum

Severity: variable

Explanation: This fault is caused by "Total physical ports used cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413491: fltTcaEqptcapacityPortUsage1dTotalCum

Severity: variable

Explanation: This fault is caused by "Total physical ports used cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413492: fltTcaEqptcapacityPortUsage1wTotalCum

Severity: variable

Explanation: This fault is caused by "Total physical ports used cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413493: fltTcaEqptcapacityPortUsage1moTotalCum

Severity: variable

Explanation: This fault is caused by "Total physical ports used cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413494: fltTcaEqptcapacityPortUsage1qtrTotalCum

Severity: variable

Explanation: This fault is caused by "Total physical ports used cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413495: fltTcaEqptcapacityPortUsage1yearTotalCum

Severity: variable

Explanation: This fault is caused by "Total physical ports used cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413496: fltTcaEqptcapacityPortUsage5minTotalPer

Severity: variable

Explanation: This fault is caused by "Total physical ports used periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413497: fltTcaEqptcapacityPortUsage15minTotalPer

Severity: variable

Explanation: This fault is caused by "Total physical ports used periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413498: fltTcaEqptcapacityPortUsage1hTotalPer

Severity: variable

Explanation: This fault is caused by "Total physical ports used periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413499: fltTcaEqptcapacityPortUsage1dTotalPer

Severity: variable

Explanation: This fault is caused by "Total physical ports used periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4135: fltFvEpIpTagConfigurationError

Severity: major

Explanation: This fault occurs when an Endpoint (fvEpIpTag) Tag is not correctly configured.

Recommended Action: If you see this fault, take the following actions:

1. multiple-tag-selector-match: The configured Policy Tag(s) match more than one ESG TagSelctor *when there is no pre-existing match*. As a result, the endpoint is not classified into any ESGs because each endpoint can be associated to only one ESG TagSelector. Remove or update Policy Tag(s) (tagTag) or ESG TagSelctor (fvTagSelector) so that there is only one Policy Tag matching an ESG TagSelector for this endpoint.
2. multiple-tag-selector-match-after-single-match: The configured Policy Tag(s) match more than one ESG TagSelctor *after the endpoint was already classified to an ESG via a previously configured tag*. As a result, the endpoint remains classified to the original ESG and the new Tag(s) matching other ESG TagSelectors will be ignored at the moment. Remove or update Policy Tag(s) (tagTag) or ESG TagSelctor (fvTagSelector) so that there is only one Policy Tag matching an ESG TagSelector for this endpoint.
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F413500: fltTcaEqptcapacityPortUsage1wTotalPer

Severity: variable

Explanation: This fault is caused by "Total physical ports used periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413501: fltTcaEqptcapacityPortUsage1moTotalPer

Severity: variable

Explanation: This fault is caused by "Total physical ports used periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413502: fltTcaEqptcapacityPortUsage1qtrTotalPer

Severity: variable

Explanation: This fault is caused by "Total physical ports used periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413503: fltTcaEqptcapacityPortUsage1yearTotalPer

Severity: variable

Explanation: This fault is caused by "Total physical ports used periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413504: fltTcaEqptcapacityPortUsage5minTotalMin

Severity: variable

Explanation: This fault is caused by "Total physical ports used minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413505: fltTcaEqptcapacityPortUsage15minTotalMin

Severity: variable

Explanation: This fault is caused by "Total physical ports used minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413506: fltTcaEqptcapacityPortUsage1hTotalMin

Severity: variable

Explanation: This fault is caused by "Total physical ports used minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413507: fltTcaEqptcapacityPortUsage1dTotalMin

Severity: variable

Explanation: This fault is caused by "Total physical ports used minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413508: fltTcaEqptcapacityPortUsage1wTotalMin

Severity: variable

Explanation: This fault is caused by "Total physical ports used minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413509: fltTcaEqptcapacityPortUsage1moTotalMin

Severity: variable

Explanation: This fault is caused by "Total physical ports used minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413510: fltTcaEqptcapacityPortUsage1qtrTotalMin

Severity: variable

Explanation: This fault is caused by "Total physical ports used minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413511: fltTcaEqptcapacityPortUsage1yearTotalMin

Severity: variable

Explanation: This fault is caused by "Total physical ports used minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413512: fltTcaEqptcapacityPortUsage5minTotalMax

Severity: variable

Explanation: This fault is caused by "Total physical ports used maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413513: fltTcaEqptcapacityPortUsage15minTotalMax

Severity: variable

Explanation: This fault is caused by "Total physical ports used maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413514: fltTcaEqptcapacityPortUsage1hTotalMax

Severity: variable

Explanation: This fault is caused by "Total physical ports used maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413515: fltTcaEqptcapacityPortUsage1dTotalMax

Severity: variable

Explanation: This fault is caused by "Total physical ports used maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413516: fltTcaEqptcapacityPortUsage1wTotalMax

Severity: variable

Explanation: This fault is caused by "Total physical ports used maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413517: fltTcaEqptcapacityPortUsage1moTotalMax

Severity: variable

Explanation: This fault is caused by "Total physical ports used maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413518: fltTcaEqptcapacityPortUsage1qtrTotalMax

Severity: variable

Explanation: This fault is caused by "Total physical ports used maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413519: fltTcaEqptcapacityPortUsage1yearTotalMax

Severity: variable

Explanation: This fault is caused by "Total physical ports used maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413520: fltTcaEqptcapacityPortUsage5minTotalAvg

Severity: variable

Explanation: This fault is caused by "Total physical ports used average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413521: fltTcaEqptcapacityPortUsage15minTotalAvg

Severity: variable

Explanation: This fault is caused by "Total physical ports used average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413522: fltTcaEqptcapacityPortUsage1hTotalAvg

Severity: variable

Explanation: This fault is caused by "Total physical ports used average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413523: fltTcaEqptcapacityPortUsage1dTotalAvg

Severity: variable

Explanation: This fault is caused by "Total physical ports used average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413524: fltTcaEqptcapacityPortUsage1wTotalAvg

Severity: variable

Explanation: This fault is caused by "Total physical ports used average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413525: fltTcaEqptcapacityPortUsage1moTotalAvg

Severity: variable

Explanation: This fault is caused by "Total physical ports used average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413526: fltTcaEqptcapacityPortUsage1qtrTotalAvg

Severity: variable

Explanation: This fault is caused by "Total physical ports used average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413527: fltTcaEqptcapacityPortUsage1yearTotalAvg

Severity: variable

Explanation: This fault is caused by "Total physical ports used average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413552: fltTcaEqptcapacityPortUsage5minTotalTr

Severity: variable

Explanation: This fault is caused by "Total physical ports used trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413553: fltTcaEqptcapacityPortUsage15minTotalTr

Severity: variable

Explanation: This fault is caused by "Total physical ports used trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413554: fltTcaEqptcapacityPortUsage1hTotalTr

Severity: variable

Explanation: This fault is caused by "Total physical ports used trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413555: fltTcaEqptcapacityPortUsage1dTotalTr

Severity: variable

Explanation: This fault is caused by "Total physical ports used trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413556: fltTcaEqptcapacityPortUsage1wTotalTr

Severity: variable

Explanation: This fault is caused by "Total physical ports used trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413557: fltTcaEqptcapacityPortUsage1moTotalTr

Severity: variable

Explanation: This fault is caused by "Total physical ports used trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413558: fltTcaEqptcapacityPortUsage1qtrTotalTr

Severity: variable

Explanation: This fault is caused by "Total physical ports used trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413559: fltTcaEqptcapacityPortUsage1yearTotalTr

Severity: variable

Explanation: This fault is caused by "Total physical ports used trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413560: fltTcaEqptcapacityPortUsage5minTotalRate

Severity: variable

Explanation: This fault is caused by "Total physical ports used rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413561: fltTcaEqptcapacityPortUsage15minTotalRate

Severity: variable

Explanation: This fault is caused by "Total physical ports used rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413562: fltTcaEqptcapacityPortUsage1hTotalRate

Severity: variable

Explanation: This fault is caused by "Total physical ports used rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413563: fltTcaEqptcapacityPortUsage1dTotalRate

Severity: variable

Explanation: This fault is caused by "Total physical ports used rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413564: fltTcaEqptcapacityPortUsage1wTotalRate

Severity: variable

Explanation: This fault is caused by "Total physical ports used rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413565: fltTcaEqptcapacityPortUsage1moTotalRate

Severity: variable

Explanation: This fault is caused by "Total physical ports used rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413566: fltTcaEqptcapacityPortUsage1qtrTotalRate

Severity: variable

Explanation: This fault is caused by "Total physical ports used rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413567: fltTcaEqptcapacityPortUsage1yearTotalRate

Severity: variable

Explanation: This fault is caused by "Total physical ports used rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total physical ports used" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4136: fltHinventoryRsAcctToFolderResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F413640: fltTcaEqptcapacityVrfUsage5minTotalCapLast

Severity: variable

Explanation: This fault is caused by "VRF entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413641: fltTcaEqptcapacityVrfUsage15minTotalCapLast

Severity: variable

Explanation: This fault is caused by "VRF entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413642: fltTcaEqptcapacityVrfUsage1hTotalCapLast

Severity: variable

Explanation: This fault is caused by "VRF entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413643: fltTcaEqptcapacityVrfUsage1dTotalCapLast

Severity: variable

Explanation: This fault is caused by "VRF entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413644: fltTcaEqptcapacityVrfUsage1wTotalCapLast

Severity: variable

Explanation: This fault is caused by "VRF entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413645: fltTcaEqptcapacityVrfUsage1moTotalCapLast

Severity: variable

Explanation: This fault is caused by "VRF entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413646: fltTcaEqptcapacityVrfUsage1qtrTotalCapLast

Severity: variable

Explanation: This fault is caused by "VRF entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413647: fltTcaEqptcapacityVrfUsage1yearTotalCapLast

Severity: variable

Explanation: This fault is caused by "VRF entries capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413656: fltTcaEqptcapacityVrfUsage5minTotalCapCum

Severity: variable

Explanation: This fault is caused by "VRF entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413657: fltTcaEqptcapacityVrfUsage15minTotalCapCum

Severity: variable

Explanation: This fault is caused by "VRF entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413658: fltTcaEqptcapacityVrfUsage1hTotalCapCum

Severity: variable

Explanation: This fault is caused by "VRF entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413659: fltTcaEqptcapacityVrfUsage1dTotalCapCum

Severity: variable

Explanation: This fault is caused by "VRF entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413660: fltTcaEqptcapacityVrfUsage1wTotalCapCum

Severity: variable

Explanation: This fault is caused by "VRF entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413661: fltTcaEqptcapacityVrfUsage1moTotalCapCum

Severity: variable

Explanation: This fault is caused by "VRF entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413662: fltTcaEqptcapacityVrfUsage1qtrTotalCapCum

Severity: variable

Explanation: This fault is caused by "VRF entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413663: fltTcaEqptcapacityVrfUsage1yearTotalCapCum

Severity: variable

Explanation: This fault is caused by "VRF entries capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413664: fltTcaEqptcapacityVrfUsage5minTotalCapPer

Severity: variable

Explanation: This fault is caused by "VRF entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413665: fltTcaEqptcapacityVrfUsage15minTotalCapPer

Severity: variable

Explanation: This fault is caused by "VRF entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413666: fltTcaEqptcapacityVrfUsage1hTotalCapPer

Severity: variable

Explanation: This fault is caused by "VRF entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413667: fltTcaEqptcapacityVrfUsage1dTotalCapPer

Severity: variable

Explanation: This fault is caused by "VRF entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413668: fltTcaEqptcapacityVrfUsage1wTotalCapPer

Severity: variable

Explanation: This fault is caused by "VRF entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413669: fltTcaEqptcapacityVrfUsage1moTotalCapPer

Severity: variable

Explanation: This fault is caused by "VRF entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413670: fltTcaEqptcapacityVrfUsage1qtrTotalCapPer

Severity: variable

Explanation: This fault is caused by "VRF entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413671: fltTcaEqptcapacityVrfUsage1yearTotalCapPer

Severity: variable

Explanation: This fault is caused by "VRF entries capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413672: fltTcaEqptcapacityVrfUsage5minTotalCapMin

Severity: variable

Explanation: This fault is caused by "VRF entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413673: fltTcaEqptcapacityVrfUsage15minTotalCapMin

Severity: variable

Explanation: This fault is caused by "VRF entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413674: fltTcaEqptcapacityVrfUsage1hTotalCapMin

Severity: variable

Explanation: This fault is caused by "VRF entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413675: fltTcaEqptcapacityVrfUsage1dTotalCapMin

Severity: variable

Explanation: This fault is caused by "VRF entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413676: fltTcaEqptcapacityVrfUsage1wTotalCapMin

Severity: variable

Explanation: This fault is caused by "VRF entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413677: fltTcaEqptcapacityVrfUsage1moTotalCapMin

Severity: variable

Explanation: This fault is caused by "VRF entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413678: fltTcaEqptcapacityVrfUsage1qtrTotalCapMin

Severity: variable

Explanation: This fault is caused by "VRF entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413679: fltTcaEqptcapacityVrfUsage1yearTotalCapMin

Severity: variable

Explanation: This fault is caused by "VRF entries capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413680: fltTcaEqptcapacityVrfUsage5minTotalCapMax

Severity: variable

Explanation: This fault is caused by "VRF entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413681: fltTcaEqptcapacityVrfUsage15minTotalCapMax

Severity: variable

Explanation: This fault is caused by "VRF entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413682: fltTcaEqptcapacityVrfUsage1hTotalCapMax

Severity: variable

Explanation: This fault is caused by "VRF entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413683: fltTcaEqptcapacityVrfUsage1dTotalCapMax

Severity: variable

Explanation: This fault is caused by "VRF entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413684: fltTcaEqptcapacityVrfUsage1wTotalCapMax

Severity: variable

Explanation: This fault is caused by "VRF entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413685: fltTcaEqptcapacityVrfUsage1moTotalCapMax

Severity: variable

Explanation: This fault is caused by "VRF entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413686: fltTcaEqptcapacityVrfUsage1qtrTotalCapMax

Severity: variable

Explanation: This fault is caused by "VRF entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413687: fltTcaEqptcapacityVrfUsage1yearTotalCapMax

Severity: variable

Explanation: This fault is caused by "VRF entries capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413688: fltTcaEqptcapacityVrfUsage5minTotalCapAvg

Severity: variable

Explanation: This fault is caused by "VRF entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413689: fltTcaEqptcapacityVrfUsage15minTotalCapAvg

Severity: variable

Explanation: This fault is caused by "VRF entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413690: fltTcaEqptcapacityVrfUsage1hTotalCapAvg

Severity: variable

Explanation: This fault is caused by "VRF entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413691: fltTcaEqptcapacityVrfUsage1dTotalCapAvg

Severity: variable

Explanation: This fault is caused by "VRF entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413692: fltTcaEqptcapacityVrfUsage1wTotalCapAvg

Severity: variable

Explanation: This fault is caused by "VRF entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413693: fltTcaEqptcapacityVrfUsage1moTotalCapAvg

Severity: variable

Explanation: This fault is caused by "VRF entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413694: fltTcaEqptcapacityVrfUsage1qtrTotalCapAvg

Severity: variable

Explanation: This fault is caused by "VRF entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413695: fltTcaEqptcapacityVrfUsage1yearTotalCapAvg

Severity: variable

Explanation: This fault is caused by "VRF entries capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413720: fltTcaEqptcapacityVrfUsage5minTotalCapTr

Severity: variable

Explanation: This fault is caused by "VRF entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413721: fltTcaEqptcapacityVrfUsage15minTotalCapTr

Severity: variable

Explanation: This fault is caused by "VRF entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413722: fltTcaEqptcapacityVrfUsage1hTotalCapTr

Severity: variable

Explanation: This fault is caused by "VRF entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413723: fltTcaEqptcapacityVrfUsage1dTotalCapTr

Severity: variable

Explanation: This fault is caused by "VRF entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413724: fltTcaEqptcapacityVrfUsage1wTotalCapTr

Severity: variable

Explanation: This fault is caused by "VRF entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413725: fltTcaEqptcapacityVrfUsage1moTotalCapTr

Severity: variable

Explanation: This fault is caused by "VRF entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413726: fltTcaEqptcapacityVrfUsage1qtrTotalCapTr

Severity: variable

Explanation: This fault is caused by "VRF entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413727: fltTcaEqptcapacityVrfUsage1yearTotalCapTr

Severity: variable

Explanation: This fault is caused by "VRF entries capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413728: fltTcaEqptcapacityVrfUsage5minTotalCapRate

Severity: variable

Explanation: This fault is caused by "VRF entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413729: fltTcaEqptcapacityVrfUsage15minTotalCapRate

Severity: variable

Explanation: This fault is caused by "VRF entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413730: fltTcaEqptcapacityVrfUsage1hTotalCapRate

Severity: variable

Explanation: This fault is caused by "VRF entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413731: fltTcaEqptcapacityVrfUsage1dTotalCapRate

Severity: variable

Explanation: This fault is caused by "VRF entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413732: fltTcaEqptcapacityVrfUsage1wTotalCapRate

Severity: variable

Explanation: This fault is caused by "VRF entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413733: fltTcaEqptcapacityVrfUsage1moTotalCapRate

Severity: variable

Explanation: This fault is caused by "VRF entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413734: fltTcaEqptcapacityVrfUsage1qtrTotalCapRate

Severity: variable

Explanation: This fault is caused by "VRF entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413735: fltTcaEqptcapacityVrfUsage1yearTotalCapRate

Severity: variable

Explanation: This fault is caused by "VRF entries capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "VRF entries capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413808: fltTcaEqptcapacityVrfUsage5minTotalLast

Severity: variable

Explanation: This fault is caused by "Total VRF entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413809: fltTcaEqptcapacityVrfUsage15minTotalLast

Severity: variable

Explanation: This fault is caused by "Total VRF entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413810: fltTcaEqptcapacityVrfUsage1hTotalLast

Severity: variable

Explanation: This fault is caused by "Total VRF entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413811: fltTcaEqptcapacityVrfUsage1dTotalLast

Severity: variable

Explanation: This fault is caused by "Total VRF entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413812: fltTcaEqptcapacityVrfUsage1wTotalLast

Severity: variable

Explanation: This fault is caused by "Total VRF entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413813: fltTcaEqptcapacityVrfUsage1moTotalLast

Severity: variable

Explanation: This fault is caused by "Total VRF entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413814: fltTcaEqptcapacityVrfUsage1qtrTotalLast

Severity: variable

Explanation: This fault is caused by "Total VRF entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413815: fltTcaEqptcapacityVrfUsage1yearTotalLast

Severity: variable

Explanation: This fault is caused by "Total VRF entries current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413824: fltTcaEqptcapacityVrfUsage5minTotalCum

Severity: variable

Explanation: This fault is caused by "Total VRF entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413825: fltTcaEqptcapacityVrfUsage15minTotalCum

Severity: variable

Explanation: This fault is caused by "Total VRF entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413826: fltTcaEqptcapacityVrfUsage1hTotalCum

Severity: variable

Explanation: This fault is caused by "Total VRF entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413827: fltTcaEqptcapacityVrfUsage1dTotalCum

Severity: variable

Explanation: This fault is caused by "Total VRF entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413828: fltTcaEqptcapacityVrfUsage1wTotalCum

Severity: variable

Explanation: This fault is caused by "Total VRF entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413829: fltTcaEqptcapacityVrfUsage1moTotalCum

Severity: variable

Explanation: This fault is caused by "Total VRF entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413830: fltTcaEqptcapacityVrfUsage1qtrTotalCum

Severity: variable

Explanation: This fault is caused by "Total VRF entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413831: fltTcaEqptcapacityVrfUsage1yearTotalCum

Severity: variable

Explanation: This fault is caused by "Total VRF entries cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413832: fltTcaEqptcapacityVrfUsage5minTotalPer

Severity: variable

Explanation: This fault is caused by "Total VRF entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413833: fltTcaEqptcapacityVrfUsage15minTotalPer

Severity: variable

Explanation: This fault is caused by "Total VRF entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413834: fltTcaEqptcapacityVrfUsage1hTotalPer

Severity: variable

Explanation: This fault is caused by "Total VRF entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413835: fltTcaEqptcapacityVrfUsage1dTotalPer

Severity: variable

Explanation: This fault is caused by "Total VRF entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413836: fltTcaEqptcapacityVrfUsage1wTotalPer

Severity: variable

Explanation: This fault is caused by "Total VRF entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413837: fltTcaEqptcapacityVrfUsage1moTotalPer

Severity: variable

Explanation: This fault is caused by "Total VRF entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413838: fltTcaEqptcapacityVrfUsage1qtrTotalPer

Severity: variable

Explanation: This fault is caused by "Total VRF entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413839: fltTcaEqptcapacityVrfUsage1yearTotalPer

Severity: variable

Explanation: This fault is caused by "Total VRF entries periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413840: fltTcaEqptcapacityVrfUsage5minTotalMin

Severity: variable

Explanation: This fault is caused by "Total VRF entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413841: fltTcaEqptcapacityVrfUsage15minTotalMin

Severity: variable

Explanation: This fault is caused by "Total VRF entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413842: fltTcaEqptcapacityVrfUsage1hTotalMin

Severity: variable

Explanation: This fault is caused by "Total VRF entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413843: fltTcaEqptcapacityVrfUsage1dTotalMin

Severity: variable

Explanation: This fault is caused by "Total VRF entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413844: fltTcaEqptcapacityVrfUsage1wTotalMin

Severity: variable

Explanation: This fault is caused by "Total VRF entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413845: fltTcaEqptcapacityVrfUsage1moTotalMin

Severity: variable

Explanation: This fault is caused by "Total VRF entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413846: fltTcaEqptcapacityVrfUsage1qtrTotalMin

Severity: variable

Explanation: This fault is caused by "Total VRF entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413847: fltTcaEqptcapacityVrfUsage1yearTotalMin

Severity: variable

Explanation: This fault is caused by "Total VRF entries minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413848: fltTcaEqptcapacityVrfUsage5minTotalMax

Severity: variable

Explanation: This fault is caused by "Total VRF entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413849: fltTcaEqptcapacityVrfUsage15minTotalMax

Severity: variable

Explanation: This fault is caused by "Total VRF entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413850: fltTcaEqptcapacityVrfUsage1hTotalMax

Severity: variable

Explanation: This fault is caused by "Total VRF entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413851: fltTcaEqptcapacityVrfUsage1dTotalMax

Severity: variable

Explanation: This fault is caused by "Total VRF entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413852: fltTcaEqptcapacityVrfUsage1wTotalMax

Severity: variable

Explanation: This fault is caused by "Total VRF entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413853: fltTcaEqptcapacityVrfUsage1moTotalMax

Severity: variable

Explanation: This fault is caused by "Total VRF entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413854: fltTcaEqptcapacityVrfUsage1qtrTotalMax

Severity: variable

Explanation: This fault is caused by "Total VRF entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413855: fltTcaEqptcapacityVrfUsage1yearTotalMax

Severity: variable

Explanation: This fault is caused by "Total VRF entries maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413856: fltTcaEqptcapacityVrfUsage5minTotalAvg

Severity: variable

Explanation: This fault is caused by "Total VRF entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413857: fltTcaEqptcapacityVrfUsage15minTotalAvg

Severity: variable

Explanation: This fault is caused by "Total VRF entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413858: fltTcaEqptcapacityVrfUsage1hTotalAvg

Severity: variable

Explanation: This fault is caused by "Total VRF entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413859: fltTcaEqptcapacityVrfUsage1dTotalAvg

Severity: variable

Explanation: This fault is caused by "Total VRF entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413860: fltTcaEqptcapacityVrfUsage1wTotalAvg

Severity: variable

Explanation: This fault is caused by "Total VRF entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413861: fltTcaEqptcapacityVrfUsage1moTotalAvg

Severity: variable

Explanation: This fault is caused by "Total VRF entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413862: fltTcaEqptcapacityVrfUsage1qtrTotalAvg

Severity: variable

Explanation: This fault is caused by "Total VRF entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413863: fltTcaEqptcapacityVrfUsage1yearTotalAvg

Severity: variable

Explanation: This fault is caused by "Total VRF entries average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413888: fltTcaEqptcapacityVrfUsage5minTotalTr

Severity: variable

Explanation: This fault is caused by "Total VRF entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413889: fltTcaEqptcapacityVrfUsage15minTotalTr

Severity: variable

Explanation: This fault is caused by "Total VRF entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413890: fltTcaEqptcapacityVrfUsage1hTotalTr

Severity: variable

Explanation: This fault is caused by "Total VRF entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413891: fltTcaEqptcapacityVrfUsage1dTotalTr

Severity: variable

Explanation: This fault is caused by "Total VRF entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413892: fltTcaEqptcapacityVrfUsage1wTotalTr

Severity: variable

Explanation: This fault is caused by "Total VRF entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413893: fltTcaEqptcapacityVrfUsage1moTotalTr

Severity: variable

Explanation: This fault is caused by "Total VRF entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413894: fltTcaEqptcapacityVrfUsage1qtrTotalTr

Severity: variable

Explanation: This fault is caused by "Total VRF entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413895: fltTcaEqptcapacityVrfUsage1yearTotalTr

Severity: variable

Explanation: This fault is caused by "Total VRF entries trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413896: fltTcaEqptcapacityVrfUsage5minTotalRate

Severity: variable

Explanation: This fault is caused by "Total VRF entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413897: fltTcaEqptcapacityVrfUsage15minTotalRate

Severity: variable

Explanation: This fault is caused by "Total VRF entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413898: fltTcaEqptcapacityVrfUsage1hTotalRate

Severity: variable

Explanation: This fault is caused by "Total VRF entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413899: fltTcaEqptcapacityVrfUsage1dTotalRate

Severity: variable

Explanation: This fault is caused by "Total VRF entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413900: fltTcaEqptcapacityVrfUsage1wTotalRate

Severity: variable

Explanation: This fault is caused by "Total VRF entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413901: fltTcaEqptcapacityVrfUsage1moTotalRate

Severity: variable

Explanation: This fault is caused by "Total VRF entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413902: fltTcaEqptcapacityVrfUsage1qtrTotalRate

Severity: variable

Explanation: This fault is caused by "Total VRF entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F413903: fltTcaEqptcapacityVrfUsage1yearTotalRate

Severity: variable

Explanation: This fault is caused by "Total VRF entries rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total VRF entries" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4140: fltDhcpDiscoveryHealthDhcpPoolOwnershipCheckFailed

Severity: major

Explanation: This fault is raised when there are more than one APIC as owners for a dhcp pool

Recommended Action: If you see this fault, take the following actions:

1. Collect a **tech-support** file and contact Cisco TAC.

F4141: fltDhcpDiscoveryHealthDhcpClientLeaseCheckFailed

Severity: warning

Explanation: This fault is raised when there is dhcp client without a lease

Recommended Action: If you see this fault, take the following actions:

1. Collect a **tech-support** file and contact Cisco TAC.

F4142: fltDhcpDiscoveryHealthDhcpIPPoolIdAssignerMismatch

Severity: warning

Explanation: This fault is raised when there is a dhcp pool ip assigner id mismatch in fnv and idmgr

Recommended Action: If you see this fault, take the following actions:

1. Collect a **tech-support** file and contact Cisco TAC.

F4143: fltDhcpDiscoveryHealthDhcpClientZeroNodeId

Severity: warning

Explanation: This fault is raised when there is a dhcp client with node id 0 with valid ip

Recommended Action: If you see this fault, take the following actions:

1. Collect a **tech-support** file and contact Cisco TAC.

F4144: fltDhcpDiscoveryHealthDhcpdFnvUnSync

Severity: major

Explanation: This fault is raised when dhcp client and pool are not in sync with fnv data

Recommended Action: If you see this fault, take the following actions:

1. Collect a **tech-support** file and contact Cisco TAC.

F4146: fltPatchingPatchPatchingCfgCtrl

Severity: warning

Explanation: This fault is caused by a hardware programming failure

Recommended Action: The system will periodically retry to program the hardware. If the failure is due to lack of hardware resources, free up resources by removing or simplifying existing configuration. One of the reasons for lack of hardware resources is exhaustion of VLANs in ToR. These hardware resources can be examined by looking at capacity dashboard under OPERATIONS tab. Please check entry against the number of VLANs in output of command show vlan summary issued at node where fault is generated to check whether it exceeds above advertised node capacity.

F4148: fltEqptCardOperStChange

Severity: minor

Explanation: LC/FM in failed state

Recommended Action: To recover from this fault, try the following actions

1. Reload LC/FM
2. If the above action did not resolve the issue, collect tech-support and contact Cisco TAC

F4149: fltEqptSlotOperStChange

Severity: minor

Explanation: This fault occurs when you remove LC/FM/SUP/SC from the slot

Recommended Action: To recover from this fault, try the following actions

1. Insert the card back in the slot
2. If the above action did not resolve the issue, collect tech-support and contact Cisco TAC

F4154: fltSynceInstPlatformSupportFault

Severity: major

Explanation: This fault occurs when the syncE feature is enabled on unsupported platform.

Recommended Action: To recover from this fault, enable feature only on supported platform.

F4155: fltSynceEthIfQlFault

Severity: major

Explanation: This fault occurs when the QL option config on interface differs with QL option config at node level

Recommended Action: To recover from this fault, make sure to have same QL option config on both interface and node level

F4156: fltApPluginAppValidationDeferred

Severity: minor

Explanation: Application validation deferred.

Recommended Action: APP validation keeps getting retried until all the information needed to validate an App image are available. Please raise a TAC case only if this fault does not get cleared within one hour.

F4158: fltInfraRsPtpInstPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4159: fltCloudRsGatewayRouterPToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F415944: fltTcaBgpPeerBytes5minByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415945: fltTcaBgpPeerBytes15minByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415946: fltTcaBgpPeerBytes1hByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415947: fltTcaBgpPeerBytes1dByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415948: fltTcaBgpPeerBytes1wByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415949: fltTcaBgpPeerBytes1moByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415950: fltTcaBgpPeerBytes1qtrByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415951: fltTcaBgpPeerBytes1yearByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415960: fltTcaBgpPeerBytes5minByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415961: fltTcaBgpPeerBytes15minByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415962: fltTcaBgpPeerBytes1hByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415963: fltTcaBgpPeerBytes1dByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415964: fltTcaBgpPeerBytes1wByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415965: fltTcaBgpPeerBytes1moByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415966: fltTcaBgpPeerBytes1qtrByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415967: fltTcaBgpPeerBytes1yearByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415968: fltTcaBgpPeerBytes5minByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415969: fltTcaBgpPeerBytes15minByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415970: fltTcaBgpPeerBytes1hByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415971: fltTcaBgpPeerBytes1dByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415972: fltTcaBgpPeerBytes1wByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415973: fltTcaBgpPeerBytes1moByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415974: fltTcaBgpPeerBytes1qtrByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415975: fltTcaBgpPeerBytes1yearByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415976: fltTcaBgpPeerBytes5minByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415977: fltTcaBgpPeerBytes15minByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415978: fltTcaBgpPeerBytes1hByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415979: fltTcaBgpPeerBytes1dByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415980: fltTcaBgpPeerBytes1wByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415981: fltTcaBgpPeerBytes1moByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415982: fltTcaBgpPeerBytes1qtrByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415983: fltTcaBgpPeerBytes1yearByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415984: fltTcaBgpPeerBytes5minByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415985: fltTcaBgpPeerBytes15minByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415986: fltTcaBgpPeerBytes1hByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415987: fltTcaBgpPeerBytes1dByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415988: fltTcaBgpPeerBytes1wByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415989: fltTcaBgpPeerBytes1moByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415990: fltTcaBgpPeerBytes1qtrByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415991: fltTcaBgpPeerBytes1yearByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415992: fltTcaBgpPeerBytes5minByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415993: fltTcaBgpPeerBytes15minByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415994: fltTcaBgpPeerBytes1hByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415995: fltTcaBgpPeerBytes1dByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415996: fltTcaBgpPeerBytes1wByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415997: fltTcaBgpPeerBytes1moByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415998: fltTcaBgpPeerBytes1qtrByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F415999: fltTcaBgpPeerBytes1yearByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4160: fltHcloudRsCtxConnectToCtxPeerResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F416024: fltTcaBgpPeerBytes5minByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416025: fltTcaBgpPeerBytes15minByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416026: fltTcaBgpPeerBytes1hByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416027: fltTcaBgpPeerBytes1dByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416028: fltTcaBgpPeerBytes1wByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416029: fltTcaBgpPeerBytes1moByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416030: fltTcaBgpPeerBytes1qtrByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416031: fltTcaBgpPeerBytes1yearByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416032: fltTcaBgpPeerBytes5minByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416033: fltTcaBgpPeerBytes15minByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416034: fltTcaBgpPeerBytes1hByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416035: fltTcaBgpPeerBytes1dByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416036: fltTcaBgpPeerBytes1wByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416037: fltTcaBgpPeerBytes1moByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416038: fltTcaBgpPeerBytes1qtrByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416039: fltTcaBgpPeerBytes1yearByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4161: fltHcloudRsCtxConnectToRouteTableResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F416112: fltTcaBgpPeerBytes5minByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416113: fltTcaBgpPeerBytes15minByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416114: fltTcaBgpPeerBytes1hByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416115: fltTcaBgpPeerBytes1dByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416116: fltTcaBgpPeerBytes1wByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416117: fltTcaBgpPeerBytes1moByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416118: fltTcaBgpPeerBytes1qtrByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416119: fltTcaBgpPeerBytes1yearByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416128: fltTcaBgpPeerBytes5minByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416129: fltTcaBgpPeerBytes15minByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416130: fltTcaBgpPeerBytes1hByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416131: fltTcaBgpPeerBytes1dByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416132: fltTcaBgpPeerBytes1wByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416133: fltTcaBgpPeerBytes1moByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416134: fltTcaBgpPeerBytes1qtrByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416135: fltTcaBgpPeerBytes1yearByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416136: fltTcaBgpPeerBytes5minByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416137: fltTcaBgpPeerBytes15minByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416138: fltTcaBgpPeerBytes1hByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416139: fltTcaBgpPeerBytes1dByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416140: fltTcaBgpPeerBytes1wByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416141: fltTcaBgpPeerBytes1moByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416142: fltTcaBgpPeerBytes1qtrByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416143: fltTcaBgpPeerBytes1yearByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416144: fltTcaBgpPeerBytes5minByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416145: fltTcaBgpPeerBytes15minByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416146: fltTcaBgpPeerBytes1hByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416147: fltTcaBgpPeerBytes1dByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416148: fltTcaBgpPeerBytes1wByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416149: fltTcaBgpPeerBytes1moByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416150: fltTcaBgpPeerBytes1qtrByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416151: fltTcaBgpPeerBytes1yearByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416152: fltTcaBgpPeerBytes5minByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416153: fltTcaBgpPeerBytes15minByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416154: fltTcaBgpPeerBytes1hByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416155: fltTcaBgpPeerBytes1dByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416156: fltTcaBgpPeerBytes1wByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416157: fltTcaBgpPeerBytes1moByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416158: fltTcaBgpPeerBytes1qtrByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416159: fltTcaBgpPeerBytes1yearByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416160: fltTcaBgpPeerBytes5minByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416161: fltTcaBgpPeerBytes15minByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416162: fltTcaBgpPeerBytes1hByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416163: fltTcaBgpPeerBytes1dByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416164: fltTcaBgpPeerBytes1wByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416165: fltTcaBgpPeerBytes1moByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416166: fltTcaBgpPeerBytes1qtrByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416167: fltTcaBgpPeerBytes1yearByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416192: fltTcaBgpPeerBytes5minByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416193: fltTcaBgpPeerBytes15minByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416194: fltTcaBgpPeerBytes1hByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416195: fltTcaBgpPeerBytes1dByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416196: fltTcaBgpPeerBytes1wByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416197: fltTcaBgpPeerBytes1moByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416198: fltTcaBgpPeerBytes1qtrByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416199: fltTcaBgpPeerBytes1yearByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4162: fltHcloudRsCtxConnectPeerToNwIntfResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F416200: fltTcaBgpPeerBytes5minByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416201: fltTcaBgpPeerBytes15minByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416202: fltTcaBgpPeerBytes1hByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416203: fltTcaBgpPeerBytes1dByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416204: fltTcaBgpPeerBytes1wByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416205: fltTcaBgpPeerBytes1moByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416206: fltTcaBgpPeerBytes1qtrByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416207: fltTcaBgpPeerBytes1yearByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416280: fltTcaBgpPeerBytes5minByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416281: fltTcaBgpPeerBytes15minByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416282: fltTcaBgpPeerBytes1hByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416283: fltTcaBgpPeerBytes1dByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416284: fltTcaBgpPeerBytes1wByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416285: fltTcaBgpPeerBytes1moByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416286: fltTcaBgpPeerBytes1qtrByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416287: fltTcaBgpPeerBytes1yearByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416296: fltTcaBgpPeerBytes5minByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416297: fltTcaBgpPeerBytes15minByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416298: fltTcaBgpPeerBytes1hByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416299: fltTcaBgpPeerBytes1dByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4163: fltHcloudRsCtxPeerToCtxResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F416300: fltTcaBgpPeerBytes1wByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416301: fltTcaBgpPeerBytes1moByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416302: fltTcaBgpPeerBytes1qtrByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416303: fltTcaBgpPeerBytes1yearByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416304: fltTcaBgpPeerBytes5minByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416305: fltTcaBgpPeerBytes15minByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416306: fltTcaBgpPeerBytes1hByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416307: fltTcaBgpPeerBytes1dByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416308: fltTcaBgpPeerBytes1wByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416309: fltTcaBgpPeerBytes1moByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416310: fltTcaBgpPeerBytes1qtrByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416311: fltTcaBgpPeerBytes1yearByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416312: fltTcaBgpPeerBytes5minByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416313: fltTcaBgpPeerBytes15minByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416314: fltTcaBgpPeerBytes1hByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416315: fltTcaBgpPeerBytes1dByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416316: fltTcaBgpPeerBytes1wByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416317: fltTcaBgpPeerBytes1moByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416318: fltTcaBgpPeerBytes1qtrByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416319: fltTcaBgpPeerBytes1yearByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416320: fltTcaBgpPeerBytes5minByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416321: fltTcaBgpPeerBytes15minByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416322: fltTcaBgpPeerBytes1hByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416323: fltTcaBgpPeerBytes1dByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416324: fltTcaBgpPeerBytes1wByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416325: fltTcaBgpPeerBytes1moByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416326: fltTcaBgpPeerBytes1qtrByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416327: fltTcaBgpPeerBytes1yearByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416328: fltTcaBgpPeerBytes5minByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416329: fltTcaBgpPeerBytes15minByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416330: fltTcaBgpPeerBytes1hByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416331: fltTcaBgpPeerBytes1dByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416332: fltTcaBgpPeerBytes1wByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416333: fltTcaBgpPeerBytes1moByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416334: fltTcaBgpPeerBytes1qtrByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416335: fltTcaBgpPeerBytes1yearByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416360: fltTcaBgpPeerBytes5minByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416361: fltTcaBgpPeerBytes15minByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416362: fltTcaBgpPeerBytes1hByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416363: fltTcaBgpPeerBytes1dByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416364: fltTcaBgpPeerBytes1wByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416365: fltTcaBgpPeerBytes1moByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416366: fltTcaBgpPeerBytes1qtrByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416367: fltTcaBgpPeerBytes1yearByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416368: fltTcaBgpPeerBytes5minByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416369: fltTcaBgpPeerBytes15minByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416370: fltTcaBgpPeerBytes1hByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416371: fltTcaBgpPeerBytes1dByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416372: fltTcaBgpPeerBytes1wByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416373: fltTcaBgpPeerBytes1moByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416374: fltTcaBgpPeerBytes1qtrByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416375: fltTcaBgpPeerBytes1yearByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4164: fltHcloudRsCtxPeerToExtCtxResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F416448: fltTcaBgpPeerBytes5minByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416449: fltTcaBgpPeerBytes15minByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416450: fltTcaBgpPeerBytes1hByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416451: fltTcaBgpPeerBytes1dByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416452: fltTcaBgpPeerBytes1wByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416453: fltTcaBgpPeerBytes1moByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416454: fltTcaBgpPeerBytes1qtrByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416455: fltTcaBgpPeerBytes1yearByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416464: fltTcaBgpPeerBytes5minByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416465: fltTcaBgpPeerBytes15minByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416466: fltTcaBgpPeerBytes1hByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416467: fltTcaBgpPeerBytes1dByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416468: fltTcaBgpPeerBytes1wByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416469: fltTcaBgpPeerBytes1moByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416470: fltTcaBgpPeerBytes1qtrByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416471: fltTcaBgpPeerBytes1yearByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416472: fltTcaBgpPeerBytes5minByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416473: fltTcaBgpPeerBytes15minByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416474: fltTcaBgpPeerBytes1hByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416475: fltTcaBgpPeerBytes1dByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416476: fltTcaBgpPeerBytes1wByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416477: fltTcaBgpPeerBytes1moByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416478: fltTcaBgpPeerBytes1qtrByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416479: fltTcaBgpPeerBytes1yearByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416480: fltTcaBgpPeerBytes5minByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416481: fltTcaBgpPeerBytes15minByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416482: fltTcaBgpPeerBytes1hByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416483: fltTcaBgpPeerBytes1dByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416484: fltTcaBgpPeerBytes1wByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416485: fltTcaBgpPeerBytes1moByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416486: fltTcaBgpPeerBytes1qtrByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416487: fltTcaBgpPeerBytes1yearByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416488: fltTcaBgpPeerBytes5minByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416489: fltTcaBgpPeerBytes15minByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416490: fltTcaBgpPeerBytes1hByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416491: fltTcaBgpPeerBytes1dByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416492: fltTcaBgpPeerBytes1wByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416493: fltTcaBgpPeerBytes1moByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416494: fltTcaBgpPeerBytes1qtrByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416495: fltTcaBgpPeerBytes1yearByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416496: fltTcaBgpPeerBytes5minByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416497: fltTcaBgpPeerBytes15minByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416498: fltTcaBgpPeerBytes1hByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416499: fltTcaBgpPeerBytes1dByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4165: fltHcloudRsNextHopToCtxPeerResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F416500: fltTcaBgpPeerBytes1wByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416501: fltTcaBgpPeerBytes1moByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416502: fltTcaBgpPeerBytes1qtrByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416503: fltTcaBgpPeerBytes1yearByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416528: fltTcaBgpPeerBytes5minByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416529: fltTcaBgpPeerBytes15minByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416530: fltTcaBgpPeerBytes1hByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416531: fltTcaBgpPeerBytes1dByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416532: fltTcaBgpPeerBytes1wByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416533: fltTcaBgpPeerBytes1moByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416534: fltTcaBgpPeerBytes1qtrByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416535: fltTcaBgpPeerBytes1yearByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416536: fltTcaBgpPeerBytes5minByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416537: fltTcaBgpPeerBytes15minByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416538: fltTcaBgpPeerBytes1hByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416539: fltTcaBgpPeerBytes1dByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416540: fltTcaBgpPeerBytes1wByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416541: fltTcaBgpPeerBytes1moByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416542: fltTcaBgpPeerBytes1qtrByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416543: fltTcaBgpPeerBytes1yearByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4166: fltSvcredirDestmonConfigStFailed

Severity: major

Explanation: This fault occurs when a PBR service destination is used with multiple tracking types

Recommended Action: To recover from this fault, try the following actions

1. Use the destination with single tracking type
2. To recover, delete this destination from all PBR policies where its used, then add the destination with correct tracking type

F416616: fltTcaBgpPeerKeepAlive5minKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416617: fltTcaBgpPeerKeepAlive15minKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416618: fltTcaBgpPeerKeepAlive1hKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416619: fltTcaBgpPeerKeepAlive1dKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416620: fltTcaBgpPeerKeepAlive1wKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416621: fltTcaBgpPeerKeepAlive1moKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416622: fltTcaBgpPeerKeepAlive1qtrKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416623: fltTcaBgpPeerKeepAlive1yearKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416632: fltTcaBgpPeerKeepAlive5minKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416633: fltTcaBgpPeerKeepAlive15minKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416634: fltTcaBgpPeerKeepAlive1hKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416635: fltTcaBgpPeerKeepAlive1dKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416636: fltTcaBgpPeerKeepAlive1wKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416637: fltTcaBgpPeerKeepAlive1moKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416638: fltTcaBgpPeerKeepAlive1qtrKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416639: fltTcaBgpPeerKeepAlive1yearKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416640: fltTcaBgpPeerKeepAlive5minKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416641: fltTcaBgpPeerKeepAlive15minKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416642: fltTcaBgpPeerKeepAlive1hKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416643: fltTcaBgpPeerKeepAlive1dKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416644: fltTcaBgpPeerKeepAlive1wKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416645: fltTcaBgpPeerKeepAlive1moKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416646: fltTcaBgpPeerKeepAlive1qtrKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416647: fltTcaBgpPeerKeepAlive1yearKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416648: fltTcaBgpPeerKeepAlive5minKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416649: fltTcaBgpPeerKeepAlive15minKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416650: fltTcaBgpPeerKeepAlive1hKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416651: fltTcaBgpPeerKeepAlive1dKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416652: fltTcaBgpPeerKeepAlive1wKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416653: fltTcaBgpPeerKeepAlive1moKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416654: fltTcaBgpPeerKeepAlive1qtrKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416655: fltTcaBgpPeerKeepAlive1yearKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416656: fltTcaBgpPeerKeepAlive5minKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416657: fltTcaBgpPeerKeepAlive15minKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416658: fltTcaBgpPeerKeepAlive1hKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416659: fltTcaBgpPeerKeepAlive1dKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416660: fltTcaBgpPeerKeepAlive1wKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416661: fltTcaBgpPeerKeepAlive1moKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416662: fltTcaBgpPeerKeepAlive1qtrKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416663: fltTcaBgpPeerKeepAlive1yearKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416664: fltTcaBgpPeerKeepAlive5minKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416665: fltTcaBgpPeerKeepAlive15minKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416666: fltTcaBgpPeerKeepAlive1hKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416667: fltTcaBgpPeerKeepAlive1dKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416668: fltTcaBgpPeerKeepAlive1wKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416669: fltTcaBgpPeerKeepAlive1moKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416670: fltTcaBgpPeerKeepAlive1qtrKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416671: fltTcaBgpPeerKeepAlive1yearKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416696: fltTcaBgpPeerKeepAlive5minKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416697: fltTcaBgpPeerKeepAlive15minKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416698: fltTcaBgpPeerKeepAlive1hKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416699: fltTcaBgpPeerKeepAlive1dKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416700: fltTcaBgpPeerKeepAlive1wKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416701: fltTcaBgpPeerKeepAlive1moKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416702: fltTcaBgpPeerKeepAlive1qtrKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416703: fltTcaBgpPeerKeepAlive1yearKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416704: fltTcaBgpPeerKeepAlive5minKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416705: fltTcaBgpPeerKeepAlive15minKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416706: fltTcaBgpPeerKeepAlive1hKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416707: fltTcaBgpPeerKeepAlive1dKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416708: fltTcaBgpPeerKeepAlive1wKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416709: fltTcaBgpPeerKeepAlive1moKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416710: fltTcaBgpPeerKeepAlive1qtrKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416711: fltTcaBgpPeerKeepAlive1yearKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416784: fltTcaBgpPeerKeepAlive5minKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416785: fltTcaBgpPeerKeepAlive15minKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416786: fltTcaBgpPeerKeepAlive1hKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416787: fltTcaBgpPeerKeepAlive1dKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416788: fltTcaBgpPeerKeepAlive1wKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416789: fltTcaBgpPeerKeepAlive1moKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416790: fltTcaBgpPeerKeepAlive1qtrKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416791: fltTcaBgpPeerKeepAlive1yearKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416800: fltTcaBgpPeerKeepAlive5minKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416801: fltTcaBgpPeerKeepAlive15minKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416802: fltTcaBgpPeerKeepAlive1hKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416803: fltTcaBgpPeerKeepAlive1dKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416804: fltTcaBgpPeerKeepAlive1wKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416805: fltTcaBgpPeerKeepAlive1moKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416806: fltTcaBgpPeerKeepAlive1qtrKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416807: fltTcaBgpPeerKeepAlive1yearKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416808: fltTcaBgpPeerKeepAlive5minKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416809: fltTcaBgpPeerKeepAlive15minKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416810: fltTcaBgpPeerKeepAlive1hKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416811: fltTcaBgpPeerKeepAlive1dKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416812: fltTcaBgpPeerKeepAlive1wKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416813: fltTcaBgpPeerKeepAlive1moKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416814: fltTcaBgpPeerKeepAlive1qtrKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416815: fltTcaBgpPeerKeepAlive1yearKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416816: fltTcaBgpPeerKeepAlive5minKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416817: fltTcaBgpPeerKeepAlive15minKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416818: fltTcaBgpPeerKeepAlive1hKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416819: fltTcaBgpPeerKeepAlive1dKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416820: fltTcaBgpPeerKeepAlive1wKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416821: fltTcaBgpPeerKeepAlive1moKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416822: fltTcaBgpPeerKeepAlive1qtrKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416823: fltTcaBgpPeerKeepAlive1yearKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416824: fltTcaBgpPeerKeepAlive5minKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416825: fltTcaBgpPeerKeepAlive15minKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416826: fltTcaBgpPeerKeepAlive1hKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416827: fltTcaBgpPeerKeepAlive1dKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416828: fltTcaBgpPeerKeepAlive1wKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416829: fltTcaBgpPeerKeepAlive1moKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416830: fltTcaBgpPeerKeepAlive1qtrKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416831: fltTcaBgpPeerKeepAlive1yearKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416832: fltTcaBgpPeerKeepAlive5minKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416833: fltTcaBgpPeerKeepAlive15minKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416834: fltTcaBgpPeerKeepAlive1hKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416835: fltTcaBgpPeerKeepAlive1dKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416836: fltTcaBgpPeerKeepAlive1wKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416837: fltTcaBgpPeerKeepAlive1moKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416838: fltTcaBgpPeerKeepAlive1qtrKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416839: fltTcaBgpPeerKeepAlive1yearKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416864: fltTcaBgpPeerKeepAlive5minKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416865: fltTcaBgpPeerKeepAlive15minKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416866: fltTcaBgpPeerKeepAlive1hKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416867: fltTcaBgpPeerKeepAlive1dKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416868: fltTcaBgpPeerKeepAlive1wKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416869: fltTcaBgpPeerKeepAlive1moKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416870: fltTcaBgpPeerKeepAlive1qtrKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416871: fltTcaBgpPeerKeepAlive1yearKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416872: fltTcaBgpPeerKeepAlive5minKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416873: fltTcaBgpPeerKeepAlive15minKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416874: fltTcaBgpPeerKeepAlive1hKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416875: fltTcaBgpPeerKeepAlive1dKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416876: fltTcaBgpPeerKeepAlive1wKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416877: fltTcaBgpPeerKeepAlive1moKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416878: fltTcaBgpPeerKeepAlive1qtrKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416879: fltTcaBgpPeerKeepAlive1yearKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416952: fltTcaBgpPeerMsg5minMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416953: fltTcaBgpPeerMsg15minMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416954: fltTcaBgpPeerMsg1hMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416955: fltTcaBgpPeerMsg1dMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416956: fltTcaBgpPeerMsg1wMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416957: fltTcaBgpPeerMsg1moMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416958: fltTcaBgpPeerMsg1qtrMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416959: fltTcaBgpPeerMsg1yearMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416968: fltTcaBgpPeerMsg5minMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416969: fltTcaBgpPeerMsg15minMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416970: fltTcaBgpPeerMsg1hMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416971: fltTcaBgpPeerMsg1dMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416972: fltTcaBgpPeerMsg1wMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416973: fltTcaBgpPeerMsg1moMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416974: fltTcaBgpPeerMsg1qtrMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416975: fltTcaBgpPeerMsg1yearMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416976: fltTcaBgpPeerMsg5minMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416977: fltTcaBgpPeerMsg15minMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416978: fltTcaBgpPeerMsg1hMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416979: fltTcaBgpPeerMsg1dMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416980: fltTcaBgpPeerMsg1wMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416981: fltTcaBgpPeerMsg1moMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416982: fltTcaBgpPeerMsg1qtrMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416983: fltTcaBgpPeerMsg1yearMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416984: fltTcaBgpPeerMsg5minMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416985: fltTcaBgpPeerMsg15minMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416986: fltTcaBgpPeerMsg1hMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416987: fltTcaBgpPeerMsg1dMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416988: fltTcaBgpPeerMsg1wMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416989: fltTcaBgpPeerMsg1moMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416990: fltTcaBgpPeerMsg1qtrMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416991: fltTcaBgpPeerMsg1yearMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416992: fltTcaBgpPeerMsg5minMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416993: fltTcaBgpPeerMsg15minMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416994: fltTcaBgpPeerMsg1hMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416995: fltTcaBgpPeerMsg1dMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416996: fltTcaBgpPeerMsg1wMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416997: fltTcaBgpPeerMsg1moMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416998: fltTcaBgpPeerMsg1qtrMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F416999: fltTcaBgpPeerMsg1yearMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417000: fltTcaBgpPeerMsg5minMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417001: fltTcaBgpPeerMsg15minMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417002: fltTcaBgpPeerMsg1hMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417003: fltTcaBgpPeerMsg1dMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417004: fltTcaBgpPeerMsg1wMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417005: fltTcaBgpPeerMsg1moMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417006: fltTcaBgpPeerMsg1qtrMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417007: fltTcaBgpPeerMsg1yearMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417032: fltTcaBgpPeerMsg5minMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417033: fltTcaBgpPeerMsg15minMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417034: fltTcaBgpPeerMsg1hMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417035: fltTcaBgpPeerMsg1dMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417036: fltTcaBgpPeerMsg1wMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417037: fltTcaBgpPeerMsg1moMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417038: fltTcaBgpPeerMsg1qtrMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417039: fltTcaBgpPeerMsg1yearMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417040: fltTcaBgpPeerMsg5minMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417041: fltTcaBgpPeerMsg15minMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417042: fltTcaBgpPeerMsg1hMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417043: fltTcaBgpPeerMsg1dMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417044: fltTcaBgpPeerMsg1wMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417045: fltTcaBgpPeerMsg1moMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417046: fltTcaBgpPeerMsg1qtrMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417047: fltTcaBgpPeerMsg1yearMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417120: fltTcaBgpPeerMsg5minMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417121: fltTcaBgpPeerMsg15minMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417122: fltTcaBgpPeerMsg1hMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417123: fltTcaBgpPeerMsg1dMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417124: fltTcaBgpPeerMsg1wMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417125: fltTcaBgpPeerMsg1moMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417126: fltTcaBgpPeerMsg1qtrMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417127: fltTcaBgpPeerMsg1yearMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417136: fltTcaBgpPeerMsg5minMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417137: fltTcaBgpPeerMsg15minMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417138: fltTcaBgpPeerMsg1hMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417139: fltTcaBgpPeerMsg1dMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417140: fltTcaBgpPeerMsg1wMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417141: fltTcaBgpPeerMsg1moMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417142: fltTcaBgpPeerMsg1qtrMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417143: fltTcaBgpPeerMsg1yearMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417144: fltTcaBgpPeerMsg5minMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417145: fltTcaBgpPeerMsg15minMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417146: fltTcaBgpPeerMsg1hMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417147: fltTcaBgpPeerMsg1dMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417148: fltTcaBgpPeerMsg1wMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417149: fltTcaBgpPeerMsg1moMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417150: fltTcaBgpPeerMsg1qtrMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417151: fltTcaBgpPeerMsg1yearMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417152: fltTcaBgpPeerMsg5minMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417153: fltTcaBgpPeerMsg15minMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417154: fltTcaBgpPeerMsg1hMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417155: fltTcaBgpPeerMsg1dMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417156: fltTcaBgpPeerMsg1wMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417157: fltTcaBgpPeerMsg1moMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417158: fltTcaBgpPeerMsg1qtrMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417159: fltTcaBgpPeerMsg1yearMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417160: fltTcaBgpPeerMsg5minMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417161: fltTcaBgpPeerMsg15minMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417162: fltTcaBgpPeerMsg1hMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417163: fltTcaBgpPeerMsg1dMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417164: fltTcaBgpPeerMsg1wMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417165: fltTcaBgpPeerMsg1moMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417166: fltTcaBgpPeerMsg1qtrMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417167: fltTcaBgpPeerMsg1yearMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417168: fltTcaBgpPeerMsg5minMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417169: fltTcaBgpPeerMsg15minMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417170: fltTcaBgpPeerMsg1hMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417171: fltTcaBgpPeerMsg1dMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417172: fltTcaBgpPeerMsg1wMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417173: fltTcaBgpPeerMsg1moMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417174: fltTcaBgpPeerMsg1qtrMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417175: fltTcaBgpPeerMsg1yearMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4172: fltPtpInstPtpHighCorrection

Severity: major

Explanation: This fault occurs when the PTP clock has high corrections.

Recommended Action: If you see this fault, take the following actions:

1. Disable/Enable PTP during Maintenance Window to recover TOR.
2. Make sure all top of Rack Switches and Spines have NTP configured and NTP synced to NTP Server.
3. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F417200: fltTcaBgpPeerMsg5minMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417201: fltTcaBgpPeerMsg15minMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417202: fltTcaBgpPeerMsg1hMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417203: fltTcaBgpPeerMsg1dMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417204: fltTcaBgpPeerMsg1wMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417205: fltTcaBgpPeerMsg1moMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417206: fltTcaBgpPeerMsg1qtrMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417207: fltTcaBgpPeerMsg1yearMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417208: fltTcaBgpPeerMsg5minMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417209: fltTcaBgpPeerMsg15minMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417210: fltTcaBgpPeerMsg1hMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417211: fltTcaBgpPeerMsg1dMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417212: fltTcaBgpPeerMsg1wMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417213: fltTcaBgpPeerMsg1moMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417214: fltTcaBgpPeerMsg1qtrMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417215: fltTcaBgpPeerMsg1yearMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417288: fltTcaBgpPeerMsg5minNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417289: fltTcaBgpPeerMsg15minNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417290: fltTcaBgpPeerMsg1hNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417291: fltTcaBgpPeerMsg1dNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417292: fltTcaBgpPeerMsg1wNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417293: fltTcaBgpPeerMsg1moNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417294: fltTcaBgpPeerMsg1qtrNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417295: fltTcaBgpPeerMsg1yearNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4173: fltPtpInstPtpTimeSyncLost

Severity: minor

Explanation: This fault occurs when the PTP lost synchronization with master clock.

Recommended Action: None

1. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F417304: fltTcaBgpPeerMsg5minNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417305: fltTcaBgpPeerMsg15minNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417306: fltTcaBgpPeerMsg1hNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417307: fltTcaBgpPeerMsg1dNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417308: fltTcaBgpPeerMsg1wNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417309: fltTcaBgpPeerMsg1moNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417310: fltTcaBgpPeerMsg1qtrNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417311: fltTcaBgpPeerMsg1yearNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417312: fltTcaBgpPeerMsg5minNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417313: fltTcaBgpPeerMsg15minNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417314: fltTcaBgpPeerMsg1hNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417315: fltTcaBgpPeerMsg1dNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417316: fltTcaBgpPeerMsg1wNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417317: fltTcaBgpPeerMsg1moNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417318: fltTcaBgpPeerMsg1qtrNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417319: fltTcaBgpPeerMsg1yearNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417320: fltTcaBgpPeerMsg5minNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417321: fltTcaBgpPeerMsg15minNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417322: fltTcaBgpPeerMsg1hNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417323: fltTcaBgpPeerMsg1dNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417324: fltTcaBgpPeerMsg1wNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417325: fltTcaBgpPeerMsg1moNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417326: fltTcaBgpPeerMsg1qtrNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417327: fltTcaBgpPeerMsg1yearNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417328: fltTcaBgpPeerMsg5minNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417329: fltTcaBgpPeerMsg15minNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417330: fltTcaBgpPeerMsg1hNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417331: fltTcaBgpPeerMsg1dNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417332: fltTcaBgpPeerMsg1wNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417333: fltTcaBgpPeerMsg1moNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417334: fltTcaBgpPeerMsg1qtrNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417335: fltTcaBgpPeerMsg1yearNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417336: fltTcaBgpPeerMsg5minNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417337: fltTcaBgpPeerMsg15minNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417338: fltTcaBgpPeerMsg1hNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417339: fltTcaBgpPeerMsg1dNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417340: fltTcaBgpPeerMsg1wNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417341: fltTcaBgpPeerMsg1moNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417342: fltTcaBgpPeerMsg1qtrNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417343: fltTcaBgpPeerMsg1yearNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417368: fltTcaBgpPeerMsg5minNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417369: fltTcaBgpPeerMsg15minNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417370: fltTcaBgpPeerMsg1hNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417371: fltTcaBgpPeerMsg1dNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417372: fltTcaBgpPeerMsg1wNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417373: fltTcaBgpPeerMsg1moNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417374: fltTcaBgpPeerMsg1qtrNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417375: fltTcaBgpPeerMsg1yearNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417376: fltTcaBgpPeerMsg5minNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417377: fltTcaBgpPeerMsg15minNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417378: fltTcaBgpPeerMsg1hNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417379: fltTcaBgpPeerMsg1dNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417380: fltTcaBgpPeerMsg1wNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417381: fltTcaBgpPeerMsg1moNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417382: fltTcaBgpPeerMsg1qtrNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417383: fltTcaBgpPeerMsg1yearNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417456: fltTcaBgpPeerMsg5minNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417457: fltTcaBgpPeerMsg15minNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417458: fltTcaBgpPeerMsg1hNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417459: fltTcaBgpPeerMsg1dNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417460: fltTcaBgpPeerMsg1wNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417461: fltTcaBgpPeerMsg1moNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417462: fltTcaBgpPeerMsg1qtrNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417463: fltTcaBgpPeerMsg1yearNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417472: fltTcaBgpPeerMsg5minNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417473: fltTcaBgpPeerMsg15minNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417474: fltTcaBgpPeerMsg1hNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417475: fltTcaBgpPeerMsg1dNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417476: fltTcaBgpPeerMsg1wNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417477: fltTcaBgpPeerMsg1moNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417478: fltTcaBgpPeerMsg1qtrNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417479: fltTcaBgpPeerMsg1yearNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417480: fltTcaBgpPeerMsg5minNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417481: fltTcaBgpPeerMsg15minNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417482: fltTcaBgpPeerMsg1hNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417483: fltTcaBgpPeerMsg1dNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417484: fltTcaBgpPeerMsg1wNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417485: fltTcaBgpPeerMsg1moNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417486: fltTcaBgpPeerMsg1qtrNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417487: fltTcaBgpPeerMsg1yearNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417488: fltTcaBgpPeerMsg5minNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417489: fltTcaBgpPeerMsg15minNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417490: fltTcaBgpPeerMsg1hNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417491: fltTcaBgpPeerMsg1dNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417492: fltTcaBgpPeerMsg1wNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417493: fltTcaBgpPeerMsg1moNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417494: fltTcaBgpPeerMsg1qtrNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417495: fltTcaBgpPeerMsg1yearNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417496: fltTcaBgpPeerMsg5minNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417497: fltTcaBgpPeerMsg15minNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417498: fltTcaBgpPeerMsg1hNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417499: fltTcaBgpPeerMsg1dNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4175: fltPtpInstPtpSyncConfigIsMissing

Severity: minor

Explanation: This fault occurs when PTP Telecom profile configured when syncE config doesn't exist .

Recommended Action: None

1. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F417500: fltTcaBgpPeerMsg1wNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417501: fltTcaBgpPeerMsg1moNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417502: fltTcaBgpPeerMsg1qtrNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417503: fltTcaBgpPeerMsg1yearNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417504: fltTcaBgpPeerMsg5minNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417505: fltTcaBgpPeerMsg15minNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417506: fltTcaBgpPeerMsg1hNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417507: fltTcaBgpPeerMsg1dNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417508: fltTcaBgpPeerMsg1wNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417509: fltTcaBgpPeerMsg1moNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417510: fltTcaBgpPeerMsg1qtrNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417511: fltTcaBgpPeerMsg1yearNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417536: fltTcaBgpPeerMsg5minNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417537: fltTcaBgpPeerMsg15minNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417538: fltTcaBgpPeerMsg1hNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417539: fltTcaBgpPeerMsg1dNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417540: fltTcaBgpPeerMsg1wNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417541: fltTcaBgpPeerMsg1moNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417542: fltTcaBgpPeerMsg1qtrNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417543: fltTcaBgpPeerMsg1yearNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417544: fltTcaBgpPeerMsg5minNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417545: fltTcaBgpPeerMsg15minNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417546: fltTcaBgpPeerMsg1hNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417547: fltTcaBgpPeerMsg1dNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417548: fltTcaBgpPeerMsg1wNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417549: fltTcaBgpPeerMsg1moNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417550: fltTcaBgpPeerMsg1qtrNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417551: fltTcaBgpPeerMsg1yearNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4176: fltPtpInstPtpTelecomProfileNotSupported

Severity: minor

Explanation: This fault occurs when the PTP Telecom profile is not supported.

Recommended Action: None

1. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F417624: fltTcaBgpPeerOpen5minOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417625: fltTcaBgpPeerOpen15minOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417626: fltTcaBgpPeerOpen1hOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417627: fltTcaBgpPeerOpen1dOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417628: fltTcaBgpPeerOpen1wOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417629: fltTcaBgpPeerOpen1moOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417630: fltTcaBgpPeerOpen1qtrOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417631: fltTcaBgpPeerOpen1yearOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417640: fltTcaBgpPeerOpen5minOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417641: fltTcaBgpPeerOpen15minOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417642: fltTcaBgpPeerOpen1hOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417643: fltTcaBgpPeerOpen1dOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417644: fltTcaBgpPeerOpen1wOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417645: fltTcaBgpPeerOpen1moOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417646: fltTcaBgpPeerOpen1qtrOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417647: fltTcaBgpPeerOpen1yearOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417648: fltTcaBgpPeerOpen5minOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417649: fltTcaBgpPeerOpen15minOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417650: fltTcaBgpPeerOpen1hOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417651: fltTcaBgpPeerOpen1dOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417652: fltTcaBgpPeerOpen1wOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417653: fltTcaBgpPeerOpen1moOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417654: fltTcaBgpPeerOpen1qtrOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417655: fltTcaBgpPeerOpen1yearOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417656: fltTcaBgpPeerOpen5minOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417657: fltTcaBgpPeerOpen15minOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417658: fltTcaBgpPeerOpen1hOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417659: fltTcaBgpPeerOpen1dOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417660: fltTcaBgpPeerOpen1wOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417661: fltTcaBgpPeerOpen1moOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417662: fltTcaBgpPeerOpen1qtrOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417663: fltTcaBgpPeerOpen1yearOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417664: fltTcaBgpPeerOpen5minOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417665: fltTcaBgpPeerOpen15minOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417666: fltTcaBgpPeerOpen1hOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417667: fltTcaBgpPeerOpen1dOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417668: fltTcaBgpPeerOpen1wOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417669: fltTcaBgpPeerOpen1moOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417670: fltTcaBgpPeerOpen1qtrOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417671: fltTcaBgpPeerOpen1yearOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417672: fltTcaBgpPeerOpen5minOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417673: fltTcaBgpPeerOpen15minOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417674: fltTcaBgpPeerOpen1hOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417675: fltTcaBgpPeerOpen1dOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417676: fltTcaBgpPeerOpen1wOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417677: fltTcaBgpPeerOpen1moOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417678: fltTcaBgpPeerOpen1qtrOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417679: fltTcaBgpPeerOpen1yearOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417704: fltTcaBgpPeerOpen5minOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417705: fltTcaBgpPeerOpen15minOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417706: fltTcaBgpPeerOpen1hOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417707: fltTcaBgpPeerOpen1dOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417708: fltTcaBgpPeerOpen1wOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417709: fltTcaBgpPeerOpen1moOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417710: fltTcaBgpPeerOpen1qtrOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417711: fltTcaBgpPeerOpen1yearOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417712: fltTcaBgpPeerOpen5minOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417713: fltTcaBgpPeerOpen15minOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417714: fltTcaBgpPeerOpen1hOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417715: fltTcaBgpPeerOpen1dOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417716: fltTcaBgpPeerOpen1wOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417717: fltTcaBgpPeerOpen1moOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417718: fltTcaBgpPeerOpen1qtrOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417719: fltTcaBgpPeerOpen1yearOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417792: fltTcaBgpPeerOpen5minOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417793: fltTcaBgpPeerOpen15minOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417794: fltTcaBgpPeerOpen1hOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417795: fltTcaBgpPeerOpen1dOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417796: fltTcaBgpPeerOpen1wOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417797: fltTcaBgpPeerOpen1moOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417798: fltTcaBgpPeerOpen1qtrOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417799: fltTcaBgpPeerOpen1yearOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4178: fltMaintUpgJobReloadSkip

Severity: warning

Explanation: This fault occurs when a switch SMU patch is installed/uninstalled with ReloadSkip option.

Recommended Action: If you see this fault, take the following actions:

1. Reload the switch.

F417808: fltTcaBgpPeerOpen5minOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417809: fltTcaBgpPeerOpen15minOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417810: fltTcaBgpPeerOpen1hOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417811: fltTcaBgpPeerOpen1dOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417812: fltTcaBgpPeerOpen1wOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417813: fltTcaBgpPeerOpen1moOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417814: fltTcaBgpPeerOpen1qtrOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417815: fltTcaBgpPeerOpen1yearOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417816: fltTcaBgpPeerOpen5minOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417817: fltTcaBgpPeerOpen15minOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417818: fltTcaBgpPeerOpen1hOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417819: fltTcaBgpPeerOpen1dOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417820: fltTcaBgpPeerOpen1wOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417821: fltTcaBgpPeerOpen1moOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417822: fltTcaBgpPeerOpen1qtrOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417823: fltTcaBgpPeerOpen1yearOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417824: fltTcaBgpPeerOpen5minOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417825: fltTcaBgpPeerOpen15minOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417826: fltTcaBgpPeerOpen1hOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417827: fltTcaBgpPeerOpen1dOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417828: fltTcaBgpPeerOpen1wOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417829: fltTcaBgpPeerOpen1moOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417830: fltTcaBgpPeerOpen1qtrOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417831: fltTcaBgpPeerOpen1yearOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417832: fltTcaBgpPeerOpen5minOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417833: fltTcaBgpPeerOpen15minOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417834: fltTcaBgpPeerOpen1hOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417835: fltTcaBgpPeerOpen1dOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417836: fltTcaBgpPeerOpen1wOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417837: fltTcaBgpPeerOpen1moOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417838: fltTcaBgpPeerOpen1qtrOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417839: fltTcaBgpPeerOpen1yearOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417840: fltTcaBgpPeerOpen5minOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417841: fltTcaBgpPeerOpen15minOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417842: fltTcaBgpPeerOpen1hOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417843: fltTcaBgpPeerOpen1dOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417844: fltTcaBgpPeerOpen1wOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417845: fltTcaBgpPeerOpen1moOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417846: fltTcaBgpPeerOpen1qtrOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417847: fltTcaBgpPeerOpen1yearOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417872: fltTcaBgpPeerOpen5minOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417873: fltTcaBgpPeerOpen15minOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417874: fltTcaBgpPeerOpen1hOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417875: fltTcaBgpPeerOpen1dOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417876: fltTcaBgpPeerOpen1wOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417877: fltTcaBgpPeerOpen1moOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417878: fltTcaBgpPeerOpen1qtrOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417879: fltTcaBgpPeerOpen1yearOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417880: fltTcaBgpPeerOpen5minOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417881: fltTcaBgpPeerOpen15minOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417882: fltTcaBgpPeerOpen1hOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417883: fltTcaBgpPeerOpen1dOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417884: fltTcaBgpPeerOpen1wOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417885: fltTcaBgpPeerOpen1moOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417886: fltTcaBgpPeerOpen1qtrOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417887: fltTcaBgpPeerOpen1yearOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417960: fltTcaBgpPeerOpen5minUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417961: fltTcaBgpPeerOpen15minUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417962: fltTcaBgpPeerOpen1hUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417963: fltTcaBgpPeerOpen1dUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417964: fltTcaBgpPeerOpen1wUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417965: fltTcaBgpPeerOpen1moUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417966: fltTcaBgpPeerOpen1qtrUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417967: fltTcaBgpPeerOpen1yearUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417976: fltTcaBgpPeerOpen5minUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417977: fltTcaBgpPeerOpen15minUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417978: fltTcaBgpPeerOpen1hUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417979: fltTcaBgpPeerOpen1dUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417980: fltTcaBgpPeerOpen1wUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417981: fltTcaBgpPeerOpen1moUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417982: fltTcaBgpPeerOpen1qtrUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417983: fltTcaBgpPeerOpen1yearUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417984: fltTcaBgpPeerOpen5minUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417985: fltTcaBgpPeerOpen15minUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417986: fltTcaBgpPeerOpen1hUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417987: fltTcaBgpPeerOpen1dUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417988: fltTcaBgpPeerOpen1wUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417989: fltTcaBgpPeerOpen1moUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417990: fltTcaBgpPeerOpen1qtrUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417991: fltTcaBgpPeerOpen1yearUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417992: fltTcaBgpPeerOpen5minUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417993: fltTcaBgpPeerOpen15minUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417994: fltTcaBgpPeerOpen1hUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417995: fltTcaBgpPeerOpen1dUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417996: fltTcaBgpPeerOpen1wUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417997: fltTcaBgpPeerOpen1moUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417998: fltTcaBgpPeerOpen1qtrUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F417999: fltTcaBgpPeerOpen1yearUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4180: fltHcloudRsEpToSecurityGroupOperRsEpToSecurityGroupOper

Severity: minor

Explanation: This fault occurs where the Endpoint Group could not be attached to the target Endpoint even if it was matching the Selector's expression.

Recommended Action: If you see this fault, take the following actions:

1. Depending on the cloud provider and your configuration, an Endpoint can be attached to at most one EPG. Make sure that the EPG's Selector is matching the intended Endpoint.
2. If fault still has not cleared, please contact Cisco TAC.
3. Check the error message and make sure that the tenant's account has permission to access and possibly modify the Endpoint configuration.

F418000: fltTcaBgpPeerOpen5minUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418001: fltTcaBgpPeerOpen15minUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418002: fltTcaBgpPeerOpen1hUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418003: fltTcaBgpPeerOpen1dUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418004: fltTcaBgpPeerOpen1wUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418005: fltTcaBgpPeerOpen1moUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418006: fltTcaBgpPeerOpen1qtrUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418007: fltTcaBgpPeerOpen1yearUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418008: fltTcaBgpPeerOpen5minUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418009: fltTcaBgpPeerOpen15minUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418010: fltTcaBgpPeerOpen1hUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418011: fltTcaBgpPeerOpen1dUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418012: fltTcaBgpPeerOpen1wUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418013: fltTcaBgpPeerOpen1moUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418014: fltTcaBgpPeerOpen1qtrUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418015: fltTcaBgpPeerOpen1yearUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418040: fltTcaBgpPeerOpen5minUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418041: fltTcaBgpPeerOpen15minUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418042: fltTcaBgpPeerOpen1hUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418043: fltTcaBgpPeerOpen1dUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418044: fltTcaBgpPeerOpen1wUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418045: fltTcaBgpPeerOpen1moUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418046: fltTcaBgpPeerOpen1qtrUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418047: fltTcaBgpPeerOpen1yearUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418048: fltTcaBgpPeerOpen5minUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418049: fltTcaBgpPeerOpen15minUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418050: fltTcaBgpPeerOpen1hUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418051: fltTcaBgpPeerOpen1dUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418052: fltTcaBgpPeerOpen1wUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418053: fltTcaBgpPeerOpen1moUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418054: fltTcaBgpPeerOpen1qtrUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418055: fltTcaBgpPeerOpen1yearUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4181: fltHcloudCtxProfileOperCloudCtxProfileOperStateDown

Severity: minor

Explanation: This fault occurs when an erroneous configuration is pushed for creating a CtxProfile.

Recommended Action: If you see this fault, take the following actions:

1. Please check the fault message and make necessary changes to the config for creating the CtxProfile.
2. If fault still has not cleared, please contact Cisco TAC.

F418128: fltTcaBgpPeerOpen5minUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418129: fltTcaBgpPeerOpen15minUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418130: fltTcaBgpPeerOpen1hUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418131: fltTcaBgpPeerOpen1dUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418132: fltTcaBgpPeerOpen1wUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418133: fltTcaBgpPeerOpen1moUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418134: fltTcaBgpPeerOpen1qtrUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418135: fltTcaBgpPeerOpen1yearUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418144: fltTcaBgpPeerOpen5minUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418145: fltTcaBgpPeerOpen15minUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418146: fltTcaBgpPeerOpen1hUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418147: fltTcaBgpPeerOpen1dUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418148: fltTcaBgpPeerOpen1wUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418149: fltTcaBgpPeerOpen1moUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418150: fltTcaBgpPeerOpen1qtrUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418151: fltTcaBgpPeerOpen1yearUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418152: fltTcaBgpPeerOpen5minUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418153: fltTcaBgpPeerOpen15minUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418154: fltTcaBgpPeerOpen1hUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418155: fltTcaBgpPeerOpen1dUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418156: fltTcaBgpPeerOpen1wUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418157: fltTcaBgpPeerOpen1moUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418158: fltTcaBgpPeerOpen1qtrUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418159: fltTcaBgpPeerOpen1yearUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418160: fltTcaBgpPeerOpen5minUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418161: fltTcaBgpPeerOpen15minUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418162: fltTcaBgpPeerOpen1hUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418163: fltTcaBgpPeerOpen1dUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418164: fltTcaBgpPeerOpen1wUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418165: fltTcaBgpPeerOpen1moUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418166: fltTcaBgpPeerOpen1qtrUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418167: fltTcaBgpPeerOpen1yearUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418168: fltTcaBgpPeerOpen5minUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418169: fltTcaBgpPeerOpen15minUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418170: fltTcaBgpPeerOpen1hUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418171: fltTcaBgpPeerOpen1dUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418172: fltTcaBgpPeerOpen1wUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418173: fltTcaBgpPeerOpen1moUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418174: fltTcaBgpPeerOpen1qtrUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418175: fltTcaBgpPeerOpen1yearUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418176: fltTcaBgpPeerOpen5minUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418177: fltTcaBgpPeerOpen15minUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418178: fltTcaBgpPeerOpen1hUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418179: fltTcaBgpPeerOpen1dUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418180: fltTcaBgpPeerOpen1wUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418181: fltTcaBgpPeerOpen1moUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418182: fltTcaBgpPeerOpen1qtrUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418183: fltTcaBgpPeerOpen1yearUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4182: fltCloudRsExtNetworkPToCtxResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F418208: fltTcaBgpPeerOpen5minUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418209: fltTcaBgpPeerOpen15minUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418210: fltTcaBgpPeerOpen1hUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418211: fltTcaBgpPeerOpen1dUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418212: fltTcaBgpPeerOpen1wUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418213: fltTcaBgpPeerOpen1moUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418214: fltTcaBgpPeerOpen1qtrUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418215: fltTcaBgpPeerOpen1yearUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418216: fltTcaBgpPeerOpen5minUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418217: fltTcaBgpPeerOpen15minUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418218: fltTcaBgpPeerOpen1hUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418219: fltTcaBgpPeerOpen1dUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418220: fltTcaBgpPeerOpen1wUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418221: fltTcaBgpPeerOpen1moUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418222: fltTcaBgpPeerOpen1qtrUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418223: fltTcaBgpPeerOpen1yearUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418296: fltTcaBgpPeerRoute5minCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418297: fltTcaBgpPeerRoute15minCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418298: fltTcaBgpPeerRoute1hCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418299: fltTcaBgpPeerRoute1dCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4183: fltCloudRsExtNetworkPToRegionResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F418300: fltTcaBgpPeerRoute1wCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418301: fltTcaBgpPeerRoute1moCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418302: fltTcaBgpPeerRoute1qtrCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418303: fltTcaBgpPeerRoute1yearCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418312: fltTcaBgpPeerRoute5minCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418313: fltTcaBgpPeerRoute15minCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418314: fltTcaBgpPeerRoute1hCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418315: fltTcaBgpPeerRoute1dCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418316: fltTcaBgpPeerRoute1wCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418317: fltTcaBgpPeerRoute1moCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418318: fltTcaBgpPeerRoute1qtrCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418319: fltTcaBgpPeerRoute1yearCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418320: fltTcaBgpPeerRoute5minCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418321: fltTcaBgpPeerRoute15minCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418322: fltTcaBgpPeerRoute1hCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418323: fltTcaBgpPeerRoute1dCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418324: fltTcaBgpPeerRoute1wCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418325: fltTcaBgpPeerRoute1moCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418326: fltTcaBgpPeerRoute1qtrCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418327: fltTcaBgpPeerRoute1yearCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418328: fltTcaBgpPeerRoute5minCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418329: fltTcaBgpPeerRoute15minCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418330: fltTcaBgpPeerRoute1hCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418331: fltTcaBgpPeerRoute1dCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418332: fltTcaBgpPeerRoute1wCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418333: fltTcaBgpPeerRoute1moCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418334: fltTcaBgpPeerRoute1qtrCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418335: fltTcaBgpPeerRoute1yearCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418336: fltTcaBgpPeerRoute5minCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418337: fltTcaBgpPeerRoute15minCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418338: fltTcaBgpPeerRoute1hCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418339: fltTcaBgpPeerRoute1dCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418340: fltTcaBgpPeerRoute1wCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418341: fltTcaBgpPeerRoute1moCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418342: fltTcaBgpPeerRoute1qtrCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418343: fltTcaBgpPeerRoute1yearCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418344: fltTcaBgpPeerRoute5minCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418345: fltTcaBgpPeerRoute15minCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418346: fltTcaBgpPeerRoute1hCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418347: fltTcaBgpPeerRoute1dCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418348: fltTcaBgpPeerRoute1wCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418349: fltTcaBgpPeerRoute1moCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418350: fltTcaBgpPeerRoute1qtrCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418351: fltTcaBgpPeerRoute1yearCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418376: fltTcaBgpPeerRoute5minCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418377: fltTcaBgpPeerRoute15minCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418378: fltTcaBgpPeerRoute1hCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418379: fltTcaBgpPeerRoute1dCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418380: fltTcaBgpPeerRoute1wCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418381: fltTcaBgpPeerRoute1moCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418382: fltTcaBgpPeerRoute1qtrCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418383: fltTcaBgpPeerRoute1yearCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418384: fltTcaBgpPeerRoute5minCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418385: fltTcaBgpPeerRoute15minCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418386: fltTcaBgpPeerRoute1hCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418387: fltTcaBgpPeerRoute1dCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418388: fltTcaBgpPeerRoute1wCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418389: fltTcaBgpPeerRoute1moCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418390: fltTcaBgpPeerRoute1qtrCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418391: fltTcaBgpPeerRoute1yearCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4184: fltFvRsCtxToCloudVrfRouteLeakPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F418464: fltTcaBgpPeerRoute5minCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418465: fltTcaBgpPeerRoute15minCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418466: fltTcaBgpPeerRoute1hCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418467: fltTcaBgpPeerRoute1dCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418468: fltTcaBgpPeerRoute1wCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418469: fltTcaBgpPeerRoute1moCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418470: fltTcaBgpPeerRoute1qtrCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418471: fltTcaBgpPeerRoute1yearCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418480: fltTcaBgpPeerRoute5minCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418481: fltTcaBgpPeerRoute15minCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418482: fltTcaBgpPeerRoute1hCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418483: fltTcaBgpPeerRoute1dCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418484: fltTcaBgpPeerRoute1wCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418485: fltTcaBgpPeerRoute1moCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418486: fltTcaBgpPeerRoute1qtrCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418487: fltTcaBgpPeerRoute1yearCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418488: fltTcaBgpPeerRoute5minCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418489: fltTcaBgpPeerRoute15minCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418490: fltTcaBgpPeerRoute1hCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418491: fltTcaBgpPeerRoute1dCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418492: fltTcaBgpPeerRoute1wCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418493: fltTcaBgpPeerRoute1moCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418494: fltTcaBgpPeerRoute1qtrCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418495: fltTcaBgpPeerRoute1yearCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418496: fltTcaBgpPeerRoute5minCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418497: fltTcaBgpPeerRoute15minCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418498: fltTcaBgpPeerRoute1hCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418499: fltTcaBgpPeerRoute1dCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4185: fltHinventoryRsSubnetToCtxResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F418500: fltTcaBgpPeerRoute1wCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418501: fltTcaBgpPeerRoute1moCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418502: fltTcaBgpPeerRoute1qtrCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418503: fltTcaBgpPeerRoute1yearCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418504: fltTcaBgpPeerRoute5minCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418505: fltTcaBgpPeerRoute15minCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418506: fltTcaBgpPeerRoute1hCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418507: fltTcaBgpPeerRoute1dCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418508: fltTcaBgpPeerRoute1wCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418509: fltTcaBgpPeerRoute1moCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418510: fltTcaBgpPeerRoute1qtrCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418511: fltTcaBgpPeerRoute1yearCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418512: fltTcaBgpPeerRoute5minCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418513: fltTcaBgpPeerRoute15minCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418514: fltTcaBgpPeerRoute1hCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418515: fltTcaBgpPeerRoute1dCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418516: fltTcaBgpPeerRoute1wCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418517: fltTcaBgpPeerRoute1moCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418518: fltTcaBgpPeerRoute1qtrCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418519: fltTcaBgpPeerRoute1yearCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418544: fltTcaBgpPeerRoute5minCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418545: fltTcaBgpPeerRoute15minCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418546: fltTcaBgpPeerRoute1hCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418547: fltTcaBgpPeerRoute1dCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418548: fltTcaBgpPeerRoute1wCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418549: fltTcaBgpPeerRoute1moCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418550: fltTcaBgpPeerRoute1qtrCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418551: fltTcaBgpPeerRoute1yearCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418552: fltTcaBgpPeerRoute5minCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418553: fltTcaBgpPeerRoute15minCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418554: fltTcaBgpPeerRoute1hCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418555: fltTcaBgpPeerRoute1dCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418556: fltTcaBgpPeerRoute1wCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418557: fltTcaBgpPeerRoute1moCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418558: fltTcaBgpPeerRoute1qtrCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418559: fltTcaBgpPeerRoute1yearCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4186: fltHinventoryRsConnToRouterResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F418632: fltTcaBgpPeerRoute5minRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418633: fltTcaBgpPeerRoute15minRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418634: fltTcaBgpPeerRoute1hRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418635: fltTcaBgpPeerRoute1dRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418636: fltTcaBgpPeerRoute1wRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418637: fltTcaBgpPeerRoute1moRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418638: fltTcaBgpPeerRoute1qtrRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418639: fltTcaBgpPeerRoute1yearRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418648: fltTcaBgpPeerRoute5minRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418649: fltTcaBgpPeerRoute15minRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418650: fltTcaBgpPeerRoute1hRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418651: fltTcaBgpPeerRoute1dRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418652: fltTcaBgpPeerRoute1wRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418653: fltTcaBgpPeerRoute1moRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418654: fltTcaBgpPeerRoute1qtrRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418655: fltTcaBgpPeerRoute1yearRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418656: fltTcaBgpPeerRoute5minRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418657: fltTcaBgpPeerRoute15minRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418658: fltTcaBgpPeerRoute1hRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418659: fltTcaBgpPeerRoute1dRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418660: fltTcaBgpPeerRoute1wRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418661: fltTcaBgpPeerRoute1moRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418662: fltTcaBgpPeerRoute1qtrRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418663: fltTcaBgpPeerRoute1yearRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418664: fltTcaBgpPeerRoute5minRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418665: fltTcaBgpPeerRoute15minRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418666: fltTcaBgpPeerRoute1hRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418667: fltTcaBgpPeerRoute1dRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418668: fltTcaBgpPeerRoute1wRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418669: fltTcaBgpPeerRoute1moRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418670: fltTcaBgpPeerRoute1qtrRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418671: fltTcaBgpPeerRoute1yearRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418672: fltTcaBgpPeerRoute5minRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418673: fltTcaBgpPeerRoute15minRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418674: fltTcaBgpPeerRoute1hRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418675: fltTcaBgpPeerRoute1dRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418676: fltTcaBgpPeerRoute1wRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418677: fltTcaBgpPeerRoute1moRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418678: fltTcaBgpPeerRoute1qtrRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418679: fltTcaBgpPeerRoute1yearRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418680: fltTcaBgpPeerRoute5minRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418681: fltTcaBgpPeerRoute15minRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418682: fltTcaBgpPeerRoute1hRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418683: fltTcaBgpPeerRoute1dRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418684: fltTcaBgpPeerRoute1wRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418685: fltTcaBgpPeerRoute1moRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418686: fltTcaBgpPeerRoute1qtrRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418687: fltTcaBgpPeerRoute1yearRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418712: fltTcaBgpPeerRoute5minRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418713: fltTcaBgpPeerRoute15minRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418714: fltTcaBgpPeerRoute1hRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418715: fltTcaBgpPeerRoute1dRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418716: fltTcaBgpPeerRoute1wRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418717: fltTcaBgpPeerRoute1moRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418718: fltTcaBgpPeerRoute1qtrRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418719: fltTcaBgpPeerRoute1yearRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418720: fltTcaBgpPeerRoute5minRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418721: fltTcaBgpPeerRoute15minRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418722: fltTcaBgpPeerRoute1hRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418723: fltTcaBgpPeerRoute1dRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418724: fltTcaBgpPeerRoute1wRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418725: fltTcaBgpPeerRoute1moRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418726: fltTcaBgpPeerRoute1qtrRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418727: fltTcaBgpPeerRoute1yearRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4188: fltCloudRsAccountToAccessPolicyResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F418800: fltTcaBgpPeerRoute5minRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418801: fltTcaBgpPeerRoute15minRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418802: fltTcaBgpPeerRoute1hRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418803: fltTcaBgpPeerRoute1dRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418804: fltTcaBgpPeerRoute1wRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418805: fltTcaBgpPeerRoute1moRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418806: fltTcaBgpPeerRoute1qtrRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418807: fltTcaBgpPeerRoute1yearRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418816: fltTcaBgpPeerRoute5minRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418817: fltTcaBgpPeerRoute15minRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418818: fltTcaBgpPeerRoute1hRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418819: fltTcaBgpPeerRoute1dRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418820: fltTcaBgpPeerRoute1wRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418821: fltTcaBgpPeerRoute1moRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418822: fltTcaBgpPeerRoute1qtrRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418823: fltTcaBgpPeerRoute1yearRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418824: fltTcaBgpPeerRoute5minRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418825: fltTcaBgpPeerRoute15minRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418826: fltTcaBgpPeerRoute1hRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418827: fltTcaBgpPeerRoute1dRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418828: fltTcaBgpPeerRoute1wRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418829: fltTcaBgpPeerRoute1moRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418830: fltTcaBgpPeerRoute1qtrRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418831: fltTcaBgpPeerRoute1yearRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418832: fltTcaBgpPeerRoute5minRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418833: fltTcaBgpPeerRoute15minRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418834: fltTcaBgpPeerRoute1hRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418835: fltTcaBgpPeerRoute1dRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418836: fltTcaBgpPeerRoute1wRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418837: fltTcaBgpPeerRoute1moRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418838: fltTcaBgpPeerRoute1qtrRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418839: fltTcaBgpPeerRoute1yearRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418840: fltTcaBgpPeerRoute5minRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418841: fltTcaBgpPeerRoute15minRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418842: fltTcaBgpPeerRoute1hRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418843: fltTcaBgpPeerRoute1dRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418844: fltTcaBgpPeerRoute1wRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418845: fltTcaBgpPeerRoute1moRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418846: fltTcaBgpPeerRoute1qtrRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418847: fltTcaBgpPeerRoute1yearRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418848: fltTcaBgpPeerRoute5minRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418849: fltTcaBgpPeerRoute15minRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418850: fltTcaBgpPeerRoute1hRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418851: fltTcaBgpPeerRoute1dRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418852: fltTcaBgpPeerRoute1wRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418853: fltTcaBgpPeerRoute1moRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418854: fltTcaBgpPeerRoute1qtrRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418855: fltTcaBgpPeerRoute1yearRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418880: fltTcaBgpPeerRoute5minRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418881: fltTcaBgpPeerRoute15minRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418882: fltTcaBgpPeerRoute1hRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418883: fltTcaBgpPeerRoute1dRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418884: fltTcaBgpPeerRoute1wRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418885: fltTcaBgpPeerRoute1moRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418886: fltTcaBgpPeerRoute1qtrRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418887: fltTcaBgpPeerRoute1yearRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418888: fltTcaBgpPeerRoute5minRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418889: fltTcaBgpPeerRoute15minRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418890: fltTcaBgpPeerRoute1hRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418891: fltTcaBgpPeerRoute1dRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418892: fltTcaBgpPeerRoute1wRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418893: fltTcaBgpPeerRoute1moRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418894: fltTcaBgpPeerRoute1qtrRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418895: fltTcaBgpPeerRoute1yearRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4189: fltCloudRsCtxProfileToAccessPolicyResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F418968: fltTcaOspfBadErrPktStats5minBadAuthPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418969: fltTcaOspfBadErrPktStats15minBadAuthPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418970: fltTcaOspfBadErrPktStats1hBadAuthPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418971: fltTcaOspfBadErrPktStats1dBadAuthPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418972: fltTcaOspfBadErrPktStats1wBadAuthPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418973: fltTcaOspfBadErrPktStats1moBadAuthPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418974: fltTcaOspfBadErrPktStats1qtrBadAuthPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418975: fltTcaOspfBadErrPktStats1yearBadAuthPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418984: fltTcaOspfBadErrPktStats5minBadAuthPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418985: fltTcaOspfBadErrPktStats15minBadAuthPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418986: fltTcaOspfBadErrPktStats1hBadAuthPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418987: fltTcaOspfBadErrPktStats1dBadAuthPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418988: fltTcaOspfBadErrPktStats1wBadAuthPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418989: fltTcaOspfBadErrPktStats1moBadAuthPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418990: fltTcaOspfBadErrPktStats1qtrBadAuthPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418991: fltTcaOspfBadErrPktStats1yearBadAuthPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418992: fltTcaOspfBadErrPktStats5minBadAuthPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418993: fltTcaOspfBadErrPktStats15minBadAuthPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418994: fltTcaOspfBadErrPktStats1hBadAuthPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418995: fltTcaOspfBadErrPktStats1dBadAuthPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418996: fltTcaOspfBadErrPktStats1wBadAuthPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418997: fltTcaOspfBadErrPktStats1moBadAuthPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418998: fltTcaOspfBadErrPktStats1qtrBadAuthPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F418999: fltTcaOspfBadErrPktStats1yearBadAuthPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4190: fltHcloudRsCtxToAccessPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F419000: fltTcaOspfBadErrPktStats5minBadAuthPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419001: fltTcaOspfBadErrPktStats15minBadAuthPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419002: fltTcaOspfBadErrPktStats1hBadAuthPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419003: fltTcaOspfBadErrPktStats1dBadAuthPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419004: fltTcaOspfBadErrPktStats1wBadAuthPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419005: fltTcaOspfBadErrPktStats1moBadAuthPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419006: fltTcaOspfBadErrPktStats1qtrBadAuthPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419007: fltTcaOspfBadErrPktStats1yearBadAuthPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419008: fltTcaOspfBadErrPktStats5minBadAuthPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419009: fltTcaOspfBadErrPktStats15minBadAuthPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419010: fltTcaOspfBadErrPktStats1hBadAuthPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419011: fltTcaOspfBadErrPktStats1dBadAuthPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419012: fltTcaOspfBadErrPktStats1wBadAuthPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419013: fltTcaOspfBadErrPktStats1moBadAuthPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419014: fltTcaOspfBadErrPktStats1qtrBadAuthPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419015: fltTcaOspfBadErrPktStats1yearBadAuthPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419016: fltTcaOspfBadErrPktStats5minBadAuthPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419017: fltTcaOspfBadErrPktStats15minBadAuthPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419018: fltTcaOspfBadErrPktStats1hBadAuthPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419019: fltTcaOspfBadErrPktStats1dBadAuthPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419020: fltTcaOspfBadErrPktStats1wBadAuthPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419021: fltTcaOspfBadErrPktStats1moBadAuthPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419022: fltTcaOspfBadErrPktStats1qtrBadAuthPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419023: fltTcaOspfBadErrPktStats1yearBadAuthPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419048: fltTcaOspfBadErrPktStats5minBadAuthPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419049: fltTcaOspfBadErrPktStats15minBadAuthPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419050: fltTcaOspfBadErrPktStats1hBadAuthPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419051: fltTcaOspfBadErrPktStats1dBadAuthPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419052: fltTcaOspfBadErrPktStats1wBadAuthPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419053: fltTcaOspfBadErrPktStats1moBadAuthPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419054: fltTcaOspfBadErrPktStats1qtrBadAuthPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419055: fltTcaOspfBadErrPktStats1yearBadAuthPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419056: fltTcaOspfBadErrPktStats5minBadAuthPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419057: fltTcaOspfBadErrPktStats15minBadAuthPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419058: fltTcaOspfBadErrPktStats1hBadAuthPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419059: fltTcaOspfBadErrPktStats1dBadAuthPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419060: fltTcaOspfBadErrPktStats1wBadAuthPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419061: fltTcaOspfBadErrPktStats1moBadAuthPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419062: fltTcaOspfBadErrPktStats1qtrBadAuthPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419063: fltTcaOspfBadErrPktStats1yearBadAuthPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Authentication Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Authentication Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4191: fltHcloudRsProvAcctToAccessPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F419136: fltTcaOspfBadErrPktStats5minBadCRCPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419137: fltTcaOspfBadErrPktStats15minBadCRCPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419138: fltTcaOspfBadErrPktStats1hBadCRCPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419139: fltTcaOspfBadErrPktStats1dBadCRCPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419140: fltTcaOspfBadErrPktStats1wBadCRCPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419141: fltTcaOspfBadErrPktStats1moBadCRCPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419142: fltTcaOspfBadErrPktStats1qtrBadCRCPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419143: fltTcaOspfBadErrPktStats1yearBadCRCPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419152: fltTcaOspfBadErrPktStats5minBadCRCPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419153: fltTcaOspfBadErrPktStats15minBadCRCPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419154: fltTcaOspfBadErrPktStats1hBadCRCPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419155: fltTcaOspfBadErrPktStats1dBadCRCPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419156: fltTcaOspfBadErrPktStats1wBadCRCPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419157: fltTcaOspfBadErrPktStats1moBadCRCPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419158: fltTcaOspfBadErrPktStats1qtrBadCRCPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419159: fltTcaOspfBadErrPktStats1yearBadCRCPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419160: fltTcaOspfBadErrPktStats5minBadCRCPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419161: fltTcaOspfBadErrPktStats15minBadCRCPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419162: fltTcaOspfBadErrPktStats1hBadCRCPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419163: fltTcaOspfBadErrPktStats1dBadCRCPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419164: fltTcaOspfBadErrPktStats1wBadCRCPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419165: fltTcaOspfBadErrPktStats1moBadCRCPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419166: fltTcaOspfBadErrPktStats1qtrBadCRCPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419167: fltTcaOspfBadErrPktStats1yearBadCRCPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419168: fltTcaOspfBadErrPktStats5minBadCRCPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419169: fltTcaOspfBadErrPktStats15minBadCRCPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419170: fltTcaOspfBadErrPktStats1hBadCRCPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419171: fltTcaOspfBadErrPktStats1dBadCRCPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419172: fltTcaOspfBadErrPktStats1wBadCRCPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419173: fltTcaOspfBadErrPktStats1moBadCRCPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419174: fltTcaOspfBadErrPktStats1qtrBadCRCPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419175: fltTcaOspfBadErrPktStats1yearBadCRCPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419176: fltTcaOspfBadErrPktStats5minBadCRCPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419177: fltTcaOspfBadErrPktStats15minBadCRCPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419178: fltTcaOspfBadErrPktStats1hBadCRCPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419179: fltTcaOspfBadErrPktStats1dBadCRCPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419180: fltTcaOspfBadErrPktStats1wBadCRCPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419181: fltTcaOspfBadErrPktStats1moBadCRCPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419182: fltTcaOspfBadErrPktStats1qtrBadCRCPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419183: fltTcaOspfBadErrPktStats1yearBadCRCPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419184: fltTcaOspfBadErrPktStats5minBadCRCPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419185: fltTcaOspfBadErrPktStats15minBadCRCPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419186: fltTcaOspfBadErrPktStats1hBadCRCPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419187: fltTcaOspfBadErrPktStats1dBadCRCPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419188: fltTcaOspfBadErrPktStats1wBadCRCPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419189: fltTcaOspfBadErrPktStats1moBadCRCPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419190: fltTcaOspfBadErrPktStats1qtrBadCRCPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419191: fltTcaOspfBadErrPktStats1yearBadCRCPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4192: fltPtpIfPtpInterfaceProfileMismatch

Severity: minor

Explanation: This fault occurs when Interface level Telecom profile configured is not same as node-level profile or Telecom profile is not supported.

Recommended Action: None

1. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F419216: fltTcaOspfBadErrPktStats5minBadCRCPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419217: fltTcaOspfBadErrPktStats15minBadCRCPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419218: fltTcaOspfBadErrPktStats1hBadCRCPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419219: fltTcaOspfBadErrPktStats1dBadCRCPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419220: fltTcaOspfBadErrPktStats1wBadCRCPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419221: fltTcaOspfBadErrPktStats1moBadCRCPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419222: fltTcaOspfBadErrPktStats1qtrBadCRCPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419223: fltTcaOspfBadErrPktStats1yearBadCRCPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419224: fltTcaOspfBadErrPktStats5minBadCRCPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419225: fltTcaOspfBadErrPktStats15minBadCRCPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419226: fltTcaOspfBadErrPktStats1hBadCRCPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419227: fltTcaOspfBadErrPktStats1dBadCRCPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419228: fltTcaOspfBadErrPktStats1wBadCRCPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419229: fltTcaOspfBadErrPktStats1moBadCRCPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419230: fltTcaOspfBadErrPktStats1qtrBadCRCPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419231: fltTcaOspfBadErrPktStats1yearBadCRCPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad CRC Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad CRC Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4193: fltPtpIfPtpOverrideFlagNotEnabled

Severity: minor

Explanation: This fault occurs when the PTP override flag is not enabled in the configuration.

Recommended Action: None

1. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F419304: fltTcaOspfBadPktStats5minBadLenPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419305: fltTcaOspfBadPktStats15minBadLenPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419306: fltTcaOspfBadPktStats1hBadLenPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419307: fltTcaOspfBadPktStats1dBadLenPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419308: fltTcaOspfBadPktStats1wBadLenPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419309: fltTcaOspfBadPktStats1moBadLenPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419310: fltTcaOspfBadPktStats1qtrBadLenPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419311: fltTcaOspfBadPktStats1yearBadLenPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419320: fltTcaOspfBadPktStats5minBadLenPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419321: fltTcaOspfBadPktStats15minBadLenPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419322: fltTcaOspfBadPktStats1hBadLenPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419323: fltTcaOspfBadPktStats1dBadLenPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419324: fltTcaOspfBadPktStats1wBadLenPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419325: fltTcaOspfBadPktStats1moBadLenPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419326: fltTcaOspfBadPktStats1qtrBadLenPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419327: fltTcaOspfBadPktStats1yearBadLenPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419328: fltTcaOspfBadPktStats5minBadLenPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419329: fltTcaOspfBadPktStats15minBadLenPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419330: fltTcaOspfBadPktStats1hBadLenPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419331: fltTcaOspfBadPktStats1dBadLenPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419332: fltTcaOspfBadPktStats1wBadLenPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419333: fltTcaOspfBadPktStats1moBadLenPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419334: fltTcaOspfBadPktStats1qtrBadLenPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419335: fltTcaOspfBadPktStats1yearBadLenPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419336: fltTcaOspfBadPktStats5minBadLenPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419337: fltTcaOspfBadPktStats15minBadLenPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419338: fltTcaOspfBadPktStats1hBadLenPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419339: fltTcaOspfBadPktStats1dBadLenPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419340: fltTcaOspfBadPktStats1wBadLenPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419341: fltTcaOspfBadPktStats1moBadLenPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419342: fltTcaOspfBadPktStats1qtrBadLenPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419343: fltTcaOspfBadPktStats1yearBadLenPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419344: fltTcaOspfBadPktStats5minBadLenPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419345: fltTcaOspfBadPktStats15minBadLenPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419346: fltTcaOspfBadPktStats1hBadLenPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419347: fltTcaOspfBadPktStats1dBadLenPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419348: fltTcaOspfBadPktStats1wBadLenPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419349: fltTcaOspfBadPktStats1moBadLenPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419350: fltTcaOspfBadPktStats1qtrBadLenPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419351: fltTcaOspfBadPktStats1yearBadLenPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419352: fltTcaOspfBadPktStats5minBadLenPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419353: fltTcaOspfBadPktStats15minBadLenPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419354: fltTcaOspfBadPktStats1hBadLenPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419355: fltTcaOspfBadPktStats1dBadLenPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419356: fltTcaOspfBadPktStats1wBadLenPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419357: fltTcaOspfBadPktStats1moBadLenPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419358: fltTcaOspfBadPktStats1qtrBadLenPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419359: fltTcaOspfBadPktStats1yearBadLenPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419384: fltTcaOspfBadPktStats5minBadLenPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419385: fltTcaOspfBadPktStats15minBadLenPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419386: fltTcaOspfBadPktStats1hBadLenPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419387: fltTcaOspfBadPktStats1dBadLenPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419388: fltTcaOspfBadPktStats1wBadLenPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419389: fltTcaOspfBadPktStats1moBadLenPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419390: fltTcaOspfBadPktStats1qtrBadLenPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419391: fltTcaOspfBadPktStats1yearBadLenPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419392: fltTcaOspfBadPktStats5minBadLenPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419393: fltTcaOspfBadPktStats15minBadLenPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419394: fltTcaOspfBadPktStats1hBadLenPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419395: fltTcaOspfBadPktStats1dBadLenPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419396: fltTcaOspfBadPktStats1wBadLenPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419397: fltTcaOspfBadPktStats1moBadLenPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419398: fltTcaOspfBadPktStats1qtrBadLenPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419399: fltTcaOspfBadPktStats1yearBadLenPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Length Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Length Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4194: fltPtpIfPtpUnicastEnabledForTelecomProf

Severity: minor

Explanation: This fault occurs when the PTP unicast configuration applied with telecom profile.

Recommended Action: None

1. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F419472: fltTcaOspfBadPktStats5minBadResvFieldPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419473: fltTcaOspfBadPktStats15minBadResvFieldPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419474: fltTcaOspfBadPktStats1hBadResvFieldPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419475: fltTcaOspfBadPktStats1dBadResvFieldPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419476: fltTcaOspfBadPktStats1wBadResvFieldPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419477: fltTcaOspfBadPktStats1moBadResvFieldPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419478: fltTcaOspfBadPktStats1qtrBadResvFieldPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419479: fltTcaOspfBadPktStats1yearBadResvFieldPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419488: fltTcaOspfBadPktStats5minBadResvFieldPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419489: fltTcaOspfBadPktStats15minBadResvFieldPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419490: fltTcaOspfBadPktStats1hBadResvFieldPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419491: fltTcaOspfBadPktStats1dBadResvFieldPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419492: fltTcaOspfBadPktStats1wBadResvFieldPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419493: fltTcaOspfBadPktStats1moBadResvFieldPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419494: fltTcaOspfBadPktStats1qtrBadResvFieldPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419495: fltTcaOspfBadPktStats1yearBadResvFieldPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419496: fltTcaOspfBadPktStats5minBadResvFieldPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419497: fltTcaOspfBadPktStats15minBadResvFieldPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419498: fltTcaOspfBadPktStats1hBadResvFieldPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419499: fltTcaOspfBadPktStats1dBadResvFieldPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4195: fltFvESgConfig-warning

Severity: warning

Explanation: This fault occurs when an End Point Security Group is not correctly configred

Recommended Action: If you see this fault, take the following actions:

1. Look at the configuration for issues
2. Verify the End Point Security Group configuration is correct and complete
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F419500: fltTcaOspfBadPktStats1wBadResvFieldPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419501: fltTcaOspfBadPktStats1moBadResvFieldPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419502: fltTcaOspfBadPktStats1qtrBadResvFieldPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419503: fltTcaOspfBadPktStats1yearBadResvFieldPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419504: fltTcaOspfBadPktStats5minBadResvFieldPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419505: fltTcaOspfBadPktStats15minBadResvFieldPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419506: fltTcaOspfBadPktStats1hBadResvFieldPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419507: fltTcaOspfBadPktStats1dBadResvFieldPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419508: fltTcaOspfBadPktStats1wBadResvFieldPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419509: fltTcaOspfBadPktStats1moBadResvFieldPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419510: fltTcaOspfBadPktStats1qtrBadResvFieldPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419511: fltTcaOspfBadPktStats1yearBadResvFieldPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419512: fltTcaOspfBadPktStats5minBadResvFieldPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419513: fltTcaOspfBadPktStats15minBadResvFieldPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419514: fltTcaOspfBadPktStats1hBadResvFieldPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419515: fltTcaOspfBadPktStats1dBadResvFieldPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419516: fltTcaOspfBadPktStats1wBadResvFieldPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419517: fltTcaOspfBadPktStats1moBadResvFieldPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419518: fltTcaOspfBadPktStats1qtrBadResvFieldPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419519: fltTcaOspfBadPktStats1yearBadResvFieldPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419520: fltTcaOspfBadPktStats5minBadResvFieldPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419521: fltTcaOspfBadPktStats15minBadResvFieldPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419522: fltTcaOspfBadPktStats1hBadResvFieldPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419523: fltTcaOspfBadPktStats1dBadResvFieldPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419524: fltTcaOspfBadPktStats1wBadResvFieldPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419525: fltTcaOspfBadPktStats1moBadResvFieldPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419526: fltTcaOspfBadPktStats1qtrBadResvFieldPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419527: fltTcaOspfBadPktStats1yearBadResvFieldPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419552: fltTcaOspfBadPktStats5minBadResvFieldPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419553: fltTcaOspfBadPktStats15minBadResvFieldPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419554: fltTcaOspfBadPktStats1hBadResvFieldPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419555: fltTcaOspfBadPktStats1dBadResvFieldPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419556: fltTcaOspfBadPktStats1wBadResvFieldPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419557: fltTcaOspfBadPktStats1moBadResvFieldPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419558: fltTcaOspfBadPktStats1qtrBadResvFieldPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419559: fltTcaOspfBadPktStats1yearBadResvFieldPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419560: fltTcaOspfBadPktStats5minBadResvFieldPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419561: fltTcaOspfBadPktStats15minBadResvFieldPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419562: fltTcaOspfBadPktStats1hBadResvFieldPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419563: fltTcaOspfBadPktStats1dBadResvFieldPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419564: fltTcaOspfBadPktStats1wBadResvFieldPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419565: fltTcaOspfBadPktStats1moBadResvFieldPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419566: fltTcaOspfBadPktStats1qtrBadResvFieldPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419567: fltTcaOspfBadPktStats1yearBadResvFieldPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Reserved Field Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Reserved Field Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4196: fltPimInterVRFConfIssue

Severity: minor

Explanation: This fault occurs because source VRF and source EPGs is not present on the leaf with the receiver VRF.

Recommended Action: If you see this fault, please verify the source VRF in interVRF policy is deployed on the leaf.

F419640: fltTcaOspfBadPktStats5minBadVersionPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419641: fltTcaOspfBadPktStats15minBadVersionPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419642: fltTcaOspfBadPktStats1hBadVersionPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419643: fltTcaOspfBadPktStats1dBadVersionPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419644: fltTcaOspfBadPktStats1wBadVersionPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419645: fltTcaOspfBadPktStats1moBadVersionPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419646: fltTcaOspfBadPktStats1qtrBadVersionPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419647: fltTcaOspfBadPktStats1yearBadVersionPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419656: fltTcaOspfBadPktStats5minBadVersionPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419657: fltTcaOspfBadPktStats15minBadVersionPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419658: fltTcaOspfBadPktStats1hBadVersionPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419659: fltTcaOspfBadPktStats1dBadVersionPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419660: fltTcaOspfBadPktStats1wBadVersionPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419661: fltTcaOspfBadPktStats1moBadVersionPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419662: fltTcaOspfBadPktStats1qtrBadVersionPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419663: fltTcaOspfBadPktStats1yearBadVersionPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419664: fltTcaOspfBadPktStats5minBadVersionPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419665: fltTcaOspfBadPktStats15minBadVersionPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419666: fltTcaOspfBadPktStats1hBadVersionPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419667: fltTcaOspfBadPktStats1dBadVersionPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419668: fltTcaOspfBadPktStats1wBadVersionPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419669: fltTcaOspfBadPktStats1moBadVersionPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419670: fltTcaOspfBadPktStats1qtrBadVersionPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419671: fltTcaOspfBadPktStats1yearBadVersionPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419672: fltTcaOspfBadPktStats5minBadVersionPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419673: fltTcaOspfBadPktStats15minBadVersionPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419674: fltTcaOspfBadPktStats1hBadVersionPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419675: fltTcaOspfBadPktStats1dBadVersionPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419676: fltTcaOspfBadPktStats1wBadVersionPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419677: fltTcaOspfBadPktStats1moBadVersionPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419678: fltTcaOspfBadPktStats1qtrBadVersionPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419679: fltTcaOspfBadPktStats1yearBadVersionPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419680: fltTcaOspfBadPktStats5minBadVersionPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419681: fltTcaOspfBadPktStats15minBadVersionPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419682: fltTcaOspfBadPktStats1hBadVersionPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419683: fltTcaOspfBadPktStats1dBadVersionPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419684: fltTcaOspfBadPktStats1wBadVersionPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419685: fltTcaOspfBadPktStats1moBadVersionPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419686: fltTcaOspfBadPktStats1qtrBadVersionPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419687: fltTcaOspfBadPktStats1yearBadVersionPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419688: fltTcaOspfBadPktStats5minBadVersionPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419689: fltTcaOspfBadPktStats15minBadVersionPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419690: fltTcaOspfBadPktStats1hBadVersionPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419691: fltTcaOspfBadPktStats1dBadVersionPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419692: fltTcaOspfBadPktStats1wBadVersionPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419693: fltTcaOspfBadPktStats1moBadVersionPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419694: fltTcaOspfBadPktStats1qtrBadVersionPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419695: fltTcaOspfBadPktStats1yearBadVersionPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4197: fltSvcredirRsDestAttConfigStFailed2

Severity: major

Explanation: This fault occurs when a PBR service destination is used with multiple health groups

Recommended Action: To recover from this fault, try the following actions

1. Use the destination with single health group
2. To recover, delete this destination from all PBR policies where its used, then add the destination with correct health group

F419720: fltTcaOspfBadPktStats5minBadVersionPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419721: fltTcaOspfBadPktStats15minBadVersionPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419722: fltTcaOspfBadPktStats1hBadVersionPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419723: fltTcaOspfBadPktStats1dBadVersionPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419724: fltTcaOspfBadPktStats1wBadVersionPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419725: fltTcaOspfBadPktStats1moBadVersionPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419726: fltTcaOspfBadPktStats1qtrBadVersionPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419727: fltTcaOspfBadPktStats1yearBadVersionPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419728: fltTcaOspfBadPktStats5minBadVersionPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419729: fltTcaOspfBadPktStats15minBadVersionPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419730: fltTcaOspfBadPktStats1hBadVersionPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419731: fltTcaOspfBadPktStats1dBadVersionPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419732: fltTcaOspfBadPktStats1wBadVersionPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419733: fltTcaOspfBadPktStats1moBadVersionPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419734: fltTcaOspfBadPktStats1qtrBadVersionPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419735: fltTcaOspfBadPktStats1yearBadVersionPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Bad Version Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bad Version Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4198: fltSvcredirRsBackupDestAttConfigStFailed2

Severity: major

Explanation: This fault occurs when a PBR service destination is used with multiple health groups

Recommended Action: To recover from this fault, try the following actions

1. Use the destination with single health group

2. To recover, delete this destination from all PBR policies where its used, then add the destination with correct health group

F419808: fltTcaOspfDropUnkStats5minRcvdPktsDroppedLast

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419809: fltTcaOspfDropUnkStats15minRcvdPktsDroppedLast

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419810: fltTcaOspfDropUnkStats1hRcvdPktsDroppedLast

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419811: fltTcaOspfDropUnkStats1dRcvdPktsDroppedLast

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419812: fltTcaOspfDropUnkStats1wRcvdPktsDroppedLast

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419813: fltTcaOspfDropUnkStats1moRcvdPktsDroppedLast

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419814: fltTcaOspfDropUnkStats1qtrRcvdPktsDroppedLast

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419815: fltTcaOspfDropUnkStats1yearRcvdPktsDroppedLast

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419824: fltTcaOspfDropUnkStats5minRcvdPktsDroppedCum

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419825: fltTcaOspfDropUnkStats15minRcvdPktsDroppedCum

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419826: fltTcaOspfDropUnkStats1hRcvdPktsDroppedCum

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419827: fltTcaOspfDropUnkStats1dRcvdPktsDroppedCum

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419828: fltTcaOspfDropUnkStats1wRcvdPktsDroppedCum

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419829: fltTcaOspfDropUnkStats1moRcvdPktsDroppedCum

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419830: fltTcaOspfDropUnkStats1qtrRcvdPktsDroppedCum

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419831: fltTcaOspfDropUnkStats1yearRcvdPktsDroppedCum

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419832: fltTcaOspfDropUnkStats5minRcvdPktsDroppedPer

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419833: fltTcaOspfDropUnkStats15minRcvdPktsDroppedPer

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419834: fltTcaOspfDropUnkStats1hRcvdPktsDroppedPer

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419835: fltTcaOspfDropUnkStats1dRcvdPktsDroppedPer

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419836: fltTcaOspfDropUnkStats1wRcvdPktsDroppedPer

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419837: fltTcaOspfDropUnkStats1moRcvdPktsDroppedPer

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419838: fltTcaOspfDropUnkStats1qtrRcvdPktsDroppedPer

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419839: fltTcaOspfDropUnkStats1yearRcvdPktsDroppedPer

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419840: fltTcaOspfDropUnkStats5minRcvdPktsDroppedMin

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419841: fltTcaOspfDropUnkStats15minRcvdPktsDroppedMin

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419842: fltTcaOspfDropUnkStats1hRcvdPktsDroppedMin

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419843: fltTcaOspfDropUnkStats1dRcvdPktsDroppedMin

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419844: fltTcaOspfDropUnkStats1wRcvdPktsDroppedMin

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419845: fltTcaOspfDropUnkStats1moRcvdPktsDroppedMin

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419846: fltTcaOspfDropUnkStats1qtrRcvdPktsDroppedMin

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419847: fltTcaOspfDropUnkStats1yearRcvdPktsDroppedMin

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419848: fltTcaOspfDropUnkStats5minRcvdPktsDroppedMax

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419849: fltTcaOspfDropUnkStats15minRcvdPktsDroppedMax

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419850: fltTcaOspfDropUnkStats1hRcvdPktsDroppedMax

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419851: fltTcaOspfDropUnkStats1dRcvdPktsDroppedMax

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419852: fltTcaOspfDropUnkStats1wRcvdPktsDroppedMax

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419853: fltTcaOspfDropUnkStats1moRcvdPktsDroppedMax

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419854: fltTcaOspfDropUnkStats1qtrRcvdPktsDroppedMax

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419855: fltTcaOspfDropUnkStats1yearRcvdPktsDroppedMax

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419856: fltTcaOspfDropUnkStats5minRcvdPktsDroppedAvg

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419857: fltTcaOspfDropUnkStats15minRcvdPktsDroppedAvg

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419858: fltTcaOspfDropUnkStats1hRcvdPktsDroppedAvg

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419859: fltTcaOspfDropUnkStats1dRcvdPktsDroppedAvg

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419860: fltTcaOspfDropUnkStats1wRcvdPktsDroppedAvg

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419861: fltTcaOspfDropUnkStats1moRcvdPktsDroppedAvg

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419862: fltTcaOspfDropUnkStats1qtrRcvdPktsDroppedAvg

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419863: fltTcaOspfDropUnkStats1yearRcvdPktsDroppedAvg

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419888: fltTcaOspfDropUnkStats5minRcvdPktsDroppedTr

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419889: fltTcaOspfDropUnkStats15minRcvdPktsDroppedTr

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419890: fltTcaOspfDropUnkStats1hRcvdPktsDroppedTr

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419891: fltTcaOspfDropUnkStats1dRcvdPktsDroppedTr

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419892: fltTcaOspfDropUnkStats1wRcvdPktsDroppedTr

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419893: fltTcaOspfDropUnkStats1moRcvdPktsDroppedTr

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419894: fltTcaOspfDropUnkStats1qtrRcvdPktsDroppedTr

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419895: fltTcaOspfDropUnkStats1yearRcvdPktsDroppedTr

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419896: fltTcaOspfDropUnkStats5minRcvdPktsDroppedRate

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419897: fltTcaOspfDropUnkStats15minRcvdPktsDroppedRate

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419898: fltTcaOspfDropUnkStats1hRcvdPktsDroppedRate

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419899: fltTcaOspfDropUnkStats1dRcvdPktsDroppedRate

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4199: fltHcloudCtxPeerOperCloudVNetPeeringProvisioningStateFailed

Severity: major

Explanation: This fault occurs when Azure failed to provision the peering resource.

Recommended Action: If you see this fault, take the following actions:

1. Please try deleting the VNet Peering and create it again.
2. If fault still has not cleared, please contact Cisco TAC.

F419900: fltTcaOspfDropUnkStats1wRcvdPktsDroppedRate

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419901: fltTcaOspfDropUnkStats1moRcvdPktsDroppedRate

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419902: fltTcaOspfDropUnkStats1qtrRcvdPktsDroppedRate

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419903: fltTcaOspfDropUnkStats1yearRcvdPktsDroppedRate

Severity: variable

Explanation: This fault is caused by "Received Packets Dropped rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received Packets Dropped" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419976: fltTcaOspfDropUnkStats5minUnknownPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419977: fltTcaOspfDropUnkStats15minUnknownPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419978: fltTcaOspfDropUnkStats1hUnknownPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419979: fltTcaOspfDropUnkStats1dUnknownPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419980: fltTcaOspfDropUnkStats1wUnknownPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419981: fltTcaOspfDropUnkStats1moUnknownPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419982: fltTcaOspfDropUnkStats1qtrUnknownPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419983: fltTcaOspfDropUnkStats1yearUnknownPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419992: fltTcaOspfDropUnkStats5minUnknownPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419993: fltTcaOspfDropUnkStats15minUnknownPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419994: fltTcaOspfDropUnkStats1hUnknownPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419995: fltTcaOspfDropUnkStats1dUnknownPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419996: fltTcaOspfDropUnkStats1wUnknownPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419997: fltTcaOspfDropUnkStats1moUnknownPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419998: fltTcaOspfDropUnkStats1qtrUnknownPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F419999: fltTcaOspfDropUnkStats1yearUnknownPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4200: fltHcloudASelectorEPGSelectorValidation

Severity: minor

Explanation: This fault occurs when the Selector given on the EPG cannot be applied in the context of the stated CtxProfile(VNET/VPC).

Recommended Action: If you see this fault, change or remove the faulty EpSelector on the EPG.

F420000: fltTcaOspfDropUnkStats5minUnknownPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420001: fltTcaOspfDropUnkStats15minUnknownPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420002: fltTcaOspfDropUnkStats1hUnknownPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420003: fltTcaOspfDropUnkStats1dUnknownPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420004: fltTcaOspfDropUnkStats1wUnknownPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420005: fltTcaOspfDropUnkStats1moUnknownPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420006: fltTcaOspfDropUnkStats1qtrUnknownPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420007: fltTcaOspfDropUnkStats1yearUnknownPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420008: fltTcaOspfDropUnkStats5minUnknownPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420009: fltTcaOspfDropUnkStats15minUnknownPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420010: fltTcaOspfDropUnkStats1hUnknownPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420011: fltTcaOspfDropUnkStats1dUnknownPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420012: fltTcaOspfDropUnkStats1wUnknownPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420013: fltTcaOspfDropUnkStats1moUnknownPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420014: fltTcaOspfDropUnkStats1qtrUnknownPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420015: fltTcaOspfDropUnkStats1yearUnknownPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420016: fltTcaOspfDropUnkStats5minUnknownPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420017: fltTcaOspfDropUnkStats15minUnknownPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420018: fltTcaOspfDropUnkStats1hUnknownPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420019: fltTcaOspfDropUnkStats1dUnknownPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420020: fltTcaOspfDropUnkStats1wUnknownPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420021: fltTcaOspfDropUnkStats1moUnknownPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420022: fltTcaOspfDropUnkStats1qtrUnknownPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420023: fltTcaOspfDropUnkStats1yearUnknownPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420024: fltTcaOspfDropUnkStats5minUnknownPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420025: fltTcaOspfDropUnkStats15minUnknownPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420026: fltTcaOspfDropUnkStats1hUnknownPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420027: fltTcaOspfDropUnkStats1dUnknownPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420028: fltTcaOspfDropUnkStats1wUnknownPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420029: fltTcaOspfDropUnkStats1moUnknownPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420030: fltTcaOspfDropUnkStats1qtrUnknownPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420031: fltTcaOspfDropUnkStats1yearUnknownPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420056: fltTcaOspfDropUnkStats5minUnknownPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420057: fltTcaOspfDropUnkStats15minUnknownPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420058: fltTcaOspfDropUnkStats1hUnknownPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420059: fltTcaOspfDropUnkStats1dUnknownPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420060: fltTcaOspfDropUnkStats1wUnknownPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420061: fltTcaOspfDropUnkStats1moUnknownPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420062: fltTcaOspfDropUnkStats1qtrUnknownPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420063: fltTcaOspfDropUnkStats1yearUnknownPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420064: fltTcaOspfDropUnkStats5minUnknownPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420065: fltTcaOspfDropUnkStats15minUnknownPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420066: fltTcaOspfDropUnkStats1hUnknownPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420067: fltTcaOspfDropUnkStats1dUnknownPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420068: fltTcaOspfDropUnkStats1wUnknownPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420069: fltTcaOspfDropUnkStats1moUnknownPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420070: fltTcaOspfDropUnkStats1qtrUnknownPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420071: fltTcaOspfDropUnkStats1yearUnknownPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Unknown Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4201: fltHinventoryRsSubnetToRouteTableResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F420144: fltTcaOspfDupStats5minDupRtrIdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420145: fltTcaOspfDupStats15minDupRtrIdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420146: fltTcaOspfDupStats1hDupRtrIdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420147: fltTcaOspfDupStats1dDupRtrIdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420148: fltTcaOspfDupStats1wDupRtrIdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420149: fltTcaOspfDupStats1moDupRtrIdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420150: fltTcaOspfDupStats1qtrDupRtrIdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420151: fltTcaOspfDupStats1yearDupRtrIdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420160: fltTcaOspfDupStats5minDupRtrIdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420161: fltTcaOspfDupStats15minDupRtrIdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420162: fltTcaOspfDupStats1hDupRtrIdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420163: fltTcaOspfDupStats1dDupRtrIdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420164: fltTcaOspfDupStats1wDupRtrIdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420165: fltTcaOspfDupStats1moDupRtrIdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420166: fltTcaOspfDupStats1qtrDupRtrIdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420167: fltTcaOspfDupStats1yearDupRtrIdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420168: fltTcaOspfDupStats5minDupRtrIdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420169: fltTcaOspfDupStats15minDupRtrIdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420170: fltTcaOspfDupStats1hDupRtrIdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420171: fltTcaOspfDupStats1dDupRtrIdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420172: fltTcaOspfDupStats1wDupRtrIdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420173: fltTcaOspfDupStats1moDupRtrIdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420174: fltTcaOspfDupStats1qtrDupRtrIdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420175: fltTcaOspfDupStats1yearDupRtrIdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420176: fltTcaOspfDupStats5minDupRtrIdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420177: fltTcaOspfDupStats15minDupRtrIdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420178: fltTcaOspfDupStats1hDupRtrIdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420179: fltTcaOspfDupStats1dDupRtrIdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420180: fltTcaOspfDupStats1wDupRtrIdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420181: fltTcaOspfDupStats1moDupRtrIdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420182: fltTcaOspfDupStats1qtrDupRtrIdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420183: fltTcaOspfDupStats1yearDupRtrIdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420184: fltTcaOspfDupStats5minDupRtrIdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420185: fltTcaOspfDupStats15minDupRtrIdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420186: fltTcaOspfDupStats1hDupRtrIdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420187: fltTcaOspfDupStats1dDupRtrIdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420188: fltTcaOspfDupStats1wDupRtrIdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420189: fltTcaOspfDupStats1moDupRtrIdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420190: fltTcaOspfDupStats1qtrDupRtrIdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420191: fltTcaOspfDupStats1yearDupRtrIdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420192: fltTcaOspfDupStats5minDupRtrIdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420193: fltTcaOspfDupStats15minDupRtrIdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420194: fltTcaOspfDupStats1hDupRtrIdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420195: fltTcaOspfDupStats1dDupRtrIdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420196: fltTcaOspfDupStats1wDupRtrIdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420197: fltTcaOspfDupStats1moDupRtrIdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420198: fltTcaOspfDupStats1qtrDupRtrIdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420199: fltTcaOspfDupStats1yearDupRtrIdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420224: fltTcaOspfDupStats5minDupRtrIdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420225: fltTcaOspfDupStats15minDupRtrIdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420226: fltTcaOspfDupStats1hDupRtrIdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420227: fltTcaOspfDupStats1dDupRtrIdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420228: fltTcaOspfDupStats1wDupRtrIdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420229: fltTcaOspfDupStats1moDupRtrIdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420230: fltTcaOspfDupStats1qtrDupRtrIdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420231: fltTcaOspfDupStats1yearDupRtrIdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420232: fltTcaOspfDupStats5minDupRtrIdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420233: fltTcaOspfDupStats15minDupRtrIdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420234: fltTcaOspfDupStats1hDupRtrIdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420235: fltTcaOspfDupStats1dDupRtrIdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420236: fltTcaOspfDupStats1wDupRtrIdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420237: fltTcaOspfDupStats1moDupRtrIdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420238: fltTcaOspfDupStats1qtrDupRtrIdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420239: fltTcaOspfDupStats1yearDupRtrIdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate RouterId Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate RouterId Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4203: fltSvcredirRsDestAttTrackedDown

Severity: major

Explanation: This fault occurs when corresponding PBR service destination goes to failed state

Recommended Action: To recover from this fault, try the following actions

1. Check if hardware supports this feature
2. Look at any configuration issues
3. Verify the configuration is correct/complete
4. Check network connectivity and ensure the service dest is up and is trackable using the protocol configured

F420312: fltTcaOspfDupStats5minDupSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420313: fltTcaOspfDupStats15minDupSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420314: fltTcaOspfDupStats1hDupSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420315: fltTcaOspfDupStats1dDupSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420316: fltTcaOspfDupStats1wDupSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420317: fltTcaOspfDupStats1moDupSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420318: fltTcaOspfDupStats1qtrDupSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420319: fltTcaOspfDupStats1yearDupSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420328: fltTcaOspfDupStats5minDupSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420329: fltTcaOspfDupStats15minDupSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420330: fltTcaOspfDupStats1hDupSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420331: fltTcaOspfDupStats1dDupSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420332: fltTcaOspfDupStats1wDupSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420333: fltTcaOspfDupStats1moDupSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420334: fltTcaOspfDupStats1qtrDupSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420335: fltTcaOspfDupStats1yearDupSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420336: fltTcaOspfDupStats5minDupSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420337: fltTcaOspfDupStats15minDupSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420338: fltTcaOspfDupStats1hDupSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420339: fltTcaOspfDupStats1dDupSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420340: fltTcaOspfDupStats1wDupSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420341: fltTcaOspfDupStats1moDupSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420342: fltTcaOspfDupStats1qtrDupSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420343: fltTcaOspfDupStats1yearDupSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420344: fltTcaOspfDupStats5minDupSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420345: fltTcaOspfDupStats15minDupSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420346: fltTcaOspfDupStats1hDupSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420347: fltTcaOspfDupStats1dDupSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420348: fltTcaOspfDupStats1wDupSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420349: fltTcaOspfDupStats1moDupSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420350: fltTcaOspfDupStats1qtrDupSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420351: fltTcaOspfDupStats1yearDupSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420352: fltTcaOspfDupStats5minDupSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420353: fltTcaOspfDupStats15minDupSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420354: fltTcaOspfDupStats1hDupSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420355: fltTcaOspfDupStats1dDupSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420356: fltTcaOspfDupStats1wDupSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420357: fltTcaOspfDupStats1moDupSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420358: fltTcaOspfDupStats1qtrDupSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420359: fltTcaOspfDupStats1yearDupSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420360: fltTcaOspfDupStats5minDupSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420361: fltTcaOspfDupStats15minDupSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420362: fltTcaOspfDupStats1hDupSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420363: fltTcaOspfDupStats1dDupSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420364: fltTcaOspfDupStats1wDupSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420365: fltTcaOspfDupStats1moDupSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420366: fltTcaOspfDupStats1qtrDupSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420367: fltTcaOspfDupStats1yearDupSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420392: fltTcaOspfDupStats5minDupSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420393: fltTcaOspfDupStats15minDupSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420394: fltTcaOspfDupStats1hDupSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420395: fltTcaOspfDupStats1dDupSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420396: fltTcaOspfDupStats1wDupSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420397: fltTcaOspfDupStats1moDupSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420398: fltTcaOspfDupStats1qtrDupSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420399: fltTcaOspfDupStats1yearDupSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4204: fltSvcredirRsDestAttRulesNotPresent

Severity: major

Explanation: This fault occurs when corresponding PBR service destination goes to failed state

Recommended Action: To recover from this fault, try the following actions

1. Check if hardware supports this feature
2. Look at any configuration issues
3. Verify the configuration is correct/complete

F420400: fltTcaOspfDupStats5minDupSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420401: fltTcaOspfDupStats15minDupSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420402: fltTcaOspfDupStats1hDupSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420403: fltTcaOspfDupStats1dDupSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420404: fltTcaOspfDupStats1wDupSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420405: fltTcaOspfDupStats1moDupSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420406: fltTcaOspfDupStats1qtrDupSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420407: fltTcaOspfDupStats1yearDupSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Duplicate Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Duplicate Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420480: fltTcaOspfErrPktStats5minErrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420481: fltTcaOspfErrPktStats15minErrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420482: fltTcaOspfErrPktStats1hErrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420483: fltTcaOspfErrPktStats1dErrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420484: fltTcaOspfErrPktStats1wErrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420485: fltTcaOspfErrPktStats1moErrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420486: fltTcaOspfErrPktStats1qtrErrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420487: fltTcaOspfErrPktStats1yearErrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420496: fltTcaOspfErrPktStats5minErrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420497: fltTcaOspfErrPktStats15minErrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420498: fltTcaOspfErrPktStats1hErrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420499: fltTcaOspfErrPktStats1dErrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4205: fltSvcredirRsDestAttHwError

Severity: major

Explanation: This fault occurs when corresponding PBR service destination goes to failed state

Recommended Action: To recover from this fault, try the following actions

1. Check if hardware supports this feature
2. Look at any configuration issues
3. Verify the configuration is correct/complete
4. Check network connectivity and ensure the port is up

F420500: fltTcaOspfErrPktStats1wErrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420501: fltTcaOspfErrPktStats1moErrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420502: fltTcaOspfErrPktStats1qtrErrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420503: fltTcaOspfErrPktStats1yearErrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420504: fltTcaOspfErrPktStats5minErrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420505: fltTcaOspfErrPktStats15minErrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420506: fltTcaOspfErrPktStats1hErrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420507: fltTcaOspfErrPktStats1dErrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420508: fltTcaOspfErrPktStats1wErrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420509: fltTcaOspfErrPktStats1moErrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420510: fltTcaOspfErrPktStats1qtrErrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420511: fltTcaOspfErrPktStats1yearErrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420512: fltTcaOspfErrPktStats5minErrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420513: fltTcaOspfErrPktStats15minErrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420514: fltTcaOspfErrPktStats1hErrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420515: fltTcaOspfErrPktStats1dErrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420516: fltTcaOspfErrPktStats1wErrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420517: fltTcaOspfErrPktStats1moErrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420518: fltTcaOspfErrPktStats1qtrErrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420519: fltTcaOspfErrPktStats1yearErrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420520: fltTcaOspfErrPktStats5minErrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420521: fltTcaOspfErrPktStats15minErrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420522: fltTcaOspfErrPktStats1hErrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420523: fltTcaOspfErrPktStats1dErrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420524: fltTcaOspfErrPktStats1wErrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420525: fltTcaOspfErrPktStats1moErrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420526: fltTcaOspfErrPktStats1qtrErrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420527: fltTcaOspfErrPktStats1yearErrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420528: fltTcaOspfErrPktStats5minErrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420529: fltTcaOspfErrPktStats15minErrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420530: fltTcaOspfErrPktStats1hErrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420531: fltTcaOspfErrPktStats1dErrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420532: fltTcaOspfErrPktStats1wErrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420533: fltTcaOspfErrPktStats1moErrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420534: fltTcaOspfErrPktStats1qtrErrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420535: fltTcaOspfErrPktStats1yearErrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420560: fltTcaOspfErrPktStats5minErrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420561: fltTcaOspfErrPktStats15minErrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420562: fltTcaOspfErrPktStats1hErrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420563: fltTcaOspfErrPktStats1dErrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420564: fltTcaOspfErrPktStats1wErrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420565: fltTcaOspfErrPktStats1moErrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420566: fltTcaOspfErrPktStats1qtrErrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420567: fltTcaOspfErrPktStats1yearErrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420568: fltTcaOspfErrPktStats5minErrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420569: fltTcaOspfErrPktStats15minErrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420570: fltTcaOspfErrPktStats1hErrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420571: fltTcaOspfErrPktStats1dErrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420572: fltTcaOspfErrPktStats1wErrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420573: fltTcaOspfErrPktStats1moErrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420574: fltTcaOspfErrPktStats1qtrErrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420575: fltTcaOspfErrPktStats1yearErrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4206: fltSvcredirRsBackupDestAttTrackedDown

Severity: major

Explanation: This fault occurs when corresponding PBR service backup destination goes to failed state

Recommended Action: To recover from this fault, try the following actions

1. Check if hardware supports this feature
2. Look at any configuration issues
3. Verify the configuration is correct/complete
4. Check network connectivity and ensure the service dest is up and is trackable using the protocol configured

F420648: fltTcaOspfErrPktStats5minErrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420649: fltTcaOspfErrPktStats15minErrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420650: fltTcaOspfErrPktStats1hErrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420651: fltTcaOspfErrPktStats1dErrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420652: fltTcaOspfErrPktStats1wErrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420653: fltTcaOspfErrPktStats1moErrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420654: fltTcaOspfErrPktStats1qtrErrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420655: fltTcaOspfErrPktStats1yearErrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420664: fltTcaOspfErrPktStats5minErrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420665: fltTcaOspfErrPktStats15minErrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420666: fltTcaOspfErrPktStats1hErrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420667: fltTcaOspfErrPktStats1dErrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420668: fltTcaOspfErrPktStats1wErrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420669: fltTcaOspfErrPktStats1moErrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420670: fltTcaOspfErrPktStats1qtrErrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420671: fltTcaOspfErrPktStats1yearErrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420672: fltTcaOspfErrPktStats5minErrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420673: fltTcaOspfErrPktStats15minErrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420674: fltTcaOspfErrPktStats1hErrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420675: fltTcaOspfErrPktStats1dErrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420676: fltTcaOspfErrPktStats1wErrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420677: fltTcaOspfErrPktStats1moErrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420678: fltTcaOspfErrPktStats1qtrErrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420679: fltTcaOspfErrPktStats1yearErrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420680: fltTcaOspfErrPktStats5minErrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420681: fltTcaOspfErrPktStats15minErrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420682: fltTcaOspfErrPktStats1hErrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420683: fltTcaOspfErrPktStats1dErrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420684: fltTcaOspfErrPktStats1wErrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420685: fltTcaOspfErrPktStats1moErrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420686: fltTcaOspfErrPktStats1qtrErrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420687: fltTcaOspfErrPktStats1yearErrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420688: fltTcaOspfErrPktStats5minErrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420689: fltTcaOspfErrPktStats15minErrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420690: fltTcaOspfErrPktStats1hErrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420691: fltTcaOspfErrPktStats1dErrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420692: fltTcaOspfErrPktStats1wErrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420693: fltTcaOspfErrPktStats1moErrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420694: fltTcaOspfErrPktStats1qtrErrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420695: fltTcaOspfErrPktStats1yearErrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420696: fltTcaOspfErrPktStats5minErrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420697: fltTcaOspfErrPktStats15minErrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420698: fltTcaOspfErrPktStats1hErrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420699: fltTcaOspfErrPktStats1dErrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4207: fltSvcredirRsBackupDestAttRulesNotPresent

Severity: major

Explanation: This fault occurs when corresponding PBR service backup destination goes to failed state

Recommended Action: To recover from this fault, try the following actions

1. Check if hardware supports this feature
2. Look at any configuration issues
3. Verify the configuration is correct/complete

F420700: fltTcaOspfErrPktStats1wErrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420701: fltTcaOspfErrPktStats1moErrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420702: fltTcaOspfErrPktStats1qtrErrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420703: fltTcaOspfErrPktStats1yearErrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420728: fltTcaOspfErrPktStats5minErrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420729: fltTcaOspfErrPktStats15minErrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420730: fltTcaOspfErrPktStats1hErrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420731: fltTcaOspfErrPktStats1dErrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420732: fltTcaOspfErrPktStats1wErrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420733: fltTcaOspfErrPktStats1moErrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420734: fltTcaOspfErrPktStats1qtrErrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420735: fltTcaOspfErrPktStats1yearErrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420736: fltTcaOspfErrPktStats5minErrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420737: fltTcaOspfErrPktStats15minErrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420738: fltTcaOspfErrPktStats1hErrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420739: fltTcaOspfErrPktStats1dErrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420740: fltTcaOspfErrPktStats1wErrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420741: fltTcaOspfErrPktStats1moErrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420742: fltTcaOspfErrPktStats1qtrErrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420743: fltTcaOspfErrPktStats1yearErrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4208: fltSvcredirRsBackupDestAttHwErrorDest

Severity: major

Explanation: This fault occurs when corresponding PBR service backup destination goes to failed state

Recommended Action: To recover from this fault, try the following actions

1. Check if hardware supports this feature
2. Look at any configuration issues
3. Verify the configuration is correct/complete
4. Check network connectivity and ensure the port is up

F420816: fltTcaOspfErrPktStats5minErrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420817: fltTcaOspfErrPktStats15minErrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420818: fltTcaOspfErrPktStats1hErrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420819: fltTcaOspfErrPktStats1dErrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420820: fltTcaOspfErrPktStats1wErrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Packets Received current value" statistical property crossing threshold level.
