Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452788: fltTcaCloudLBStats1wRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452789: fltTcaCloudLBStats1moRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452790: fltTcaCloudLBStats1qtrRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452791: fltTcaCloudLBStats1yearRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452864: fltTcaCloudLBStatsAg5minRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452865: fltTcaCloudLBStatsAg15minRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452866: fltTcaCloudLBStatsAg1hRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452867: fltTcaCloudLBStatsAg1dRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452868: fltTcaCloudLBStatsAg1wRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452869: fltTcaCloudLBStatsAg1moRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452870: fltTcaCloudLBStatsAg1qtrRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452871: fltTcaCloudLBStatsAg1yearRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452872: fltTcaCloudLBStatsAg5minRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452873: fltTcaCloudLBStatsAg15minRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452874: fltTcaCloudLBStatsAg1hRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452875: fltTcaCloudLBStatsAg1dRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452876: fltTcaCloudLBStatsAg1wRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452877: fltTcaCloudLBStatsAg1moRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452878: fltTcaCloudLBStatsAg1qtrRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452879: fltTcaCloudLBStatsAg1yearRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452904: fltTcaCloudLBStatsAg5minRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452905: fltTcaCloudLBStatsAg15minRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452906: fltTcaCloudLBStatsAg1hRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452907: fltTcaCloudLBStatsAg1dRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452908: fltTcaCloudLBStatsAg1wRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452909: fltTcaCloudLBStatsAg1moRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452910: fltTcaCloudLBStatsAg1qtrRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452911: fltTcaCloudLBStatsAg1yearRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452912: fltTcaCloudLBStatsAg5minRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452913: fltTcaCloudLBStatsAg15minRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452914: fltTcaCloudLBStatsAg1hRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452915: fltTcaCloudLBStatsAg1dRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452916: fltTcaCloudLBStatsAg1wRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452917: fltTcaCloudLBStatsAg1moRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452918: fltTcaCloudLBStatsAg1qtrRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452919: fltTcaCloudLBStatsAg1yearRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452968: fltTcaCloudLBStats5minRequestCountLast

Severity: variable

Explanation: This fault is caused by "Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452969: fltTcaCloudLBStats15minRequestCountLast

Severity: variable

Explanation: This fault is caused by "Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452970: fltTcaCloudLBStats1hRequestCountLast

Severity: variable

Explanation: This fault is caused by "Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452971: fltTcaCloudLBStats1dRequestCountLast

Severity: variable

Explanation: This fault is caused by "Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452972: fltTcaCloudLBStats1wRequestCountLast

Severity: variable

Explanation: This fault is caused by "Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452973: fltTcaCloudLBStats1moRequestCountLast

Severity: variable

Explanation: This fault is caused by "Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452974: fltTcaCloudLBStats1qtrRequestCountLast

Severity: variable

Explanation: This fault is caused by "Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452975: fltTcaCloudLBStats1yearRequestCountLast

Severity: variable

Explanation: This fault is caused by "Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452984: fltTcaCloudLBStats5minRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452985: fltTcaCloudLBStats15minRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452986: fltTcaCloudLBStats1hRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452987: fltTcaCloudLBStats1dRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452988: fltTcaCloudLBStats1wRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452989: fltTcaCloudLBStats1moRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452990: fltTcaCloudLBStats1qtrRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452991: fltTcaCloudLBStats1yearRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452992: fltTcaCloudLBStats5minRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452993: fltTcaCloudLBStats15minRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452994: fltTcaCloudLBStats1hRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452995: fltTcaCloudLBStats1dRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452996: fltTcaCloudLBStats1wRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452997: fltTcaCloudLBStats1moRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452998: fltTcaCloudLBStats1qtrRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452999: fltTcaCloudLBStats1yearRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453000: fltTcaCloudLBStats5minRequestCountMin

Severity: variable

Explanation: This fault is caused by "Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453001: fltTcaCloudLBStats15minRequestCountMin

Severity: variable

Explanation: This fault is caused by "Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453002: fltTcaCloudLBStats1hRequestCountMin

Severity: variable

Explanation: This fault is caused by "Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453003: fltTcaCloudLBStats1dRequestCountMin

Severity: variable

Explanation: This fault is caused by "Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453004: fltTcaCloudLBStats1wRequestCountMin

Severity: variable

Explanation: This fault is caused by "Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453005: fltTcaCloudLBStats1moRequestCountMin

Severity: variable

Explanation: This fault is caused by "Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453006: fltTcaCloudLBStats1qtrRequestCountMin

Severity: variable

Explanation: This fault is caused by "Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453007: fltTcaCloudLBStats1yearRequestCountMin

Severity: variable

Explanation: This fault is caused by "Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453008: fltTcaCloudLBStats5minRequestCountMax

Severity: variable

Explanation: This fault is caused by "Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453009: fltTcaCloudLBStats15minRequestCountMax

Severity: variable

Explanation: This fault is caused by "Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453010: fltTcaCloudLBStats1hRequestCountMax

Severity: variable

Explanation: This fault is caused by "Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453011: fltTcaCloudLBStats1dRequestCountMax

Severity: variable

Explanation: This fault is caused by "Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453012: fltTcaCloudLBStats1wRequestCountMax

Severity: variable

Explanation: This fault is caused by "Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453013: fltTcaCloudLBStats1moRequestCountMax

Severity: variable

Explanation: This fault is caused by "Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453014: fltTcaCloudLBStats1qtrRequestCountMax

Severity: variable

Explanation: This fault is caused by "Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453015: fltTcaCloudLBStats1yearRequestCountMax

Severity: variable

Explanation: This fault is caused by "Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453016: fltTcaCloudLBStats5minRequestCountAvg

Severity: variable

Explanation: This fault is caused by "Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453017: fltTcaCloudLBStats15minRequestCountAvg

Severity: variable

Explanation: This fault is caused by "Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453018: fltTcaCloudLBStats1hRequestCountAvg

Severity: variable

Explanation: This fault is caused by "Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453019: fltTcaCloudLBStats1dRequestCountAvg

Severity: variable

Explanation: This fault is caused by "Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453020: fltTcaCloudLBStats1wRequestCountAvg

Severity: variable

Explanation: This fault is caused by "Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453021: fltTcaCloudLBStats1moRequestCountAvg

Severity: variable

Explanation: This fault is caused by "Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453022: fltTcaCloudLBStats1qtrRequestCountAvg

Severity: variable

Explanation: This fault is caused by "Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453023: fltTcaCloudLBStats1yearRequestCountAvg

Severity: variable

Explanation: This fault is caused by "Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453048: fltTcaCloudLBStats5minRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453049: fltTcaCloudLBStats15minRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453050: fltTcaCloudLBStats1hRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453051: fltTcaCloudLBStats1dRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453052: fltTcaCloudLBStats1wRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453053: fltTcaCloudLBStats1moRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453054: fltTcaCloudLBStats1qtrRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453055: fltTcaCloudLBStats1yearRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453056: fltTcaCloudLBStats5minRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453057: fltTcaCloudLBStats15minRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453058: fltTcaCloudLBStats1hRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453059: fltTcaCloudLBStats1dRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453060: fltTcaCloudLBStats1wRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453061: fltTcaCloudLBStats1moRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453062: fltTcaCloudLBStats1qtrRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453063: fltTcaCloudLBStats1yearRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453136: fltTcaCloudLBStatsAg5minRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453137: fltTcaCloudLBStatsAg15minRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453138: fltTcaCloudLBStatsAg1hRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453139: fltTcaCloudLBStatsAg1dRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453140: fltTcaCloudLBStatsAg1wRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453141: fltTcaCloudLBStatsAg1moRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453142: fltTcaCloudLBStatsAg1qtrRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453143: fltTcaCloudLBStatsAg1yearRequestCountCum

Severity: variable

Explanation: This fault is caused by "Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453144: fltTcaCloudLBStatsAg5minRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453145: fltTcaCloudLBStatsAg15minRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453146: fltTcaCloudLBStatsAg1hRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453147: fltTcaCloudLBStatsAg1dRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453148: fltTcaCloudLBStatsAg1wRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453149: fltTcaCloudLBStatsAg1moRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453150: fltTcaCloudLBStatsAg1qtrRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453151: fltTcaCloudLBStatsAg1yearRequestCountPer

Severity: variable

Explanation: This fault is caused by "Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453176: fltTcaCloudLBStatsAg5minRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453177: fltTcaCloudLBStatsAg15minRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453178: fltTcaCloudLBStatsAg1hRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453179: fltTcaCloudLBStatsAg1dRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453180: fltTcaCloudLBStatsAg1wRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453181: fltTcaCloudLBStatsAg1moRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453182: fltTcaCloudLBStatsAg1qtrRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453183: fltTcaCloudLBStatsAg1yearRequestCountTr

Severity: variable

Explanation: This fault is caused by "Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453184: fltTcaCloudLBStatsAg5minRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453185: fltTcaCloudLBStatsAg15minRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453186: fltTcaCloudLBStatsAg1hRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453187: fltTcaCloudLBStatsAg1dRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453188: fltTcaCloudLBStatsAg1wRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453189: fltTcaCloudLBStatsAg1moRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453190: fltTcaCloudLBStatsAg1qtrRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453191: fltTcaCloudLBStatsAg1yearRequestCountRate

Severity: variable

Explanation: This fault is caused by "Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453240: fltTcaCloudPoolHealthStats5minHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453241: fltTcaCloudPoolHealthStats15minHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453242: fltTcaCloudPoolHealthStats1hHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453243: fltTcaCloudPoolHealthStats1dHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453244: fltTcaCloudPoolHealthStats1wHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453245: fltTcaCloudPoolHealthStats1moHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453246: fltTcaCloudPoolHealthStats1qtrHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453247: fltTcaCloudPoolHealthStats1yearHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453256: fltTcaCloudPoolHealthStats5minHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453257: fltTcaCloudPoolHealthStats15minHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453258: fltTcaCloudPoolHealthStats1hHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453259: fltTcaCloudPoolHealthStats1dHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453260: fltTcaCloudPoolHealthStats1wHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453261: fltTcaCloudPoolHealthStats1moHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453262: fltTcaCloudPoolHealthStats1qtrHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453263: fltTcaCloudPoolHealthStats1yearHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453264: fltTcaCloudPoolHealthStats5minHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453265: fltTcaCloudPoolHealthStats15minHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453266: fltTcaCloudPoolHealthStats1hHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453267: fltTcaCloudPoolHealthStats1dHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453268: fltTcaCloudPoolHealthStats1wHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453269: fltTcaCloudPoolHealthStats1moHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453270: fltTcaCloudPoolHealthStats1qtrHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453271: fltTcaCloudPoolHealthStats1yearHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453272: fltTcaCloudPoolHealthStats5minHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453273: fltTcaCloudPoolHealthStats15minHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453274: fltTcaCloudPoolHealthStats1hHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453275: fltTcaCloudPoolHealthStats1dHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453276: fltTcaCloudPoolHealthStats1wHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453277: fltTcaCloudPoolHealthStats1moHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453278: fltTcaCloudPoolHealthStats1qtrHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453279: fltTcaCloudPoolHealthStats1yearHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453280: fltTcaCloudPoolHealthStats5minHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453281: fltTcaCloudPoolHealthStats15minHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453282: fltTcaCloudPoolHealthStats1hHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453283: fltTcaCloudPoolHealthStats1dHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453284: fltTcaCloudPoolHealthStats1wHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453285: fltTcaCloudPoolHealthStats1moHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453286: fltTcaCloudPoolHealthStats1qtrHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453287: fltTcaCloudPoolHealthStats1yearHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453288: fltTcaCloudPoolHealthStats5minHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453289: fltTcaCloudPoolHealthStats15minHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453290: fltTcaCloudPoolHealthStats1hHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453291: fltTcaCloudPoolHealthStats1dHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453292: fltTcaCloudPoolHealthStats1wHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453293: fltTcaCloudPoolHealthStats1moHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453294: fltTcaCloudPoolHealthStats1qtrHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453295: fltTcaCloudPoolHealthStats1yearHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453320: fltTcaCloudPoolHealthStats5minHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453321: fltTcaCloudPoolHealthStats15minHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453322: fltTcaCloudPoolHealthStats1hHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453323: fltTcaCloudPoolHealthStats1dHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453324: fltTcaCloudPoolHealthStats1wHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453325: fltTcaCloudPoolHealthStats1moHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453326: fltTcaCloudPoolHealthStats1qtrHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453327: fltTcaCloudPoolHealthStats1yearHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453328: fltTcaCloudPoolHealthStats5minHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453329: fltTcaCloudPoolHealthStats15minHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453330: fltTcaCloudPoolHealthStats1hHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453331: fltTcaCloudPoolHealthStats1dHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453332: fltTcaCloudPoolHealthStats1wHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453333: fltTcaCloudPoolHealthStats1moHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453334: fltTcaCloudPoolHealthStats1qtrHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453335: fltTcaCloudPoolHealthStats1yearHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453408: fltTcaCloudPoolHealthStatsAg5minHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453409: fltTcaCloudPoolHealthStatsAg15minHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453410: fltTcaCloudPoolHealthStatsAg1hHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453411: fltTcaCloudPoolHealthStatsAg1dHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453412: fltTcaCloudPoolHealthStatsAg1wHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453413: fltTcaCloudPoolHealthStatsAg1moHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453414: fltTcaCloudPoolHealthStatsAg1qtrHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453415: fltTcaCloudPoolHealthStatsAg1yearHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453416: fltTcaCloudPoolHealthStatsAg5minHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453417: fltTcaCloudPoolHealthStatsAg15minHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453418: fltTcaCloudPoolHealthStatsAg1hHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453419: fltTcaCloudPoolHealthStatsAg1dHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453420: fltTcaCloudPoolHealthStatsAg1wHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453421: fltTcaCloudPoolHealthStatsAg1moHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453422: fltTcaCloudPoolHealthStatsAg1qtrHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453423: fltTcaCloudPoolHealthStatsAg1yearHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453448: fltTcaCloudPoolHealthStatsAg5minHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453449: fltTcaCloudPoolHealthStatsAg15minHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453450: fltTcaCloudPoolHealthStatsAg1hHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453451: fltTcaCloudPoolHealthStatsAg1dHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453452: fltTcaCloudPoolHealthStatsAg1wHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453453: fltTcaCloudPoolHealthStatsAg1moHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453454: fltTcaCloudPoolHealthStatsAg1qtrHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453455: fltTcaCloudPoolHealthStatsAg1yearHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453456: fltTcaCloudPoolHealthStatsAg5minHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453457: fltTcaCloudPoolHealthStatsAg15minHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453458: fltTcaCloudPoolHealthStatsAg1hHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453459: fltTcaCloudPoolHealthStatsAg1dHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453460: fltTcaCloudPoolHealthStatsAg1wHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453461: fltTcaCloudPoolHealthStatsAg1moHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453462: fltTcaCloudPoolHealthStatsAg1qtrHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453463: fltTcaCloudPoolHealthStatsAg1yearHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool healthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool healthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453512: fltTcaCloudPoolHealthStats5minUnHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453513: fltTcaCloudPoolHealthStats15minUnHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453514: fltTcaCloudPoolHealthStats1hUnHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453515: fltTcaCloudPoolHealthStats1dUnHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453516: fltTcaCloudPoolHealthStats1wUnHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453517: fltTcaCloudPoolHealthStats1moUnHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453518: fltTcaCloudPoolHealthStats1qtrUnHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453519: fltTcaCloudPoolHealthStats1yearUnHealthyHostCountLast

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453528: fltTcaCloudPoolHealthStats5minUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453529: fltTcaCloudPoolHealthStats15minUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453530: fltTcaCloudPoolHealthStats1hUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453531: fltTcaCloudPoolHealthStats1dUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453532: fltTcaCloudPoolHealthStats1wUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453533: fltTcaCloudPoolHealthStats1moUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453534: fltTcaCloudPoolHealthStats1qtrUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453535: fltTcaCloudPoolHealthStats1yearUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453536: fltTcaCloudPoolHealthStats5minUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453537: fltTcaCloudPoolHealthStats15minUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453538: fltTcaCloudPoolHealthStats1hUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453539: fltTcaCloudPoolHealthStats1dUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453540: fltTcaCloudPoolHealthStats1wUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453541: fltTcaCloudPoolHealthStats1moUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453542: fltTcaCloudPoolHealthStats1qtrUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453543: fltTcaCloudPoolHealthStats1yearUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453544: fltTcaCloudPoolHealthStats5minUnHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453545: fltTcaCloudPoolHealthStats15minUnHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453546: fltTcaCloudPoolHealthStats1hUnHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453547: fltTcaCloudPoolHealthStats1dUnHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453548: fltTcaCloudPoolHealthStats1wUnHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453549: fltTcaCloudPoolHealthStats1moUnHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453550: fltTcaCloudPoolHealthStats1qtrUnHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453551: fltTcaCloudPoolHealthStats1yearUnHealthyHostCountMin

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453552: fltTcaCloudPoolHealthStats5minUnHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453553: fltTcaCloudPoolHealthStats15minUnHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453554: fltTcaCloudPoolHealthStats1hUnHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453555: fltTcaCloudPoolHealthStats1dUnHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453556: fltTcaCloudPoolHealthStats1wUnHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453557: fltTcaCloudPoolHealthStats1moUnHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453558: fltTcaCloudPoolHealthStats1qtrUnHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453559: fltTcaCloudPoolHealthStats1yearUnHealthyHostCountMax

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453560: fltTcaCloudPoolHealthStats5minUnHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453561: fltTcaCloudPoolHealthStats15minUnHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453562: fltTcaCloudPoolHealthStats1hUnHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453563: fltTcaCloudPoolHealthStats1dUnHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453564: fltTcaCloudPoolHealthStats1wUnHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453565: fltTcaCloudPoolHealthStats1moUnHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453566: fltTcaCloudPoolHealthStats1qtrUnHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453567: fltTcaCloudPoolHealthStats1yearUnHealthyHostCountAvg

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453592: fltTcaCloudPoolHealthStats5minUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453593: fltTcaCloudPoolHealthStats15minUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453594: fltTcaCloudPoolHealthStats1hUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453595: fltTcaCloudPoolHealthStats1dUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453596: fltTcaCloudPoolHealthStats1wUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453597: fltTcaCloudPoolHealthStats1moUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453598: fltTcaCloudPoolHealthStats1qtrUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453599: fltTcaCloudPoolHealthStats1yearUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453600: fltTcaCloudPoolHealthStats5minUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453601: fltTcaCloudPoolHealthStats15minUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453602: fltTcaCloudPoolHealthStats1hUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453603: fltTcaCloudPoolHealthStats1dUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453604: fltTcaCloudPoolHealthStats1wUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453605: fltTcaCloudPoolHealthStats1moUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453606: fltTcaCloudPoolHealthStats1qtrUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453607: fltTcaCloudPoolHealthStats1yearUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453680: fltTcaCloudPoolHealthStatsAg5minUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453681: fltTcaCloudPoolHealthStatsAg15minUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453682: fltTcaCloudPoolHealthStatsAg1hUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453683: fltTcaCloudPoolHealthStatsAg1dUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453684: fltTcaCloudPoolHealthStatsAg1wUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453685: fltTcaCloudPoolHealthStatsAg1moUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453686: fltTcaCloudPoolHealthStatsAg1qtrUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453687: fltTcaCloudPoolHealthStatsAg1yearUnHealthyHostCountCum

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453688: fltTcaCloudPoolHealthStatsAg5minUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453689: fltTcaCloudPoolHealthStatsAg15minUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453690: fltTcaCloudPoolHealthStatsAg1hUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453691: fltTcaCloudPoolHealthStatsAg1dUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453692: fltTcaCloudPoolHealthStatsAg1wUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453693: fltTcaCloudPoolHealthStatsAg1moUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453694: fltTcaCloudPoolHealthStatsAg1qtrUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453695: fltTcaCloudPoolHealthStatsAg1yearUnHealthyHostCountPer

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453720: fltTcaCloudPoolHealthStatsAg5minUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453721: fltTcaCloudPoolHealthStatsAg15minUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453722: fltTcaCloudPoolHealthStatsAg1hUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453723: fltTcaCloudPoolHealthStatsAg1dUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453724: fltTcaCloudPoolHealthStatsAg1wUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453725: fltTcaCloudPoolHealthStatsAg1moUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453726: fltTcaCloudPoolHealthStatsAg1qtrUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453727: fltTcaCloudPoolHealthStatsAg1yearUnHealthyHostCountTr

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453728: fltTcaCloudPoolHealthStatsAg5minUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453729: fltTcaCloudPoolHealthStatsAg15minUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453730: fltTcaCloudPoolHealthStatsAg1hUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453731: fltTcaCloudPoolHealthStatsAg1dUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453732: fltTcaCloudPoolHealthStatsAg1wUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453733: fltTcaCloudPoolHealthStatsAg1moUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453734: fltTcaCloudPoolHealthStatsAg1qtrUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453735: fltTcaCloudPoolHealthStatsAg1yearUnHealthyHostCountRate

Severity: variable

Explanation: This fault is caused by "Pool unhealthy hosts count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool unhealthy hosts count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453784: fltTcaCloudPoolResponseLatency5minTargetResponseTimeLast

Severity: variable

Explanation: This fault is caused by "Pool response time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453785: fltTcaCloudPoolResponseLatency15minTargetResponseTimeLast

Severity: variable

Explanation: This fault is caused by "Pool response time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453786: fltTcaCloudPoolResponseLatency1hTargetResponseTimeLast

Severity: variable

Explanation: This fault is caused by "Pool response time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453787: fltTcaCloudPoolResponseLatency1dTargetResponseTimeLast

Severity: variable

Explanation: This fault is caused by "Pool response time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453788: fltTcaCloudPoolResponseLatency1wTargetResponseTimeLast

Severity: variable

Explanation: This fault is caused by "Pool response time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453789: fltTcaCloudPoolResponseLatency1moTargetResponseTimeLast

Severity: variable

Explanation: This fault is caused by "Pool response time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453790: fltTcaCloudPoolResponseLatency1qtrTargetResponseTimeLast

Severity: variable

Explanation: This fault is caused by "Pool response time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453791: fltTcaCloudPoolResponseLatency1yearTargetResponseTimeLast

Severity: variable

Explanation: This fault is caused by "Pool response time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453800: fltTcaCloudPoolResponseLatency5minTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453801: fltTcaCloudPoolResponseLatency15minTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453802: fltTcaCloudPoolResponseLatency1hTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453803: fltTcaCloudPoolResponseLatency1dTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453804: fltTcaCloudPoolResponseLatency1wTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453805: fltTcaCloudPoolResponseLatency1moTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453806: fltTcaCloudPoolResponseLatency1qtrTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453807: fltTcaCloudPoolResponseLatency1yearTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453808: fltTcaCloudPoolResponseLatency5minTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453809: fltTcaCloudPoolResponseLatency15minTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453810: fltTcaCloudPoolResponseLatency1hTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453811: fltTcaCloudPoolResponseLatency1dTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453812: fltTcaCloudPoolResponseLatency1wTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453813: fltTcaCloudPoolResponseLatency1moTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453814: fltTcaCloudPoolResponseLatency1qtrTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453815: fltTcaCloudPoolResponseLatency1yearTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453816: fltTcaCloudPoolResponseLatency5minTargetResponseTimeMin

Severity: variable

Explanation: This fault is caused by "Pool response time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453817: fltTcaCloudPoolResponseLatency15minTargetResponseTimeMin

Severity: variable

Explanation: This fault is caused by "Pool response time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453818: fltTcaCloudPoolResponseLatency1hTargetResponseTimeMin

Severity: variable

Explanation: This fault is caused by "Pool response time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453819: fltTcaCloudPoolResponseLatency1dTargetResponseTimeMin

Severity: variable

Explanation: This fault is caused by "Pool response time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453820: fltTcaCloudPoolResponseLatency1wTargetResponseTimeMin

Severity: variable

Explanation: This fault is caused by "Pool response time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453821: fltTcaCloudPoolResponseLatency1moTargetResponseTimeMin

Severity: variable

Explanation: This fault is caused by "Pool response time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453822: fltTcaCloudPoolResponseLatency1qtrTargetResponseTimeMin

Severity: variable

Explanation: This fault is caused by "Pool response time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453823: fltTcaCloudPoolResponseLatency1yearTargetResponseTimeMin

Severity: variable

Explanation: This fault is caused by "Pool response time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453824: fltTcaCloudPoolResponseLatency5minTargetResponseTimeMax

Severity: variable

Explanation: This fault is caused by "Pool response time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453825: fltTcaCloudPoolResponseLatency15minTargetResponseTimeMax

Severity: variable

Explanation: This fault is caused by "Pool response time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453826: fltTcaCloudPoolResponseLatency1hTargetResponseTimeMax

Severity: variable

Explanation: This fault is caused by "Pool response time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453827: fltTcaCloudPoolResponseLatency1dTargetResponseTimeMax

Severity: variable

Explanation: This fault is caused by "Pool response time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453828: fltTcaCloudPoolResponseLatency1wTargetResponseTimeMax

Severity: variable

Explanation: This fault is caused by "Pool response time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453829: fltTcaCloudPoolResponseLatency1moTargetResponseTimeMax

Severity: variable

Explanation: This fault is caused by "Pool response time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453830: fltTcaCloudPoolResponseLatency1qtrTargetResponseTimeMax

Severity: variable

Explanation: This fault is caused by "Pool response time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453831: fltTcaCloudPoolResponseLatency1yearTargetResponseTimeMax

Severity: variable

Explanation: This fault is caused by "Pool response time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453832: fltTcaCloudPoolResponseLatency5minTargetResponseTimeAvg

Severity: variable

Explanation: This fault is caused by "Pool response time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453833: fltTcaCloudPoolResponseLatency15minTargetResponseTimeAvg

Severity: variable

Explanation: This fault is caused by "Pool response time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453834: fltTcaCloudPoolResponseLatency1hTargetResponseTimeAvg

Severity: variable

Explanation: This fault is caused by "Pool response time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453835: fltTcaCloudPoolResponseLatency1dTargetResponseTimeAvg

Severity: variable

Explanation: This fault is caused by "Pool response time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453836: fltTcaCloudPoolResponseLatency1wTargetResponseTimeAvg

Severity: variable

Explanation: This fault is caused by "Pool response time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453837: fltTcaCloudPoolResponseLatency1moTargetResponseTimeAvg

Severity: variable

Explanation: This fault is caused by "Pool response time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453838: fltTcaCloudPoolResponseLatency1qtrTargetResponseTimeAvg

Severity: variable

Explanation: This fault is caused by "Pool response time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453839: fltTcaCloudPoolResponseLatency1yearTargetResponseTimeAvg

Severity: variable

Explanation: This fault is caused by "Pool response time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453864: fltTcaCloudPoolResponseLatency5minTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453865: fltTcaCloudPoolResponseLatency15minTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453866: fltTcaCloudPoolResponseLatency1hTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453867: fltTcaCloudPoolResponseLatency1dTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453868: fltTcaCloudPoolResponseLatency1wTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453869: fltTcaCloudPoolResponseLatency1moTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453870: fltTcaCloudPoolResponseLatency1qtrTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453871: fltTcaCloudPoolResponseLatency1yearTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453872: fltTcaCloudPoolResponseLatency5minTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453873: fltTcaCloudPoolResponseLatency15minTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453874: fltTcaCloudPoolResponseLatency1hTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453875: fltTcaCloudPoolResponseLatency1dTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453876: fltTcaCloudPoolResponseLatency1wTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453877: fltTcaCloudPoolResponseLatency1moTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453878: fltTcaCloudPoolResponseLatency1qtrTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453879: fltTcaCloudPoolResponseLatency1yearTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453952: fltTcaCloudPoolResponseLatencyAg5minTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453953: fltTcaCloudPoolResponseLatencyAg15minTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453954: fltTcaCloudPoolResponseLatencyAg1hTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453955: fltTcaCloudPoolResponseLatencyAg1dTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453956: fltTcaCloudPoolResponseLatencyAg1wTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453957: fltTcaCloudPoolResponseLatencyAg1moTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453958: fltTcaCloudPoolResponseLatencyAg1qtrTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453959: fltTcaCloudPoolResponseLatencyAg1yearTargetResponseTimeCum

Severity: variable

Explanation: This fault is caused by "Pool response time cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453960: fltTcaCloudPoolResponseLatencyAg5minTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453961: fltTcaCloudPoolResponseLatencyAg15minTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453962: fltTcaCloudPoolResponseLatencyAg1hTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453963: fltTcaCloudPoolResponseLatencyAg1dTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453964: fltTcaCloudPoolResponseLatencyAg1wTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453965: fltTcaCloudPoolResponseLatencyAg1moTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453966: fltTcaCloudPoolResponseLatencyAg1qtrTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453967: fltTcaCloudPoolResponseLatencyAg1yearTargetResponseTimePer

Severity: variable

Explanation: This fault is caused by "Pool response time periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453992: fltTcaCloudPoolResponseLatencyAg5minTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453993: fltTcaCloudPoolResponseLatencyAg15minTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453994: fltTcaCloudPoolResponseLatencyAg1hTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453995: fltTcaCloudPoolResponseLatencyAg1dTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453996: fltTcaCloudPoolResponseLatencyAg1wTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453997: fltTcaCloudPoolResponseLatencyAg1moTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453998: fltTcaCloudPoolResponseLatencyAg1qtrTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F453999: fltTcaCloudPoolResponseLatencyAg1yearTargetResponseTimeTr

Severity: variable

Explanation: This fault is caused by "Pool response time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F454000: fltTcaCloudPoolResponseLatencyAg5minTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F454001: fltTcaCloudPoolResponseLatencyAg15minTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F454002: fltTcaCloudPoolResponseLatencyAg1hTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F454003: fltTcaCloudPoolResponseLatencyAg1dTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F454004: fltTcaCloudPoolResponseLatencyAg1wTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F454005: fltTcaCloudPoolResponseLatencyAg1moTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F454006: fltTcaCloudPoolResponseLatencyAg1qtrTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F454007: fltTcaCloudPoolResponseLatencyAg1yearTargetResponseTimeRate

Severity: variable

Explanation: This fault is caused by "Pool response time rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Pool response time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456176: fltTcaCloudLBStats5minRuleEvaluationsLast

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456177: fltTcaCloudLBStats15minRuleEvaluationsLast

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456178: fltTcaCloudLBStats1hRuleEvaluationsLast

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456179: fltTcaCloudLBStats1dRuleEvaluationsLast

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456180: fltTcaCloudLBStats1wRuleEvaluationsLast

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456181: fltTcaCloudLBStats1moRuleEvaluationsLast

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456182: fltTcaCloudLBStats1qtrRuleEvaluationsLast

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456183: fltTcaCloudLBStats1yearRuleEvaluationsLast

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456192: fltTcaCloudLBStats5minRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456193: fltTcaCloudLBStats15minRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456194: fltTcaCloudLBStats1hRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456195: fltTcaCloudLBStats1dRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456196: fltTcaCloudLBStats1wRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456197: fltTcaCloudLBStats1moRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456198: fltTcaCloudLBStats1qtrRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456199: fltTcaCloudLBStats1yearRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456200: fltTcaCloudLBStats5minRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456201: fltTcaCloudLBStats15minRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456202: fltTcaCloudLBStats1hRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456203: fltTcaCloudLBStats1dRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456204: fltTcaCloudLBStats1wRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456205: fltTcaCloudLBStats1moRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456206: fltTcaCloudLBStats1qtrRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456207: fltTcaCloudLBStats1yearRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456208: fltTcaCloudLBStats5minRuleEvaluationsMin

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456209: fltTcaCloudLBStats15minRuleEvaluationsMin

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456210: fltTcaCloudLBStats1hRuleEvaluationsMin

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456211: fltTcaCloudLBStats1dRuleEvaluationsMin

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456212: fltTcaCloudLBStats1wRuleEvaluationsMin

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456213: fltTcaCloudLBStats1moRuleEvaluationsMin

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456214: fltTcaCloudLBStats1qtrRuleEvaluationsMin

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456215: fltTcaCloudLBStats1yearRuleEvaluationsMin

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456216: fltTcaCloudLBStats5minRuleEvaluationsMax

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456217: fltTcaCloudLBStats15minRuleEvaluationsMax

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456218: fltTcaCloudLBStats1hRuleEvaluationsMax

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456219: fltTcaCloudLBStats1dRuleEvaluationsMax

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456220: fltTcaCloudLBStats1wRuleEvaluationsMax

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456221: fltTcaCloudLBStats1moRuleEvaluationsMax

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456222: fltTcaCloudLBStats1qtrRuleEvaluationsMax

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456223: fltTcaCloudLBStats1yearRuleEvaluationsMax

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456224: fltTcaCloudLBStats5minRuleEvaluationsAvg

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456225: fltTcaCloudLBStats15minRuleEvaluationsAvg

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456226: fltTcaCloudLBStats1hRuleEvaluationsAvg

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456227: fltTcaCloudLBStats1dRuleEvaluationsAvg

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456228: fltTcaCloudLBStats1wRuleEvaluationsAvg

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456229: fltTcaCloudLBStats1moRuleEvaluationsAvg

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456230: fltTcaCloudLBStats1qtrRuleEvaluationsAvg

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456231: fltTcaCloudLBStats1yearRuleEvaluationsAvg

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456256: fltTcaCloudLBStats5minRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456257: fltTcaCloudLBStats15minRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456258: fltTcaCloudLBStats1hRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456259: fltTcaCloudLBStats1dRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456260: fltTcaCloudLBStats1wRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456261: fltTcaCloudLBStats1moRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456262: fltTcaCloudLBStats1qtrRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456263: fltTcaCloudLBStats1yearRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456264: fltTcaCloudLBStats5minRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456265: fltTcaCloudLBStats15minRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456266: fltTcaCloudLBStats1hRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456267: fltTcaCloudLBStats1dRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456268: fltTcaCloudLBStats1wRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456269: fltTcaCloudLBStats1moRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456270: fltTcaCloudLBStats1qtrRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456271: fltTcaCloudLBStats1yearRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456344: fltTcaCloudLBStatsAg5minRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456345: fltTcaCloudLBStatsAg15minRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456346: fltTcaCloudLBStatsAg1hRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456347: fltTcaCloudLBStatsAg1dRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456348: fltTcaCloudLBStatsAg1wRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456349: fltTcaCloudLBStatsAg1moRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456350: fltTcaCloudLBStatsAg1qtrRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456351: fltTcaCloudLBStatsAg1yearRuleEvaluationsCum

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456352: fltTcaCloudLBStatsAg5minRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456353: fltTcaCloudLBStatsAg15minRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456354: fltTcaCloudLBStatsAg1hRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456355: fltTcaCloudLBStatsAg1dRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456356: fltTcaCloudLBStatsAg1wRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456357: fltTcaCloudLBStatsAg1moRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456358: fltTcaCloudLBStatsAg1qtrRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456359: fltTcaCloudLBStatsAg1yearRuleEvaluationsPer

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456384: fltTcaCloudLBStatsAg5minRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456385: fltTcaCloudLBStatsAg15minRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456386: fltTcaCloudLBStatsAg1hRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456387: fltTcaCloudLBStatsAg1dRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456388: fltTcaCloudLBStatsAg1wRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456389: fltTcaCloudLBStatsAg1moRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456390: fltTcaCloudLBStatsAg1qtrRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456391: fltTcaCloudLBStatsAg1yearRuleEvaluationsTr

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456392: fltTcaCloudLBStatsAg5minRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456393: fltTcaCloudLBStatsAg15minRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456394: fltTcaCloudLBStatsAg1hRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456395: fltTcaCloudLBStatsAg1dRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456396: fltTcaCloudLBStatsAg1wRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456397: fltTcaCloudLBStatsAg1moRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456398: fltTcaCloudLBStatsAg1qtrRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456399: fltTcaCloudLBStatsAg1yearRuleEvaluationsRate

Severity: variable

Explanation: This fault is caused by "Native LB rules evaluated rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB rules evaluated" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456920: fltTcaAibAdjCounts5minAdjupdatesLast

Severity: variable

Explanation: This fault is caused by "adjacency updates counts current value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456921: fltTcaAibAdjCounts15minAdjupdatesLast

Severity: variable

Explanation: This fault is caused by "adjacency updates counts current value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456922: fltTcaAibAdjCounts1hAdjupdatesLast

Severity: variable

Explanation: This fault is caused by "adjacency updates counts current value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456923: fltTcaAibAdjCounts1dAdjupdatesLast

Severity: variable

Explanation: This fault is caused by "adjacency updates counts current value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456924: fltTcaAibAdjCounts1wAdjupdatesLast

Severity: variable

Explanation: This fault is caused by "adjacency updates counts current value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456925: fltTcaAibAdjCounts1moAdjupdatesLast

Severity: variable

Explanation: This fault is caused by "adjacency updates counts current value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456926: fltTcaAibAdjCounts1qtrAdjupdatesLast

Severity: variable

Explanation: This fault is caused by "adjacency updates counts current value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456927: fltTcaAibAdjCounts1yearAdjupdatesLast

Severity: variable

Explanation: This fault is caused by "adjacency updates counts current value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456936: fltTcaAibAdjCounts5minAdjupdatesCum

Severity: variable

Explanation: This fault is caused by "adjacency updates counts cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456937: fltTcaAibAdjCounts15minAdjupdatesCum

Severity: variable

Explanation: This fault is caused by "adjacency updates counts cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456938: fltTcaAibAdjCounts1hAdjupdatesCum

Severity: variable

Explanation: This fault is caused by "adjacency updates counts cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456939: fltTcaAibAdjCounts1dAdjupdatesCum

Severity: variable

Explanation: This fault is caused by "adjacency updates counts cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456940: fltTcaAibAdjCounts1wAdjupdatesCum

Severity: variable

Explanation: This fault is caused by "adjacency updates counts cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456941: fltTcaAibAdjCounts1moAdjupdatesCum

Severity: variable

Explanation: This fault is caused by "adjacency updates counts cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456942: fltTcaAibAdjCounts1qtrAdjupdatesCum

Severity: variable

Explanation: This fault is caused by "adjacency updates counts cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456943: fltTcaAibAdjCounts1yearAdjupdatesCum

Severity: variable

Explanation: This fault is caused by "adjacency updates counts cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456944: fltTcaAibAdjCounts5minAdjupdatesPer

Severity: variable

Explanation: This fault is caused by "adjacency updates counts periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456945: fltTcaAibAdjCounts15minAdjupdatesPer

Severity: variable

Explanation: This fault is caused by "adjacency updates counts periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456946: fltTcaAibAdjCounts1hAdjupdatesPer

Severity: variable

Explanation: This fault is caused by "adjacency updates counts periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456947: fltTcaAibAdjCounts1dAdjupdatesPer

Severity: variable

Explanation: This fault is caused by "adjacency updates counts periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456948: fltTcaAibAdjCounts1wAdjupdatesPer

Severity: variable

Explanation: This fault is caused by "adjacency updates counts periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456949: fltTcaAibAdjCounts1moAdjupdatesPer

Severity: variable

Explanation: This fault is caused by "adjacency updates counts periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456950: fltTcaAibAdjCounts1qtrAdjupdatesPer

Severity: variable

Explanation: This fault is caused by "adjacency updates counts periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456951: fltTcaAibAdjCounts1yearAdjupdatesPer

Severity: variable

Explanation: This fault is caused by "adjacency updates counts periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456952: fltTcaAibAdjCounts5minAdjupdatesMin

Severity: variable

Explanation: This fault is caused by "adjacency updates counts minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456953: fltTcaAibAdjCounts15minAdjupdatesMin

Severity: variable

Explanation: This fault is caused by "adjacency updates counts minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456954: fltTcaAibAdjCounts1hAdjupdatesMin

Severity: variable

Explanation: This fault is caused by "adjacency updates counts minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456955: fltTcaAibAdjCounts1dAdjupdatesMin

Severity: variable

Explanation: This fault is caused by "adjacency updates counts minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456956: fltTcaAibAdjCounts1wAdjupdatesMin

Severity: variable

Explanation: This fault is caused by "adjacency updates counts minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456957: fltTcaAibAdjCounts1moAdjupdatesMin

Severity: variable

Explanation: This fault is caused by "adjacency updates counts minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456958: fltTcaAibAdjCounts1qtrAdjupdatesMin

Severity: variable

Explanation: This fault is caused by "adjacency updates counts minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456959: fltTcaAibAdjCounts1yearAdjupdatesMin

Severity: variable

Explanation: This fault is caused by "adjacency updates counts minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456960: fltTcaAibAdjCounts5minAdjupdatesMax

Severity: variable

Explanation: This fault is caused by "adjacency updates counts maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456961: fltTcaAibAdjCounts15minAdjupdatesMax

Severity: variable

Explanation: This fault is caused by "adjacency updates counts maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456962: fltTcaAibAdjCounts1hAdjupdatesMax

Severity: variable

Explanation: This fault is caused by "adjacency updates counts maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456963: fltTcaAibAdjCounts1dAdjupdatesMax

Severity: variable

Explanation: This fault is caused by "adjacency updates counts maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456964: fltTcaAibAdjCounts1wAdjupdatesMax

Severity: variable

Explanation: This fault is caused by "adjacency updates counts maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456965: fltTcaAibAdjCounts1moAdjupdatesMax

Severity: variable

Explanation: This fault is caused by "adjacency updates counts maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456966: fltTcaAibAdjCounts1qtrAdjupdatesMax

Severity: variable

Explanation: This fault is caused by "adjacency updates counts maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456967: fltTcaAibAdjCounts1yearAdjupdatesMax

Severity: variable

Explanation: This fault is caused by "adjacency updates counts maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456968: fltTcaAibAdjCounts5minAdjupdatesAvg

Severity: variable

Explanation: This fault is caused by "adjacency updates counts average value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456969: fltTcaAibAdjCounts15minAdjupdatesAvg

Severity: variable

Explanation: This fault is caused by "adjacency updates counts average value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456970: fltTcaAibAdjCounts1hAdjupdatesAvg

Severity: variable

Explanation: This fault is caused by "adjacency updates counts average value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456971: fltTcaAibAdjCounts1dAdjupdatesAvg

Severity: variable

Explanation: This fault is caused by "adjacency updates counts average value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456972: fltTcaAibAdjCounts1wAdjupdatesAvg

Severity: variable

Explanation: This fault is caused by "adjacency updates counts average value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456973: fltTcaAibAdjCounts1moAdjupdatesAvg

Severity: variable

Explanation: This fault is caused by "adjacency updates counts average value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456974: fltTcaAibAdjCounts1qtrAdjupdatesAvg

Severity: variable

Explanation: This fault is caused by "adjacency updates counts average value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F456975: fltTcaAibAdjCounts1yearAdjupdatesAvg

Severity: variable

Explanation: This fault is caused by "adjacency updates counts average value" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457000: fltTcaAibAdjCounts5minAdjupdatesTr

Severity: variable

Explanation: This fault is caused by "adjacency updates counts trend" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457001: fltTcaAibAdjCounts15minAdjupdatesTr

Severity: variable

Explanation: This fault is caused by "adjacency updates counts trend" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457002: fltTcaAibAdjCounts1hAdjupdatesTr

Severity: variable

Explanation: This fault is caused by "adjacency updates counts trend" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457003: fltTcaAibAdjCounts1dAdjupdatesTr

Severity: variable

Explanation: This fault is caused by "adjacency updates counts trend" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457004: fltTcaAibAdjCounts1wAdjupdatesTr

Severity: variable

Explanation: This fault is caused by "adjacency updates counts trend" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457005: fltTcaAibAdjCounts1moAdjupdatesTr

Severity: variable

Explanation: This fault is caused by "adjacency updates counts trend" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457006: fltTcaAibAdjCounts1qtrAdjupdatesTr

Severity: variable

Explanation: This fault is caused by "adjacency updates counts trend" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457007: fltTcaAibAdjCounts1yearAdjupdatesTr

Severity: variable

Explanation: This fault is caused by "adjacency updates counts trend" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457008: fltTcaAibAdjCounts5minAdjupdatesRate

Severity: variable

Explanation: This fault is caused by "adjacency updates counts rate" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457009: fltTcaAibAdjCounts15minAdjupdatesRate

Severity: variable

Explanation: This fault is caused by "adjacency updates counts rate" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457010: fltTcaAibAdjCounts1hAdjupdatesRate

Severity: variable

Explanation: This fault is caused by "adjacency updates counts rate" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457011: fltTcaAibAdjCounts1dAdjupdatesRate

Severity: variable

Explanation: This fault is caused by "adjacency updates counts rate" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457012: fltTcaAibAdjCounts1wAdjupdatesRate

Severity: variable

Explanation: This fault is caused by "adjacency updates counts rate" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457013: fltTcaAibAdjCounts1moAdjupdatesRate

Severity: variable

Explanation: This fault is caused by "adjacency updates counts rate" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457014: fltTcaAibAdjCounts1qtrAdjupdatesRate

Severity: variable

Explanation: This fault is caused by "adjacency updates counts rate" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457015: fltTcaAibAdjCounts1yearAdjupdatesRate

Severity: variable

Explanation: This fault is caused by "adjacency updates counts rate" statistical property crossing threshold level.

Recommended Action: Check the values of "adjacency updates counts" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457672: fltTcaEqptEgrDropPkts5minAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Egress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457673: fltTcaEqptEgrDropPkts15minAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Egress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457674: fltTcaEqptEgrDropPkts1hAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Egress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457675: fltTcaEqptEgrDropPkts1dAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Egress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457676: fltTcaEqptEgrDropPkts1wAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Egress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457677: fltTcaEqptEgrDropPkts1moAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Egress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457678: fltTcaEqptEgrDropPkts1qtrAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Egress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457679: fltTcaEqptEgrDropPkts1yearAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Egress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457688: fltTcaEqptEgrDropPkts5minAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Egress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457689: fltTcaEqptEgrDropPkts15minAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Egress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457690: fltTcaEqptEgrDropPkts1hAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Egress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457691: fltTcaEqptEgrDropPkts1dAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Egress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457692: fltTcaEqptEgrDropPkts1wAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Egress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457693: fltTcaEqptEgrDropPkts1moAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Egress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457694: fltTcaEqptEgrDropPkts1qtrAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Egress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457695: fltTcaEqptEgrDropPkts1yearAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Egress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457696: fltTcaEqptEgrDropPkts5minAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Egress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457697: fltTcaEqptEgrDropPkts15minAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Egress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457698: fltTcaEqptEgrDropPkts1hAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Egress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457699: fltTcaEqptEgrDropPkts1dAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Egress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457700: fltTcaEqptEgrDropPkts1wAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Egress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457701: fltTcaEqptEgrDropPkts1moAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Egress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457702: fltTcaEqptEgrDropPkts1qtrAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Egress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457703: fltTcaEqptEgrDropPkts1yearAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Egress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457704: fltTcaEqptEgrDropPkts5minAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Egress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457705: fltTcaEqptEgrDropPkts15minAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Egress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457706: fltTcaEqptEgrDropPkts1hAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Egress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457707: fltTcaEqptEgrDropPkts1dAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Egress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457708: fltTcaEqptEgrDropPkts1wAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Egress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457709: fltTcaEqptEgrDropPkts1moAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Egress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457710: fltTcaEqptEgrDropPkts1qtrAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Egress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457711: fltTcaEqptEgrDropPkts1yearAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Egress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457712: fltTcaEqptEgrDropPkts5minAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Egress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457713: fltTcaEqptEgrDropPkts15minAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Egress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457714: fltTcaEqptEgrDropPkts1hAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Egress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457715: fltTcaEqptEgrDropPkts1dAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Egress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457716: fltTcaEqptEgrDropPkts1wAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Egress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457717: fltTcaEqptEgrDropPkts1moAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Egress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457718: fltTcaEqptEgrDropPkts1qtrAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Egress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457719: fltTcaEqptEgrDropPkts1yearAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Egress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457720: fltTcaEqptEgrDropPkts5minAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Egress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457721: fltTcaEqptEgrDropPkts15minAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Egress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457722: fltTcaEqptEgrDropPkts1hAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Egress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457723: fltTcaEqptEgrDropPkts1dAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Egress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457724: fltTcaEqptEgrDropPkts1wAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Egress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457725: fltTcaEqptEgrDropPkts1moAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Egress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457726: fltTcaEqptEgrDropPkts1qtrAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Egress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457727: fltTcaEqptEgrDropPkts1yearAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Egress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457752: fltTcaEqptEgrDropPkts5minAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Egress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457753: fltTcaEqptEgrDropPkts15minAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Egress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457754: fltTcaEqptEgrDropPkts1hAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Egress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457755: fltTcaEqptEgrDropPkts1dAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Egress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457756: fltTcaEqptEgrDropPkts1wAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Egress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457757: fltTcaEqptEgrDropPkts1moAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Egress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457758: fltTcaEqptEgrDropPkts1qtrAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Egress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457759: fltTcaEqptEgrDropPkts1yearAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Egress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457760: fltTcaEqptEgrDropPkts5minAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Egress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457761: fltTcaEqptEgrDropPkts15minAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Egress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457762: fltTcaEqptEgrDropPkts1hAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Egress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457763: fltTcaEqptEgrDropPkts1dAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Egress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457764: fltTcaEqptEgrDropPkts1wAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Egress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457765: fltTcaEqptEgrDropPkts1moAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Egress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457766: fltTcaEqptEgrDropPkts1qtrAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Egress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457767: fltTcaEqptEgrDropPkts1yearAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Egress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457840: fltTcaEqptEgrPkts5minDiscardLast

Severity: variable

Explanation: This fault is caused by "Egress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457841: fltTcaEqptEgrPkts15minDiscardLast

Severity: variable

Explanation: This fault is caused by "Egress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457842: fltTcaEqptEgrPkts1hDiscardLast

Severity: variable

Explanation: This fault is caused by "Egress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457843: fltTcaEqptEgrPkts1dDiscardLast

Severity: variable

Explanation: This fault is caused by "Egress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457844: fltTcaEqptEgrPkts1wDiscardLast

Severity: variable

Explanation: This fault is caused by "Egress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457845: fltTcaEqptEgrPkts1moDiscardLast

Severity: variable

Explanation: This fault is caused by "Egress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457846: fltTcaEqptEgrPkts1qtrDiscardLast

Severity: variable

Explanation: This fault is caused by "Egress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457847: fltTcaEqptEgrPkts1yearDiscardLast

Severity: variable

Explanation: This fault is caused by "Egress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457856: fltTcaEqptEgrPkts5minDiscardCum

Severity: variable

Explanation: This fault is caused by "Egress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457857: fltTcaEqptEgrPkts15minDiscardCum

Severity: variable

Explanation: This fault is caused by "Egress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457858: fltTcaEqptEgrPkts1hDiscardCum

Severity: variable

Explanation: This fault is caused by "Egress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457859: fltTcaEqptEgrPkts1dDiscardCum

Severity: variable

Explanation: This fault is caused by "Egress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457860: fltTcaEqptEgrPkts1wDiscardCum

Severity: variable

Explanation: This fault is caused by "Egress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457861: fltTcaEqptEgrPkts1moDiscardCum

Severity: variable

Explanation: This fault is caused by "Egress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457862: fltTcaEqptEgrPkts1qtrDiscardCum

Severity: variable

Explanation: This fault is caused by "Egress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457863: fltTcaEqptEgrPkts1yearDiscardCum

Severity: variable

Explanation: This fault is caused by "Egress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457864: fltTcaEqptEgrPkts5minDiscardPer

Severity: variable

Explanation: This fault is caused by "Egress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457865: fltTcaEqptEgrPkts15minDiscardPer

Severity: variable

Explanation: This fault is caused by "Egress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457866: fltTcaEqptEgrPkts1hDiscardPer

Severity: variable

Explanation: This fault is caused by "Egress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457867: fltTcaEqptEgrPkts1dDiscardPer

Severity: variable

Explanation: This fault is caused by "Egress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457868: fltTcaEqptEgrPkts1wDiscardPer

Severity: variable

Explanation: This fault is caused by "Egress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457869: fltTcaEqptEgrPkts1moDiscardPer

Severity: variable

Explanation: This fault is caused by "Egress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457870: fltTcaEqptEgrPkts1qtrDiscardPer

Severity: variable

Explanation: This fault is caused by "Egress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457871: fltTcaEqptEgrPkts1yearDiscardPer

Severity: variable

Explanation: This fault is caused by "Egress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457872: fltTcaEqptEgrPkts5minDiscardMin

Severity: variable

Explanation: This fault is caused by "Egress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457873: fltTcaEqptEgrPkts15minDiscardMin

Severity: variable

Explanation: This fault is caused by "Egress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457874: fltTcaEqptEgrPkts1hDiscardMin

Severity: variable

Explanation: This fault is caused by "Egress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457875: fltTcaEqptEgrPkts1dDiscardMin

Severity: variable

Explanation: This fault is caused by "Egress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457876: fltTcaEqptEgrPkts1wDiscardMin

Severity: variable

Explanation: This fault is caused by "Egress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457877: fltTcaEqptEgrPkts1moDiscardMin

Severity: variable

Explanation: This fault is caused by "Egress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457878: fltTcaEqptEgrPkts1qtrDiscardMin

Severity: variable

Explanation: This fault is caused by "Egress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457879: fltTcaEqptEgrPkts1yearDiscardMin

Severity: variable

Explanation: This fault is caused by "Egress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457880: fltTcaEqptEgrPkts5minDiscardMax

Severity: variable

Explanation: This fault is caused by "Egress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457881: fltTcaEqptEgrPkts15minDiscardMax

Severity: variable

Explanation: This fault is caused by "Egress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457882: fltTcaEqptEgrPkts1hDiscardMax

Severity: variable

Explanation: This fault is caused by "Egress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457883: fltTcaEqptEgrPkts1dDiscardMax

Severity: variable

Explanation: This fault is caused by "Egress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457884: fltTcaEqptEgrPkts1wDiscardMax

Severity: variable

Explanation: This fault is caused by "Egress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457885: fltTcaEqptEgrPkts1moDiscardMax

Severity: variable

Explanation: This fault is caused by "Egress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457886: fltTcaEqptEgrPkts1qtrDiscardMax

Severity: variable

Explanation: This fault is caused by "Egress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457887: fltTcaEqptEgrPkts1yearDiscardMax

Severity: variable

Explanation: This fault is caused by "Egress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457888: fltTcaEqptEgrPkts5minDiscardAvg

Severity: variable

Explanation: This fault is caused by "Egress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457889: fltTcaEqptEgrPkts15minDiscardAvg

Severity: variable

Explanation: This fault is caused by "Egress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457890: fltTcaEqptEgrPkts1hDiscardAvg

Severity: variable

Explanation: This fault is caused by "Egress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457891: fltTcaEqptEgrPkts1dDiscardAvg

Severity: variable

Explanation: This fault is caused by "Egress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457892: fltTcaEqptEgrPkts1wDiscardAvg

Severity: variable

Explanation: This fault is caused by "Egress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457893: fltTcaEqptEgrPkts1moDiscardAvg

Severity: variable

Explanation: This fault is caused by "Egress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457894: fltTcaEqptEgrPkts1qtrDiscardAvg

Severity: variable

Explanation: This fault is caused by "Egress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457895: fltTcaEqptEgrPkts1yearDiscardAvg

Severity: variable

Explanation: This fault is caused by "Egress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457920: fltTcaEqptEgrPkts5minDiscardTr

Severity: variable

Explanation: This fault is caused by "Egress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457921: fltTcaEqptEgrPkts15minDiscardTr

Severity: variable

Explanation: This fault is caused by "Egress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457922: fltTcaEqptEgrPkts1hDiscardTr

Severity: variable

Explanation: This fault is caused by "Egress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457923: fltTcaEqptEgrPkts1dDiscardTr

Severity: variable

Explanation: This fault is caused by "Egress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457924: fltTcaEqptEgrPkts1wDiscardTr

Severity: variable

Explanation: This fault is caused by "Egress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457925: fltTcaEqptEgrPkts1moDiscardTr

Severity: variable

Explanation: This fault is caused by "Egress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457926: fltTcaEqptEgrPkts1qtrDiscardTr

Severity: variable

Explanation: This fault is caused by "Egress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457927: fltTcaEqptEgrPkts1yearDiscardTr

Severity: variable

Explanation: This fault is caused by "Egress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457928: fltTcaEqptEgrPkts5minDiscardRate

Severity: variable

Explanation: This fault is caused by "Egress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457929: fltTcaEqptEgrPkts15minDiscardRate

Severity: variable

Explanation: This fault is caused by "Egress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457930: fltTcaEqptEgrPkts1hDiscardRate

Severity: variable

Explanation: This fault is caused by "Egress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457931: fltTcaEqptEgrPkts1dDiscardRate

Severity: variable

Explanation: This fault is caused by "Egress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457932: fltTcaEqptEgrPkts1wDiscardRate

Severity: variable

Explanation: This fault is caused by "Egress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457933: fltTcaEqptEgrPkts1moDiscardRate

Severity: variable

Explanation: This fault is caused by "Egress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457934: fltTcaEqptEgrPkts1qtrDiscardRate

Severity: variable

Explanation: This fault is caused by "Egress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F457935: fltTcaEqptEgrPkts1yearDiscardRate

Severity: variable

Explanation: This fault is caused by "Egress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Egress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458008: fltTcaEqptIngrErrPkts5minAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Ingress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458009: fltTcaEqptIngrErrPkts15minAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Ingress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458010: fltTcaEqptIngrErrPkts1hAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Ingress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458011: fltTcaEqptIngrErrPkts1dAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Ingress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458012: fltTcaEqptIngrErrPkts1wAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Ingress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458013: fltTcaEqptIngrErrPkts1moAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Ingress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458014: fltTcaEqptIngrErrPkts1qtrAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Ingress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458015: fltTcaEqptIngrErrPkts1yearAnyErrorLast

Severity: variable

Explanation: This fault is caused by "Ingress error current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458024: fltTcaEqptIngrErrPkts5minAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Ingress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458025: fltTcaEqptIngrErrPkts15minAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Ingress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458026: fltTcaEqptIngrErrPkts1hAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Ingress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458027: fltTcaEqptIngrErrPkts1dAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Ingress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458028: fltTcaEqptIngrErrPkts1wAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Ingress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458029: fltTcaEqptIngrErrPkts1moAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Ingress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458030: fltTcaEqptIngrErrPkts1qtrAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Ingress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458031: fltTcaEqptIngrErrPkts1yearAnyErrorCum

Severity: variable

Explanation: This fault is caused by "Ingress error cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458032: fltTcaEqptIngrErrPkts5minAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Ingress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458033: fltTcaEqptIngrErrPkts15minAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Ingress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458034: fltTcaEqptIngrErrPkts1hAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Ingress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458035: fltTcaEqptIngrErrPkts1dAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Ingress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458036: fltTcaEqptIngrErrPkts1wAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Ingress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458037: fltTcaEqptIngrErrPkts1moAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Ingress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458038: fltTcaEqptIngrErrPkts1qtrAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Ingress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458039: fltTcaEqptIngrErrPkts1yearAnyErrorPer

Severity: variable

Explanation: This fault is caused by "Ingress error periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458040: fltTcaEqptIngrErrPkts5minAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Ingress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458041: fltTcaEqptIngrErrPkts15minAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Ingress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458042: fltTcaEqptIngrErrPkts1hAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Ingress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458043: fltTcaEqptIngrErrPkts1dAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Ingress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458044: fltTcaEqptIngrErrPkts1wAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Ingress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458045: fltTcaEqptIngrErrPkts1moAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Ingress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458046: fltTcaEqptIngrErrPkts1qtrAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Ingress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458047: fltTcaEqptIngrErrPkts1yearAnyErrorMin

Severity: variable

Explanation: This fault is caused by "Ingress error minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458048: fltTcaEqptIngrErrPkts5minAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Ingress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458049: fltTcaEqptIngrErrPkts15minAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Ingress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458050: fltTcaEqptIngrErrPkts1hAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Ingress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458051: fltTcaEqptIngrErrPkts1dAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Ingress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458052: fltTcaEqptIngrErrPkts1wAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Ingress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458053: fltTcaEqptIngrErrPkts1moAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Ingress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458054: fltTcaEqptIngrErrPkts1qtrAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Ingress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458055: fltTcaEqptIngrErrPkts1yearAnyErrorMax

Severity: variable

Explanation: This fault is caused by "Ingress error maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458056: fltTcaEqptIngrErrPkts5minAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Ingress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458057: fltTcaEqptIngrErrPkts15minAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Ingress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458058: fltTcaEqptIngrErrPkts1hAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Ingress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458059: fltTcaEqptIngrErrPkts1dAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Ingress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458060: fltTcaEqptIngrErrPkts1wAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Ingress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458061: fltTcaEqptIngrErrPkts1moAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Ingress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458062: fltTcaEqptIngrErrPkts1qtrAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Ingress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458063: fltTcaEqptIngrErrPkts1yearAnyErrorAvg

Severity: variable

Explanation: This fault is caused by "Ingress error average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458088: fltTcaEqptIngrErrPkts5minAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Ingress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458089: fltTcaEqptIngrErrPkts15minAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Ingress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458090: fltTcaEqptIngrErrPkts1hAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Ingress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458091: fltTcaEqptIngrErrPkts1dAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Ingress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458092: fltTcaEqptIngrErrPkts1wAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Ingress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458093: fltTcaEqptIngrErrPkts1moAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Ingress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458094: fltTcaEqptIngrErrPkts1qtrAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Ingress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458095: fltTcaEqptIngrErrPkts1yearAnyErrorTr

Severity: variable

Explanation: This fault is caused by "Ingress error trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458096: fltTcaEqptIngrErrPkts5minAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Ingress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458097: fltTcaEqptIngrErrPkts15minAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Ingress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458098: fltTcaEqptIngrErrPkts1hAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Ingress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458099: fltTcaEqptIngrErrPkts1dAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Ingress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458100: fltTcaEqptIngrErrPkts1wAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Ingress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458101: fltTcaEqptIngrErrPkts1moAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Ingress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458102: fltTcaEqptIngrErrPkts1qtrAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Ingress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458103: fltTcaEqptIngrErrPkts1yearAnyErrorRate

Severity: variable

Explanation: This fault is caused by "Ingress error rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress error" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458176: fltTcaEqptIngrErrPkts5minDiscardLast

Severity: variable

Explanation: This fault is caused by "Ingress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458177: fltTcaEqptIngrErrPkts15minDiscardLast

Severity: variable

Explanation: This fault is caused by "Ingress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458178: fltTcaEqptIngrErrPkts1hDiscardLast

Severity: variable

Explanation: This fault is caused by "Ingress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458179: fltTcaEqptIngrErrPkts1dDiscardLast

Severity: variable

Explanation: This fault is caused by "Ingress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458180: fltTcaEqptIngrErrPkts1wDiscardLast

Severity: variable

Explanation: This fault is caused by "Ingress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458181: fltTcaEqptIngrErrPkts1moDiscardLast

Severity: variable

Explanation: This fault is caused by "Ingress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458182: fltTcaEqptIngrErrPkts1qtrDiscardLast

Severity: variable

Explanation: This fault is caused by "Ingress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458183: fltTcaEqptIngrErrPkts1yearDiscardLast

Severity: variable

Explanation: This fault is caused by "Ingress discard current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458192: fltTcaEqptIngrErrPkts5minDiscardCum

Severity: variable

Explanation: This fault is caused by "Ingress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458193: fltTcaEqptIngrErrPkts15minDiscardCum

Severity: variable

Explanation: This fault is caused by "Ingress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458194: fltTcaEqptIngrErrPkts1hDiscardCum

Severity: variable

Explanation: This fault is caused by "Ingress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458195: fltTcaEqptIngrErrPkts1dDiscardCum

Severity: variable

Explanation: This fault is caused by "Ingress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458196: fltTcaEqptIngrErrPkts1wDiscardCum

Severity: variable

Explanation: This fault is caused by "Ingress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458197: fltTcaEqptIngrErrPkts1moDiscardCum

Severity: variable

Explanation: This fault is caused by "Ingress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458198: fltTcaEqptIngrErrPkts1qtrDiscardCum

Severity: variable

Explanation: This fault is caused by "Ingress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458199: fltTcaEqptIngrErrPkts1yearDiscardCum

Severity: variable

Explanation: This fault is caused by "Ingress discard cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458200: fltTcaEqptIngrErrPkts5minDiscardPer

Severity: variable

Explanation: This fault is caused by "Ingress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458201: fltTcaEqptIngrErrPkts15minDiscardPer

Severity: variable

Explanation: This fault is caused by "Ingress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458202: fltTcaEqptIngrErrPkts1hDiscardPer

Severity: variable

Explanation: This fault is caused by "Ingress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458203: fltTcaEqptIngrErrPkts1dDiscardPer

Severity: variable

Explanation: This fault is caused by "Ingress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458204: fltTcaEqptIngrErrPkts1wDiscardPer

Severity: variable

Explanation: This fault is caused by "Ingress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458205: fltTcaEqptIngrErrPkts1moDiscardPer

Severity: variable

Explanation: This fault is caused by "Ingress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458206: fltTcaEqptIngrErrPkts1qtrDiscardPer

Severity: variable

Explanation: This fault is caused by "Ingress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458207: fltTcaEqptIngrErrPkts1yearDiscardPer

Severity: variable

Explanation: This fault is caused by "Ingress discard periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458208: fltTcaEqptIngrErrPkts5minDiscardMin

Severity: variable

Explanation: This fault is caused by "Ingress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458209: fltTcaEqptIngrErrPkts15minDiscardMin

Severity: variable

Explanation: This fault is caused by "Ingress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458210: fltTcaEqptIngrErrPkts1hDiscardMin

Severity: variable

Explanation: This fault is caused by "Ingress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458211: fltTcaEqptIngrErrPkts1dDiscardMin

Severity: variable

Explanation: This fault is caused by "Ingress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458212: fltTcaEqptIngrErrPkts1wDiscardMin

Severity: variable

Explanation: This fault is caused by "Ingress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458213: fltTcaEqptIngrErrPkts1moDiscardMin

Severity: variable

Explanation: This fault is caused by "Ingress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458214: fltTcaEqptIngrErrPkts1qtrDiscardMin

Severity: variable

Explanation: This fault is caused by "Ingress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458215: fltTcaEqptIngrErrPkts1yearDiscardMin

Severity: variable

Explanation: This fault is caused by "Ingress discard minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458216: fltTcaEqptIngrErrPkts5minDiscardMax

Severity: variable

Explanation: This fault is caused by "Ingress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458217: fltTcaEqptIngrErrPkts15minDiscardMax

Severity: variable

Explanation: This fault is caused by "Ingress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458218: fltTcaEqptIngrErrPkts1hDiscardMax

Severity: variable

Explanation: This fault is caused by "Ingress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458219: fltTcaEqptIngrErrPkts1dDiscardMax

Severity: variable

Explanation: This fault is caused by "Ingress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458220: fltTcaEqptIngrErrPkts1wDiscardMax

Severity: variable

Explanation: This fault is caused by "Ingress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458221: fltTcaEqptIngrErrPkts1moDiscardMax

Severity: variable

Explanation: This fault is caused by "Ingress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458222: fltTcaEqptIngrErrPkts1qtrDiscardMax

Severity: variable

Explanation: This fault is caused by "Ingress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458223: fltTcaEqptIngrErrPkts1yearDiscardMax

Severity: variable

Explanation: This fault is caused by "Ingress discard maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458224: fltTcaEqptIngrErrPkts5minDiscardAvg

Severity: variable

Explanation: This fault is caused by "Ingress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458225: fltTcaEqptIngrErrPkts15minDiscardAvg

Severity: variable

Explanation: This fault is caused by "Ingress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458226: fltTcaEqptIngrErrPkts1hDiscardAvg

Severity: variable

Explanation: This fault is caused by "Ingress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458227: fltTcaEqptIngrErrPkts1dDiscardAvg

Severity: variable

Explanation: This fault is caused by "Ingress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458228: fltTcaEqptIngrErrPkts1wDiscardAvg

Severity: variable

Explanation: This fault is caused by "Ingress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458229: fltTcaEqptIngrErrPkts1moDiscardAvg

Severity: variable

Explanation: This fault is caused by "Ingress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458230: fltTcaEqptIngrErrPkts1qtrDiscardAvg

Severity: variable

Explanation: This fault is caused by "Ingress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458231: fltTcaEqptIngrErrPkts1yearDiscardAvg

Severity: variable

Explanation: This fault is caused by "Ingress discard average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458256: fltTcaEqptIngrErrPkts5minDiscardTr

Severity: variable

Explanation: This fault is caused by "Ingress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458257: fltTcaEqptIngrErrPkts15minDiscardTr

Severity: variable

Explanation: This fault is caused by "Ingress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458258: fltTcaEqptIngrErrPkts1hDiscardTr

Severity: variable

Explanation: This fault is caused by "Ingress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458259: fltTcaEqptIngrErrPkts1dDiscardTr

Severity: variable

Explanation: This fault is caused by "Ingress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458260: fltTcaEqptIngrErrPkts1wDiscardTr

Severity: variable

Explanation: This fault is caused by "Ingress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458261: fltTcaEqptIngrErrPkts1moDiscardTr

Severity: variable

Explanation: This fault is caused by "Ingress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458262: fltTcaEqptIngrErrPkts1qtrDiscardTr

Severity: variable

Explanation: This fault is caused by "Ingress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458263: fltTcaEqptIngrErrPkts1yearDiscardTr

Severity: variable

Explanation: This fault is caused by "Ingress discard trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458264: fltTcaEqptIngrErrPkts5minDiscardRate

Severity: variable

Explanation: This fault is caused by "Ingress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458265: fltTcaEqptIngrErrPkts15minDiscardRate

Severity: variable

Explanation: This fault is caused by "Ingress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458266: fltTcaEqptIngrErrPkts1hDiscardRate

Severity: variable

Explanation: This fault is caused by "Ingress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458267: fltTcaEqptIngrErrPkts1dDiscardRate

Severity: variable

Explanation: This fault is caused by "Ingress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458268: fltTcaEqptIngrErrPkts1wDiscardRate

Severity: variable

Explanation: This fault is caused by "Ingress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458269: fltTcaEqptIngrErrPkts1moDiscardRate

Severity: variable

Explanation: This fault is caused by "Ingress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458270: fltTcaEqptIngrErrPkts1qtrDiscardRate

Severity: variable

Explanation: This fault is caused by "Ingress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F458271: fltTcaEqptIngrErrPkts1yearDiscardRate

Severity: variable

Explanation: This fault is caused by "Ingress discard rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Ingress discard" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460192: fltTcaBgpBgpPeerBytes5minByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460193: fltTcaBgpBgpPeerBytes15minByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460194: fltTcaBgpBgpPeerBytes1hByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460195: fltTcaBgpBgpPeerBytes1dByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460196: fltTcaBgpBgpPeerBytes1wByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460197: fltTcaBgpBgpPeerBytes1moByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460198: fltTcaBgpBgpPeerBytes1qtrByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460199: fltTcaBgpBgpPeerBytes1yearByteInRecvQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460208: fltTcaBgpBgpPeerBytes5minByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460209: fltTcaBgpBgpPeerBytes15minByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460210: fltTcaBgpBgpPeerBytes1hByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460211: fltTcaBgpBgpPeerBytes1dByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460212: fltTcaBgpBgpPeerBytes1wByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460213: fltTcaBgpBgpPeerBytes1moByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460214: fltTcaBgpBgpPeerBytes1qtrByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460215: fltTcaBgpBgpPeerBytes1yearByteInRecvQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460216: fltTcaBgpBgpPeerBytes5minByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460217: fltTcaBgpBgpPeerBytes15minByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460218: fltTcaBgpBgpPeerBytes1hByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460219: fltTcaBgpBgpPeerBytes1dByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460220: fltTcaBgpBgpPeerBytes1wByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460221: fltTcaBgpBgpPeerBytes1moByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460222: fltTcaBgpBgpPeerBytes1qtrByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460223: fltTcaBgpBgpPeerBytes1yearByteInRecvQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460224: fltTcaBgpBgpPeerBytes5minByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460225: fltTcaBgpBgpPeerBytes15minByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460226: fltTcaBgpBgpPeerBytes1hByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460227: fltTcaBgpBgpPeerBytes1dByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460228: fltTcaBgpBgpPeerBytes1wByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460229: fltTcaBgpBgpPeerBytes1moByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460230: fltTcaBgpBgpPeerBytes1qtrByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460231: fltTcaBgpBgpPeerBytes1yearByteInRecvQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460232: fltTcaBgpBgpPeerBytes5minByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460233: fltTcaBgpBgpPeerBytes15minByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460234: fltTcaBgpBgpPeerBytes1hByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460235: fltTcaBgpBgpPeerBytes1dByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460236: fltTcaBgpBgpPeerBytes1wByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460237: fltTcaBgpBgpPeerBytes1moByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460238: fltTcaBgpBgpPeerBytes1qtrByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460239: fltTcaBgpBgpPeerBytes1yearByteInRecvQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460240: fltTcaBgpBgpPeerBytes5minByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460241: fltTcaBgpBgpPeerBytes15minByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460242: fltTcaBgpBgpPeerBytes1hByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460243: fltTcaBgpBgpPeerBytes1dByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460244: fltTcaBgpBgpPeerBytes1wByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460245: fltTcaBgpBgpPeerBytes1moByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460246: fltTcaBgpBgpPeerBytes1qtrByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460247: fltTcaBgpBgpPeerBytes1yearByteInRecvQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460272: fltTcaBgpBgpPeerBytes5minByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460273: fltTcaBgpBgpPeerBytes15minByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460274: fltTcaBgpBgpPeerBytes1hByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460275: fltTcaBgpBgpPeerBytes1dByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460276: fltTcaBgpBgpPeerBytes1wByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460277: fltTcaBgpBgpPeerBytes1moByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460278: fltTcaBgpBgpPeerBytes1qtrByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460279: fltTcaBgpBgpPeerBytes1yearByteInRecvQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460280: fltTcaBgpBgpPeerBytes5minByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460281: fltTcaBgpBgpPeerBytes15minByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460282: fltTcaBgpBgpPeerBytes1hByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460283: fltTcaBgpBgpPeerBytes1dByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460284: fltTcaBgpBgpPeerBytes1wByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460285: fltTcaBgpBgpPeerBytes1moByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460286: fltTcaBgpBgpPeerBytes1qtrByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460287: fltTcaBgpBgpPeerBytes1yearByteInRecvQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Receive Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Receive Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460360: fltTcaBgpBgpPeerBytes5minByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460361: fltTcaBgpBgpPeerBytes15minByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460362: fltTcaBgpBgpPeerBytes1hByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460363: fltTcaBgpBgpPeerBytes1dByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460364: fltTcaBgpBgpPeerBytes1wByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460365: fltTcaBgpBgpPeerBytes1moByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460366: fltTcaBgpBgpPeerBytes1qtrByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460367: fltTcaBgpBgpPeerBytes1yearByteInSendQLast

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460376: fltTcaBgpBgpPeerBytes5minByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460377: fltTcaBgpBgpPeerBytes15minByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460378: fltTcaBgpBgpPeerBytes1hByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460379: fltTcaBgpBgpPeerBytes1dByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460380: fltTcaBgpBgpPeerBytes1wByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460381: fltTcaBgpBgpPeerBytes1moByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460382: fltTcaBgpBgpPeerBytes1qtrByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460383: fltTcaBgpBgpPeerBytes1yearByteInSendQCum

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460384: fltTcaBgpBgpPeerBytes5minByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460385: fltTcaBgpBgpPeerBytes15minByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460386: fltTcaBgpBgpPeerBytes1hByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460387: fltTcaBgpBgpPeerBytes1dByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460388: fltTcaBgpBgpPeerBytes1wByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460389: fltTcaBgpBgpPeerBytes1moByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460390: fltTcaBgpBgpPeerBytes1qtrByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460391: fltTcaBgpBgpPeerBytes1yearByteInSendQPer

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460392: fltTcaBgpBgpPeerBytes5minByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460393: fltTcaBgpBgpPeerBytes15minByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460394: fltTcaBgpBgpPeerBytes1hByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460395: fltTcaBgpBgpPeerBytes1dByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460396: fltTcaBgpBgpPeerBytes1wByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460397: fltTcaBgpBgpPeerBytes1moByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460398: fltTcaBgpBgpPeerBytes1qtrByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460399: fltTcaBgpBgpPeerBytes1yearByteInSendQMin

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460400: fltTcaBgpBgpPeerBytes5minByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460401: fltTcaBgpBgpPeerBytes15minByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460402: fltTcaBgpBgpPeerBytes1hByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460403: fltTcaBgpBgpPeerBytes1dByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460404: fltTcaBgpBgpPeerBytes1wByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460405: fltTcaBgpBgpPeerBytes1moByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460406: fltTcaBgpBgpPeerBytes1qtrByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460407: fltTcaBgpBgpPeerBytes1yearByteInSendQMax

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460408: fltTcaBgpBgpPeerBytes5minByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460409: fltTcaBgpBgpPeerBytes15minByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460410: fltTcaBgpBgpPeerBytes1hByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460411: fltTcaBgpBgpPeerBytes1dByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460412: fltTcaBgpBgpPeerBytes1wByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460413: fltTcaBgpBgpPeerBytes1moByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460414: fltTcaBgpBgpPeerBytes1qtrByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460415: fltTcaBgpBgpPeerBytes1yearByteInSendQAvg

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460440: fltTcaBgpBgpPeerBytes5minByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460441: fltTcaBgpBgpPeerBytes15minByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460442: fltTcaBgpBgpPeerBytes1hByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460443: fltTcaBgpBgpPeerBytes1dByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460444: fltTcaBgpBgpPeerBytes1wByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460445: fltTcaBgpBgpPeerBytes1moByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460446: fltTcaBgpBgpPeerBytes1qtrByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460447: fltTcaBgpBgpPeerBytes1yearByteInSendQTr

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460448: fltTcaBgpBgpPeerBytes5minByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460449: fltTcaBgpBgpPeerBytes15minByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460450: fltTcaBgpBgpPeerBytes1hByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460451: fltTcaBgpBgpPeerBytes1dByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460452: fltTcaBgpBgpPeerBytes1wByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460453: fltTcaBgpBgpPeerBytes1moByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460454: fltTcaBgpBgpPeerBytes1qtrByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460455: fltTcaBgpBgpPeerBytes1yearByteInSendQRate

Severity: variable

Explanation: This fault is caused by "Bytes in Send Queue rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Bytes in Send Queue" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460528: fltTcaBgpBgpPeerBytes5minByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460529: fltTcaBgpBgpPeerBytes15minByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460530: fltTcaBgpBgpPeerBytes1hByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460531: fltTcaBgpBgpPeerBytes1dByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460532: fltTcaBgpBgpPeerBytes1wByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460533: fltTcaBgpBgpPeerBytes1moByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460534: fltTcaBgpBgpPeerBytes1qtrByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460535: fltTcaBgpBgpPeerBytes1yearByteRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460544: fltTcaBgpBgpPeerBytes5minByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460545: fltTcaBgpBgpPeerBytes15minByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460546: fltTcaBgpBgpPeerBytes1hByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460547: fltTcaBgpBgpPeerBytes1dByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460548: fltTcaBgpBgpPeerBytes1wByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460549: fltTcaBgpBgpPeerBytes1moByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460550: fltTcaBgpBgpPeerBytes1qtrByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460551: fltTcaBgpBgpPeerBytes1yearByteRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460552: fltTcaBgpBgpPeerBytes5minByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460553: fltTcaBgpBgpPeerBytes15minByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460554: fltTcaBgpBgpPeerBytes1hByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460555: fltTcaBgpBgpPeerBytes1dByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460556: fltTcaBgpBgpPeerBytes1wByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460557: fltTcaBgpBgpPeerBytes1moByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460558: fltTcaBgpBgpPeerBytes1qtrByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460559: fltTcaBgpBgpPeerBytes1yearByteRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460560: fltTcaBgpBgpPeerBytes5minByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460561: fltTcaBgpBgpPeerBytes15minByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460562: fltTcaBgpBgpPeerBytes1hByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460563: fltTcaBgpBgpPeerBytes1dByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460564: fltTcaBgpBgpPeerBytes1wByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460565: fltTcaBgpBgpPeerBytes1moByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460566: fltTcaBgpBgpPeerBytes1qtrByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460567: fltTcaBgpBgpPeerBytes1yearByteRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460568: fltTcaBgpBgpPeerBytes5minByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460569: fltTcaBgpBgpPeerBytes15minByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460570: fltTcaBgpBgpPeerBytes1hByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460571: fltTcaBgpBgpPeerBytes1dByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460572: fltTcaBgpBgpPeerBytes1wByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460573: fltTcaBgpBgpPeerBytes1moByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460574: fltTcaBgpBgpPeerBytes1qtrByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460575: fltTcaBgpBgpPeerBytes1yearByteRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460576: fltTcaBgpBgpPeerBytes5minByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460577: fltTcaBgpBgpPeerBytes15minByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460578: fltTcaBgpBgpPeerBytes1hByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460579: fltTcaBgpBgpPeerBytes1dByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460580: fltTcaBgpBgpPeerBytes1wByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460581: fltTcaBgpBgpPeerBytes1moByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460582: fltTcaBgpBgpPeerBytes1qtrByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460583: fltTcaBgpBgpPeerBytes1yearByteRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460608: fltTcaBgpBgpPeerBytes5minByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460609: fltTcaBgpBgpPeerBytes15minByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460610: fltTcaBgpBgpPeerBytes1hByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460611: fltTcaBgpBgpPeerBytes1dByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460612: fltTcaBgpBgpPeerBytes1wByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460613: fltTcaBgpBgpPeerBytes1moByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460614: fltTcaBgpBgpPeerBytes1qtrByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460615: fltTcaBgpBgpPeerBytes1yearByteRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460616: fltTcaBgpBgpPeerBytes5minByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460617: fltTcaBgpBgpPeerBytes15minByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460618: fltTcaBgpBgpPeerBytes1hByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460619: fltTcaBgpBgpPeerBytes1dByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460620: fltTcaBgpBgpPeerBytes1wByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460621: fltTcaBgpBgpPeerBytes1moByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460622: fltTcaBgpBgpPeerBytes1qtrByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460623: fltTcaBgpBgpPeerBytes1yearByteRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460696: fltTcaBgpBgpPeerBytes5minByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460697: fltTcaBgpBgpPeerBytes15minByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460698: fltTcaBgpBgpPeerBytes1hByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460699: fltTcaBgpBgpPeerBytes1dByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460700: fltTcaBgpBgpPeerBytes1wByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460701: fltTcaBgpBgpPeerBytes1moByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460702: fltTcaBgpBgpPeerBytes1qtrByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460703: fltTcaBgpBgpPeerBytes1yearByteSentLast

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460712: fltTcaBgpBgpPeerBytes5minByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460713: fltTcaBgpBgpPeerBytes15minByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460714: fltTcaBgpBgpPeerBytes1hByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460715: fltTcaBgpBgpPeerBytes1dByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460716: fltTcaBgpBgpPeerBytes1wByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460717: fltTcaBgpBgpPeerBytes1moByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460718: fltTcaBgpBgpPeerBytes1qtrByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460719: fltTcaBgpBgpPeerBytes1yearByteSentCum

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460720: fltTcaBgpBgpPeerBytes5minByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460721: fltTcaBgpBgpPeerBytes15minByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460722: fltTcaBgpBgpPeerBytes1hByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460723: fltTcaBgpBgpPeerBytes1dByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460724: fltTcaBgpBgpPeerBytes1wByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460725: fltTcaBgpBgpPeerBytes1moByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460726: fltTcaBgpBgpPeerBytes1qtrByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460727: fltTcaBgpBgpPeerBytes1yearByteSentPer

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460728: fltTcaBgpBgpPeerBytes5minByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460729: fltTcaBgpBgpPeerBytes15minByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460730: fltTcaBgpBgpPeerBytes1hByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460731: fltTcaBgpBgpPeerBytes1dByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460732: fltTcaBgpBgpPeerBytes1wByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460733: fltTcaBgpBgpPeerBytes1moByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460734: fltTcaBgpBgpPeerBytes1qtrByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460735: fltTcaBgpBgpPeerBytes1yearByteSentMin

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460736: fltTcaBgpBgpPeerBytes5minByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460737: fltTcaBgpBgpPeerBytes15minByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460738: fltTcaBgpBgpPeerBytes1hByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460739: fltTcaBgpBgpPeerBytes1dByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460740: fltTcaBgpBgpPeerBytes1wByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460741: fltTcaBgpBgpPeerBytes1moByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460742: fltTcaBgpBgpPeerBytes1qtrByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460743: fltTcaBgpBgpPeerBytes1yearByteSentMax

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460744: fltTcaBgpBgpPeerBytes5minByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460745: fltTcaBgpBgpPeerBytes15minByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460746: fltTcaBgpBgpPeerBytes1hByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460747: fltTcaBgpBgpPeerBytes1dByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460748: fltTcaBgpBgpPeerBytes1wByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460749: fltTcaBgpBgpPeerBytes1moByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460750: fltTcaBgpBgpPeerBytes1qtrByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460751: fltTcaBgpBgpPeerBytes1yearByteSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460776: fltTcaBgpBgpPeerBytes5minByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460777: fltTcaBgpBgpPeerBytes15minByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460778: fltTcaBgpBgpPeerBytes1hByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460779: fltTcaBgpBgpPeerBytes1dByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460780: fltTcaBgpBgpPeerBytes1wByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460781: fltTcaBgpBgpPeerBytes1moByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460782: fltTcaBgpBgpPeerBytes1qtrByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460783: fltTcaBgpBgpPeerBytes1yearByteSentTr

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460784: fltTcaBgpBgpPeerBytes5minByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460785: fltTcaBgpBgpPeerBytes15minByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460786: fltTcaBgpBgpPeerBytes1hByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460787: fltTcaBgpBgpPeerBytes1dByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460788: fltTcaBgpBgpPeerBytes1wByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460789: fltTcaBgpBgpPeerBytes1moByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460790: fltTcaBgpBgpPeerBytes1qtrByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460791: fltTcaBgpBgpPeerBytes1yearByteSentRate

Severity: variable

Explanation: This fault is caused by "Number of Bytes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Bytes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460864: fltTcaBgpBgpPeerKeepAlive5minKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460865: fltTcaBgpBgpPeerKeepAlive15minKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460866: fltTcaBgpBgpPeerKeepAlive1hKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460867: fltTcaBgpBgpPeerKeepAlive1dKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460868: fltTcaBgpBgpPeerKeepAlive1wKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460869: fltTcaBgpBgpPeerKeepAlive1moKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460870: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460871: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460880: fltTcaBgpBgpPeerKeepAlive5minKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460881: fltTcaBgpBgpPeerKeepAlive15minKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460882: fltTcaBgpBgpPeerKeepAlive1hKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460883: fltTcaBgpBgpPeerKeepAlive1dKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460884: fltTcaBgpBgpPeerKeepAlive1wKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460885: fltTcaBgpBgpPeerKeepAlive1moKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460886: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460887: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460888: fltTcaBgpBgpPeerKeepAlive5minKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460889: fltTcaBgpBgpPeerKeepAlive15minKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460890: fltTcaBgpBgpPeerKeepAlive1hKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460891: fltTcaBgpBgpPeerKeepAlive1dKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460892: fltTcaBgpBgpPeerKeepAlive1wKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460893: fltTcaBgpBgpPeerKeepAlive1moKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460894: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460895: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460896: fltTcaBgpBgpPeerKeepAlive5minKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460897: fltTcaBgpBgpPeerKeepAlive15minKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460898: fltTcaBgpBgpPeerKeepAlive1hKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460899: fltTcaBgpBgpPeerKeepAlive1dKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460900: fltTcaBgpBgpPeerKeepAlive1wKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460901: fltTcaBgpBgpPeerKeepAlive1moKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460902: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460903: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460904: fltTcaBgpBgpPeerKeepAlive5minKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460905: fltTcaBgpBgpPeerKeepAlive15minKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460906: fltTcaBgpBgpPeerKeepAlive1hKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460907: fltTcaBgpBgpPeerKeepAlive1dKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460908: fltTcaBgpBgpPeerKeepAlive1wKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460909: fltTcaBgpBgpPeerKeepAlive1moKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460910: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460911: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460912: fltTcaBgpBgpPeerKeepAlive5minKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460913: fltTcaBgpBgpPeerKeepAlive15minKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460914: fltTcaBgpBgpPeerKeepAlive1hKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460915: fltTcaBgpBgpPeerKeepAlive1dKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460916: fltTcaBgpBgpPeerKeepAlive1wKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460917: fltTcaBgpBgpPeerKeepAlive1moKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460918: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460919: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460944: fltTcaBgpBgpPeerKeepAlive5minKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460945: fltTcaBgpBgpPeerKeepAlive15minKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460946: fltTcaBgpBgpPeerKeepAlive1hKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460947: fltTcaBgpBgpPeerKeepAlive1dKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460948: fltTcaBgpBgpPeerKeepAlive1wKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460949: fltTcaBgpBgpPeerKeepAlive1moKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460950: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460951: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460952: fltTcaBgpBgpPeerKeepAlive5minKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460953: fltTcaBgpBgpPeerKeepAlive15minKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460954: fltTcaBgpBgpPeerKeepAlive1hKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460955: fltTcaBgpBgpPeerKeepAlive1dKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460956: fltTcaBgpBgpPeerKeepAlive1wKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460957: fltTcaBgpBgpPeerKeepAlive1moKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460958: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F460959: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461032: fltTcaBgpBgpPeerKeepAlive5minKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461033: fltTcaBgpBgpPeerKeepAlive15minKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461034: fltTcaBgpBgpPeerKeepAlive1hKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461035: fltTcaBgpBgpPeerKeepAlive1dKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461036: fltTcaBgpBgpPeerKeepAlive1wKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461037: fltTcaBgpBgpPeerKeepAlive1moKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461038: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461039: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveSentLast

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461048: fltTcaBgpBgpPeerKeepAlive5minKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461049: fltTcaBgpBgpPeerKeepAlive15minKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461050: fltTcaBgpBgpPeerKeepAlive1hKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461051: fltTcaBgpBgpPeerKeepAlive1dKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461052: fltTcaBgpBgpPeerKeepAlive1wKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461053: fltTcaBgpBgpPeerKeepAlive1moKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461054: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461055: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveSentCum

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461056: fltTcaBgpBgpPeerKeepAlive5minKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461057: fltTcaBgpBgpPeerKeepAlive15minKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461058: fltTcaBgpBgpPeerKeepAlive1hKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461059: fltTcaBgpBgpPeerKeepAlive1dKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461060: fltTcaBgpBgpPeerKeepAlive1wKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461061: fltTcaBgpBgpPeerKeepAlive1moKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461062: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461063: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveSentPer

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461064: fltTcaBgpBgpPeerKeepAlive5minKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461065: fltTcaBgpBgpPeerKeepAlive15minKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461066: fltTcaBgpBgpPeerKeepAlive1hKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461067: fltTcaBgpBgpPeerKeepAlive1dKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461068: fltTcaBgpBgpPeerKeepAlive1wKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461069: fltTcaBgpBgpPeerKeepAlive1moKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461070: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461071: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveSentMin

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461072: fltTcaBgpBgpPeerKeepAlive5minKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461073: fltTcaBgpBgpPeerKeepAlive15minKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461074: fltTcaBgpBgpPeerKeepAlive1hKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461075: fltTcaBgpBgpPeerKeepAlive1dKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461076: fltTcaBgpBgpPeerKeepAlive1wKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461077: fltTcaBgpBgpPeerKeepAlive1moKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461078: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461079: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveSentMax

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461080: fltTcaBgpBgpPeerKeepAlive5minKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461081: fltTcaBgpBgpPeerKeepAlive15minKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461082: fltTcaBgpBgpPeerKeepAlive1hKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461083: fltTcaBgpBgpPeerKeepAlive1dKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461084: fltTcaBgpBgpPeerKeepAlive1wKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461085: fltTcaBgpBgpPeerKeepAlive1moKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461086: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461087: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461112: fltTcaBgpBgpPeerKeepAlive5minKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461113: fltTcaBgpBgpPeerKeepAlive15minKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461114: fltTcaBgpBgpPeerKeepAlive1hKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461115: fltTcaBgpBgpPeerKeepAlive1dKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461116: fltTcaBgpBgpPeerKeepAlive1wKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461117: fltTcaBgpBgpPeerKeepAlive1moKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461118: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461119: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveSentTr

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461120: fltTcaBgpBgpPeerKeepAlive5minKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461121: fltTcaBgpBgpPeerKeepAlive15minKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461122: fltTcaBgpBgpPeerKeepAlive1hKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461123: fltTcaBgpBgpPeerKeepAlive1dKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461124: fltTcaBgpBgpPeerKeepAlive1wKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461125: fltTcaBgpBgpPeerKeepAlive1moKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461126: fltTcaBgpBgpPeerKeepAlive1qtrKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461127: fltTcaBgpBgpPeerKeepAlive1yearKeepaliveSentRate

Severity: variable

Explanation: This fault is caused by "Number of Keepalive Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Keepalive Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461200: fltTcaBgpBgpPeerMsg5minMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461201: fltTcaBgpBgpPeerMsg15minMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461202: fltTcaBgpBgpPeerMsg1hMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461203: fltTcaBgpBgpPeerMsg1dMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461204: fltTcaBgpBgpPeerMsg1wMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461205: fltTcaBgpBgpPeerMsg1moMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461206: fltTcaBgpBgpPeerMsg1qtrMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461207: fltTcaBgpBgpPeerMsg1yearMsgRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461216: fltTcaBgpBgpPeerMsg5minMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461217: fltTcaBgpBgpPeerMsg15minMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461218: fltTcaBgpBgpPeerMsg1hMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461219: fltTcaBgpBgpPeerMsg1dMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461220: fltTcaBgpBgpPeerMsg1wMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461221: fltTcaBgpBgpPeerMsg1moMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461222: fltTcaBgpBgpPeerMsg1qtrMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461223: fltTcaBgpBgpPeerMsg1yearMsgRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461224: fltTcaBgpBgpPeerMsg5minMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461225: fltTcaBgpBgpPeerMsg15minMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461226: fltTcaBgpBgpPeerMsg1hMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461227: fltTcaBgpBgpPeerMsg1dMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461228: fltTcaBgpBgpPeerMsg1wMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461229: fltTcaBgpBgpPeerMsg1moMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461230: fltTcaBgpBgpPeerMsg1qtrMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461231: fltTcaBgpBgpPeerMsg1yearMsgRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461232: fltTcaBgpBgpPeerMsg5minMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461233: fltTcaBgpBgpPeerMsg15minMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461234: fltTcaBgpBgpPeerMsg1hMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461235: fltTcaBgpBgpPeerMsg1dMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461236: fltTcaBgpBgpPeerMsg1wMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461237: fltTcaBgpBgpPeerMsg1moMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461238: fltTcaBgpBgpPeerMsg1qtrMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461239: fltTcaBgpBgpPeerMsg1yearMsgRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461240: fltTcaBgpBgpPeerMsg5minMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461241: fltTcaBgpBgpPeerMsg15minMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461242: fltTcaBgpBgpPeerMsg1hMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461243: fltTcaBgpBgpPeerMsg1dMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461244: fltTcaBgpBgpPeerMsg1wMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461245: fltTcaBgpBgpPeerMsg1moMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461246: fltTcaBgpBgpPeerMsg1qtrMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461247: fltTcaBgpBgpPeerMsg1yearMsgRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461248: fltTcaBgpBgpPeerMsg5minMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461249: fltTcaBgpBgpPeerMsg15minMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461250: fltTcaBgpBgpPeerMsg1hMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461251: fltTcaBgpBgpPeerMsg1dMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461252: fltTcaBgpBgpPeerMsg1wMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461253: fltTcaBgpBgpPeerMsg1moMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461254: fltTcaBgpBgpPeerMsg1qtrMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461255: fltTcaBgpBgpPeerMsg1yearMsgRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461280: fltTcaBgpBgpPeerMsg5minMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461281: fltTcaBgpBgpPeerMsg15minMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461282: fltTcaBgpBgpPeerMsg1hMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461283: fltTcaBgpBgpPeerMsg1dMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461284: fltTcaBgpBgpPeerMsg1wMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461285: fltTcaBgpBgpPeerMsg1moMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461286: fltTcaBgpBgpPeerMsg1qtrMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461287: fltTcaBgpBgpPeerMsg1yearMsgRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461288: fltTcaBgpBgpPeerMsg5minMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461289: fltTcaBgpBgpPeerMsg15minMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461290: fltTcaBgpBgpPeerMsg1hMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461291: fltTcaBgpBgpPeerMsg1dMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461292: fltTcaBgpBgpPeerMsg1wMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461293: fltTcaBgpBgpPeerMsg1moMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461294: fltTcaBgpBgpPeerMsg1qtrMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461295: fltTcaBgpBgpPeerMsg1yearMsgRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461368: fltTcaBgpBgpPeerMsg5minMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461369: fltTcaBgpBgpPeerMsg15minMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461370: fltTcaBgpBgpPeerMsg1hMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461371: fltTcaBgpBgpPeerMsg1dMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461372: fltTcaBgpBgpPeerMsg1wMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461373: fltTcaBgpBgpPeerMsg1moMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461374: fltTcaBgpBgpPeerMsg1qtrMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461375: fltTcaBgpBgpPeerMsg1yearMsgSentLast

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461384: fltTcaBgpBgpPeerMsg5minMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461385: fltTcaBgpBgpPeerMsg15minMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461386: fltTcaBgpBgpPeerMsg1hMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461387: fltTcaBgpBgpPeerMsg1dMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461388: fltTcaBgpBgpPeerMsg1wMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461389: fltTcaBgpBgpPeerMsg1moMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461390: fltTcaBgpBgpPeerMsg1qtrMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461391: fltTcaBgpBgpPeerMsg1yearMsgSentCum

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461392: fltTcaBgpBgpPeerMsg5minMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461393: fltTcaBgpBgpPeerMsg15minMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461394: fltTcaBgpBgpPeerMsg1hMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461395: fltTcaBgpBgpPeerMsg1dMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461396: fltTcaBgpBgpPeerMsg1wMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461397: fltTcaBgpBgpPeerMsg1moMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461398: fltTcaBgpBgpPeerMsg1qtrMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461399: fltTcaBgpBgpPeerMsg1yearMsgSentPer

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461400: fltTcaBgpBgpPeerMsg5minMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461401: fltTcaBgpBgpPeerMsg15minMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461402: fltTcaBgpBgpPeerMsg1hMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461403: fltTcaBgpBgpPeerMsg1dMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461404: fltTcaBgpBgpPeerMsg1wMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461405: fltTcaBgpBgpPeerMsg1moMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461406: fltTcaBgpBgpPeerMsg1qtrMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461407: fltTcaBgpBgpPeerMsg1yearMsgSentMin

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461408: fltTcaBgpBgpPeerMsg5minMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461409: fltTcaBgpBgpPeerMsg15minMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461410: fltTcaBgpBgpPeerMsg1hMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461411: fltTcaBgpBgpPeerMsg1dMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461412: fltTcaBgpBgpPeerMsg1wMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461413: fltTcaBgpBgpPeerMsg1moMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461414: fltTcaBgpBgpPeerMsg1qtrMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461415: fltTcaBgpBgpPeerMsg1yearMsgSentMax

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461416: fltTcaBgpBgpPeerMsg5minMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461417: fltTcaBgpBgpPeerMsg15minMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461418: fltTcaBgpBgpPeerMsg1hMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461419: fltTcaBgpBgpPeerMsg1dMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461420: fltTcaBgpBgpPeerMsg1wMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461421: fltTcaBgpBgpPeerMsg1moMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461422: fltTcaBgpBgpPeerMsg1qtrMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461423: fltTcaBgpBgpPeerMsg1yearMsgSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461448: fltTcaBgpBgpPeerMsg5minMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461449: fltTcaBgpBgpPeerMsg15minMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461450: fltTcaBgpBgpPeerMsg1hMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461451: fltTcaBgpBgpPeerMsg1dMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461452: fltTcaBgpBgpPeerMsg1wMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461453: fltTcaBgpBgpPeerMsg1moMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461454: fltTcaBgpBgpPeerMsg1qtrMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461455: fltTcaBgpBgpPeerMsg1yearMsgSentTr

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461456: fltTcaBgpBgpPeerMsg5minMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461457: fltTcaBgpBgpPeerMsg15minMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461458: fltTcaBgpBgpPeerMsg1hMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461459: fltTcaBgpBgpPeerMsg1dMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461460: fltTcaBgpBgpPeerMsg1wMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461461: fltTcaBgpBgpPeerMsg1moMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461462: fltTcaBgpBgpPeerMsg1qtrMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461463: fltTcaBgpBgpPeerMsg1yearMsgSentRate

Severity: variable

Explanation: This fault is caused by "Number of Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461536: fltTcaBgpBgpPeerMsg5minNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461537: fltTcaBgpBgpPeerMsg15minNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461538: fltTcaBgpBgpPeerMsg1hNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461539: fltTcaBgpBgpPeerMsg1dNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461540: fltTcaBgpBgpPeerMsg1wNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461541: fltTcaBgpBgpPeerMsg1moNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461542: fltTcaBgpBgpPeerMsg1qtrNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461543: fltTcaBgpBgpPeerMsg1yearNotifRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461552: fltTcaBgpBgpPeerMsg5minNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461553: fltTcaBgpBgpPeerMsg15minNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461554: fltTcaBgpBgpPeerMsg1hNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461555: fltTcaBgpBgpPeerMsg1dNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461556: fltTcaBgpBgpPeerMsg1wNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461557: fltTcaBgpBgpPeerMsg1moNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461558: fltTcaBgpBgpPeerMsg1qtrNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461559: fltTcaBgpBgpPeerMsg1yearNotifRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461560: fltTcaBgpBgpPeerMsg5minNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461561: fltTcaBgpBgpPeerMsg15minNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461562: fltTcaBgpBgpPeerMsg1hNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461563: fltTcaBgpBgpPeerMsg1dNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461564: fltTcaBgpBgpPeerMsg1wNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461565: fltTcaBgpBgpPeerMsg1moNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461566: fltTcaBgpBgpPeerMsg1qtrNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461567: fltTcaBgpBgpPeerMsg1yearNotifRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461568: fltTcaBgpBgpPeerMsg5minNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461569: fltTcaBgpBgpPeerMsg15minNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461570: fltTcaBgpBgpPeerMsg1hNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461571: fltTcaBgpBgpPeerMsg1dNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461572: fltTcaBgpBgpPeerMsg1wNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461573: fltTcaBgpBgpPeerMsg1moNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461574: fltTcaBgpBgpPeerMsg1qtrNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461575: fltTcaBgpBgpPeerMsg1yearNotifRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461576: fltTcaBgpBgpPeerMsg5minNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461577: fltTcaBgpBgpPeerMsg15minNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461578: fltTcaBgpBgpPeerMsg1hNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461579: fltTcaBgpBgpPeerMsg1dNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461580: fltTcaBgpBgpPeerMsg1wNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461581: fltTcaBgpBgpPeerMsg1moNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461582: fltTcaBgpBgpPeerMsg1qtrNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461583: fltTcaBgpBgpPeerMsg1yearNotifRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461584: fltTcaBgpBgpPeerMsg5minNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461585: fltTcaBgpBgpPeerMsg15minNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461586: fltTcaBgpBgpPeerMsg1hNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461587: fltTcaBgpBgpPeerMsg1dNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461588: fltTcaBgpBgpPeerMsg1wNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461589: fltTcaBgpBgpPeerMsg1moNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461590: fltTcaBgpBgpPeerMsg1qtrNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461591: fltTcaBgpBgpPeerMsg1yearNotifRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461616: fltTcaBgpBgpPeerMsg5minNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461617: fltTcaBgpBgpPeerMsg15minNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461618: fltTcaBgpBgpPeerMsg1hNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461619: fltTcaBgpBgpPeerMsg1dNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461620: fltTcaBgpBgpPeerMsg1wNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461621: fltTcaBgpBgpPeerMsg1moNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461622: fltTcaBgpBgpPeerMsg1qtrNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461623: fltTcaBgpBgpPeerMsg1yearNotifRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461624: fltTcaBgpBgpPeerMsg5minNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461625: fltTcaBgpBgpPeerMsg15minNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461626: fltTcaBgpBgpPeerMsg1hNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461627: fltTcaBgpBgpPeerMsg1dNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461628: fltTcaBgpBgpPeerMsg1wNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461629: fltTcaBgpBgpPeerMsg1moNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461630: fltTcaBgpBgpPeerMsg1qtrNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461631: fltTcaBgpBgpPeerMsg1yearNotifRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461704: fltTcaBgpBgpPeerMsg5minNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461705: fltTcaBgpBgpPeerMsg15minNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461706: fltTcaBgpBgpPeerMsg1hNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461707: fltTcaBgpBgpPeerMsg1dNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461708: fltTcaBgpBgpPeerMsg1wNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461709: fltTcaBgpBgpPeerMsg1moNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461710: fltTcaBgpBgpPeerMsg1qtrNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461711: fltTcaBgpBgpPeerMsg1yearNotifSentLast

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461720: fltTcaBgpBgpPeerMsg5minNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461721: fltTcaBgpBgpPeerMsg15minNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461722: fltTcaBgpBgpPeerMsg1hNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461723: fltTcaBgpBgpPeerMsg1dNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461724: fltTcaBgpBgpPeerMsg1wNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461725: fltTcaBgpBgpPeerMsg1moNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461726: fltTcaBgpBgpPeerMsg1qtrNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461727: fltTcaBgpBgpPeerMsg1yearNotifSentCum

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461728: fltTcaBgpBgpPeerMsg5minNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461729: fltTcaBgpBgpPeerMsg15minNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461730: fltTcaBgpBgpPeerMsg1hNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461731: fltTcaBgpBgpPeerMsg1dNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461732: fltTcaBgpBgpPeerMsg1wNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461733: fltTcaBgpBgpPeerMsg1moNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461734: fltTcaBgpBgpPeerMsg1qtrNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461735: fltTcaBgpBgpPeerMsg1yearNotifSentPer

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461736: fltTcaBgpBgpPeerMsg5minNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461737: fltTcaBgpBgpPeerMsg15minNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461738: fltTcaBgpBgpPeerMsg1hNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461739: fltTcaBgpBgpPeerMsg1dNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461740: fltTcaBgpBgpPeerMsg1wNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461741: fltTcaBgpBgpPeerMsg1moNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461742: fltTcaBgpBgpPeerMsg1qtrNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461743: fltTcaBgpBgpPeerMsg1yearNotifSentMin

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461744: fltTcaBgpBgpPeerMsg5minNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461745: fltTcaBgpBgpPeerMsg15minNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461746: fltTcaBgpBgpPeerMsg1hNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461747: fltTcaBgpBgpPeerMsg1dNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461748: fltTcaBgpBgpPeerMsg1wNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461749: fltTcaBgpBgpPeerMsg1moNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461750: fltTcaBgpBgpPeerMsg1qtrNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461751: fltTcaBgpBgpPeerMsg1yearNotifSentMax

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461752: fltTcaBgpBgpPeerMsg5minNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461753: fltTcaBgpBgpPeerMsg15minNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461754: fltTcaBgpBgpPeerMsg1hNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461755: fltTcaBgpBgpPeerMsg1dNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461756: fltTcaBgpBgpPeerMsg1wNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461757: fltTcaBgpBgpPeerMsg1moNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461758: fltTcaBgpBgpPeerMsg1qtrNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461759: fltTcaBgpBgpPeerMsg1yearNotifSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461784: fltTcaBgpBgpPeerMsg5minNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461785: fltTcaBgpBgpPeerMsg15minNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461786: fltTcaBgpBgpPeerMsg1hNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461787: fltTcaBgpBgpPeerMsg1dNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461788: fltTcaBgpBgpPeerMsg1wNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461789: fltTcaBgpBgpPeerMsg1moNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461790: fltTcaBgpBgpPeerMsg1qtrNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461791: fltTcaBgpBgpPeerMsg1yearNotifSentTr

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461792: fltTcaBgpBgpPeerMsg5minNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461793: fltTcaBgpBgpPeerMsg15minNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461794: fltTcaBgpBgpPeerMsg1hNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461795: fltTcaBgpBgpPeerMsg1dNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461796: fltTcaBgpBgpPeerMsg1wNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461797: fltTcaBgpBgpPeerMsg1moNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461798: fltTcaBgpBgpPeerMsg1qtrNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461799: fltTcaBgpBgpPeerMsg1yearNotifSentRate

Severity: variable

Explanation: This fault is caused by "Number of Notification Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Notification Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461872: fltTcaBgpBgpPeerOpen5minOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461873: fltTcaBgpBgpPeerOpen15minOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461874: fltTcaBgpBgpPeerOpen1hOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461875: fltTcaBgpBgpPeerOpen1dOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461876: fltTcaBgpBgpPeerOpen1wOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461877: fltTcaBgpBgpPeerOpen1moOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461878: fltTcaBgpBgpPeerOpen1qtrOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461879: fltTcaBgpBgpPeerOpen1yearOpenRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461888: fltTcaBgpBgpPeerOpen5minOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461889: fltTcaBgpBgpPeerOpen15minOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461890: fltTcaBgpBgpPeerOpen1hOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461891: fltTcaBgpBgpPeerOpen1dOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461892: fltTcaBgpBgpPeerOpen1wOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461893: fltTcaBgpBgpPeerOpen1moOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461894: fltTcaBgpBgpPeerOpen1qtrOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461895: fltTcaBgpBgpPeerOpen1yearOpenRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461896: fltTcaBgpBgpPeerOpen5minOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461897: fltTcaBgpBgpPeerOpen15minOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461898: fltTcaBgpBgpPeerOpen1hOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461899: fltTcaBgpBgpPeerOpen1dOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461900: fltTcaBgpBgpPeerOpen1wOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461901: fltTcaBgpBgpPeerOpen1moOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461902: fltTcaBgpBgpPeerOpen1qtrOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461903: fltTcaBgpBgpPeerOpen1yearOpenRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461904: fltTcaBgpBgpPeerOpen5minOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461905: fltTcaBgpBgpPeerOpen15minOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461906: fltTcaBgpBgpPeerOpen1hOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461907: fltTcaBgpBgpPeerOpen1dOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461908: fltTcaBgpBgpPeerOpen1wOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461909: fltTcaBgpBgpPeerOpen1moOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461910: fltTcaBgpBgpPeerOpen1qtrOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461911: fltTcaBgpBgpPeerOpen1yearOpenRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461912: fltTcaBgpBgpPeerOpen5minOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461913: fltTcaBgpBgpPeerOpen15minOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461914: fltTcaBgpBgpPeerOpen1hOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461915: fltTcaBgpBgpPeerOpen1dOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461916: fltTcaBgpBgpPeerOpen1wOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461917: fltTcaBgpBgpPeerOpen1moOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461918: fltTcaBgpBgpPeerOpen1qtrOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461919: fltTcaBgpBgpPeerOpen1yearOpenRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461920: fltTcaBgpBgpPeerOpen5minOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461921: fltTcaBgpBgpPeerOpen15minOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461922: fltTcaBgpBgpPeerOpen1hOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461923: fltTcaBgpBgpPeerOpen1dOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461924: fltTcaBgpBgpPeerOpen1wOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461925: fltTcaBgpBgpPeerOpen1moOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461926: fltTcaBgpBgpPeerOpen1qtrOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461927: fltTcaBgpBgpPeerOpen1yearOpenRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461952: fltTcaBgpBgpPeerOpen5minOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461953: fltTcaBgpBgpPeerOpen15minOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461954: fltTcaBgpBgpPeerOpen1hOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461955: fltTcaBgpBgpPeerOpen1dOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461956: fltTcaBgpBgpPeerOpen1wOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461957: fltTcaBgpBgpPeerOpen1moOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461958: fltTcaBgpBgpPeerOpen1qtrOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461959: fltTcaBgpBgpPeerOpen1yearOpenRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461960: fltTcaBgpBgpPeerOpen5minOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461961: fltTcaBgpBgpPeerOpen15minOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461962: fltTcaBgpBgpPeerOpen1hOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461963: fltTcaBgpBgpPeerOpen1dOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461964: fltTcaBgpBgpPeerOpen1wOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461965: fltTcaBgpBgpPeerOpen1moOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461966: fltTcaBgpBgpPeerOpen1qtrOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F461967: fltTcaBgpBgpPeerOpen1yearOpenRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462040: fltTcaBgpBgpPeerOpen5minOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462041: fltTcaBgpBgpPeerOpen15minOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462042: fltTcaBgpBgpPeerOpen1hOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462043: fltTcaBgpBgpPeerOpen1dOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462044: fltTcaBgpBgpPeerOpen1wOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462045: fltTcaBgpBgpPeerOpen1moOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462046: fltTcaBgpBgpPeerOpen1qtrOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462047: fltTcaBgpBgpPeerOpen1yearOpenSentLast

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462056: fltTcaBgpBgpPeerOpen5minOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462057: fltTcaBgpBgpPeerOpen15minOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462058: fltTcaBgpBgpPeerOpen1hOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462059: fltTcaBgpBgpPeerOpen1dOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462060: fltTcaBgpBgpPeerOpen1wOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462061: fltTcaBgpBgpPeerOpen1moOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462062: fltTcaBgpBgpPeerOpen1qtrOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462063: fltTcaBgpBgpPeerOpen1yearOpenSentCum

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462064: fltTcaBgpBgpPeerOpen5minOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462065: fltTcaBgpBgpPeerOpen15minOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462066: fltTcaBgpBgpPeerOpen1hOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462067: fltTcaBgpBgpPeerOpen1dOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462068: fltTcaBgpBgpPeerOpen1wOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462069: fltTcaBgpBgpPeerOpen1moOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462070: fltTcaBgpBgpPeerOpen1qtrOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462071: fltTcaBgpBgpPeerOpen1yearOpenSentPer

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462072: fltTcaBgpBgpPeerOpen5minOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462073: fltTcaBgpBgpPeerOpen15minOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462074: fltTcaBgpBgpPeerOpen1hOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462075: fltTcaBgpBgpPeerOpen1dOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462076: fltTcaBgpBgpPeerOpen1wOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462077: fltTcaBgpBgpPeerOpen1moOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462078: fltTcaBgpBgpPeerOpen1qtrOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462079: fltTcaBgpBgpPeerOpen1yearOpenSentMin

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462080: fltTcaBgpBgpPeerOpen5minOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462081: fltTcaBgpBgpPeerOpen15minOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462082: fltTcaBgpBgpPeerOpen1hOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462083: fltTcaBgpBgpPeerOpen1dOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462084: fltTcaBgpBgpPeerOpen1wOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462085: fltTcaBgpBgpPeerOpen1moOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462086: fltTcaBgpBgpPeerOpen1qtrOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462087: fltTcaBgpBgpPeerOpen1yearOpenSentMax

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462088: fltTcaBgpBgpPeerOpen5minOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462089: fltTcaBgpBgpPeerOpen15minOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462090: fltTcaBgpBgpPeerOpen1hOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462091: fltTcaBgpBgpPeerOpen1dOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462092: fltTcaBgpBgpPeerOpen1wOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462093: fltTcaBgpBgpPeerOpen1moOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462094: fltTcaBgpBgpPeerOpen1qtrOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462095: fltTcaBgpBgpPeerOpen1yearOpenSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462120: fltTcaBgpBgpPeerOpen5minOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462121: fltTcaBgpBgpPeerOpen15minOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462122: fltTcaBgpBgpPeerOpen1hOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462123: fltTcaBgpBgpPeerOpen1dOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462124: fltTcaBgpBgpPeerOpen1wOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462125: fltTcaBgpBgpPeerOpen1moOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462126: fltTcaBgpBgpPeerOpen1qtrOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462127: fltTcaBgpBgpPeerOpen1yearOpenSentTr

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462128: fltTcaBgpBgpPeerOpen5minOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462129: fltTcaBgpBgpPeerOpen15minOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462130: fltTcaBgpBgpPeerOpen1hOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462131: fltTcaBgpBgpPeerOpen1dOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462132: fltTcaBgpBgpPeerOpen1wOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462133: fltTcaBgpBgpPeerOpen1moOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462134: fltTcaBgpBgpPeerOpen1qtrOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462135: fltTcaBgpBgpPeerOpen1yearOpenSentRate

Severity: variable

Explanation: This fault is caused by "Number of Open Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Open Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462208: fltTcaBgpBgpPeerOpen5minUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462209: fltTcaBgpBgpPeerOpen15minUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462210: fltTcaBgpBgpPeerOpen1hUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462211: fltTcaBgpBgpPeerOpen1dUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462212: fltTcaBgpBgpPeerOpen1wUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462213: fltTcaBgpBgpPeerOpen1moUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462214: fltTcaBgpBgpPeerOpen1qtrUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462215: fltTcaBgpBgpPeerOpen1yearUpdateRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462224: fltTcaBgpBgpPeerOpen5minUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462225: fltTcaBgpBgpPeerOpen15minUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462226: fltTcaBgpBgpPeerOpen1hUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462227: fltTcaBgpBgpPeerOpen1dUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462228: fltTcaBgpBgpPeerOpen1wUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462229: fltTcaBgpBgpPeerOpen1moUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462230: fltTcaBgpBgpPeerOpen1qtrUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462231: fltTcaBgpBgpPeerOpen1yearUpdateRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462232: fltTcaBgpBgpPeerOpen5minUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462233: fltTcaBgpBgpPeerOpen15minUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462234: fltTcaBgpBgpPeerOpen1hUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462235: fltTcaBgpBgpPeerOpen1dUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462236: fltTcaBgpBgpPeerOpen1wUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462237: fltTcaBgpBgpPeerOpen1moUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462238: fltTcaBgpBgpPeerOpen1qtrUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462239: fltTcaBgpBgpPeerOpen1yearUpdateRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462240: fltTcaBgpBgpPeerOpen5minUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462241: fltTcaBgpBgpPeerOpen15minUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462242: fltTcaBgpBgpPeerOpen1hUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462243: fltTcaBgpBgpPeerOpen1dUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462244: fltTcaBgpBgpPeerOpen1wUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462245: fltTcaBgpBgpPeerOpen1moUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462246: fltTcaBgpBgpPeerOpen1qtrUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462247: fltTcaBgpBgpPeerOpen1yearUpdateRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462248: fltTcaBgpBgpPeerOpen5minUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462249: fltTcaBgpBgpPeerOpen15minUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462250: fltTcaBgpBgpPeerOpen1hUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462251: fltTcaBgpBgpPeerOpen1dUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462252: fltTcaBgpBgpPeerOpen1wUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462253: fltTcaBgpBgpPeerOpen1moUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462254: fltTcaBgpBgpPeerOpen1qtrUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462255: fltTcaBgpBgpPeerOpen1yearUpdateRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462256: fltTcaBgpBgpPeerOpen5minUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462257: fltTcaBgpBgpPeerOpen15minUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462258: fltTcaBgpBgpPeerOpen1hUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462259: fltTcaBgpBgpPeerOpen1dUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462260: fltTcaBgpBgpPeerOpen1wUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462261: fltTcaBgpBgpPeerOpen1moUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462262: fltTcaBgpBgpPeerOpen1qtrUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462263: fltTcaBgpBgpPeerOpen1yearUpdateRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462288: fltTcaBgpBgpPeerOpen5minUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462289: fltTcaBgpBgpPeerOpen15minUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462290: fltTcaBgpBgpPeerOpen1hUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462291: fltTcaBgpBgpPeerOpen1dUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462292: fltTcaBgpBgpPeerOpen1wUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462293: fltTcaBgpBgpPeerOpen1moUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462294: fltTcaBgpBgpPeerOpen1qtrUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462295: fltTcaBgpBgpPeerOpen1yearUpdateRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462296: fltTcaBgpBgpPeerOpen5minUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462297: fltTcaBgpBgpPeerOpen15minUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462298: fltTcaBgpBgpPeerOpen1hUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462299: fltTcaBgpBgpPeerOpen1dUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462300: fltTcaBgpBgpPeerOpen1wUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462301: fltTcaBgpBgpPeerOpen1moUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462302: fltTcaBgpBgpPeerOpen1qtrUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462303: fltTcaBgpBgpPeerOpen1yearUpdateRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462376: fltTcaBgpBgpPeerOpen5minUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462377: fltTcaBgpBgpPeerOpen15minUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462378: fltTcaBgpBgpPeerOpen1hUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462379: fltTcaBgpBgpPeerOpen1dUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462380: fltTcaBgpBgpPeerOpen1wUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462381: fltTcaBgpBgpPeerOpen1moUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462382: fltTcaBgpBgpPeerOpen1qtrUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462383: fltTcaBgpBgpPeerOpen1yearUpdateSentLast

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462392: fltTcaBgpBgpPeerOpen5minUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462393: fltTcaBgpBgpPeerOpen15minUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462394: fltTcaBgpBgpPeerOpen1hUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462395: fltTcaBgpBgpPeerOpen1dUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462396: fltTcaBgpBgpPeerOpen1wUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462397: fltTcaBgpBgpPeerOpen1moUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462398: fltTcaBgpBgpPeerOpen1qtrUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462399: fltTcaBgpBgpPeerOpen1yearUpdateSentCum

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462400: fltTcaBgpBgpPeerOpen5minUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462401: fltTcaBgpBgpPeerOpen15minUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462402: fltTcaBgpBgpPeerOpen1hUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462403: fltTcaBgpBgpPeerOpen1dUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462404: fltTcaBgpBgpPeerOpen1wUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462405: fltTcaBgpBgpPeerOpen1moUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462406: fltTcaBgpBgpPeerOpen1qtrUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462407: fltTcaBgpBgpPeerOpen1yearUpdateSentPer

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462408: fltTcaBgpBgpPeerOpen5minUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462409: fltTcaBgpBgpPeerOpen15minUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462410: fltTcaBgpBgpPeerOpen1hUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462411: fltTcaBgpBgpPeerOpen1dUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462412: fltTcaBgpBgpPeerOpen1wUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462413: fltTcaBgpBgpPeerOpen1moUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462414: fltTcaBgpBgpPeerOpen1qtrUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462415: fltTcaBgpBgpPeerOpen1yearUpdateSentMin

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462416: fltTcaBgpBgpPeerOpen5minUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462417: fltTcaBgpBgpPeerOpen15minUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462418: fltTcaBgpBgpPeerOpen1hUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462419: fltTcaBgpBgpPeerOpen1dUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462420: fltTcaBgpBgpPeerOpen1wUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462421: fltTcaBgpBgpPeerOpen1moUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462422: fltTcaBgpBgpPeerOpen1qtrUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462423: fltTcaBgpBgpPeerOpen1yearUpdateSentMax

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462424: fltTcaBgpBgpPeerOpen5minUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462425: fltTcaBgpBgpPeerOpen15minUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462426: fltTcaBgpBgpPeerOpen1hUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462427: fltTcaBgpBgpPeerOpen1dUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462428: fltTcaBgpBgpPeerOpen1wUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462429: fltTcaBgpBgpPeerOpen1moUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462430: fltTcaBgpBgpPeerOpen1qtrUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462431: fltTcaBgpBgpPeerOpen1yearUpdateSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462456: fltTcaBgpBgpPeerOpen5minUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462457: fltTcaBgpBgpPeerOpen15minUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462458: fltTcaBgpBgpPeerOpen1hUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462459: fltTcaBgpBgpPeerOpen1dUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462460: fltTcaBgpBgpPeerOpen1wUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462461: fltTcaBgpBgpPeerOpen1moUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462462: fltTcaBgpBgpPeerOpen1qtrUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462463: fltTcaBgpBgpPeerOpen1yearUpdateSentTr

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462464: fltTcaBgpBgpPeerOpen5minUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462465: fltTcaBgpBgpPeerOpen15minUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462466: fltTcaBgpBgpPeerOpen1hUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462467: fltTcaBgpBgpPeerOpen1dUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462468: fltTcaBgpBgpPeerOpen1wUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462469: fltTcaBgpBgpPeerOpen1moUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462470: fltTcaBgpBgpPeerOpen1qtrUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462471: fltTcaBgpBgpPeerOpen1yearUpdateSentRate

Severity: variable

Explanation: This fault is caused by "Number of Update Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Update Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462544: fltTcaBgpBgpPeerRoute5minCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462545: fltTcaBgpBgpPeerRoute15minCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462546: fltTcaBgpBgpPeerRoute1hCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462547: fltTcaBgpBgpPeerRoute1dCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462548: fltTcaBgpBgpPeerRoute1wCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462549: fltTcaBgpBgpPeerRoute1moCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462550: fltTcaBgpBgpPeerRoute1qtrCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462551: fltTcaBgpBgpPeerRoute1yearCapabilityRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462560: fltTcaBgpBgpPeerRoute5minCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462561: fltTcaBgpBgpPeerRoute15minCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462562: fltTcaBgpBgpPeerRoute1hCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462563: fltTcaBgpBgpPeerRoute1dCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462564: fltTcaBgpBgpPeerRoute1wCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462565: fltTcaBgpBgpPeerRoute1moCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462566: fltTcaBgpBgpPeerRoute1qtrCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462567: fltTcaBgpBgpPeerRoute1yearCapabilityRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462568: fltTcaBgpBgpPeerRoute5minCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462569: fltTcaBgpBgpPeerRoute15minCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462570: fltTcaBgpBgpPeerRoute1hCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462571: fltTcaBgpBgpPeerRoute1dCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462572: fltTcaBgpBgpPeerRoute1wCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462573: fltTcaBgpBgpPeerRoute1moCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462574: fltTcaBgpBgpPeerRoute1qtrCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462575: fltTcaBgpBgpPeerRoute1yearCapabilityRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462576: fltTcaBgpBgpPeerRoute5minCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462577: fltTcaBgpBgpPeerRoute15minCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462578: fltTcaBgpBgpPeerRoute1hCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462579: fltTcaBgpBgpPeerRoute1dCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462580: fltTcaBgpBgpPeerRoute1wCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462581: fltTcaBgpBgpPeerRoute1moCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462582: fltTcaBgpBgpPeerRoute1qtrCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462583: fltTcaBgpBgpPeerRoute1yearCapabilityRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462584: fltTcaBgpBgpPeerRoute5minCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462585: fltTcaBgpBgpPeerRoute15minCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462586: fltTcaBgpBgpPeerRoute1hCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462587: fltTcaBgpBgpPeerRoute1dCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462588: fltTcaBgpBgpPeerRoute1wCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462589: fltTcaBgpBgpPeerRoute1moCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462590: fltTcaBgpBgpPeerRoute1qtrCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462591: fltTcaBgpBgpPeerRoute1yearCapabilityRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462592: fltTcaBgpBgpPeerRoute5minCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462593: fltTcaBgpBgpPeerRoute15minCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462594: fltTcaBgpBgpPeerRoute1hCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462595: fltTcaBgpBgpPeerRoute1dCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462596: fltTcaBgpBgpPeerRoute1wCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462597: fltTcaBgpBgpPeerRoute1moCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462598: fltTcaBgpBgpPeerRoute1qtrCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462599: fltTcaBgpBgpPeerRoute1yearCapabilityRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462624: fltTcaBgpBgpPeerRoute5minCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462625: fltTcaBgpBgpPeerRoute15minCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462626: fltTcaBgpBgpPeerRoute1hCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462627: fltTcaBgpBgpPeerRoute1dCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462628: fltTcaBgpBgpPeerRoute1wCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462629: fltTcaBgpBgpPeerRoute1moCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462630: fltTcaBgpBgpPeerRoute1qtrCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462631: fltTcaBgpBgpPeerRoute1yearCapabilityRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462632: fltTcaBgpBgpPeerRoute5minCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462633: fltTcaBgpBgpPeerRoute15minCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462634: fltTcaBgpBgpPeerRoute1hCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462635: fltTcaBgpBgpPeerRoute1dCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462636: fltTcaBgpBgpPeerRoute1wCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462637: fltTcaBgpBgpPeerRoute1moCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462638: fltTcaBgpBgpPeerRoute1qtrCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462639: fltTcaBgpBgpPeerRoute1yearCapabilityRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462712: fltTcaBgpBgpPeerRoute5minCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462713: fltTcaBgpBgpPeerRoute15minCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462714: fltTcaBgpBgpPeerRoute1hCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462715: fltTcaBgpBgpPeerRoute1dCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462716: fltTcaBgpBgpPeerRoute1wCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462717: fltTcaBgpBgpPeerRoute1moCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462718: fltTcaBgpBgpPeerRoute1qtrCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462719: fltTcaBgpBgpPeerRoute1yearCapabilitySentLast

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462728: fltTcaBgpBgpPeerRoute5minCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462729: fltTcaBgpBgpPeerRoute15minCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462730: fltTcaBgpBgpPeerRoute1hCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462731: fltTcaBgpBgpPeerRoute1dCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462732: fltTcaBgpBgpPeerRoute1wCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462733: fltTcaBgpBgpPeerRoute1moCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462734: fltTcaBgpBgpPeerRoute1qtrCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462735: fltTcaBgpBgpPeerRoute1yearCapabilitySentCum

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462736: fltTcaBgpBgpPeerRoute5minCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462737: fltTcaBgpBgpPeerRoute15minCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462738: fltTcaBgpBgpPeerRoute1hCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462739: fltTcaBgpBgpPeerRoute1dCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462740: fltTcaBgpBgpPeerRoute1wCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462741: fltTcaBgpBgpPeerRoute1moCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462742: fltTcaBgpBgpPeerRoute1qtrCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462743: fltTcaBgpBgpPeerRoute1yearCapabilitySentPer

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462744: fltTcaBgpBgpPeerRoute5minCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462745: fltTcaBgpBgpPeerRoute15minCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462746: fltTcaBgpBgpPeerRoute1hCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462747: fltTcaBgpBgpPeerRoute1dCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462748: fltTcaBgpBgpPeerRoute1wCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462749: fltTcaBgpBgpPeerRoute1moCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462750: fltTcaBgpBgpPeerRoute1qtrCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462751: fltTcaBgpBgpPeerRoute1yearCapabilitySentMin

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462752: fltTcaBgpBgpPeerRoute5minCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462753: fltTcaBgpBgpPeerRoute15minCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462754: fltTcaBgpBgpPeerRoute1hCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462755: fltTcaBgpBgpPeerRoute1dCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462756: fltTcaBgpBgpPeerRoute1wCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462757: fltTcaBgpBgpPeerRoute1moCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462758: fltTcaBgpBgpPeerRoute1qtrCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462759: fltTcaBgpBgpPeerRoute1yearCapabilitySentMax

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462760: fltTcaBgpBgpPeerRoute5minCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462761: fltTcaBgpBgpPeerRoute15minCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462762: fltTcaBgpBgpPeerRoute1hCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462763: fltTcaBgpBgpPeerRoute1dCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462764: fltTcaBgpBgpPeerRoute1wCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462765: fltTcaBgpBgpPeerRoute1moCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462766: fltTcaBgpBgpPeerRoute1qtrCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462767: fltTcaBgpBgpPeerRoute1yearCapabilitySentAvg

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462792: fltTcaBgpBgpPeerRoute5minCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462793: fltTcaBgpBgpPeerRoute15minCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462794: fltTcaBgpBgpPeerRoute1hCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462795: fltTcaBgpBgpPeerRoute1dCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462796: fltTcaBgpBgpPeerRoute1wCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462797: fltTcaBgpBgpPeerRoute1moCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462798: fltTcaBgpBgpPeerRoute1qtrCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462799: fltTcaBgpBgpPeerRoute1yearCapabilitySentTr

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462800: fltTcaBgpBgpPeerRoute5minCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462801: fltTcaBgpBgpPeerRoute15minCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462802: fltTcaBgpBgpPeerRoute1hCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462803: fltTcaBgpBgpPeerRoute1dCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462804: fltTcaBgpBgpPeerRoute1wCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462805: fltTcaBgpBgpPeerRoute1moCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462806: fltTcaBgpBgpPeerRoute1qtrCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462807: fltTcaBgpBgpPeerRoute1yearCapabilitySentRate

Severity: variable

Explanation: This fault is caused by "Number of Capability Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Capability Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462880: fltTcaBgpBgpPeerRoute5minRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462881: fltTcaBgpBgpPeerRoute15minRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462882: fltTcaBgpBgpPeerRoute1hRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462883: fltTcaBgpBgpPeerRoute1dRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462884: fltTcaBgpBgpPeerRoute1wRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462885: fltTcaBgpBgpPeerRoute1moRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462886: fltTcaBgpBgpPeerRoute1qtrRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462887: fltTcaBgpBgpPeerRoute1yearRouteRefreshRcvdLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462896: fltTcaBgpBgpPeerRoute5minRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462897: fltTcaBgpBgpPeerRoute15minRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462898: fltTcaBgpBgpPeerRoute1hRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462899: fltTcaBgpBgpPeerRoute1dRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462900: fltTcaBgpBgpPeerRoute1wRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462901: fltTcaBgpBgpPeerRoute1moRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462902: fltTcaBgpBgpPeerRoute1qtrRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462903: fltTcaBgpBgpPeerRoute1yearRouteRefreshRcvdCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462904: fltTcaBgpBgpPeerRoute5minRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462905: fltTcaBgpBgpPeerRoute15minRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462906: fltTcaBgpBgpPeerRoute1hRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462907: fltTcaBgpBgpPeerRoute1dRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462908: fltTcaBgpBgpPeerRoute1wRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462909: fltTcaBgpBgpPeerRoute1moRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462910: fltTcaBgpBgpPeerRoute1qtrRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462911: fltTcaBgpBgpPeerRoute1yearRouteRefreshRcvdPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462912: fltTcaBgpBgpPeerRoute5minRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462913: fltTcaBgpBgpPeerRoute15minRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462914: fltTcaBgpBgpPeerRoute1hRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462915: fltTcaBgpBgpPeerRoute1dRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462916: fltTcaBgpBgpPeerRoute1wRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462917: fltTcaBgpBgpPeerRoute1moRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462918: fltTcaBgpBgpPeerRoute1qtrRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462919: fltTcaBgpBgpPeerRoute1yearRouteRefreshRcvdMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462920: fltTcaBgpBgpPeerRoute5minRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462921: fltTcaBgpBgpPeerRoute15minRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462922: fltTcaBgpBgpPeerRoute1hRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462923: fltTcaBgpBgpPeerRoute1dRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462924: fltTcaBgpBgpPeerRoute1wRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462925: fltTcaBgpBgpPeerRoute1moRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462926: fltTcaBgpBgpPeerRoute1qtrRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462927: fltTcaBgpBgpPeerRoute1yearRouteRefreshRcvdMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462928: fltTcaBgpBgpPeerRoute5minRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462929: fltTcaBgpBgpPeerRoute15minRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462930: fltTcaBgpBgpPeerRoute1hRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462931: fltTcaBgpBgpPeerRoute1dRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462932: fltTcaBgpBgpPeerRoute1wRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462933: fltTcaBgpBgpPeerRoute1moRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462934: fltTcaBgpBgpPeerRoute1qtrRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462935: fltTcaBgpBgpPeerRoute1yearRouteRefreshRcvdAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462960: fltTcaBgpBgpPeerRoute5minRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462961: fltTcaBgpBgpPeerRoute15minRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462962: fltTcaBgpBgpPeerRoute1hRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462963: fltTcaBgpBgpPeerRoute1dRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462964: fltTcaBgpBgpPeerRoute1wRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462965: fltTcaBgpBgpPeerRoute1moRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462966: fltTcaBgpBgpPeerRoute1qtrRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462967: fltTcaBgpBgpPeerRoute1yearRouteRefreshRcvdTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462968: fltTcaBgpBgpPeerRoute5minRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462969: fltTcaBgpBgpPeerRoute15minRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462970: fltTcaBgpBgpPeerRoute1hRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462971: fltTcaBgpBgpPeerRoute1dRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462972: fltTcaBgpBgpPeerRoute1wRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462973: fltTcaBgpBgpPeerRoute1moRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462974: fltTcaBgpBgpPeerRoute1qtrRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F462975: fltTcaBgpBgpPeerRoute1yearRouteRefreshRcvdRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463048: fltTcaBgpBgpPeerRoute5minRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463049: fltTcaBgpBgpPeerRoute15minRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463050: fltTcaBgpBgpPeerRoute1hRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463051: fltTcaBgpBgpPeerRoute1dRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463052: fltTcaBgpBgpPeerRoute1wRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463053: fltTcaBgpBgpPeerRoute1moRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463054: fltTcaBgpBgpPeerRoute1qtrRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463055: fltTcaBgpBgpPeerRoute1yearRouteRefreshSentLast

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463064: fltTcaBgpBgpPeerRoute5minRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463065: fltTcaBgpBgpPeerRoute15minRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463066: fltTcaBgpBgpPeerRoute1hRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463067: fltTcaBgpBgpPeerRoute1dRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463068: fltTcaBgpBgpPeerRoute1wRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463069: fltTcaBgpBgpPeerRoute1moRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463070: fltTcaBgpBgpPeerRoute1qtrRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463071: fltTcaBgpBgpPeerRoute1yearRouteRefreshSentCum

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463072: fltTcaBgpBgpPeerRoute5minRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463073: fltTcaBgpBgpPeerRoute15minRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463074: fltTcaBgpBgpPeerRoute1hRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463075: fltTcaBgpBgpPeerRoute1dRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463076: fltTcaBgpBgpPeerRoute1wRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463077: fltTcaBgpBgpPeerRoute1moRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463078: fltTcaBgpBgpPeerRoute1qtrRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463079: fltTcaBgpBgpPeerRoute1yearRouteRefreshSentPer

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463080: fltTcaBgpBgpPeerRoute5minRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463081: fltTcaBgpBgpPeerRoute15minRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463082: fltTcaBgpBgpPeerRoute1hRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463083: fltTcaBgpBgpPeerRoute1dRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463084: fltTcaBgpBgpPeerRoute1wRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463085: fltTcaBgpBgpPeerRoute1moRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463086: fltTcaBgpBgpPeerRoute1qtrRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463087: fltTcaBgpBgpPeerRoute1yearRouteRefreshSentMin

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463088: fltTcaBgpBgpPeerRoute5minRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463089: fltTcaBgpBgpPeerRoute15minRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463090: fltTcaBgpBgpPeerRoute1hRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463091: fltTcaBgpBgpPeerRoute1dRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463092: fltTcaBgpBgpPeerRoute1wRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463093: fltTcaBgpBgpPeerRoute1moRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463094: fltTcaBgpBgpPeerRoute1qtrRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463095: fltTcaBgpBgpPeerRoute1yearRouteRefreshSentMax

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463096: fltTcaBgpBgpPeerRoute5minRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463097: fltTcaBgpBgpPeerRoute15minRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463098: fltTcaBgpBgpPeerRoute1hRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463099: fltTcaBgpBgpPeerRoute1dRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463100: fltTcaBgpBgpPeerRoute1wRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463101: fltTcaBgpBgpPeerRoute1moRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463102: fltTcaBgpBgpPeerRoute1qtrRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463103: fltTcaBgpBgpPeerRoute1yearRouteRefreshSentAvg

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463128: fltTcaBgpBgpPeerRoute5minRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463129: fltTcaBgpBgpPeerRoute15minRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463130: fltTcaBgpBgpPeerRoute1hRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463131: fltTcaBgpBgpPeerRoute1dRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463132: fltTcaBgpBgpPeerRoute1wRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463133: fltTcaBgpBgpPeerRoute1moRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463134: fltTcaBgpBgpPeerRoute1qtrRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463135: fltTcaBgpBgpPeerRoute1yearRouteRefreshSentTr

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463136: fltTcaBgpBgpPeerRoute5minRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463137: fltTcaBgpBgpPeerRoute15minRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463138: fltTcaBgpBgpPeerRoute1hRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463139: fltTcaBgpBgpPeerRoute1dRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463140: fltTcaBgpBgpPeerRoute1wRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463141: fltTcaBgpBgpPeerRoute1moRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463142: fltTcaBgpBgpPeerRoute1qtrRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463143: fltTcaBgpBgpPeerRoute1yearRouteRefreshSentRate

Severity: variable

Explanation: This fault is caused by "Number of Route Refresh Messages Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of Route Refresh Messages Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463216: fltTcaBgpBgpRtPrefixCount5minAcceptedPathsLast

Severity: variable

Explanation: This fault is caused by "Accepted Paths current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463217: fltTcaBgpBgpRtPrefixCount15minAcceptedPathsLast

Severity: variable

Explanation: This fault is caused by "Accepted Paths current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463218: fltTcaBgpBgpRtPrefixCount1hAcceptedPathsLast

Severity: variable

Explanation: This fault is caused by "Accepted Paths current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463219: fltTcaBgpBgpRtPrefixCount1dAcceptedPathsLast

Severity: variable

Explanation: This fault is caused by "Accepted Paths current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463220: fltTcaBgpBgpRtPrefixCount1wAcceptedPathsLast

Severity: variable

Explanation: This fault is caused by "Accepted Paths current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463221: fltTcaBgpBgpRtPrefixCount1moAcceptedPathsLast

Severity: variable

Explanation: This fault is caused by "Accepted Paths current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463222: fltTcaBgpBgpRtPrefixCount1qtrAcceptedPathsLast

Severity: variable

Explanation: This fault is caused by "Accepted Paths current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463223: fltTcaBgpBgpRtPrefixCount1yearAcceptedPathsLast

Severity: variable

Explanation: This fault is caused by "Accepted Paths current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463232: fltTcaBgpBgpRtPrefixCount5minAcceptedPathsCum

Severity: variable

Explanation: This fault is caused by "Accepted Paths cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463233: fltTcaBgpBgpRtPrefixCount15minAcceptedPathsCum

Severity: variable

Explanation: This fault is caused by "Accepted Paths cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463234: fltTcaBgpBgpRtPrefixCount1hAcceptedPathsCum

Severity: variable

Explanation: This fault is caused by "Accepted Paths cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463235: fltTcaBgpBgpRtPrefixCount1dAcceptedPathsCum

Severity: variable

Explanation: This fault is caused by "Accepted Paths cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463236: fltTcaBgpBgpRtPrefixCount1wAcceptedPathsCum

Severity: variable

Explanation: This fault is caused by "Accepted Paths cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463237: fltTcaBgpBgpRtPrefixCount1moAcceptedPathsCum

Severity: variable

Explanation: This fault is caused by "Accepted Paths cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463238: fltTcaBgpBgpRtPrefixCount1qtrAcceptedPathsCum

Severity: variable

Explanation: This fault is caused by "Accepted Paths cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463239: fltTcaBgpBgpRtPrefixCount1yearAcceptedPathsCum

Severity: variable

Explanation: This fault is caused by "Accepted Paths cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463240: fltTcaBgpBgpRtPrefixCount5minAcceptedPathsPer

Severity: variable

Explanation: This fault is caused by "Accepted Paths periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463241: fltTcaBgpBgpRtPrefixCount15minAcceptedPathsPer

Severity: variable

Explanation: This fault is caused by "Accepted Paths periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463242: fltTcaBgpBgpRtPrefixCount1hAcceptedPathsPer

Severity: variable

Explanation: This fault is caused by "Accepted Paths periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463243: fltTcaBgpBgpRtPrefixCount1dAcceptedPathsPer

Severity: variable

Explanation: This fault is caused by "Accepted Paths periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463244: fltTcaBgpBgpRtPrefixCount1wAcceptedPathsPer

Severity: variable

Explanation: This fault is caused by "Accepted Paths periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463245: fltTcaBgpBgpRtPrefixCount1moAcceptedPathsPer

Severity: variable

Explanation: This fault is caused by "Accepted Paths periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463246: fltTcaBgpBgpRtPrefixCount1qtrAcceptedPathsPer

Severity: variable

Explanation: This fault is caused by "Accepted Paths periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463247: fltTcaBgpBgpRtPrefixCount1yearAcceptedPathsPer

Severity: variable

Explanation: This fault is caused by "Accepted Paths periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463248: fltTcaBgpBgpRtPrefixCount5minAcceptedPathsMin

Severity: variable

Explanation: This fault is caused by "Accepted Paths minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463249: fltTcaBgpBgpRtPrefixCount15minAcceptedPathsMin

Severity: variable

Explanation: This fault is caused by "Accepted Paths minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463250: fltTcaBgpBgpRtPrefixCount1hAcceptedPathsMin

Severity: variable

Explanation: This fault is caused by "Accepted Paths minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463251: fltTcaBgpBgpRtPrefixCount1dAcceptedPathsMin

Severity: variable

Explanation: This fault is caused by "Accepted Paths minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463252: fltTcaBgpBgpRtPrefixCount1wAcceptedPathsMin

Severity: variable

Explanation: This fault is caused by "Accepted Paths minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463253: fltTcaBgpBgpRtPrefixCount1moAcceptedPathsMin

Severity: variable

Explanation: This fault is caused by "Accepted Paths minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463254: fltTcaBgpBgpRtPrefixCount1qtrAcceptedPathsMin

Severity: variable

Explanation: This fault is caused by "Accepted Paths minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463255: fltTcaBgpBgpRtPrefixCount1yearAcceptedPathsMin

Severity: variable

Explanation: This fault is caused by "Accepted Paths minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463256: fltTcaBgpBgpRtPrefixCount5minAcceptedPathsMax

Severity: variable

Explanation: This fault is caused by "Accepted Paths maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463257: fltTcaBgpBgpRtPrefixCount15minAcceptedPathsMax

Severity: variable

Explanation: This fault is caused by "Accepted Paths maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463258: fltTcaBgpBgpRtPrefixCount1hAcceptedPathsMax

Severity: variable

Explanation: This fault is caused by "Accepted Paths maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463259: fltTcaBgpBgpRtPrefixCount1dAcceptedPathsMax

Severity: variable

Explanation: This fault is caused by "Accepted Paths maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463260: fltTcaBgpBgpRtPrefixCount1wAcceptedPathsMax

Severity: variable

Explanation: This fault is caused by "Accepted Paths maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463261: fltTcaBgpBgpRtPrefixCount1moAcceptedPathsMax

Severity: variable

Explanation: This fault is caused by "Accepted Paths maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463262: fltTcaBgpBgpRtPrefixCount1qtrAcceptedPathsMax

Severity: variable

Explanation: This fault is caused by "Accepted Paths maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463263: fltTcaBgpBgpRtPrefixCount1yearAcceptedPathsMax

Severity: variable

Explanation: This fault is caused by "Accepted Paths maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463264: fltTcaBgpBgpRtPrefixCount5minAcceptedPathsAvg

Severity: variable

Explanation: This fault is caused by "Accepted Paths average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463265: fltTcaBgpBgpRtPrefixCount15minAcceptedPathsAvg

Severity: variable

Explanation: This fault is caused by "Accepted Paths average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463266: fltTcaBgpBgpRtPrefixCount1hAcceptedPathsAvg

Severity: variable

Explanation: This fault is caused by "Accepted Paths average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463267: fltTcaBgpBgpRtPrefixCount1dAcceptedPathsAvg

Severity: variable

Explanation: This fault is caused by "Accepted Paths average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463268: fltTcaBgpBgpRtPrefixCount1wAcceptedPathsAvg

Severity: variable

Explanation: This fault is caused by "Accepted Paths average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463269: fltTcaBgpBgpRtPrefixCount1moAcceptedPathsAvg

Severity: variable

Explanation: This fault is caused by "Accepted Paths average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463270: fltTcaBgpBgpRtPrefixCount1qtrAcceptedPathsAvg

Severity: variable

Explanation: This fault is caused by "Accepted Paths average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463271: fltTcaBgpBgpRtPrefixCount1yearAcceptedPathsAvg

Severity: variable

Explanation: This fault is caused by "Accepted Paths average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463296: fltTcaBgpBgpRtPrefixCount5minAcceptedPathsTr

Severity: variable

Explanation: This fault is caused by "Accepted Paths trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463297: fltTcaBgpBgpRtPrefixCount15minAcceptedPathsTr

Severity: variable

Explanation: This fault is caused by "Accepted Paths trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463298: fltTcaBgpBgpRtPrefixCount1hAcceptedPathsTr

Severity: variable

Explanation: This fault is caused by "Accepted Paths trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463299: fltTcaBgpBgpRtPrefixCount1dAcceptedPathsTr

Severity: variable

Explanation: This fault is caused by "Accepted Paths trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463300: fltTcaBgpBgpRtPrefixCount1wAcceptedPathsTr

Severity: variable

Explanation: This fault is caused by "Accepted Paths trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463301: fltTcaBgpBgpRtPrefixCount1moAcceptedPathsTr

Severity: variable

Explanation: This fault is caused by "Accepted Paths trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463302: fltTcaBgpBgpRtPrefixCount1qtrAcceptedPathsTr

Severity: variable

Explanation: This fault is caused by "Accepted Paths trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463303: fltTcaBgpBgpRtPrefixCount1yearAcceptedPathsTr

Severity: variable

Explanation: This fault is caused by "Accepted Paths trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463304: fltTcaBgpBgpRtPrefixCount5minAcceptedPathsRate

Severity: variable

Explanation: This fault is caused by "Accepted Paths rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463305: fltTcaBgpBgpRtPrefixCount15minAcceptedPathsRate

Severity: variable

Explanation: This fault is caused by "Accepted Paths rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463306: fltTcaBgpBgpRtPrefixCount1hAcceptedPathsRate

Severity: variable

Explanation: This fault is caused by "Accepted Paths rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463307: fltTcaBgpBgpRtPrefixCount1dAcceptedPathsRate

Severity: variable

Explanation: This fault is caused by "Accepted Paths rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463308: fltTcaBgpBgpRtPrefixCount1wAcceptedPathsRate

Severity: variable

Explanation: This fault is caused by "Accepted Paths rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463309: fltTcaBgpBgpRtPrefixCount1moAcceptedPathsRate

Severity: variable

Explanation: This fault is caused by "Accepted Paths rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463310: fltTcaBgpBgpRtPrefixCount1qtrAcceptedPathsRate

Severity: variable

Explanation: This fault is caused by "Accepted Paths rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463311: fltTcaBgpBgpRtPrefixCount1yearAcceptedPathsRate

Severity: variable

Explanation: This fault is caused by "Accepted Paths rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Accepted Paths" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463384: fltTcaBgpBgpRtPrefixCount5minPfxSavedLast

Severity: variable

Explanation: This fault is caused by "Prefixes Saved current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463385: fltTcaBgpBgpRtPrefixCount15minPfxSavedLast

Severity: variable

Explanation: This fault is caused by "Prefixes Saved current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463386: fltTcaBgpBgpRtPrefixCount1hPfxSavedLast

Severity: variable

Explanation: This fault is caused by "Prefixes Saved current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463387: fltTcaBgpBgpRtPrefixCount1dPfxSavedLast

Severity: variable

Explanation: This fault is caused by "Prefixes Saved current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463388: fltTcaBgpBgpRtPrefixCount1wPfxSavedLast

Severity: variable

Explanation: This fault is caused by "Prefixes Saved current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463389: fltTcaBgpBgpRtPrefixCount1moPfxSavedLast

Severity: variable

Explanation: This fault is caused by "Prefixes Saved current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463390: fltTcaBgpBgpRtPrefixCount1qtrPfxSavedLast

Severity: variable

Explanation: This fault is caused by "Prefixes Saved current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463391: fltTcaBgpBgpRtPrefixCount1yearPfxSavedLast

Severity: variable

Explanation: This fault is caused by "Prefixes Saved current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463400: fltTcaBgpBgpRtPrefixCount5minPfxSavedCum

Severity: variable

Explanation: This fault is caused by "Prefixes Saved cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463401: fltTcaBgpBgpRtPrefixCount15minPfxSavedCum

Severity: variable

Explanation: This fault is caused by "Prefixes Saved cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463402: fltTcaBgpBgpRtPrefixCount1hPfxSavedCum

Severity: variable

Explanation: This fault is caused by "Prefixes Saved cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463403: fltTcaBgpBgpRtPrefixCount1dPfxSavedCum

Severity: variable

Explanation: This fault is caused by "Prefixes Saved cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463404: fltTcaBgpBgpRtPrefixCount1wPfxSavedCum

Severity: variable

Explanation: This fault is caused by "Prefixes Saved cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463405: fltTcaBgpBgpRtPrefixCount1moPfxSavedCum

Severity: variable

Explanation: This fault is caused by "Prefixes Saved cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463406: fltTcaBgpBgpRtPrefixCount1qtrPfxSavedCum

Severity: variable

Explanation: This fault is caused by "Prefixes Saved cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463407: fltTcaBgpBgpRtPrefixCount1yearPfxSavedCum

Severity: variable

Explanation: This fault is caused by "Prefixes Saved cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463408: fltTcaBgpBgpRtPrefixCount5minPfxSavedPer

Severity: variable

Explanation: This fault is caused by "Prefixes Saved periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463409: fltTcaBgpBgpRtPrefixCount15minPfxSavedPer

Severity: variable

Explanation: This fault is caused by "Prefixes Saved periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463410: fltTcaBgpBgpRtPrefixCount1hPfxSavedPer

Severity: variable

Explanation: This fault is caused by "Prefixes Saved periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463411: fltTcaBgpBgpRtPrefixCount1dPfxSavedPer

Severity: variable

Explanation: This fault is caused by "Prefixes Saved periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463412: fltTcaBgpBgpRtPrefixCount1wPfxSavedPer

Severity: variable

Explanation: This fault is caused by "Prefixes Saved periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463413: fltTcaBgpBgpRtPrefixCount1moPfxSavedPer

Severity: variable

Explanation: This fault is caused by "Prefixes Saved periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463414: fltTcaBgpBgpRtPrefixCount1qtrPfxSavedPer

Severity: variable

Explanation: This fault is caused by "Prefixes Saved periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463415: fltTcaBgpBgpRtPrefixCount1yearPfxSavedPer

Severity: variable

Explanation: This fault is caused by "Prefixes Saved periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463416: fltTcaBgpBgpRtPrefixCount5minPfxSavedMin

Severity: variable

Explanation: This fault is caused by "Prefixes Saved minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463417: fltTcaBgpBgpRtPrefixCount15minPfxSavedMin

Severity: variable

Explanation: This fault is caused by "Prefixes Saved minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463418: fltTcaBgpBgpRtPrefixCount1hPfxSavedMin

Severity: variable

Explanation: This fault is caused by "Prefixes Saved minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463419: fltTcaBgpBgpRtPrefixCount1dPfxSavedMin

Severity: variable

Explanation: This fault is caused by "Prefixes Saved minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463420: fltTcaBgpBgpRtPrefixCount1wPfxSavedMin

Severity: variable

Explanation: This fault is caused by "Prefixes Saved minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463421: fltTcaBgpBgpRtPrefixCount1moPfxSavedMin

Severity: variable

Explanation: This fault is caused by "Prefixes Saved minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463422: fltTcaBgpBgpRtPrefixCount1qtrPfxSavedMin

Severity: variable

Explanation: This fault is caused by "Prefixes Saved minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463423: fltTcaBgpBgpRtPrefixCount1yearPfxSavedMin

Severity: variable

Explanation: This fault is caused by "Prefixes Saved minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463424: fltTcaBgpBgpRtPrefixCount5minPfxSavedMax

Severity: variable

Explanation: This fault is caused by "Prefixes Saved maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463425: fltTcaBgpBgpRtPrefixCount15minPfxSavedMax

Severity: variable

Explanation: This fault is caused by "Prefixes Saved maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463426: fltTcaBgpBgpRtPrefixCount1hPfxSavedMax

Severity: variable

Explanation: This fault is caused by "Prefixes Saved maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463427: fltTcaBgpBgpRtPrefixCount1dPfxSavedMax

Severity: variable

Explanation: This fault is caused by "Prefixes Saved maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463428: fltTcaBgpBgpRtPrefixCount1wPfxSavedMax

Severity: variable

Explanation: This fault is caused by "Prefixes Saved maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463429: fltTcaBgpBgpRtPrefixCount1moPfxSavedMax

Severity: variable

Explanation: This fault is caused by "Prefixes Saved maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463430: fltTcaBgpBgpRtPrefixCount1qtrPfxSavedMax

Severity: variable

Explanation: This fault is caused by "Prefixes Saved maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463431: fltTcaBgpBgpRtPrefixCount1yearPfxSavedMax

Severity: variable

Explanation: This fault is caused by "Prefixes Saved maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463432: fltTcaBgpBgpRtPrefixCount5minPfxSavedAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Saved average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463433: fltTcaBgpBgpRtPrefixCount15minPfxSavedAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Saved average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463434: fltTcaBgpBgpRtPrefixCount1hPfxSavedAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Saved average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463435: fltTcaBgpBgpRtPrefixCount1dPfxSavedAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Saved average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463436: fltTcaBgpBgpRtPrefixCount1wPfxSavedAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Saved average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463437: fltTcaBgpBgpRtPrefixCount1moPfxSavedAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Saved average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463438: fltTcaBgpBgpRtPrefixCount1qtrPfxSavedAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Saved average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463439: fltTcaBgpBgpRtPrefixCount1yearPfxSavedAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Saved average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463464: fltTcaBgpBgpRtPrefixCount5minPfxSavedTr

Severity: variable

Explanation: This fault is caused by "Prefixes Saved trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463465: fltTcaBgpBgpRtPrefixCount15minPfxSavedTr

Severity: variable

Explanation: This fault is caused by "Prefixes Saved trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463466: fltTcaBgpBgpRtPrefixCount1hPfxSavedTr

Severity: variable

Explanation: This fault is caused by "Prefixes Saved trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463467: fltTcaBgpBgpRtPrefixCount1dPfxSavedTr

Severity: variable

Explanation: This fault is caused by "Prefixes Saved trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463468: fltTcaBgpBgpRtPrefixCount1wPfxSavedTr

Severity: variable

Explanation: This fault is caused by "Prefixes Saved trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463469: fltTcaBgpBgpRtPrefixCount1moPfxSavedTr

Severity: variable

Explanation: This fault is caused by "Prefixes Saved trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463470: fltTcaBgpBgpRtPrefixCount1qtrPfxSavedTr

Severity: variable

Explanation: This fault is caused by "Prefixes Saved trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463471: fltTcaBgpBgpRtPrefixCount1yearPfxSavedTr

Severity: variable

Explanation: This fault is caused by "Prefixes Saved trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463472: fltTcaBgpBgpRtPrefixCount5minPfxSavedRate

Severity: variable

Explanation: This fault is caused by "Prefixes Saved rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463473: fltTcaBgpBgpRtPrefixCount15minPfxSavedRate

Severity: variable

Explanation: This fault is caused by "Prefixes Saved rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463474: fltTcaBgpBgpRtPrefixCount1hPfxSavedRate

Severity: variable

Explanation: This fault is caused by "Prefixes Saved rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463475: fltTcaBgpBgpRtPrefixCount1dPfxSavedRate

Severity: variable

Explanation: This fault is caused by "Prefixes Saved rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463476: fltTcaBgpBgpRtPrefixCount1wPfxSavedRate

Severity: variable

Explanation: This fault is caused by "Prefixes Saved rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463477: fltTcaBgpBgpRtPrefixCount1moPfxSavedRate

Severity: variable

Explanation: This fault is caused by "Prefixes Saved rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463478: fltTcaBgpBgpRtPrefixCount1qtrPfxSavedRate

Severity: variable

Explanation: This fault is caused by "Prefixes Saved rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463479: fltTcaBgpBgpRtPrefixCount1yearPfxSavedRate

Severity: variable

Explanation: This fault is caused by "Prefixes Saved rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Saved" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463552: fltTcaBgpBgpRtPrefixCount5minPfxSentLast

Severity: variable

Explanation: This fault is caused by "Prefixes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463553: fltTcaBgpBgpRtPrefixCount15minPfxSentLast

Severity: variable

Explanation: This fault is caused by "Prefixes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463554: fltTcaBgpBgpRtPrefixCount1hPfxSentLast

Severity: variable

Explanation: This fault is caused by "Prefixes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463555: fltTcaBgpBgpRtPrefixCount1dPfxSentLast

Severity: variable

Explanation: This fault is caused by "Prefixes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463556: fltTcaBgpBgpRtPrefixCount1wPfxSentLast

Severity: variable

Explanation: This fault is caused by "Prefixes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463557: fltTcaBgpBgpRtPrefixCount1moPfxSentLast

Severity: variable

Explanation: This fault is caused by "Prefixes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463558: fltTcaBgpBgpRtPrefixCount1qtrPfxSentLast

Severity: variable

Explanation: This fault is caused by "Prefixes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463559: fltTcaBgpBgpRtPrefixCount1yearPfxSentLast

Severity: variable

Explanation: This fault is caused by "Prefixes Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463568: fltTcaBgpBgpRtPrefixCount5minPfxSentCum

Severity: variable

Explanation: This fault is caused by "Prefixes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463569: fltTcaBgpBgpRtPrefixCount15minPfxSentCum

Severity: variable

Explanation: This fault is caused by "Prefixes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463570: fltTcaBgpBgpRtPrefixCount1hPfxSentCum

Severity: variable

Explanation: This fault is caused by "Prefixes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463571: fltTcaBgpBgpRtPrefixCount1dPfxSentCum

Severity: variable

Explanation: This fault is caused by "Prefixes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463572: fltTcaBgpBgpRtPrefixCount1wPfxSentCum

Severity: variable

Explanation: This fault is caused by "Prefixes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463573: fltTcaBgpBgpRtPrefixCount1moPfxSentCum

Severity: variable

Explanation: This fault is caused by "Prefixes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463574: fltTcaBgpBgpRtPrefixCount1qtrPfxSentCum

Severity: variable

Explanation: This fault is caused by "Prefixes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463575: fltTcaBgpBgpRtPrefixCount1yearPfxSentCum

Severity: variable

Explanation: This fault is caused by "Prefixes Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463576: fltTcaBgpBgpRtPrefixCount5minPfxSentPer

Severity: variable

Explanation: This fault is caused by "Prefixes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463577: fltTcaBgpBgpRtPrefixCount15minPfxSentPer

Severity: variable

Explanation: This fault is caused by "Prefixes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463578: fltTcaBgpBgpRtPrefixCount1hPfxSentPer

Severity: variable

Explanation: This fault is caused by "Prefixes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463579: fltTcaBgpBgpRtPrefixCount1dPfxSentPer

Severity: variable

Explanation: This fault is caused by "Prefixes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463580: fltTcaBgpBgpRtPrefixCount1wPfxSentPer

Severity: variable

Explanation: This fault is caused by "Prefixes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463581: fltTcaBgpBgpRtPrefixCount1moPfxSentPer

Severity: variable

Explanation: This fault is caused by "Prefixes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463582: fltTcaBgpBgpRtPrefixCount1qtrPfxSentPer

Severity: variable

Explanation: This fault is caused by "Prefixes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463583: fltTcaBgpBgpRtPrefixCount1yearPfxSentPer

Severity: variable

Explanation: This fault is caused by "Prefixes Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463584: fltTcaBgpBgpRtPrefixCount5minPfxSentMin

Severity: variable

Explanation: This fault is caused by "Prefixes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463585: fltTcaBgpBgpRtPrefixCount15minPfxSentMin

Severity: variable

Explanation: This fault is caused by "Prefixes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463586: fltTcaBgpBgpRtPrefixCount1hPfxSentMin

Severity: variable

Explanation: This fault is caused by "Prefixes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463587: fltTcaBgpBgpRtPrefixCount1dPfxSentMin

Severity: variable

Explanation: This fault is caused by "Prefixes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463588: fltTcaBgpBgpRtPrefixCount1wPfxSentMin

Severity: variable

Explanation: This fault is caused by "Prefixes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463589: fltTcaBgpBgpRtPrefixCount1moPfxSentMin

Severity: variable

Explanation: This fault is caused by "Prefixes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463590: fltTcaBgpBgpRtPrefixCount1qtrPfxSentMin

Severity: variable

Explanation: This fault is caused by "Prefixes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463591: fltTcaBgpBgpRtPrefixCount1yearPfxSentMin

Severity: variable

Explanation: This fault is caused by "Prefixes Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463592: fltTcaBgpBgpRtPrefixCount5minPfxSentMax

Severity: variable

Explanation: This fault is caused by "Prefixes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463593: fltTcaBgpBgpRtPrefixCount15minPfxSentMax

Severity: variable

Explanation: This fault is caused by "Prefixes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463594: fltTcaBgpBgpRtPrefixCount1hPfxSentMax

Severity: variable

Explanation: This fault is caused by "Prefixes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463595: fltTcaBgpBgpRtPrefixCount1dPfxSentMax

Severity: variable

Explanation: This fault is caused by "Prefixes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463596: fltTcaBgpBgpRtPrefixCount1wPfxSentMax

Severity: variable

Explanation: This fault is caused by "Prefixes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463597: fltTcaBgpBgpRtPrefixCount1moPfxSentMax

Severity: variable

Explanation: This fault is caused by "Prefixes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463598: fltTcaBgpBgpRtPrefixCount1qtrPfxSentMax

Severity: variable

Explanation: This fault is caused by "Prefixes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463599: fltTcaBgpBgpRtPrefixCount1yearPfxSentMax

Severity: variable

Explanation: This fault is caused by "Prefixes Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463600: fltTcaBgpBgpRtPrefixCount5minPfxSentAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463601: fltTcaBgpBgpRtPrefixCount15minPfxSentAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463602: fltTcaBgpBgpRtPrefixCount1hPfxSentAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463603: fltTcaBgpBgpRtPrefixCount1dPfxSentAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463604: fltTcaBgpBgpRtPrefixCount1wPfxSentAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463605: fltTcaBgpBgpRtPrefixCount1moPfxSentAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463606: fltTcaBgpBgpRtPrefixCount1qtrPfxSentAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463607: fltTcaBgpBgpRtPrefixCount1yearPfxSentAvg

Severity: variable

Explanation: This fault is caused by "Prefixes Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463632: fltTcaBgpBgpRtPrefixCount5minPfxSentTr

Severity: variable

Explanation: This fault is caused by "Prefixes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463633: fltTcaBgpBgpRtPrefixCount15minPfxSentTr

Severity: variable

Explanation: This fault is caused by "Prefixes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463634: fltTcaBgpBgpRtPrefixCount1hPfxSentTr

Severity: variable

Explanation: This fault is caused by "Prefixes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463635: fltTcaBgpBgpRtPrefixCount1dPfxSentTr

Severity: variable

Explanation: This fault is caused by "Prefixes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463636: fltTcaBgpBgpRtPrefixCount1wPfxSentTr

Severity: variable

Explanation: This fault is caused by "Prefixes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463637: fltTcaBgpBgpRtPrefixCount1moPfxSentTr

Severity: variable

Explanation: This fault is caused by "Prefixes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463638: fltTcaBgpBgpRtPrefixCount1qtrPfxSentTr

Severity: variable

Explanation: This fault is caused by "Prefixes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463639: fltTcaBgpBgpRtPrefixCount1yearPfxSentTr

Severity: variable

Explanation: This fault is caused by "Prefixes Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463640: fltTcaBgpBgpRtPrefixCount5minPfxSentRate

Severity: variable

Explanation: This fault is caused by "Prefixes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463641: fltTcaBgpBgpRtPrefixCount15minPfxSentRate

Severity: variable

Explanation: This fault is caused by "Prefixes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463642: fltTcaBgpBgpRtPrefixCount1hPfxSentRate

Severity: variable

Explanation: This fault is caused by "Prefixes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463643: fltTcaBgpBgpRtPrefixCount1dPfxSentRate

Severity: variable

Explanation: This fault is caused by "Prefixes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463644: fltTcaBgpBgpRtPrefixCount1wPfxSentRate

Severity: variable

Explanation: This fault is caused by "Prefixes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463645: fltTcaBgpBgpRtPrefixCount1moPfxSentRate

Severity: variable

Explanation: This fault is caused by "Prefixes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463646: fltTcaBgpBgpRtPrefixCount1qtrPfxSentRate

Severity: variable

Explanation: This fault is caused by "Prefixes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F463647: fltTcaBgpBgpRtPrefixCount1yearPfxSentRate

Severity: variable

Explanation: This fault is caused by "Prefixes Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Prefixes Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464112: fltTcaEqptcapacityPolOTCAMEntry5minNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464113: fltTcaEqptcapacityPolOTCAMEntry15minNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464114: fltTcaEqptcapacityPolOTCAMEntry1hNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464115: fltTcaEqptcapacityPolOTCAMEntry1dNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464116: fltTcaEqptcapacityPolOTCAMEntry1wNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464117: fltTcaEqptcapacityPolOTCAMEntry1moNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464118: fltTcaEqptcapacityPolOTCAMEntry1qtrNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464119: fltTcaEqptcapacityPolOTCAMEntry1yearNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464120: fltTcaEqptcapacityPolOTCAMEntry5minNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464121: fltTcaEqptcapacityPolOTCAMEntry15minNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464122: fltTcaEqptcapacityPolOTCAMEntry1hNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464123: fltTcaEqptcapacityPolOTCAMEntry1dNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464124: fltTcaEqptcapacityPolOTCAMEntry1wNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464125: fltTcaEqptcapacityPolOTCAMEntry1moNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464126: fltTcaEqptcapacityPolOTCAMEntry1qtrNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464127: fltTcaEqptcapacityPolOTCAMEntry1yearNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464128: fltTcaEqptcapacityPolOTCAMEntry5minNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464129: fltTcaEqptcapacityPolOTCAMEntry15minNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464130: fltTcaEqptcapacityPolOTCAMEntry1hNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464131: fltTcaEqptcapacityPolOTCAMEntry1dNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464132: fltTcaEqptcapacityPolOTCAMEntry1wNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464133: fltTcaEqptcapacityPolOTCAMEntry1moNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464134: fltTcaEqptcapacityPolOTCAMEntry1qtrNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464135: fltTcaEqptcapacityPolOTCAMEntry1yearNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464136: fltTcaEqptcapacityPolOTCAMEntry5minNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464137: fltTcaEqptcapacityPolOTCAMEntry15minNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464138: fltTcaEqptcapacityPolOTCAMEntry1hNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464139: fltTcaEqptcapacityPolOTCAMEntry1dNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464140: fltTcaEqptcapacityPolOTCAMEntry1wNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464141: fltTcaEqptcapacityPolOTCAMEntry1moNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464142: fltTcaEqptcapacityPolOTCAMEntry1qtrNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464143: fltTcaEqptcapacityPolOTCAMEntry1yearNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464176: fltTcaEqptcapacityPolOTCAMEntry5minNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464177: fltTcaEqptcapacityPolOTCAMEntry15minNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464178: fltTcaEqptcapacityPolOTCAMEntry1hNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464179: fltTcaEqptcapacityPolOTCAMEntry1dNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464180: fltTcaEqptcapacityPolOTCAMEntry1wNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464181: fltTcaEqptcapacityPolOTCAMEntry1moNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464182: fltTcaEqptcapacityPolOTCAMEntry1qtrNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464183: fltTcaEqptcapacityPolOTCAMEntry1yearNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464232: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464233: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464234: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464235: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464236: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464237: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464238: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464239: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464248: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464249: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464250: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464251: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464252: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464253: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464254: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464255: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464256: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464257: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464258: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464259: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464260: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464261: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464262: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464263: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464264: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464265: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464266: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464267: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464268: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464269: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464270: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464271: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464272: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464273: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464274: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464275: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464276: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464277: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464278: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464279: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464280: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464281: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464282: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464283: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464284: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464285: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464286: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464287: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464312: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464313: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464314: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464315: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464316: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464317: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464318: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464319: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464320: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464321: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464322: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464323: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464324: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464325: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464326: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464327: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464400: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464401: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464402: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464403: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464404: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464405: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464406: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464407: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464416: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464417: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464418: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464419: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464420: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464421: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464422: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464423: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464424: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464425: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464426: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464427: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464428: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464429: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464430: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464431: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464432: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464433: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464434: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464435: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464436: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464437: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464438: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464439: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464440: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464441: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464442: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464443: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464444: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464445: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464446: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464447: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464448: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464449: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464450: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464451: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464452: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464453: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464454: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464455: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464480: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464481: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464482: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464483: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464484: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464485: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464486: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464487: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464488: fltTcaEqptcapacityPolOTCAMUsage5minPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464489: fltTcaEqptcapacityPolOTCAMUsage15minPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464490: fltTcaEqptcapacityPolOTCAMUsage1hPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464491: fltTcaEqptcapacityPolOTCAMUsage1dPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464492: fltTcaEqptcapacityPolOTCAMUsage1wPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464493: fltTcaEqptcapacityPolOTCAMUsage1moPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464494: fltTcaEqptcapacityPolOTCAMUsage1qtrPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F464495: fltTcaEqptcapacityPolOTCAMUsage1yearPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466800: fltTcaCloudHostRouterEgressBytes5minUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466801: fltTcaCloudHostRouterEgressBytes15minUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466802: fltTcaCloudHostRouterEgressBytes1hUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466803: fltTcaCloudHostRouterEgressBytes1dUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466804: fltTcaCloudHostRouterEgressBytes1wUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466805: fltTcaCloudHostRouterEgressBytes1moUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466806: fltTcaCloudHostRouterEgressBytes1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466807: fltTcaCloudHostRouterEgressBytes1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466816: fltTcaCloudHostRouterEgressBytes5minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466817: fltTcaCloudHostRouterEgressBytes15minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466818: fltTcaCloudHostRouterEgressBytes1hUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466819: fltTcaCloudHostRouterEgressBytes1dUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466820: fltTcaCloudHostRouterEgressBytes1wUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466821: fltTcaCloudHostRouterEgressBytes1moUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466822: fltTcaCloudHostRouterEgressBytes1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466823: fltTcaCloudHostRouterEgressBytes1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466824: fltTcaCloudHostRouterEgressBytes5minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466825: fltTcaCloudHostRouterEgressBytes15minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466826: fltTcaCloudHostRouterEgressBytes1hUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466827: fltTcaCloudHostRouterEgressBytes1dUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466828: fltTcaCloudHostRouterEgressBytes1wUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466829: fltTcaCloudHostRouterEgressBytes1moUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466830: fltTcaCloudHostRouterEgressBytes1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466831: fltTcaCloudHostRouterEgressBytes1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466832: fltTcaCloudHostRouterEgressBytes5minUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466833: fltTcaCloudHostRouterEgressBytes15minUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466834: fltTcaCloudHostRouterEgressBytes1hUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466835: fltTcaCloudHostRouterEgressBytes1dUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466836: fltTcaCloudHostRouterEgressBytes1wUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466837: fltTcaCloudHostRouterEgressBytes1moUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466838: fltTcaCloudHostRouterEgressBytes1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466839: fltTcaCloudHostRouterEgressBytes1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466840: fltTcaCloudHostRouterEgressBytes5minUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466841: fltTcaCloudHostRouterEgressBytes15minUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466842: fltTcaCloudHostRouterEgressBytes1hUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466843: fltTcaCloudHostRouterEgressBytes1dUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466844: fltTcaCloudHostRouterEgressBytes1wUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466845: fltTcaCloudHostRouterEgressBytes1moUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466846: fltTcaCloudHostRouterEgressBytes1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466847: fltTcaCloudHostRouterEgressBytes1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466848: fltTcaCloudHostRouterEgressBytes5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466849: fltTcaCloudHostRouterEgressBytes15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466850: fltTcaCloudHostRouterEgressBytes1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466851: fltTcaCloudHostRouterEgressBytes1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466852: fltTcaCloudHostRouterEgressBytes1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466853: fltTcaCloudHostRouterEgressBytes1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466854: fltTcaCloudHostRouterEgressBytes1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466855: fltTcaCloudHostRouterEgressBytes1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466880: fltTcaCloudHostRouterEgressBytes5minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466881: fltTcaCloudHostRouterEgressBytes15minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466882: fltTcaCloudHostRouterEgressBytes1hUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466883: fltTcaCloudHostRouterEgressBytes1dUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466884: fltTcaCloudHostRouterEgressBytes1wUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466885: fltTcaCloudHostRouterEgressBytes1moUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466886: fltTcaCloudHostRouterEgressBytes1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466887: fltTcaCloudHostRouterEgressBytes1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466888: fltTcaCloudHostRouterEgressBytes5minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466889: fltTcaCloudHostRouterEgressBytes15minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466890: fltTcaCloudHostRouterEgressBytes1hUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466891: fltTcaCloudHostRouterEgressBytes1dUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466892: fltTcaCloudHostRouterEgressBytes1wUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466893: fltTcaCloudHostRouterEgressBytes1moUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466894: fltTcaCloudHostRouterEgressBytes1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466895: fltTcaCloudHostRouterEgressBytes1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466968: fltTcaCloudHostRouterEgressBytesAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466969: fltTcaCloudHostRouterEgressBytesAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466970: fltTcaCloudHostRouterEgressBytesAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466971: fltTcaCloudHostRouterEgressBytesAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466972: fltTcaCloudHostRouterEgressBytesAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466973: fltTcaCloudHostRouterEgressBytesAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466974: fltTcaCloudHostRouterEgressBytesAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466975: fltTcaCloudHostRouterEgressBytesAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466976: fltTcaCloudHostRouterEgressBytesAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466977: fltTcaCloudHostRouterEgressBytesAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466978: fltTcaCloudHostRouterEgressBytesAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466979: fltTcaCloudHostRouterEgressBytesAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466980: fltTcaCloudHostRouterEgressBytesAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466981: fltTcaCloudHostRouterEgressBytesAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466982: fltTcaCloudHostRouterEgressBytesAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F466983: fltTcaCloudHostRouterEgressBytesAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467008: fltTcaCloudHostRouterEgressBytesAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467009: fltTcaCloudHostRouterEgressBytesAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467010: fltTcaCloudHostRouterEgressBytesAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467011: fltTcaCloudHostRouterEgressBytesAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467012: fltTcaCloudHostRouterEgressBytesAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467013: fltTcaCloudHostRouterEgressBytesAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467014: fltTcaCloudHostRouterEgressBytesAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467015: fltTcaCloudHostRouterEgressBytesAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467016: fltTcaCloudHostRouterEgressBytesAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467017: fltTcaCloudHostRouterEgressBytesAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467018: fltTcaCloudHostRouterEgressBytesAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467019: fltTcaCloudHostRouterEgressBytesAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467020: fltTcaCloudHostRouterEgressBytesAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467021: fltTcaCloudHostRouterEgressBytesAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467022: fltTcaCloudHostRouterEgressBytesAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467023: fltTcaCloudHostRouterEgressBytesAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467072: fltTcaCloudHostRouterEgressPkts5minUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467073: fltTcaCloudHostRouterEgressPkts15minUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467074: fltTcaCloudHostRouterEgressPkts1hUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467075: fltTcaCloudHostRouterEgressPkts1dUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467076: fltTcaCloudHostRouterEgressPkts1wUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467077: fltTcaCloudHostRouterEgressPkts1moUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467078: fltTcaCloudHostRouterEgressPkts1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467079: fltTcaCloudHostRouterEgressPkts1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467088: fltTcaCloudHostRouterEgressPkts5minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467089: fltTcaCloudHostRouterEgressPkts15minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467090: fltTcaCloudHostRouterEgressPkts1hUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467091: fltTcaCloudHostRouterEgressPkts1dUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467092: fltTcaCloudHostRouterEgressPkts1wUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467093: fltTcaCloudHostRouterEgressPkts1moUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467094: fltTcaCloudHostRouterEgressPkts1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467095: fltTcaCloudHostRouterEgressPkts1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467096: fltTcaCloudHostRouterEgressPkts5minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467097: fltTcaCloudHostRouterEgressPkts15minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467098: fltTcaCloudHostRouterEgressPkts1hUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467099: fltTcaCloudHostRouterEgressPkts1dUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467100: fltTcaCloudHostRouterEgressPkts1wUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467101: fltTcaCloudHostRouterEgressPkts1moUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467102: fltTcaCloudHostRouterEgressPkts1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467103: fltTcaCloudHostRouterEgressPkts1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467104: fltTcaCloudHostRouterEgressPkts5minUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467105: fltTcaCloudHostRouterEgressPkts15minUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467106: fltTcaCloudHostRouterEgressPkts1hUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467107: fltTcaCloudHostRouterEgressPkts1dUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467108: fltTcaCloudHostRouterEgressPkts1wUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467109: fltTcaCloudHostRouterEgressPkts1moUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467110: fltTcaCloudHostRouterEgressPkts1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467111: fltTcaCloudHostRouterEgressPkts1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467112: fltTcaCloudHostRouterEgressPkts5minUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467113: fltTcaCloudHostRouterEgressPkts15minUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467114: fltTcaCloudHostRouterEgressPkts1hUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467115: fltTcaCloudHostRouterEgressPkts1dUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467116: fltTcaCloudHostRouterEgressPkts1wUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467117: fltTcaCloudHostRouterEgressPkts1moUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467118: fltTcaCloudHostRouterEgressPkts1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467119: fltTcaCloudHostRouterEgressPkts1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467120: fltTcaCloudHostRouterEgressPkts5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467121: fltTcaCloudHostRouterEgressPkts15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467122: fltTcaCloudHostRouterEgressPkts1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467123: fltTcaCloudHostRouterEgressPkts1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467124: fltTcaCloudHostRouterEgressPkts1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467125: fltTcaCloudHostRouterEgressPkts1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467126: fltTcaCloudHostRouterEgressPkts1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467127: fltTcaCloudHostRouterEgressPkts1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467152: fltTcaCloudHostRouterEgressPkts5minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467153: fltTcaCloudHostRouterEgressPkts15minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467154: fltTcaCloudHostRouterEgressPkts1hUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467155: fltTcaCloudHostRouterEgressPkts1dUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467156: fltTcaCloudHostRouterEgressPkts1wUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467157: fltTcaCloudHostRouterEgressPkts1moUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467158: fltTcaCloudHostRouterEgressPkts1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467159: fltTcaCloudHostRouterEgressPkts1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467160: fltTcaCloudHostRouterEgressPkts5minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467161: fltTcaCloudHostRouterEgressPkts15minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467162: fltTcaCloudHostRouterEgressPkts1hUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467163: fltTcaCloudHostRouterEgressPkts1dUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467164: fltTcaCloudHostRouterEgressPkts1wUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467165: fltTcaCloudHostRouterEgressPkts1moUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467166: fltTcaCloudHostRouterEgressPkts1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467167: fltTcaCloudHostRouterEgressPkts1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467240: fltTcaCloudHostRouterEgressPktsAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467241: fltTcaCloudHostRouterEgressPktsAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467242: fltTcaCloudHostRouterEgressPktsAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467243: fltTcaCloudHostRouterEgressPktsAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467244: fltTcaCloudHostRouterEgressPktsAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467245: fltTcaCloudHostRouterEgressPktsAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467246: fltTcaCloudHostRouterEgressPktsAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467247: fltTcaCloudHostRouterEgressPktsAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467248: fltTcaCloudHostRouterEgressPktsAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467249: fltTcaCloudHostRouterEgressPktsAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467250: fltTcaCloudHostRouterEgressPktsAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467251: fltTcaCloudHostRouterEgressPktsAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467252: fltTcaCloudHostRouterEgressPktsAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467253: fltTcaCloudHostRouterEgressPktsAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467254: fltTcaCloudHostRouterEgressPktsAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467255: fltTcaCloudHostRouterEgressPktsAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467280: fltTcaCloudHostRouterEgressPktsAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467281: fltTcaCloudHostRouterEgressPktsAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467282: fltTcaCloudHostRouterEgressPktsAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467283: fltTcaCloudHostRouterEgressPktsAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467284: fltTcaCloudHostRouterEgressPktsAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467285: fltTcaCloudHostRouterEgressPktsAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467286: fltTcaCloudHostRouterEgressPktsAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467287: fltTcaCloudHostRouterEgressPktsAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467288: fltTcaCloudHostRouterEgressPktsAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467289: fltTcaCloudHostRouterEgressPktsAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467290: fltTcaCloudHostRouterEgressPktsAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467291: fltTcaCloudHostRouterEgressPktsAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467292: fltTcaCloudHostRouterEgressPktsAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467293: fltTcaCloudHostRouterEgressPktsAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467294: fltTcaCloudHostRouterEgressPktsAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467295: fltTcaCloudHostRouterEgressPktsAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467344: fltTcaCloudHostRouterIngressBytes5minUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467345: fltTcaCloudHostRouterIngressBytes15minUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467346: fltTcaCloudHostRouterIngressBytes1hUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467347: fltTcaCloudHostRouterIngressBytes1dUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467348: fltTcaCloudHostRouterIngressBytes1wUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467349: fltTcaCloudHostRouterIngressBytes1moUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467350: fltTcaCloudHostRouterIngressBytes1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467351: fltTcaCloudHostRouterIngressBytes1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467360: fltTcaCloudHostRouterIngressBytes5minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467361: fltTcaCloudHostRouterIngressBytes15minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467362: fltTcaCloudHostRouterIngressBytes1hUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467363: fltTcaCloudHostRouterIngressBytes1dUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467364: fltTcaCloudHostRouterIngressBytes1wUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467365: fltTcaCloudHostRouterIngressBytes1moUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467366: fltTcaCloudHostRouterIngressBytes1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467367: fltTcaCloudHostRouterIngressBytes1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467368: fltTcaCloudHostRouterIngressBytes5minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467369: fltTcaCloudHostRouterIngressBytes15minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467370: fltTcaCloudHostRouterIngressBytes1hUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467371: fltTcaCloudHostRouterIngressBytes1dUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467372: fltTcaCloudHostRouterIngressBytes1wUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467373: fltTcaCloudHostRouterIngressBytes1moUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467374: fltTcaCloudHostRouterIngressBytes1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467375: fltTcaCloudHostRouterIngressBytes1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467376: fltTcaCloudHostRouterIngressBytes5minUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467377: fltTcaCloudHostRouterIngressBytes15minUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467378: fltTcaCloudHostRouterIngressBytes1hUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467379: fltTcaCloudHostRouterIngressBytes1dUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467380: fltTcaCloudHostRouterIngressBytes1wUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467381: fltTcaCloudHostRouterIngressBytes1moUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467382: fltTcaCloudHostRouterIngressBytes1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467383: fltTcaCloudHostRouterIngressBytes1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467384: fltTcaCloudHostRouterIngressBytes5minUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467385: fltTcaCloudHostRouterIngressBytes15minUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467386: fltTcaCloudHostRouterIngressBytes1hUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467387: fltTcaCloudHostRouterIngressBytes1dUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467388: fltTcaCloudHostRouterIngressBytes1wUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467389: fltTcaCloudHostRouterIngressBytes1moUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467390: fltTcaCloudHostRouterIngressBytes1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467391: fltTcaCloudHostRouterIngressBytes1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467392: fltTcaCloudHostRouterIngressBytes5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467393: fltTcaCloudHostRouterIngressBytes15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467394: fltTcaCloudHostRouterIngressBytes1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467395: fltTcaCloudHostRouterIngressBytes1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467396: fltTcaCloudHostRouterIngressBytes1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467397: fltTcaCloudHostRouterIngressBytes1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467398: fltTcaCloudHostRouterIngressBytes1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467399: fltTcaCloudHostRouterIngressBytes1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467424: fltTcaCloudHostRouterIngressBytes5minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467425: fltTcaCloudHostRouterIngressBytes15minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467426: fltTcaCloudHostRouterIngressBytes1hUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467427: fltTcaCloudHostRouterIngressBytes1dUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467428: fltTcaCloudHostRouterIngressBytes1wUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467429: fltTcaCloudHostRouterIngressBytes1moUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467430: fltTcaCloudHostRouterIngressBytes1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467431: fltTcaCloudHostRouterIngressBytes1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467432: fltTcaCloudHostRouterIngressBytes5minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467433: fltTcaCloudHostRouterIngressBytes15minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467434: fltTcaCloudHostRouterIngressBytes1hUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467435: fltTcaCloudHostRouterIngressBytes1dUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467436: fltTcaCloudHostRouterIngressBytes1wUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467437: fltTcaCloudHostRouterIngressBytes1moUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467438: fltTcaCloudHostRouterIngressBytes1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467439: fltTcaCloudHostRouterIngressBytes1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467512: fltTcaCloudHostRouterIngressBytesAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467513: fltTcaCloudHostRouterIngressBytesAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467514: fltTcaCloudHostRouterIngressBytesAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467515: fltTcaCloudHostRouterIngressBytesAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467516: fltTcaCloudHostRouterIngressBytesAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467517: fltTcaCloudHostRouterIngressBytesAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467518: fltTcaCloudHostRouterIngressBytesAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467519: fltTcaCloudHostRouterIngressBytesAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467520: fltTcaCloudHostRouterIngressBytesAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467521: fltTcaCloudHostRouterIngressBytesAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467522: fltTcaCloudHostRouterIngressBytesAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467523: fltTcaCloudHostRouterIngressBytesAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467524: fltTcaCloudHostRouterIngressBytesAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467525: fltTcaCloudHostRouterIngressBytesAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467526: fltTcaCloudHostRouterIngressBytesAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467527: fltTcaCloudHostRouterIngressBytesAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467552: fltTcaCloudHostRouterIngressBytesAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467553: fltTcaCloudHostRouterIngressBytesAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467554: fltTcaCloudHostRouterIngressBytesAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467555: fltTcaCloudHostRouterIngressBytesAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467556: fltTcaCloudHostRouterIngressBytesAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467557: fltTcaCloudHostRouterIngressBytesAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467558: fltTcaCloudHostRouterIngressBytesAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467559: fltTcaCloudHostRouterIngressBytesAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467560: fltTcaCloudHostRouterIngressBytesAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467561: fltTcaCloudHostRouterIngressBytesAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467562: fltTcaCloudHostRouterIngressBytesAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467563: fltTcaCloudHostRouterIngressBytesAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467564: fltTcaCloudHostRouterIngressBytesAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467565: fltTcaCloudHostRouterIngressBytesAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467566: fltTcaCloudHostRouterIngressBytesAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467567: fltTcaCloudHostRouterIngressBytesAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467616: fltTcaCloudHostRouterIngressPkts5minUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467617: fltTcaCloudHostRouterIngressPkts15minUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467618: fltTcaCloudHostRouterIngressPkts1hUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467619: fltTcaCloudHostRouterIngressPkts1dUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467620: fltTcaCloudHostRouterIngressPkts1wUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467621: fltTcaCloudHostRouterIngressPkts1moUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467622: fltTcaCloudHostRouterIngressPkts1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467623: fltTcaCloudHostRouterIngressPkts1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467632: fltTcaCloudHostRouterIngressPkts5minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467633: fltTcaCloudHostRouterIngressPkts15minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467634: fltTcaCloudHostRouterIngressPkts1hUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467635: fltTcaCloudHostRouterIngressPkts1dUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467636: fltTcaCloudHostRouterIngressPkts1wUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467637: fltTcaCloudHostRouterIngressPkts1moUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467638: fltTcaCloudHostRouterIngressPkts1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467639: fltTcaCloudHostRouterIngressPkts1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467640: fltTcaCloudHostRouterIngressPkts5minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467641: fltTcaCloudHostRouterIngressPkts15minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467642: fltTcaCloudHostRouterIngressPkts1hUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467643: fltTcaCloudHostRouterIngressPkts1dUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467644: fltTcaCloudHostRouterIngressPkts1wUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467645: fltTcaCloudHostRouterIngressPkts1moUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467646: fltTcaCloudHostRouterIngressPkts1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467647: fltTcaCloudHostRouterIngressPkts1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467648: fltTcaCloudHostRouterIngressPkts5minUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467649: fltTcaCloudHostRouterIngressPkts15minUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467650: fltTcaCloudHostRouterIngressPkts1hUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467651: fltTcaCloudHostRouterIngressPkts1dUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467652: fltTcaCloudHostRouterIngressPkts1wUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467653: fltTcaCloudHostRouterIngressPkts1moUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467654: fltTcaCloudHostRouterIngressPkts1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467655: fltTcaCloudHostRouterIngressPkts1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467656: fltTcaCloudHostRouterIngressPkts5minUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467657: fltTcaCloudHostRouterIngressPkts15minUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467658: fltTcaCloudHostRouterIngressPkts1hUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467659: fltTcaCloudHostRouterIngressPkts1dUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467660: fltTcaCloudHostRouterIngressPkts1wUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467661: fltTcaCloudHostRouterIngressPkts1moUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467662: fltTcaCloudHostRouterIngressPkts1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467663: fltTcaCloudHostRouterIngressPkts1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467664: fltTcaCloudHostRouterIngressPkts5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467665: fltTcaCloudHostRouterIngressPkts15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467666: fltTcaCloudHostRouterIngressPkts1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467667: fltTcaCloudHostRouterIngressPkts1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467668: fltTcaCloudHostRouterIngressPkts1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467669: fltTcaCloudHostRouterIngressPkts1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467670: fltTcaCloudHostRouterIngressPkts1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467671: fltTcaCloudHostRouterIngressPkts1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467696: fltTcaCloudHostRouterIngressPkts5minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467697: fltTcaCloudHostRouterIngressPkts15minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467698: fltTcaCloudHostRouterIngressPkts1hUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467699: fltTcaCloudHostRouterIngressPkts1dUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467700: fltTcaCloudHostRouterIngressPkts1wUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467701: fltTcaCloudHostRouterIngressPkts1moUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467702: fltTcaCloudHostRouterIngressPkts1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467703: fltTcaCloudHostRouterIngressPkts1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467704: fltTcaCloudHostRouterIngressPkts5minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467705: fltTcaCloudHostRouterIngressPkts15minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467706: fltTcaCloudHostRouterIngressPkts1hUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467707: fltTcaCloudHostRouterIngressPkts1dUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467708: fltTcaCloudHostRouterIngressPkts1wUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467709: fltTcaCloudHostRouterIngressPkts1moUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467710: fltTcaCloudHostRouterIngressPkts1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467711: fltTcaCloudHostRouterIngressPkts1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467784: fltTcaCloudHostRouterIngressPktsAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467785: fltTcaCloudHostRouterIngressPktsAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467786: fltTcaCloudHostRouterIngressPktsAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467787: fltTcaCloudHostRouterIngressPktsAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467788: fltTcaCloudHostRouterIngressPktsAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467789: fltTcaCloudHostRouterIngressPktsAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467790: fltTcaCloudHostRouterIngressPktsAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467791: fltTcaCloudHostRouterIngressPktsAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467792: fltTcaCloudHostRouterIngressPktsAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467793: fltTcaCloudHostRouterIngressPktsAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467794: fltTcaCloudHostRouterIngressPktsAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467795: fltTcaCloudHostRouterIngressPktsAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467796: fltTcaCloudHostRouterIngressPktsAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467797: fltTcaCloudHostRouterIngressPktsAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467798: fltTcaCloudHostRouterIngressPktsAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467799: fltTcaCloudHostRouterIngressPktsAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467824: fltTcaCloudHostRouterIngressPktsAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467825: fltTcaCloudHostRouterIngressPktsAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467826: fltTcaCloudHostRouterIngressPktsAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467827: fltTcaCloudHostRouterIngressPktsAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467828: fltTcaCloudHostRouterIngressPktsAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467829: fltTcaCloudHostRouterIngressPktsAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467830: fltTcaCloudHostRouterIngressPktsAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467831: fltTcaCloudHostRouterIngressPktsAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467832: fltTcaCloudHostRouterIngressPktsAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467833: fltTcaCloudHostRouterIngressPktsAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467834: fltTcaCloudHostRouterIngressPktsAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467835: fltTcaCloudHostRouterIngressPktsAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467836: fltTcaCloudHostRouterIngressPktsAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467837: fltTcaCloudHostRouterIngressPktsAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467838: fltTcaCloudHostRouterIngressPktsAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F467839: fltTcaCloudHostRouterIngressPktsAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475712: fltTcaCloudAppGwStats5minCurrentConnectionsLast

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475713: fltTcaCloudAppGwStats15minCurrentConnectionsLast

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475714: fltTcaCloudAppGwStats1hCurrentConnectionsLast

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475715: fltTcaCloudAppGwStats1dCurrentConnectionsLast

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475716: fltTcaCloudAppGwStats1wCurrentConnectionsLast

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475717: fltTcaCloudAppGwStats1moCurrentConnectionsLast

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475718: fltTcaCloudAppGwStats1qtrCurrentConnectionsLast

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475719: fltTcaCloudAppGwStats1yearCurrentConnectionsLast

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475728: fltTcaCloudAppGwStats5minCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475729: fltTcaCloudAppGwStats15minCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475730: fltTcaCloudAppGwStats1hCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475731: fltTcaCloudAppGwStats1dCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475732: fltTcaCloudAppGwStats1wCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475733: fltTcaCloudAppGwStats1moCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475734: fltTcaCloudAppGwStats1qtrCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475735: fltTcaCloudAppGwStats1yearCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475736: fltTcaCloudAppGwStats5minCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475737: fltTcaCloudAppGwStats15minCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475738: fltTcaCloudAppGwStats1hCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475739: fltTcaCloudAppGwStats1dCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475740: fltTcaCloudAppGwStats1wCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475741: fltTcaCloudAppGwStats1moCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475742: fltTcaCloudAppGwStats1qtrCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475743: fltTcaCloudAppGwStats1yearCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475744: fltTcaCloudAppGwStats5minCurrentConnectionsMin

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475745: fltTcaCloudAppGwStats15minCurrentConnectionsMin

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475746: fltTcaCloudAppGwStats1hCurrentConnectionsMin

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475747: fltTcaCloudAppGwStats1dCurrentConnectionsMin

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475748: fltTcaCloudAppGwStats1wCurrentConnectionsMin

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475749: fltTcaCloudAppGwStats1moCurrentConnectionsMin

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475750: fltTcaCloudAppGwStats1qtrCurrentConnectionsMin

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475751: fltTcaCloudAppGwStats1yearCurrentConnectionsMin

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475752: fltTcaCloudAppGwStats5minCurrentConnectionsMax

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475753: fltTcaCloudAppGwStats15minCurrentConnectionsMax

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475754: fltTcaCloudAppGwStats1hCurrentConnectionsMax

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475755: fltTcaCloudAppGwStats1dCurrentConnectionsMax

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475756: fltTcaCloudAppGwStats1wCurrentConnectionsMax

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475757: fltTcaCloudAppGwStats1moCurrentConnectionsMax

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475758: fltTcaCloudAppGwStats1qtrCurrentConnectionsMax

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475759: fltTcaCloudAppGwStats1yearCurrentConnectionsMax

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475760: fltTcaCloudAppGwStats5minCurrentConnectionsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475761: fltTcaCloudAppGwStats15minCurrentConnectionsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475762: fltTcaCloudAppGwStats1hCurrentConnectionsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475763: fltTcaCloudAppGwStats1dCurrentConnectionsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475764: fltTcaCloudAppGwStats1wCurrentConnectionsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475765: fltTcaCloudAppGwStats1moCurrentConnectionsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475766: fltTcaCloudAppGwStats1qtrCurrentConnectionsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475767: fltTcaCloudAppGwStats1yearCurrentConnectionsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475792: fltTcaCloudAppGwStats5minCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475793: fltTcaCloudAppGwStats15minCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475794: fltTcaCloudAppGwStats1hCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475795: fltTcaCloudAppGwStats1dCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475796: fltTcaCloudAppGwStats1wCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475797: fltTcaCloudAppGwStats1moCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475798: fltTcaCloudAppGwStats1qtrCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475799: fltTcaCloudAppGwStats1yearCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475800: fltTcaCloudAppGwStats5minCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475801: fltTcaCloudAppGwStats15minCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475802: fltTcaCloudAppGwStats1hCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475803: fltTcaCloudAppGwStats1dCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475804: fltTcaCloudAppGwStats1wCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475805: fltTcaCloudAppGwStats1moCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475806: fltTcaCloudAppGwStats1qtrCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475807: fltTcaCloudAppGwStats1yearCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475880: fltTcaCloudAppGwStatsAg5minCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475881: fltTcaCloudAppGwStatsAg15minCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475882: fltTcaCloudAppGwStatsAg1hCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475883: fltTcaCloudAppGwStatsAg1dCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475884: fltTcaCloudAppGwStatsAg1wCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475885: fltTcaCloudAppGwStatsAg1moCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475886: fltTcaCloudAppGwStatsAg1qtrCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475887: fltTcaCloudAppGwStatsAg1yearCurrentConnectionsCum

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475888: fltTcaCloudAppGwStatsAg5minCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475889: fltTcaCloudAppGwStatsAg15minCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475890: fltTcaCloudAppGwStatsAg1hCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475891: fltTcaCloudAppGwStatsAg1dCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475892: fltTcaCloudAppGwStatsAg1wCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475893: fltTcaCloudAppGwStatsAg1moCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475894: fltTcaCloudAppGwStatsAg1qtrCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475895: fltTcaCloudAppGwStatsAg1yearCurrentConnectionsPer

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475920: fltTcaCloudAppGwStatsAg5minCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475921: fltTcaCloudAppGwStatsAg15minCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475922: fltTcaCloudAppGwStatsAg1hCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475923: fltTcaCloudAppGwStatsAg1dCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475924: fltTcaCloudAppGwStatsAg1wCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475925: fltTcaCloudAppGwStatsAg1moCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475926: fltTcaCloudAppGwStatsAg1qtrCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475927: fltTcaCloudAppGwStatsAg1yearCurrentConnectionsTr

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475928: fltTcaCloudAppGwStatsAg5minCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475929: fltTcaCloudAppGwStatsAg15minCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475930: fltTcaCloudAppGwStatsAg1hCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475931: fltTcaCloudAppGwStatsAg1dCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475932: fltTcaCloudAppGwStatsAg1wCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475933: fltTcaCloudAppGwStatsAg1moCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475934: fltTcaCloudAppGwStatsAg1qtrCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475935: fltTcaCloudAppGwStatsAg1yearCurrentConnectionsRate

Severity: variable

Explanation: This fault is caused by "Azure LB existing connections rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB existing connections" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475984: fltTcaCloudAppGwStats5minFailedRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475985: fltTcaCloudAppGwStats15minFailedRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475986: fltTcaCloudAppGwStats1hFailedRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475987: fltTcaCloudAppGwStats1dFailedRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475988: fltTcaCloudAppGwStats1wFailedRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475989: fltTcaCloudAppGwStats1moFailedRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475990: fltTcaCloudAppGwStats1qtrFailedRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F475991: fltTcaCloudAppGwStats1yearFailedRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476000: fltTcaCloudAppGwStats5minFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476001: fltTcaCloudAppGwStats15minFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476002: fltTcaCloudAppGwStats1hFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476003: fltTcaCloudAppGwStats1dFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476004: fltTcaCloudAppGwStats1wFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476005: fltTcaCloudAppGwStats1moFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476006: fltTcaCloudAppGwStats1qtrFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476007: fltTcaCloudAppGwStats1yearFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476008: fltTcaCloudAppGwStats5minFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476009: fltTcaCloudAppGwStats15minFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476010: fltTcaCloudAppGwStats1hFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476011: fltTcaCloudAppGwStats1dFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476012: fltTcaCloudAppGwStats1wFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476013: fltTcaCloudAppGwStats1moFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476014: fltTcaCloudAppGwStats1qtrFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476015: fltTcaCloudAppGwStats1yearFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476016: fltTcaCloudAppGwStats5minFailedRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476017: fltTcaCloudAppGwStats15minFailedRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476018: fltTcaCloudAppGwStats1hFailedRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476019: fltTcaCloudAppGwStats1dFailedRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476020: fltTcaCloudAppGwStats1wFailedRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476021: fltTcaCloudAppGwStats1moFailedRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476022: fltTcaCloudAppGwStats1qtrFailedRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476023: fltTcaCloudAppGwStats1yearFailedRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476024: fltTcaCloudAppGwStats5minFailedRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476025: fltTcaCloudAppGwStats15minFailedRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476026: fltTcaCloudAppGwStats1hFailedRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476027: fltTcaCloudAppGwStats1dFailedRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476028: fltTcaCloudAppGwStats1wFailedRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476029: fltTcaCloudAppGwStats1moFailedRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476030: fltTcaCloudAppGwStats1qtrFailedRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476031: fltTcaCloudAppGwStats1yearFailedRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476032: fltTcaCloudAppGwStats5minFailedRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476033: fltTcaCloudAppGwStats15minFailedRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476034: fltTcaCloudAppGwStats1hFailedRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476035: fltTcaCloudAppGwStats1dFailedRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476036: fltTcaCloudAppGwStats1wFailedRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476037: fltTcaCloudAppGwStats1moFailedRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476038: fltTcaCloudAppGwStats1qtrFailedRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476039: fltTcaCloudAppGwStats1yearFailedRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476064: fltTcaCloudAppGwStats5minFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476065: fltTcaCloudAppGwStats15minFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476066: fltTcaCloudAppGwStats1hFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476067: fltTcaCloudAppGwStats1dFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476068: fltTcaCloudAppGwStats1wFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476069: fltTcaCloudAppGwStats1moFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476070: fltTcaCloudAppGwStats1qtrFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476071: fltTcaCloudAppGwStats1yearFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476072: fltTcaCloudAppGwStats5minFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476073: fltTcaCloudAppGwStats15minFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476074: fltTcaCloudAppGwStats1hFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476075: fltTcaCloudAppGwStats1dFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476076: fltTcaCloudAppGwStats1wFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476077: fltTcaCloudAppGwStats1moFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476078: fltTcaCloudAppGwStats1qtrFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476079: fltTcaCloudAppGwStats1yearFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476152: fltTcaCloudAppGwStatsAg5minFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476153: fltTcaCloudAppGwStatsAg15minFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476154: fltTcaCloudAppGwStatsAg1hFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476155: fltTcaCloudAppGwStatsAg1dFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476156: fltTcaCloudAppGwStatsAg1wFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476157: fltTcaCloudAppGwStatsAg1moFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476158: fltTcaCloudAppGwStatsAg1qtrFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476159: fltTcaCloudAppGwStatsAg1yearFailedRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476160: fltTcaCloudAppGwStatsAg5minFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476161: fltTcaCloudAppGwStatsAg15minFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476162: fltTcaCloudAppGwStatsAg1hFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476163: fltTcaCloudAppGwStatsAg1dFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476164: fltTcaCloudAppGwStatsAg1wFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476165: fltTcaCloudAppGwStatsAg1moFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476166: fltTcaCloudAppGwStatsAg1qtrFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476167: fltTcaCloudAppGwStatsAg1yearFailedRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476192: fltTcaCloudAppGwStatsAg5minFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476193: fltTcaCloudAppGwStatsAg15minFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476194: fltTcaCloudAppGwStatsAg1hFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476195: fltTcaCloudAppGwStatsAg1dFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476196: fltTcaCloudAppGwStatsAg1wFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476197: fltTcaCloudAppGwStatsAg1moFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476198: fltTcaCloudAppGwStatsAg1qtrFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476199: fltTcaCloudAppGwStatsAg1yearFailedRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476200: fltTcaCloudAppGwStatsAg5minFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476201: fltTcaCloudAppGwStatsAg15minFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476202: fltTcaCloudAppGwStatsAg1hFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476203: fltTcaCloudAppGwStatsAg1dFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476204: fltTcaCloudAppGwStatsAg1wFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476205: fltTcaCloudAppGwStatsAg1moFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476206: fltTcaCloudAppGwStatsAg1qtrFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476207: fltTcaCloudAppGwStatsAg1yearFailedRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure LB Failed Requests rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Failed Requests" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476256: fltTcaCloudAppGwStats5minThroughputLast

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476257: fltTcaCloudAppGwStats15minThroughputLast

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476258: fltTcaCloudAppGwStats1hThroughputLast

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476259: fltTcaCloudAppGwStats1dThroughputLast

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476260: fltTcaCloudAppGwStats1wThroughputLast

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476261: fltTcaCloudAppGwStats1moThroughputLast

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476262: fltTcaCloudAppGwStats1qtrThroughputLast

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476263: fltTcaCloudAppGwStats1yearThroughputLast

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476272: fltTcaCloudAppGwStats5minThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476273: fltTcaCloudAppGwStats15minThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476274: fltTcaCloudAppGwStats1hThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476275: fltTcaCloudAppGwStats1dThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476276: fltTcaCloudAppGwStats1wThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476277: fltTcaCloudAppGwStats1moThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476278: fltTcaCloudAppGwStats1qtrThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476279: fltTcaCloudAppGwStats1yearThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476280: fltTcaCloudAppGwStats5minThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476281: fltTcaCloudAppGwStats15minThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476282: fltTcaCloudAppGwStats1hThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476283: fltTcaCloudAppGwStats1dThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476284: fltTcaCloudAppGwStats1wThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476285: fltTcaCloudAppGwStats1moThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476286: fltTcaCloudAppGwStats1qtrThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476287: fltTcaCloudAppGwStats1yearThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476288: fltTcaCloudAppGwStats5minThroughputMin

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476289: fltTcaCloudAppGwStats15minThroughputMin

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476290: fltTcaCloudAppGwStats1hThroughputMin

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476291: fltTcaCloudAppGwStats1dThroughputMin

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476292: fltTcaCloudAppGwStats1wThroughputMin

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476293: fltTcaCloudAppGwStats1moThroughputMin

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476294: fltTcaCloudAppGwStats1qtrThroughputMin

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476295: fltTcaCloudAppGwStats1yearThroughputMin

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476296: fltTcaCloudAppGwStats5minThroughputMax

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476297: fltTcaCloudAppGwStats15minThroughputMax

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476298: fltTcaCloudAppGwStats1hThroughputMax

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476299: fltTcaCloudAppGwStats1dThroughputMax

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476300: fltTcaCloudAppGwStats1wThroughputMax

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476301: fltTcaCloudAppGwStats1moThroughputMax

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476302: fltTcaCloudAppGwStats1qtrThroughputMax

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476303: fltTcaCloudAppGwStats1yearThroughputMax

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476304: fltTcaCloudAppGwStats5minThroughputAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476305: fltTcaCloudAppGwStats15minThroughputAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476306: fltTcaCloudAppGwStats1hThroughputAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476307: fltTcaCloudAppGwStats1dThroughputAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476308: fltTcaCloudAppGwStats1wThroughputAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476309: fltTcaCloudAppGwStats1moThroughputAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476310: fltTcaCloudAppGwStats1qtrThroughputAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476311: fltTcaCloudAppGwStats1yearThroughputAvg

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476336: fltTcaCloudAppGwStats5minThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476337: fltTcaCloudAppGwStats15minThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476338: fltTcaCloudAppGwStats1hThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476339: fltTcaCloudAppGwStats1dThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476340: fltTcaCloudAppGwStats1wThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476341: fltTcaCloudAppGwStats1moThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476342: fltTcaCloudAppGwStats1qtrThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476343: fltTcaCloudAppGwStats1yearThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476344: fltTcaCloudAppGwStats5minThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476345: fltTcaCloudAppGwStats15minThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476346: fltTcaCloudAppGwStats1hThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476347: fltTcaCloudAppGwStats1dThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476348: fltTcaCloudAppGwStats1wThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476349: fltTcaCloudAppGwStats1moThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476350: fltTcaCloudAppGwStats1qtrThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476351: fltTcaCloudAppGwStats1yearThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476424: fltTcaCloudAppGwStatsAg5minThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476425: fltTcaCloudAppGwStatsAg15minThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476426: fltTcaCloudAppGwStatsAg1hThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476427: fltTcaCloudAppGwStatsAg1dThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476428: fltTcaCloudAppGwStatsAg1wThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476429: fltTcaCloudAppGwStatsAg1moThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476430: fltTcaCloudAppGwStatsAg1qtrThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476431: fltTcaCloudAppGwStatsAg1yearThroughputCum

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476432: fltTcaCloudAppGwStatsAg5minThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476433: fltTcaCloudAppGwStatsAg15minThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476434: fltTcaCloudAppGwStatsAg1hThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476435: fltTcaCloudAppGwStatsAg1dThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476436: fltTcaCloudAppGwStatsAg1wThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476437: fltTcaCloudAppGwStatsAg1moThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476438: fltTcaCloudAppGwStatsAg1qtrThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476439: fltTcaCloudAppGwStatsAg1yearThroughputPer

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476464: fltTcaCloudAppGwStatsAg5minThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476465: fltTcaCloudAppGwStatsAg15minThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476466: fltTcaCloudAppGwStatsAg1hThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476467: fltTcaCloudAppGwStatsAg1dThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476468: fltTcaCloudAppGwStatsAg1wThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476469: fltTcaCloudAppGwStatsAg1moThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476470: fltTcaCloudAppGwStatsAg1qtrThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476471: fltTcaCloudAppGwStatsAg1yearThroughputTr

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476472: fltTcaCloudAppGwStatsAg5minThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476473: fltTcaCloudAppGwStatsAg15minThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476474: fltTcaCloudAppGwStatsAg1hThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476475: fltTcaCloudAppGwStatsAg1dThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476476: fltTcaCloudAppGwStatsAg1wThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476477: fltTcaCloudAppGwStatsAg1moThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476478: fltTcaCloudAppGwStatsAg1qtrThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476479: fltTcaCloudAppGwStatsAg1yearThroughputRate

Severity: variable

Explanation: This fault is caused by "Azure LB Total Throughput rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure LB Total Throughput" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476528: fltTcaCloudAppGwStats5minTotalRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476529: fltTcaCloudAppGwStats15minTotalRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476530: fltTcaCloudAppGwStats1hTotalRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476531: fltTcaCloudAppGwStats1dTotalRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476532: fltTcaCloudAppGwStats1wTotalRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476533: fltTcaCloudAppGwStats1moTotalRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476534: fltTcaCloudAppGwStats1qtrTotalRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476535: fltTcaCloudAppGwStats1yearTotalRequestsLast

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476544: fltTcaCloudAppGwStats5minTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476545: fltTcaCloudAppGwStats15minTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476546: fltTcaCloudAppGwStats1hTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476547: fltTcaCloudAppGwStats1dTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476548: fltTcaCloudAppGwStats1wTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476549: fltTcaCloudAppGwStats1moTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476550: fltTcaCloudAppGwStats1qtrTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476551: fltTcaCloudAppGwStats1yearTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476552: fltTcaCloudAppGwStats5minTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476553: fltTcaCloudAppGwStats15minTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476554: fltTcaCloudAppGwStats1hTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476555: fltTcaCloudAppGwStats1dTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476556: fltTcaCloudAppGwStats1wTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476557: fltTcaCloudAppGwStats1moTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476558: fltTcaCloudAppGwStats1qtrTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476559: fltTcaCloudAppGwStats1yearTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476560: fltTcaCloudAppGwStats5minTotalRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476561: fltTcaCloudAppGwStats15minTotalRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476562: fltTcaCloudAppGwStats1hTotalRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476563: fltTcaCloudAppGwStats1dTotalRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476564: fltTcaCloudAppGwStats1wTotalRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476565: fltTcaCloudAppGwStats1moTotalRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476566: fltTcaCloudAppGwStats1qtrTotalRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476567: fltTcaCloudAppGwStats1yearTotalRequestsMin

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476568: fltTcaCloudAppGwStats5minTotalRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476569: fltTcaCloudAppGwStats15minTotalRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476570: fltTcaCloudAppGwStats1hTotalRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476571: fltTcaCloudAppGwStats1dTotalRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476572: fltTcaCloudAppGwStats1wTotalRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476573: fltTcaCloudAppGwStats1moTotalRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476574: fltTcaCloudAppGwStats1qtrTotalRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476575: fltTcaCloudAppGwStats1yearTotalRequestsMax

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476576: fltTcaCloudAppGwStats5minTotalRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476577: fltTcaCloudAppGwStats15minTotalRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476578: fltTcaCloudAppGwStats1hTotalRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476579: fltTcaCloudAppGwStats1dTotalRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476580: fltTcaCloudAppGwStats1wTotalRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476581: fltTcaCloudAppGwStats1moTotalRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476582: fltTcaCloudAppGwStats1qtrTotalRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476583: fltTcaCloudAppGwStats1yearTotalRequestsAvg

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476608: fltTcaCloudAppGwStats5minTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476609: fltTcaCloudAppGwStats15minTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476610: fltTcaCloudAppGwStats1hTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476611: fltTcaCloudAppGwStats1dTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476612: fltTcaCloudAppGwStats1wTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476613: fltTcaCloudAppGwStats1moTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476614: fltTcaCloudAppGwStats1qtrTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476615: fltTcaCloudAppGwStats1yearTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476616: fltTcaCloudAppGwStats5minTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476617: fltTcaCloudAppGwStats15minTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476618: fltTcaCloudAppGwStats1hTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476619: fltTcaCloudAppGwStats1dTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476620: fltTcaCloudAppGwStats1wTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476621: fltTcaCloudAppGwStats1moTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476622: fltTcaCloudAppGwStats1qtrTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476623: fltTcaCloudAppGwStats1yearTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476696: fltTcaCloudAppGwStatsAg5minTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476697: fltTcaCloudAppGwStatsAg15minTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476698: fltTcaCloudAppGwStatsAg1hTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476699: fltTcaCloudAppGwStatsAg1dTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476700: fltTcaCloudAppGwStatsAg1wTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476701: fltTcaCloudAppGwStatsAg1moTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476702: fltTcaCloudAppGwStatsAg1qtrTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476703: fltTcaCloudAppGwStatsAg1yearTotalRequestsCum

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476704: fltTcaCloudAppGwStatsAg5minTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476705: fltTcaCloudAppGwStatsAg15minTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476706: fltTcaCloudAppGwStatsAg1hTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476707: fltTcaCloudAppGwStatsAg1dTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476708: fltTcaCloudAppGwStatsAg1wTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476709: fltTcaCloudAppGwStatsAg1moTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476710: fltTcaCloudAppGwStatsAg1qtrTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476711: fltTcaCloudAppGwStatsAg1yearTotalRequestsPer

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476736: fltTcaCloudAppGwStatsAg5minTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476737: fltTcaCloudAppGwStatsAg15minTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476738: fltTcaCloudAppGwStatsAg1hTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476739: fltTcaCloudAppGwStatsAg1dTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476740: fltTcaCloudAppGwStatsAg1wTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476741: fltTcaCloudAppGwStatsAg1moTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476742: fltTcaCloudAppGwStatsAg1qtrTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476743: fltTcaCloudAppGwStatsAg1yearTotalRequestsTr

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476744: fltTcaCloudAppGwStatsAg5minTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476745: fltTcaCloudAppGwStatsAg15minTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476746: fltTcaCloudAppGwStatsAg1hTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476747: fltTcaCloudAppGwStatsAg1dTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476748: fltTcaCloudAppGwStatsAg1wTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476749: fltTcaCloudAppGwStatsAg1moTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476750: fltTcaCloudAppGwStatsAg1qtrTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F476751: fltTcaCloudAppGwStatsAg1yearTotalRequestsRate

Severity: variable

Explanation: This fault is caused by "Azure Native LB requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Azure Native LB requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482344: fltTcaCloudHostRouter5minEgrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482345: fltTcaCloudHostRouter15minEgrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482346: fltTcaCloudHostRouter1hEgrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482347: fltTcaCloudHostRouter1dEgrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482348: fltTcaCloudHostRouter1wEgrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482349: fltTcaCloudHostRouter1moEgrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482350: fltTcaCloudHostRouter1qtrEgrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482351: fltTcaCloudHostRouter1yearEgrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482360: fltTcaCloudHostRouter5minEgrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482361: fltTcaCloudHostRouter15minEgrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482362: fltTcaCloudHostRouter1hEgrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482363: fltTcaCloudHostRouter1dEgrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482364: fltTcaCloudHostRouter1wEgrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482365: fltTcaCloudHostRouter1moEgrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482366: fltTcaCloudHostRouter1qtrEgrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482367: fltTcaCloudHostRouter1yearEgrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482368: fltTcaCloudHostRouter5minEgrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482369: fltTcaCloudHostRouter15minEgrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482370: fltTcaCloudHostRouter1hEgrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482371: fltTcaCloudHostRouter1dEgrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482372: fltTcaCloudHostRouter1wEgrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482373: fltTcaCloudHostRouter1moEgrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482374: fltTcaCloudHostRouter1qtrEgrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482375: fltTcaCloudHostRouter1yearEgrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482376: fltTcaCloudHostRouter5minEgrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482377: fltTcaCloudHostRouter15minEgrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482378: fltTcaCloudHostRouter1hEgrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482379: fltTcaCloudHostRouter1dEgrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482380: fltTcaCloudHostRouter1wEgrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482381: fltTcaCloudHostRouter1moEgrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482382: fltTcaCloudHostRouter1qtrEgrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482383: fltTcaCloudHostRouter1yearEgrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482384: fltTcaCloudHostRouter5minEgrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482385: fltTcaCloudHostRouter15minEgrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482386: fltTcaCloudHostRouter1hEgrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482387: fltTcaCloudHostRouter1dEgrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482388: fltTcaCloudHostRouter1wEgrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482389: fltTcaCloudHostRouter1moEgrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482390: fltTcaCloudHostRouter1qtrEgrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482391: fltTcaCloudHostRouter1yearEgrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482392: fltTcaCloudHostRouter5minEgrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482393: fltTcaCloudHostRouter15minEgrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482394: fltTcaCloudHostRouter1hEgrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482395: fltTcaCloudHostRouter1dEgrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482396: fltTcaCloudHostRouter1wEgrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482397: fltTcaCloudHostRouter1moEgrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482398: fltTcaCloudHostRouter1qtrEgrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482399: fltTcaCloudHostRouter1yearEgrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482424: fltTcaCloudHostRouter5minEgrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482425: fltTcaCloudHostRouter15minEgrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482426: fltTcaCloudHostRouter1hEgrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482427: fltTcaCloudHostRouter1dEgrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482428: fltTcaCloudHostRouter1wEgrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482429: fltTcaCloudHostRouter1moEgrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482430: fltTcaCloudHostRouter1qtrEgrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482431: fltTcaCloudHostRouter1yearEgrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482432: fltTcaCloudHostRouter5minEgrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482433: fltTcaCloudHostRouter15minEgrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482434: fltTcaCloudHostRouter1hEgrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482435: fltTcaCloudHostRouter1dEgrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482436: fltTcaCloudHostRouter1wEgrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482437: fltTcaCloudHostRouter1moEgrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482438: fltTcaCloudHostRouter1qtrEgrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482439: fltTcaCloudHostRouter1yearEgrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482512: fltTcaCloudHostRouter5minEgrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482513: fltTcaCloudHostRouter15minEgrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482514: fltTcaCloudHostRouter1hEgrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482515: fltTcaCloudHostRouter1dEgrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482516: fltTcaCloudHostRouter1wEgrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482517: fltTcaCloudHostRouter1moEgrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482518: fltTcaCloudHostRouter1qtrEgrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482519: fltTcaCloudHostRouter1yearEgrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482528: fltTcaCloudHostRouter5minEgrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482529: fltTcaCloudHostRouter15minEgrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482530: fltTcaCloudHostRouter1hEgrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482531: fltTcaCloudHostRouter1dEgrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482532: fltTcaCloudHostRouter1wEgrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482533: fltTcaCloudHostRouter1moEgrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482534: fltTcaCloudHostRouter1qtrEgrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482535: fltTcaCloudHostRouter1yearEgrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482536: fltTcaCloudHostRouter5minEgrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482537: fltTcaCloudHostRouter15minEgrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482538: fltTcaCloudHostRouter1hEgrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482539: fltTcaCloudHostRouter1dEgrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482540: fltTcaCloudHostRouter1wEgrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482541: fltTcaCloudHostRouter1moEgrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482542: fltTcaCloudHostRouter1qtrEgrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482543: fltTcaCloudHostRouter1yearEgrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482544: fltTcaCloudHostRouter5minEgrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482545: fltTcaCloudHostRouter15minEgrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482546: fltTcaCloudHostRouter1hEgrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482547: fltTcaCloudHostRouter1dEgrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482548: fltTcaCloudHostRouter1wEgrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482549: fltTcaCloudHostRouter1moEgrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482550: fltTcaCloudHostRouter1qtrEgrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482551: fltTcaCloudHostRouter1yearEgrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482552: fltTcaCloudHostRouter5minEgrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482553: fltTcaCloudHostRouter15minEgrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482554: fltTcaCloudHostRouter1hEgrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482555: fltTcaCloudHostRouter1dEgrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482556: fltTcaCloudHostRouter1wEgrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482557: fltTcaCloudHostRouter1moEgrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482558: fltTcaCloudHostRouter1qtrEgrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482559: fltTcaCloudHostRouter1yearEgrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482560: fltTcaCloudHostRouter5minEgrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482561: fltTcaCloudHostRouter15minEgrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482562: fltTcaCloudHostRouter1hEgrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482563: fltTcaCloudHostRouter1dEgrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482564: fltTcaCloudHostRouter1wEgrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482565: fltTcaCloudHostRouter1moEgrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482566: fltTcaCloudHostRouter1qtrEgrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482567: fltTcaCloudHostRouter1yearEgrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482592: fltTcaCloudHostRouter5minEgrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482593: fltTcaCloudHostRouter15minEgrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482594: fltTcaCloudHostRouter1hEgrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482595: fltTcaCloudHostRouter1dEgrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482596: fltTcaCloudHostRouter1wEgrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482597: fltTcaCloudHostRouter1moEgrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482598: fltTcaCloudHostRouter1qtrEgrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482599: fltTcaCloudHostRouter1yearEgrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482600: fltTcaCloudHostRouter5minEgrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482601: fltTcaCloudHostRouter15minEgrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482602: fltTcaCloudHostRouter1hEgrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482603: fltTcaCloudHostRouter1dEgrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482604: fltTcaCloudHostRouter1wEgrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482605: fltTcaCloudHostRouter1moEgrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482606: fltTcaCloudHostRouter1qtrEgrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482607: fltTcaCloudHostRouter1yearEgrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482680: fltTcaCloudHostRouter5minIngrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482681: fltTcaCloudHostRouter15minIngrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482682: fltTcaCloudHostRouter1hIngrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482683: fltTcaCloudHostRouter1dIngrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482684: fltTcaCloudHostRouter1wIngrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482685: fltTcaCloudHostRouter1moIngrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482686: fltTcaCloudHostRouter1qtrIngrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482687: fltTcaCloudHostRouter1yearIngrUnicastBytesLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482696: fltTcaCloudHostRouter5minIngrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482697: fltTcaCloudHostRouter15minIngrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482698: fltTcaCloudHostRouter1hIngrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482699: fltTcaCloudHostRouter1dIngrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482700: fltTcaCloudHostRouter1wIngrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482701: fltTcaCloudHostRouter1moIngrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482702: fltTcaCloudHostRouter1qtrIngrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482703: fltTcaCloudHostRouter1yearIngrUnicastBytesCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482704: fltTcaCloudHostRouter5minIngrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482705: fltTcaCloudHostRouter15minIngrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482706: fltTcaCloudHostRouter1hIngrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482707: fltTcaCloudHostRouter1dIngrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482708: fltTcaCloudHostRouter1wIngrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482709: fltTcaCloudHostRouter1moIngrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482710: fltTcaCloudHostRouter1qtrIngrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482711: fltTcaCloudHostRouter1yearIngrUnicastBytesPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482712: fltTcaCloudHostRouter5minIngrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482713: fltTcaCloudHostRouter15minIngrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482714: fltTcaCloudHostRouter1hIngrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482715: fltTcaCloudHostRouter1dIngrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482716: fltTcaCloudHostRouter1wIngrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482717: fltTcaCloudHostRouter1moIngrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482718: fltTcaCloudHostRouter1qtrIngrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482719: fltTcaCloudHostRouter1yearIngrUnicastBytesMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482720: fltTcaCloudHostRouter5minIngrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482721: fltTcaCloudHostRouter15minIngrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482722: fltTcaCloudHostRouter1hIngrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482723: fltTcaCloudHostRouter1dIngrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482724: fltTcaCloudHostRouter1wIngrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482725: fltTcaCloudHostRouter1moIngrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482726: fltTcaCloudHostRouter1qtrIngrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482727: fltTcaCloudHostRouter1yearIngrUnicastBytesMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482728: fltTcaCloudHostRouter5minIngrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482729: fltTcaCloudHostRouter15minIngrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482730: fltTcaCloudHostRouter1hIngrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482731: fltTcaCloudHostRouter1dIngrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482732: fltTcaCloudHostRouter1wIngrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482733: fltTcaCloudHostRouter1moIngrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482734: fltTcaCloudHostRouter1qtrIngrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482735: fltTcaCloudHostRouter1yearIngrUnicastBytesAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482760: fltTcaCloudHostRouter5minIngrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482761: fltTcaCloudHostRouter15minIngrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482762: fltTcaCloudHostRouter1hIngrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482763: fltTcaCloudHostRouter1dIngrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482764: fltTcaCloudHostRouter1wIngrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482765: fltTcaCloudHostRouter1moIngrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482766: fltTcaCloudHostRouter1qtrIngrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482767: fltTcaCloudHostRouter1yearIngrUnicastBytesTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482768: fltTcaCloudHostRouter5minIngrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482769: fltTcaCloudHostRouter15minIngrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482770: fltTcaCloudHostRouter1hIngrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482771: fltTcaCloudHostRouter1dIngrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482772: fltTcaCloudHostRouter1wIngrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482773: fltTcaCloudHostRouter1moIngrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482774: fltTcaCloudHostRouter1qtrIngrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482775: fltTcaCloudHostRouter1yearIngrUnicastBytesRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482848: fltTcaCloudHostRouter5minIngrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482849: fltTcaCloudHostRouter15minIngrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482850: fltTcaCloudHostRouter1hIngrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482851: fltTcaCloudHostRouter1dIngrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482852: fltTcaCloudHostRouter1wIngrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482853: fltTcaCloudHostRouter1moIngrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482854: fltTcaCloudHostRouter1qtrIngrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482855: fltTcaCloudHostRouter1yearIngrUnicastPktsLast

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482864: fltTcaCloudHostRouter5minIngrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482865: fltTcaCloudHostRouter15minIngrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482866: fltTcaCloudHostRouter1hIngrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482867: fltTcaCloudHostRouter1dIngrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482868: fltTcaCloudHostRouter1wIngrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482869: fltTcaCloudHostRouter1moIngrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482870: fltTcaCloudHostRouter1qtrIngrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482871: fltTcaCloudHostRouter1yearIngrUnicastPktsCum

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482872: fltTcaCloudHostRouter5minIngrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482873: fltTcaCloudHostRouter15minIngrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482874: fltTcaCloudHostRouter1hIngrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482875: fltTcaCloudHostRouter1dIngrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482876: fltTcaCloudHostRouter1wIngrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482877: fltTcaCloudHostRouter1moIngrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482878: fltTcaCloudHostRouter1qtrIngrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482879: fltTcaCloudHostRouter1yearIngrUnicastPktsPer

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482880: fltTcaCloudHostRouter5minIngrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482881: fltTcaCloudHostRouter15minIngrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482882: fltTcaCloudHostRouter1hIngrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482883: fltTcaCloudHostRouter1dIngrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482884: fltTcaCloudHostRouter1wIngrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482885: fltTcaCloudHostRouter1moIngrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482886: fltTcaCloudHostRouter1qtrIngrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482887: fltTcaCloudHostRouter1yearIngrUnicastPktsMin

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482888: fltTcaCloudHostRouter5minIngrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482889: fltTcaCloudHostRouter15minIngrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482890: fltTcaCloudHostRouter1hIngrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482891: fltTcaCloudHostRouter1dIngrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482892: fltTcaCloudHostRouter1wIngrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482893: fltTcaCloudHostRouter1moIngrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482894: fltTcaCloudHostRouter1qtrIngrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482895: fltTcaCloudHostRouter1yearIngrUnicastPktsMax

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482896: fltTcaCloudHostRouter5minIngrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482897: fltTcaCloudHostRouter15minIngrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482898: fltTcaCloudHostRouter1hIngrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482899: fltTcaCloudHostRouter1dIngrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482900: fltTcaCloudHostRouter1wIngrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482901: fltTcaCloudHostRouter1moIngrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482902: fltTcaCloudHostRouter1qtrIngrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482903: fltTcaCloudHostRouter1yearIngrUnicastPktsAvg

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482928: fltTcaCloudHostRouter5minIngrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482929: fltTcaCloudHostRouter15minIngrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482930: fltTcaCloudHostRouter1hIngrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482931: fltTcaCloudHostRouter1dIngrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482932: fltTcaCloudHostRouter1wIngrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482933: fltTcaCloudHostRouter1moIngrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482934: fltTcaCloudHostRouter1qtrIngrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482935: fltTcaCloudHostRouter1yearIngrUnicastPktsTr

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482936: fltTcaCloudHostRouter5minIngrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482937: fltTcaCloudHostRouter15minIngrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482938: fltTcaCloudHostRouter1hIngrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482939: fltTcaCloudHostRouter1dIngrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482940: fltTcaCloudHostRouter1wIngrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482941: fltTcaCloudHostRouter1moIngrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482942: fltTcaCloudHostRouter1qtrIngrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F482943: fltTcaCloudHostRouter1yearIngrUnicastPktsRate

Severity: variable

Explanation: This fault is caused by "host router ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "host router ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483496: fltTcaEqptIngrCrcErrPkts5minFcsLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483497: fltTcaEqptIngrCrcErrPkts15minFcsLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483498: fltTcaEqptIngrCrcErrPkts1hFcsLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483499: fltTcaEqptIngrCrcErrPkts1dFcsLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483500: fltTcaEqptIngrCrcErrPkts1wFcsLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483501: fltTcaEqptIngrCrcErrPkts1moFcsLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483502: fltTcaEqptIngrCrcErrPkts1qtrFcsLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483503: fltTcaEqptIngrCrcErrPkts1yearFcsLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483512: fltTcaEqptIngrCrcErrPkts5minFcsCum

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483513: fltTcaEqptIngrCrcErrPkts15minFcsCum

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483514: fltTcaEqptIngrCrcErrPkts1hFcsCum

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483515: fltTcaEqptIngrCrcErrPkts1dFcsCum

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483516: fltTcaEqptIngrCrcErrPkts1wFcsCum

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483517: fltTcaEqptIngrCrcErrPkts1moFcsCum

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483518: fltTcaEqptIngrCrcErrPkts1qtrFcsCum

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483519: fltTcaEqptIngrCrcErrPkts1yearFcsCum

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483520: fltTcaEqptIngrCrcErrPkts5minFcsPer

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483521: fltTcaEqptIngrCrcErrPkts15minFcsPer

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483522: fltTcaEqptIngrCrcErrPkts1hFcsPer

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483523: fltTcaEqptIngrCrcErrPkts1dFcsPer

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483524: fltTcaEqptIngrCrcErrPkts1wFcsPer

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483525: fltTcaEqptIngrCrcErrPkts1moFcsPer

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483526: fltTcaEqptIngrCrcErrPkts1qtrFcsPer

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483527: fltTcaEqptIngrCrcErrPkts1yearFcsPer

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483528: fltTcaEqptIngrCrcErrPkts5minFcsMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483529: fltTcaEqptIngrCrcErrPkts15minFcsMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483530: fltTcaEqptIngrCrcErrPkts1hFcsMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483531: fltTcaEqptIngrCrcErrPkts1dFcsMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483532: fltTcaEqptIngrCrcErrPkts1wFcsMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483533: fltTcaEqptIngrCrcErrPkts1moFcsMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483534: fltTcaEqptIngrCrcErrPkts1qtrFcsMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483535: fltTcaEqptIngrCrcErrPkts1yearFcsMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483536: fltTcaEqptIngrCrcErrPkts5minFcsMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483537: fltTcaEqptIngrCrcErrPkts15minFcsMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483538: fltTcaEqptIngrCrcErrPkts1hFcsMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483539: fltTcaEqptIngrCrcErrPkts1dFcsMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483540: fltTcaEqptIngrCrcErrPkts1wFcsMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483541: fltTcaEqptIngrCrcErrPkts1moFcsMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483542: fltTcaEqptIngrCrcErrPkts1qtrFcsMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483543: fltTcaEqptIngrCrcErrPkts1yearFcsMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483544: fltTcaEqptIngrCrcErrPkts5minFcsAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483545: fltTcaEqptIngrCrcErrPkts15minFcsAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483546: fltTcaEqptIngrCrcErrPkts1hFcsAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483547: fltTcaEqptIngrCrcErrPkts1dFcsAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483548: fltTcaEqptIngrCrcErrPkts1wFcsAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483549: fltTcaEqptIngrCrcErrPkts1moFcsAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483550: fltTcaEqptIngrCrcErrPkts1qtrFcsAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483551: fltTcaEqptIngrCrcErrPkts1yearFcsAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483576: fltTcaEqptIngrCrcErrPkts5minFcsTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483577: fltTcaEqptIngrCrcErrPkts15minFcsTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483578: fltTcaEqptIngrCrcErrPkts1hFcsTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483579: fltTcaEqptIngrCrcErrPkts1dFcsTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483580: fltTcaEqptIngrCrcErrPkts1wFcsTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483581: fltTcaEqptIngrCrcErrPkts1moFcsTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483582: fltTcaEqptIngrCrcErrPkts1qtrFcsTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483583: fltTcaEqptIngrCrcErrPkts1yearFcsTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483584: fltTcaEqptIngrCrcErrPkts5minFcsRate

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483585: fltTcaEqptIngrCrcErrPkts15minFcsRate

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483586: fltTcaEqptIngrCrcErrPkts1hFcsRate

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483587: fltTcaEqptIngrCrcErrPkts1dFcsRate

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483588: fltTcaEqptIngrCrcErrPkts1wFcsRate

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483589: fltTcaEqptIngrCrcErrPkts1moFcsRate

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483590: fltTcaEqptIngrCrcErrPkts1qtrFcsRate

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483591: fltTcaEqptIngrCrcErrPkts1yearFcsRate

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483664: fltTcaEqptIngrCrcErrPkts5minFcsRateLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483665: fltTcaEqptIngrCrcErrPkts15minFcsRateLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483666: fltTcaEqptIngrCrcErrPkts1hFcsRateLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483667: fltTcaEqptIngrCrcErrPkts1dFcsRateLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483668: fltTcaEqptIngrCrcErrPkts1wFcsRateLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483669: fltTcaEqptIngrCrcErrPkts1moFcsRateLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483670: fltTcaEqptIngrCrcErrPkts1qtrFcsRateLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483671: fltTcaEqptIngrCrcErrPkts1yearFcsRateLast

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483672: fltTcaEqptIngrCrcErrPkts5minFcsRateMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483673: fltTcaEqptIngrCrcErrPkts15minFcsRateMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483674: fltTcaEqptIngrCrcErrPkts1hFcsRateMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483675: fltTcaEqptIngrCrcErrPkts1dFcsRateMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483676: fltTcaEqptIngrCrcErrPkts1wFcsRateMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483677: fltTcaEqptIngrCrcErrPkts1moFcsRateMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483678: fltTcaEqptIngrCrcErrPkts1qtrFcsRateMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483679: fltTcaEqptIngrCrcErrPkts1yearFcsRateMin

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483680: fltTcaEqptIngrCrcErrPkts5minFcsRateMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483681: fltTcaEqptIngrCrcErrPkts15minFcsRateMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483682: fltTcaEqptIngrCrcErrPkts1hFcsRateMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483683: fltTcaEqptIngrCrcErrPkts1dFcsRateMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483684: fltTcaEqptIngrCrcErrPkts1wFcsRateMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483685: fltTcaEqptIngrCrcErrPkts1moFcsRateMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483686: fltTcaEqptIngrCrcErrPkts1qtrFcsRateMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483687: fltTcaEqptIngrCrcErrPkts1yearFcsRateMax

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483688: fltTcaEqptIngrCrcErrPkts5minFcsRateAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483689: fltTcaEqptIngrCrcErrPkts15minFcsRateAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483690: fltTcaEqptIngrCrcErrPkts1hFcsRateAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483691: fltTcaEqptIngrCrcErrPkts1dFcsRateAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483692: fltTcaEqptIngrCrcErrPkts1wFcsRateAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483693: fltTcaEqptIngrCrcErrPkts1moFcsRateAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483694: fltTcaEqptIngrCrcErrPkts1qtrFcsRateAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483695: fltTcaEqptIngrCrcErrPkts1yearFcsRateAvg

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483728: fltTcaEqptIngrCrcErrPkts5minFcsRateTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483729: fltTcaEqptIngrCrcErrPkts15minFcsRateTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483730: fltTcaEqptIngrCrcErrPkts1hFcsRateTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483731: fltTcaEqptIngrCrcErrPkts1dFcsRateTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483732: fltTcaEqptIngrCrcErrPkts1wFcsRateTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483733: fltTcaEqptIngrCrcErrPkts1moFcsRateTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483734: fltTcaEqptIngrCrcErrPkts1qtrFcsRateTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483735: fltTcaEqptIngrCrcErrPkts1yearFcsRateTr

Severity: variable

Explanation: This fault is caused by "FCS CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "FCS CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483784: fltTcaEqptIngrCrcErrPkts5minStompedLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483785: fltTcaEqptIngrCrcErrPkts15minStompedLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483786: fltTcaEqptIngrCrcErrPkts1hStompedLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483787: fltTcaEqptIngrCrcErrPkts1dStompedLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483788: fltTcaEqptIngrCrcErrPkts1wStompedLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483789: fltTcaEqptIngrCrcErrPkts1moStompedLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483790: fltTcaEqptIngrCrcErrPkts1qtrStompedLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483791: fltTcaEqptIngrCrcErrPkts1yearStompedLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483800: fltTcaEqptIngrCrcErrPkts5minStompedCum

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483801: fltTcaEqptIngrCrcErrPkts15minStompedCum

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483802: fltTcaEqptIngrCrcErrPkts1hStompedCum

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483803: fltTcaEqptIngrCrcErrPkts1dStompedCum

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483804: fltTcaEqptIngrCrcErrPkts1wStompedCum

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483805: fltTcaEqptIngrCrcErrPkts1moStompedCum

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483806: fltTcaEqptIngrCrcErrPkts1qtrStompedCum

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483807: fltTcaEqptIngrCrcErrPkts1yearStompedCum

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483808: fltTcaEqptIngrCrcErrPkts5minStompedPer

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483809: fltTcaEqptIngrCrcErrPkts15minStompedPer

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483810: fltTcaEqptIngrCrcErrPkts1hStompedPer

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483811: fltTcaEqptIngrCrcErrPkts1dStompedPer

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483812: fltTcaEqptIngrCrcErrPkts1wStompedPer

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483813: fltTcaEqptIngrCrcErrPkts1moStompedPer

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483814: fltTcaEqptIngrCrcErrPkts1qtrStompedPer

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483815: fltTcaEqptIngrCrcErrPkts1yearStompedPer

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483816: fltTcaEqptIngrCrcErrPkts5minStompedMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483817: fltTcaEqptIngrCrcErrPkts15minStompedMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483818: fltTcaEqptIngrCrcErrPkts1hStompedMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483819: fltTcaEqptIngrCrcErrPkts1dStompedMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483820: fltTcaEqptIngrCrcErrPkts1wStompedMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483821: fltTcaEqptIngrCrcErrPkts1moStompedMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483822: fltTcaEqptIngrCrcErrPkts1qtrStompedMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483823: fltTcaEqptIngrCrcErrPkts1yearStompedMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483824: fltTcaEqptIngrCrcErrPkts5minStompedMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483825: fltTcaEqptIngrCrcErrPkts15minStompedMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483826: fltTcaEqptIngrCrcErrPkts1hStompedMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483827: fltTcaEqptIngrCrcErrPkts1dStompedMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483828: fltTcaEqptIngrCrcErrPkts1wStompedMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483829: fltTcaEqptIngrCrcErrPkts1moStompedMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483830: fltTcaEqptIngrCrcErrPkts1qtrStompedMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483831: fltTcaEqptIngrCrcErrPkts1yearStompedMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483832: fltTcaEqptIngrCrcErrPkts5minStompedAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483833: fltTcaEqptIngrCrcErrPkts15minStompedAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483834: fltTcaEqptIngrCrcErrPkts1hStompedAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483835: fltTcaEqptIngrCrcErrPkts1dStompedAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483836: fltTcaEqptIngrCrcErrPkts1wStompedAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483837: fltTcaEqptIngrCrcErrPkts1moStompedAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483838: fltTcaEqptIngrCrcErrPkts1qtrStompedAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483839: fltTcaEqptIngrCrcErrPkts1yearStompedAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483864: fltTcaEqptIngrCrcErrPkts5minStompedTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483865: fltTcaEqptIngrCrcErrPkts15minStompedTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483866: fltTcaEqptIngrCrcErrPkts1hStompedTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483867: fltTcaEqptIngrCrcErrPkts1dStompedTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483868: fltTcaEqptIngrCrcErrPkts1wStompedTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483869: fltTcaEqptIngrCrcErrPkts1moStompedTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483870: fltTcaEqptIngrCrcErrPkts1qtrStompedTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483871: fltTcaEqptIngrCrcErrPkts1yearStompedTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483872: fltTcaEqptIngrCrcErrPkts5minStompedRate

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483873: fltTcaEqptIngrCrcErrPkts15minStompedRate

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483874: fltTcaEqptIngrCrcErrPkts1hStompedRate

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483875: fltTcaEqptIngrCrcErrPkts1dStompedRate

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483876: fltTcaEqptIngrCrcErrPkts1wStompedRate

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483877: fltTcaEqptIngrCrcErrPkts1moStompedRate

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483878: fltTcaEqptIngrCrcErrPkts1qtrStompedRate

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483879: fltTcaEqptIngrCrcErrPkts1yearStompedRate

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483952: fltTcaEqptIngrCrcErrPkts5minStompedRateLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483953: fltTcaEqptIngrCrcErrPkts15minStompedRateLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483954: fltTcaEqptIngrCrcErrPkts1hStompedRateLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483955: fltTcaEqptIngrCrcErrPkts1dStompedRateLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483956: fltTcaEqptIngrCrcErrPkts1wStompedRateLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483957: fltTcaEqptIngrCrcErrPkts1moStompedRateLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483958: fltTcaEqptIngrCrcErrPkts1qtrStompedRateLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483959: fltTcaEqptIngrCrcErrPkts1yearStompedRateLast

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483960: fltTcaEqptIngrCrcErrPkts5minStompedRateMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483961: fltTcaEqptIngrCrcErrPkts15minStompedRateMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483962: fltTcaEqptIngrCrcErrPkts1hStompedRateMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483963: fltTcaEqptIngrCrcErrPkts1dStompedRateMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483964: fltTcaEqptIngrCrcErrPkts1wStompedRateMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483965: fltTcaEqptIngrCrcErrPkts1moStompedRateMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483966: fltTcaEqptIngrCrcErrPkts1qtrStompedRateMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483967: fltTcaEqptIngrCrcErrPkts1yearStompedRateMin

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483968: fltTcaEqptIngrCrcErrPkts5minStompedRateMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483969: fltTcaEqptIngrCrcErrPkts15minStompedRateMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483970: fltTcaEqptIngrCrcErrPkts1hStompedRateMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483971: fltTcaEqptIngrCrcErrPkts1dStompedRateMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483972: fltTcaEqptIngrCrcErrPkts1wStompedRateMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483973: fltTcaEqptIngrCrcErrPkts1moStompedRateMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483974: fltTcaEqptIngrCrcErrPkts1qtrStompedRateMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483975: fltTcaEqptIngrCrcErrPkts1yearStompedRateMax

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483976: fltTcaEqptIngrCrcErrPkts5minStompedRateAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483977: fltTcaEqptIngrCrcErrPkts15minStompedRateAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483978: fltTcaEqptIngrCrcErrPkts1hStompedRateAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483979: fltTcaEqptIngrCrcErrPkts1dStompedRateAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483980: fltTcaEqptIngrCrcErrPkts1wStompedRateAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483981: fltTcaEqptIngrCrcErrPkts1moStompedRateAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483982: fltTcaEqptIngrCrcErrPkts1qtrStompedRateAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F483983: fltTcaEqptIngrCrcErrPkts1yearStompedRateAvg

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F484016: fltTcaEqptIngrCrcErrPkts5minStompedRateTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F484017: fltTcaEqptIngrCrcErrPkts15minStompedRateTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F484018: fltTcaEqptIngrCrcErrPkts1hStompedRateTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F484019: fltTcaEqptIngrCrcErrPkts1dStompedRateTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F484020: fltTcaEqptIngrCrcErrPkts1wStompedRateTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F484021: fltTcaEqptIngrCrcErrPkts1moStompedRateTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F484022: fltTcaEqptIngrCrcErrPkts1qtrStompedRateTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F484023: fltTcaEqptIngrCrcErrPkts1yearStompedRateTr

Severity: variable

Explanation: This fault is caused by "Stomped CRC Errored Packets rate trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Stomped CRC Errored Packets rate" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487400: fltTcaEqptcapacityEstPGLabelEntry5minNormalizedLast

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487401: fltTcaEqptcapacityEstPGLabelEntry15minNormalizedLast

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487402: fltTcaEqptcapacityEstPGLabelEntry1hNormalizedLast

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487403: fltTcaEqptcapacityEstPGLabelEntry1dNormalizedLast

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487404: fltTcaEqptcapacityEstPGLabelEntry1wNormalizedLast

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487405: fltTcaEqptcapacityEstPGLabelEntry1moNormalizedLast

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487406: fltTcaEqptcapacityEstPGLabelEntry1qtrNormalizedLast

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487407: fltTcaEqptcapacityEstPGLabelEntry1yearNormalizedLast

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487408: fltTcaEqptcapacityEstPGLabelEntry5minNormalizedMin

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487409: fltTcaEqptcapacityEstPGLabelEntry15minNormalizedMin

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487410: fltTcaEqptcapacityEstPGLabelEntry1hNormalizedMin

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487411: fltTcaEqptcapacityEstPGLabelEntry1dNormalizedMin

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487412: fltTcaEqptcapacityEstPGLabelEntry1wNormalizedMin

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487413: fltTcaEqptcapacityEstPGLabelEntry1moNormalizedMin

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487414: fltTcaEqptcapacityEstPGLabelEntry1qtrNormalizedMin

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487415: fltTcaEqptcapacityEstPGLabelEntry1yearNormalizedMin

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487416: fltTcaEqptcapacityEstPGLabelEntry5minNormalizedMax

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487417: fltTcaEqptcapacityEstPGLabelEntry15minNormalizedMax

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487418: fltTcaEqptcapacityEstPGLabelEntry1hNormalizedMax

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487419: fltTcaEqptcapacityEstPGLabelEntry1dNormalizedMax

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487420: fltTcaEqptcapacityEstPGLabelEntry1wNormalizedMax

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487421: fltTcaEqptcapacityEstPGLabelEntry1moNormalizedMax

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487422: fltTcaEqptcapacityEstPGLabelEntry1qtrNormalizedMax

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487423: fltTcaEqptcapacityEstPGLabelEntry1yearNormalizedMax

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487424: fltTcaEqptcapacityEstPGLabelEntry5minNormalizedAvg

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487425: fltTcaEqptcapacityEstPGLabelEntry15minNormalizedAvg

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487426: fltTcaEqptcapacityEstPGLabelEntry1hNormalizedAvg

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487427: fltTcaEqptcapacityEstPGLabelEntry1dNormalizedAvg

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487428: fltTcaEqptcapacityEstPGLabelEntry1wNormalizedAvg

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487429: fltTcaEqptcapacityEstPGLabelEntry1moNormalizedAvg

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487430: fltTcaEqptcapacityEstPGLabelEntry1qtrNormalizedAvg

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487431: fltTcaEqptcapacityEstPGLabelEntry1yearNormalizedAvg

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487464: fltTcaEqptcapacityEstPGLabelEntry5minNormalizedTr

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487465: fltTcaEqptcapacityEstPGLabelEntry15minNormalizedTr

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487466: fltTcaEqptcapacityEstPGLabelEntry1hNormalizedTr

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487467: fltTcaEqptcapacityEstPGLabelEntry1dNormalizedTr

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487468: fltTcaEqptcapacityEstPGLabelEntry1wNormalizedTr

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487469: fltTcaEqptcapacityEstPGLabelEntry1moNormalizedTr

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487470: fltTcaEqptcapacityEstPGLabelEntry1qtrNormalizedTr

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487471: fltTcaEqptcapacityEstPGLabelEntry1yearNormalizedTr

Severity: variable

Explanation: This fault is caused by "PG label entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487520: fltTcaEqptcapacityEstPGLabelUsage5minPgLblCapLast

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487521: fltTcaEqptcapacityEstPGLabelUsage15minPgLblCapLast

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487522: fltTcaEqptcapacityEstPGLabelUsage1hPgLblCapLast

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487523: fltTcaEqptcapacityEstPGLabelUsage1dPgLblCapLast

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487524: fltTcaEqptcapacityEstPGLabelUsage1wPgLblCapLast

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487525: fltTcaEqptcapacityEstPGLabelUsage1moPgLblCapLast

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487526: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblCapLast

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487527: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblCapLast

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487536: fltTcaEqptcapacityEstPGLabelUsage5minPgLblCapCum

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487537: fltTcaEqptcapacityEstPGLabelUsage15minPgLblCapCum

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487538: fltTcaEqptcapacityEstPGLabelUsage1hPgLblCapCum

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487539: fltTcaEqptcapacityEstPGLabelUsage1dPgLblCapCum

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487540: fltTcaEqptcapacityEstPGLabelUsage1wPgLblCapCum

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487541: fltTcaEqptcapacityEstPGLabelUsage1moPgLblCapCum

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487542: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblCapCum

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487543: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblCapCum

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487544: fltTcaEqptcapacityEstPGLabelUsage5minPgLblCapPer

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487545: fltTcaEqptcapacityEstPGLabelUsage15minPgLblCapPer

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487546: fltTcaEqptcapacityEstPGLabelUsage1hPgLblCapPer

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487547: fltTcaEqptcapacityEstPGLabelUsage1dPgLblCapPer

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487548: fltTcaEqptcapacityEstPGLabelUsage1wPgLblCapPer

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487549: fltTcaEqptcapacityEstPGLabelUsage1moPgLblCapPer

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487550: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblCapPer

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487551: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblCapPer

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487552: fltTcaEqptcapacityEstPGLabelUsage5minPgLblCapMin

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487553: fltTcaEqptcapacityEstPGLabelUsage15minPgLblCapMin

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487554: fltTcaEqptcapacityEstPGLabelUsage1hPgLblCapMin

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487555: fltTcaEqptcapacityEstPGLabelUsage1dPgLblCapMin

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487556: fltTcaEqptcapacityEstPGLabelUsage1wPgLblCapMin

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487557: fltTcaEqptcapacityEstPGLabelUsage1moPgLblCapMin

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487558: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblCapMin

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487559: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblCapMin

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487560: fltTcaEqptcapacityEstPGLabelUsage5minPgLblCapMax

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487561: fltTcaEqptcapacityEstPGLabelUsage15minPgLblCapMax

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487562: fltTcaEqptcapacityEstPGLabelUsage1hPgLblCapMax

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487563: fltTcaEqptcapacityEstPGLabelUsage1dPgLblCapMax

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487564: fltTcaEqptcapacityEstPGLabelUsage1wPgLblCapMax

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487565: fltTcaEqptcapacityEstPGLabelUsage1moPgLblCapMax

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487566: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblCapMax

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487567: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblCapMax

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487568: fltTcaEqptcapacityEstPGLabelUsage5minPgLblCapAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487569: fltTcaEqptcapacityEstPGLabelUsage15minPgLblCapAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487570: fltTcaEqptcapacityEstPGLabelUsage1hPgLblCapAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487571: fltTcaEqptcapacityEstPGLabelUsage1dPgLblCapAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487572: fltTcaEqptcapacityEstPGLabelUsage1wPgLblCapAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487573: fltTcaEqptcapacityEstPGLabelUsage1moPgLblCapAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487574: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblCapAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487575: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblCapAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487600: fltTcaEqptcapacityEstPGLabelUsage5minPgLblCapTr

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487601: fltTcaEqptcapacityEstPGLabelUsage15minPgLblCapTr

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487602: fltTcaEqptcapacityEstPGLabelUsage1hPgLblCapTr

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487603: fltTcaEqptcapacityEstPGLabelUsage1dPgLblCapTr

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487604: fltTcaEqptcapacityEstPGLabelUsage1wPgLblCapTr

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487605: fltTcaEqptcapacityEstPGLabelUsage1moPgLblCapTr

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487606: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblCapTr

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487607: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblCapTr

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487608: fltTcaEqptcapacityEstPGLabelUsage5minPgLblCapRate

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487609: fltTcaEqptcapacityEstPGLabelUsage15minPgLblCapRate

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487610: fltTcaEqptcapacityEstPGLabelUsage1hPgLblCapRate

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487611: fltTcaEqptcapacityEstPGLabelUsage1dPgLblCapRate

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487612: fltTcaEqptcapacityEstPGLabelUsage1wPgLblCapRate

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487613: fltTcaEqptcapacityEstPGLabelUsage1moPgLblCapRate

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487614: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblCapRate

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487615: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblCapRate

Severity: variable

Explanation: This fault is caused by "PG label Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487688: fltTcaEqptcapacityEstPGLabelUsage5minPgLblUsageLast

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487689: fltTcaEqptcapacityEstPGLabelUsage15minPgLblUsageLast

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487690: fltTcaEqptcapacityEstPGLabelUsage1hPgLblUsageLast

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487691: fltTcaEqptcapacityEstPGLabelUsage1dPgLblUsageLast

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487692: fltTcaEqptcapacityEstPGLabelUsage1wPgLblUsageLast

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487693: fltTcaEqptcapacityEstPGLabelUsage1moPgLblUsageLast

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487694: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblUsageLast

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487695: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblUsageLast

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487704: fltTcaEqptcapacityEstPGLabelUsage5minPgLblUsageCum

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487705: fltTcaEqptcapacityEstPGLabelUsage15minPgLblUsageCum

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487706: fltTcaEqptcapacityEstPGLabelUsage1hPgLblUsageCum

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487707: fltTcaEqptcapacityEstPGLabelUsage1dPgLblUsageCum

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487708: fltTcaEqptcapacityEstPGLabelUsage1wPgLblUsageCum

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487709: fltTcaEqptcapacityEstPGLabelUsage1moPgLblUsageCum

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487710: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblUsageCum

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487711: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblUsageCum

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487712: fltTcaEqptcapacityEstPGLabelUsage5minPgLblUsagePer

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487713: fltTcaEqptcapacityEstPGLabelUsage15minPgLblUsagePer

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487714: fltTcaEqptcapacityEstPGLabelUsage1hPgLblUsagePer

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487715: fltTcaEqptcapacityEstPGLabelUsage1dPgLblUsagePer

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487716: fltTcaEqptcapacityEstPGLabelUsage1wPgLblUsagePer

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487717: fltTcaEqptcapacityEstPGLabelUsage1moPgLblUsagePer

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487718: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblUsagePer

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487719: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblUsagePer

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487720: fltTcaEqptcapacityEstPGLabelUsage5minPgLblUsageMin

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487721: fltTcaEqptcapacityEstPGLabelUsage15minPgLblUsageMin

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487722: fltTcaEqptcapacityEstPGLabelUsage1hPgLblUsageMin

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487723: fltTcaEqptcapacityEstPGLabelUsage1dPgLblUsageMin

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487724: fltTcaEqptcapacityEstPGLabelUsage1wPgLblUsageMin

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487725: fltTcaEqptcapacityEstPGLabelUsage1moPgLblUsageMin

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487726: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblUsageMin

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487727: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblUsageMin

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487728: fltTcaEqptcapacityEstPGLabelUsage5minPgLblUsageMax

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487729: fltTcaEqptcapacityEstPGLabelUsage15minPgLblUsageMax

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487730: fltTcaEqptcapacityEstPGLabelUsage1hPgLblUsageMax

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487731: fltTcaEqptcapacityEstPGLabelUsage1dPgLblUsageMax

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487732: fltTcaEqptcapacityEstPGLabelUsage1wPgLblUsageMax

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487733: fltTcaEqptcapacityEstPGLabelUsage1moPgLblUsageMax

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487734: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblUsageMax

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487735: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblUsageMax

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487736: fltTcaEqptcapacityEstPGLabelUsage5minPgLblUsageAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487737: fltTcaEqptcapacityEstPGLabelUsage15minPgLblUsageAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487738: fltTcaEqptcapacityEstPGLabelUsage1hPgLblUsageAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487739: fltTcaEqptcapacityEstPGLabelUsage1dPgLblUsageAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487740: fltTcaEqptcapacityEstPGLabelUsage1wPgLblUsageAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487741: fltTcaEqptcapacityEstPGLabelUsage1moPgLblUsageAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487742: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblUsageAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487743: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblUsageAvg

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487768: fltTcaEqptcapacityEstPGLabelUsage5minPgLblUsageTr

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487769: fltTcaEqptcapacityEstPGLabelUsage15minPgLblUsageTr

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487770: fltTcaEqptcapacityEstPGLabelUsage1hPgLblUsageTr

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487771: fltTcaEqptcapacityEstPGLabelUsage1dPgLblUsageTr

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487772: fltTcaEqptcapacityEstPGLabelUsage1wPgLblUsageTr

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487773: fltTcaEqptcapacityEstPGLabelUsage1moPgLblUsageTr

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487774: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblUsageTr

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487775: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblUsageTr

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487776: fltTcaEqptcapacityEstPGLabelUsage5minPgLblUsageRate

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487777: fltTcaEqptcapacityEstPGLabelUsage15minPgLblUsageRate

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487778: fltTcaEqptcapacityEstPGLabelUsage1hPgLblUsageRate

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487779: fltTcaEqptcapacityEstPGLabelUsage1dPgLblUsageRate

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487780: fltTcaEqptcapacityEstPGLabelUsage1wPgLblUsageRate

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487781: fltTcaEqptcapacityEstPGLabelUsage1moPgLblUsageRate

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487782: fltTcaEqptcapacityEstPGLabelUsage1qtrPgLblUsageRate

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487783: fltTcaEqptcapacityEstPGLabelUsage1yearPgLblUsageRate

Severity: variable

Explanation: This fault is caused by "PG label Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "PG label Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487856: fltTcaEqptcapacityEstPolEntry5minNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487857: fltTcaEqptcapacityEstPolEntry15minNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487858: fltTcaEqptcapacityEstPolEntry1hNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487859: fltTcaEqptcapacityEstPolEntry1dNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487860: fltTcaEqptcapacityEstPolEntry1wNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487861: fltTcaEqptcapacityEstPolEntry1moNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487862: fltTcaEqptcapacityEstPolEntry1qtrNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487863: fltTcaEqptcapacityEstPolEntry1yearNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487864: fltTcaEqptcapacityEstPolEntry5minNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487865: fltTcaEqptcapacityEstPolEntry15minNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487866: fltTcaEqptcapacityEstPolEntry1hNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487867: fltTcaEqptcapacityEstPolEntry1dNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487868: fltTcaEqptcapacityEstPolEntry1wNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487869: fltTcaEqptcapacityEstPolEntry1moNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487870: fltTcaEqptcapacityEstPolEntry1qtrNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487871: fltTcaEqptcapacityEstPolEntry1yearNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487872: fltTcaEqptcapacityEstPolEntry5minNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487873: fltTcaEqptcapacityEstPolEntry15minNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487874: fltTcaEqptcapacityEstPolEntry1hNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487875: fltTcaEqptcapacityEstPolEntry1dNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487876: fltTcaEqptcapacityEstPolEntry1wNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487877: fltTcaEqptcapacityEstPolEntry1moNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487878: fltTcaEqptcapacityEstPolEntry1qtrNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487879: fltTcaEqptcapacityEstPolEntry1yearNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487880: fltTcaEqptcapacityEstPolEntry5minNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487881: fltTcaEqptcapacityEstPolEntry15minNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487882: fltTcaEqptcapacityEstPolEntry1hNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487883: fltTcaEqptcapacityEstPolEntry1dNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487884: fltTcaEqptcapacityEstPolEntry1wNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487885: fltTcaEqptcapacityEstPolEntry1moNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487886: fltTcaEqptcapacityEstPolEntry1qtrNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487887: fltTcaEqptcapacityEstPolEntry1yearNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487920: fltTcaEqptcapacityEstPolEntry5minNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487921: fltTcaEqptcapacityEstPolEntry15minNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487922: fltTcaEqptcapacityEstPolEntry1hNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487923: fltTcaEqptcapacityEstPolEntry1dNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487924: fltTcaEqptcapacityEstPolEntry1wNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487925: fltTcaEqptcapacityEstPolEntry1moNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487926: fltTcaEqptcapacityEstPolEntry1qtrNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487927: fltTcaEqptcapacityEstPolEntry1yearNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy CAM entries usage from estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy CAM entries usage from estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487976: fltTcaEqptcapacityEstPolOTCAMEntry5minNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487977: fltTcaEqptcapacityEstPolOTCAMEntry15minNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487978: fltTcaEqptcapacityEstPolOTCAMEntry1hNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487979: fltTcaEqptcapacityEstPolOTCAMEntry1dNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487980: fltTcaEqptcapacityEstPolOTCAMEntry1wNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487981: fltTcaEqptcapacityEstPolOTCAMEntry1moNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487982: fltTcaEqptcapacityEstPolOTCAMEntry1qtrNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487983: fltTcaEqptcapacityEstPolOTCAMEntry1yearNormalizedLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487984: fltTcaEqptcapacityEstPolOTCAMEntry5minNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487985: fltTcaEqptcapacityEstPolOTCAMEntry15minNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487986: fltTcaEqptcapacityEstPolOTCAMEntry1hNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487987: fltTcaEqptcapacityEstPolOTCAMEntry1dNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487988: fltTcaEqptcapacityEstPolOTCAMEntry1wNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487989: fltTcaEqptcapacityEstPolOTCAMEntry1moNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487990: fltTcaEqptcapacityEstPolOTCAMEntry1qtrNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487991: fltTcaEqptcapacityEstPolOTCAMEntry1yearNormalizedMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487992: fltTcaEqptcapacityEstPolOTCAMEntry5minNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487993: fltTcaEqptcapacityEstPolOTCAMEntry15minNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487994: fltTcaEqptcapacityEstPolOTCAMEntry1hNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487995: fltTcaEqptcapacityEstPolOTCAMEntry1dNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487996: fltTcaEqptcapacityEstPolOTCAMEntry1wNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487997: fltTcaEqptcapacityEstPolOTCAMEntry1moNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487998: fltTcaEqptcapacityEstPolOTCAMEntry1qtrNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F487999: fltTcaEqptcapacityEstPolOTCAMEntry1yearNormalizedMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488000: fltTcaEqptcapacityEstPolOTCAMEntry5minNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488001: fltTcaEqptcapacityEstPolOTCAMEntry15minNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488002: fltTcaEqptcapacityEstPolOTCAMEntry1hNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488003: fltTcaEqptcapacityEstPolOTCAMEntry1dNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488004: fltTcaEqptcapacityEstPolOTCAMEntry1wNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488005: fltTcaEqptcapacityEstPolOTCAMEntry1moNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488006: fltTcaEqptcapacityEstPolOTCAMEntry1qtrNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488007: fltTcaEqptcapacityEstPolOTCAMEntry1yearNormalizedAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488040: fltTcaEqptcapacityEstPolOTCAMEntry5minNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488041: fltTcaEqptcapacityEstPolOTCAMEntry15minNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488042: fltTcaEqptcapacityEstPolOTCAMEntry1hNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488043: fltTcaEqptcapacityEstPolOTCAMEntry1dNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488044: fltTcaEqptcapacityEstPolOTCAMEntry1wNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488045: fltTcaEqptcapacityEstPolOTCAMEntry1moNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488046: fltTcaEqptcapacityEstPolOTCAMEntry1qtrNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488047: fltTcaEqptcapacityEstPolOTCAMEntry1yearNormalizedTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM entries usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM entries usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488096: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488097: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488098: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488099: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488100: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488101: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488102: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488103: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMCapLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488112: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488113: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488114: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488115: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488116: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488117: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488118: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488119: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMCapCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488120: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488121: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488122: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488123: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488124: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488125: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488126: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488127: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMCapPer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488128: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488129: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488130: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488131: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488132: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488133: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488134: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488135: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMCapMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488136: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488137: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488138: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488139: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488140: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488141: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488142: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488143: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMCapMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488144: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488145: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488146: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488147: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488148: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488149: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488150: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488151: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMCapAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488176: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488177: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488178: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488179: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488180: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488181: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488182: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488183: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMCapTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488184: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488185: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488186: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488187: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488188: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488189: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488190: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488191: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMCapRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488264: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488265: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488266: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488267: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488268: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488269: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488270: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488271: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMUsageLast

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488280: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488281: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488282: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488283: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488284: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488285: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488286: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488287: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMUsageCum

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488288: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488289: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488290: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488291: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488292: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488293: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488294: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488295: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMUsagePer

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488296: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488297: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488298: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488299: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488300: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488301: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488302: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488303: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMUsageMin

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488304: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488305: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488306: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488307: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488308: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488309: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488310: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488311: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMUsageMax

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488312: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488313: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488314: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488315: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488316: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488317: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488318: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488319: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488344: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488345: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488346: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488347: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488348: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488349: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488350: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488351: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMUsageTr

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488352: fltTcaEqptcapacityEstPolOTCAMUsage5minPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488353: fltTcaEqptcapacityEstPolOTCAMUsage15minPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488354: fltTcaEqptcapacityEstPolOTCAMUsage1hPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488355: fltTcaEqptcapacityEstPolOTCAMUsage1dPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488356: fltTcaEqptcapacityEstPolOTCAMUsage1wPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488357: fltTcaEqptcapacityEstPolOTCAMUsage1moPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488358: fltTcaEqptcapacityEstPolOTCAMUsage1qtrPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488359: fltTcaEqptcapacityEstPolOTCAMUsage1yearPolOTCAMUsageRate

Severity: variable

Explanation: This fault is caused by "Policy OTCAM Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy OTCAM Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488432: fltTcaEqptcapacityEstPolUsage5minPolUsageCapLast

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488433: fltTcaEqptcapacityEstPolUsage15minPolUsageCapLast

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488434: fltTcaEqptcapacityEstPolUsage1hPolUsageCapLast

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488435: fltTcaEqptcapacityEstPolUsage1dPolUsageCapLast

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488436: fltTcaEqptcapacityEstPolUsage1wPolUsageCapLast

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488437: fltTcaEqptcapacityEstPolUsage1moPolUsageCapLast

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488438: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCapLast

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488439: fltTcaEqptcapacityEstPolUsage1yearPolUsageCapLast

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488448: fltTcaEqptcapacityEstPolUsage5minPolUsageCapCum

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488449: fltTcaEqptcapacityEstPolUsage15minPolUsageCapCum

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488450: fltTcaEqptcapacityEstPolUsage1hPolUsageCapCum

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488451: fltTcaEqptcapacityEstPolUsage1dPolUsageCapCum

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488452: fltTcaEqptcapacityEstPolUsage1wPolUsageCapCum

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488453: fltTcaEqptcapacityEstPolUsage1moPolUsageCapCum

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488454: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCapCum

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488455: fltTcaEqptcapacityEstPolUsage1yearPolUsageCapCum

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488456: fltTcaEqptcapacityEstPolUsage5minPolUsageCapPer

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488457: fltTcaEqptcapacityEstPolUsage15minPolUsageCapPer

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488458: fltTcaEqptcapacityEstPolUsage1hPolUsageCapPer

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488459: fltTcaEqptcapacityEstPolUsage1dPolUsageCapPer

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488460: fltTcaEqptcapacityEstPolUsage1wPolUsageCapPer

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488461: fltTcaEqptcapacityEstPolUsage1moPolUsageCapPer

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488462: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCapPer

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488463: fltTcaEqptcapacityEstPolUsage1yearPolUsageCapPer

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488464: fltTcaEqptcapacityEstPolUsage5minPolUsageCapMin

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488465: fltTcaEqptcapacityEstPolUsage15minPolUsageCapMin

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488466: fltTcaEqptcapacityEstPolUsage1hPolUsageCapMin

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488467: fltTcaEqptcapacityEstPolUsage1dPolUsageCapMin

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488468: fltTcaEqptcapacityEstPolUsage1wPolUsageCapMin

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488469: fltTcaEqptcapacityEstPolUsage1moPolUsageCapMin

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488470: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCapMin

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488471: fltTcaEqptcapacityEstPolUsage1yearPolUsageCapMin

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488472: fltTcaEqptcapacityEstPolUsage5minPolUsageCapMax

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488473: fltTcaEqptcapacityEstPolUsage15minPolUsageCapMax

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488474: fltTcaEqptcapacityEstPolUsage1hPolUsageCapMax

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488475: fltTcaEqptcapacityEstPolUsage1dPolUsageCapMax

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488476: fltTcaEqptcapacityEstPolUsage1wPolUsageCapMax

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488477: fltTcaEqptcapacityEstPolUsage1moPolUsageCapMax

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488478: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCapMax

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488479: fltTcaEqptcapacityEstPolUsage1yearPolUsageCapMax

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488480: fltTcaEqptcapacityEstPolUsage5minPolUsageCapAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488481: fltTcaEqptcapacityEstPolUsage15minPolUsageCapAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488482: fltTcaEqptcapacityEstPolUsage1hPolUsageCapAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488483: fltTcaEqptcapacityEstPolUsage1dPolUsageCapAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488484: fltTcaEqptcapacityEstPolUsage1wPolUsageCapAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488485: fltTcaEqptcapacityEstPolUsage1moPolUsageCapAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488486: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCapAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488487: fltTcaEqptcapacityEstPolUsage1yearPolUsageCapAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488512: fltTcaEqptcapacityEstPolUsage5minPolUsageCapTr

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488513: fltTcaEqptcapacityEstPolUsage15minPolUsageCapTr

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488514: fltTcaEqptcapacityEstPolUsage1hPolUsageCapTr

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488515: fltTcaEqptcapacityEstPolUsage1dPolUsageCapTr

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488516: fltTcaEqptcapacityEstPolUsage1wPolUsageCapTr

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488517: fltTcaEqptcapacityEstPolUsage1moPolUsageCapTr

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488518: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCapTr

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488519: fltTcaEqptcapacityEstPolUsage1yearPolUsageCapTr

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488520: fltTcaEqptcapacityEstPolUsage5minPolUsageCapRate

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488521: fltTcaEqptcapacityEstPolUsage15minPolUsageCapRate

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488522: fltTcaEqptcapacityEstPolUsage1hPolUsageCapRate

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488523: fltTcaEqptcapacityEstPolUsage1dPolUsageCapRate

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488524: fltTcaEqptcapacityEstPolUsage1wPolUsageCapRate

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488525: fltTcaEqptcapacityEstPolUsage1moPolUsageCapRate

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488526: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCapRate

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488527: fltTcaEqptcapacityEstPolUsage1yearPolUsageCapRate

Severity: variable

Explanation: This fault is caused by "Policy Usage capacity from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage capacity from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488600: fltTcaEqptcapacityEstPolUsage5minPolUsageLast

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488601: fltTcaEqptcapacityEstPolUsage15minPolUsageLast

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488602: fltTcaEqptcapacityEstPolUsage1hPolUsageLast

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488603: fltTcaEqptcapacityEstPolUsage1dPolUsageLast

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488604: fltTcaEqptcapacityEstPolUsage1wPolUsageLast

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488605: fltTcaEqptcapacityEstPolUsage1moPolUsageLast

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488606: fltTcaEqptcapacityEstPolUsage1qtrPolUsageLast

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488607: fltTcaEqptcapacityEstPolUsage1yearPolUsageLast

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488616: fltTcaEqptcapacityEstPolUsage5minPolUsageCum

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488617: fltTcaEqptcapacityEstPolUsage15minPolUsageCum

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488618: fltTcaEqptcapacityEstPolUsage1hPolUsageCum

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488619: fltTcaEqptcapacityEstPolUsage1dPolUsageCum

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488620: fltTcaEqptcapacityEstPolUsage1wPolUsageCum

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488621: fltTcaEqptcapacityEstPolUsage1moPolUsageCum

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488622: fltTcaEqptcapacityEstPolUsage1qtrPolUsageCum

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488623: fltTcaEqptcapacityEstPolUsage1yearPolUsageCum

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488624: fltTcaEqptcapacityEstPolUsage5minPolUsagePer

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488625: fltTcaEqptcapacityEstPolUsage15minPolUsagePer

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488626: fltTcaEqptcapacityEstPolUsage1hPolUsagePer

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488627: fltTcaEqptcapacityEstPolUsage1dPolUsagePer

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488628: fltTcaEqptcapacityEstPolUsage1wPolUsagePer

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488629: fltTcaEqptcapacityEstPolUsage1moPolUsagePer

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488630: fltTcaEqptcapacityEstPolUsage1qtrPolUsagePer

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488631: fltTcaEqptcapacityEstPolUsage1yearPolUsagePer

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488632: fltTcaEqptcapacityEstPolUsage5minPolUsageMin

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488633: fltTcaEqptcapacityEstPolUsage15minPolUsageMin

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488634: fltTcaEqptcapacityEstPolUsage1hPolUsageMin

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488635: fltTcaEqptcapacityEstPolUsage1dPolUsageMin

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488636: fltTcaEqptcapacityEstPolUsage1wPolUsageMin

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488637: fltTcaEqptcapacityEstPolUsage1moPolUsageMin

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488638: fltTcaEqptcapacityEstPolUsage1qtrPolUsageMin

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488639: fltTcaEqptcapacityEstPolUsage1yearPolUsageMin

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488640: fltTcaEqptcapacityEstPolUsage5minPolUsageMax

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488641: fltTcaEqptcapacityEstPolUsage15minPolUsageMax

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488642: fltTcaEqptcapacityEstPolUsage1hPolUsageMax

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488643: fltTcaEqptcapacityEstPolUsage1dPolUsageMax

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488644: fltTcaEqptcapacityEstPolUsage1wPolUsageMax

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488645: fltTcaEqptcapacityEstPolUsage1moPolUsageMax

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488646: fltTcaEqptcapacityEstPolUsage1qtrPolUsageMax

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488647: fltTcaEqptcapacityEstPolUsage1yearPolUsageMax

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488648: fltTcaEqptcapacityEstPolUsage5minPolUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488649: fltTcaEqptcapacityEstPolUsage15minPolUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488650: fltTcaEqptcapacityEstPolUsage1hPolUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488651: fltTcaEqptcapacityEstPolUsage1dPolUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488652: fltTcaEqptcapacityEstPolUsage1wPolUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488653: fltTcaEqptcapacityEstPolUsage1moPolUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488654: fltTcaEqptcapacityEstPolUsage1qtrPolUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488655: fltTcaEqptcapacityEstPolUsage1yearPolUsageAvg

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488680: fltTcaEqptcapacityEstPolUsage5minPolUsageTr

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488681: fltTcaEqptcapacityEstPolUsage15minPolUsageTr

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488682: fltTcaEqptcapacityEstPolUsage1hPolUsageTr

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488683: fltTcaEqptcapacityEstPolUsage1dPolUsageTr

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488684: fltTcaEqptcapacityEstPolUsage1wPolUsageTr

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488685: fltTcaEqptcapacityEstPolUsage1moPolUsageTr

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488686: fltTcaEqptcapacityEstPolUsage1qtrPolUsageTr

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488687: fltTcaEqptcapacityEstPolUsage1yearPolUsageTr

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488688: fltTcaEqptcapacityEstPolUsage5minPolUsageRate

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488689: fltTcaEqptcapacityEstPolUsage15minPolUsageRate

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488690: fltTcaEqptcapacityEstPolUsage1hPolUsageRate

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488691: fltTcaEqptcapacityEstPolUsage1dPolUsageRate

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488692: fltTcaEqptcapacityEstPolUsage1wPolUsageRate

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488693: fltTcaEqptcapacityEstPolUsage1moPolUsageRate

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488694: fltTcaEqptcapacityEstPolUsage1qtrPolUsageRate

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F488695: fltTcaEqptcapacityEstPolUsage1yearPolUsageRate

Severity: variable

Explanation: This fault is caused by "Policy Usage from policy estimator rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Policy Usage from policy estimator" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493320: fltTcaL3EgrBytes5minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493321: fltTcaL3EgrBytes15minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493322: fltTcaL3EgrBytes1hAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493323: fltTcaL3EgrBytes1dAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493324: fltTcaL3EgrBytes1wAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493325: fltTcaL3EgrBytes1moAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493326: fltTcaL3EgrBytes1qtrAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493327: fltTcaL3EgrBytes1yearAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493336: fltTcaL3EgrBytes5minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493337: fltTcaL3EgrBytes15minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493338: fltTcaL3EgrBytes1hAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493339: fltTcaL3EgrBytes1dAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493340: fltTcaL3EgrBytes1wAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493341: fltTcaL3EgrBytes1moAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493342: fltTcaL3EgrBytes1qtrAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493343: fltTcaL3EgrBytes1yearAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493344: fltTcaL3EgrBytes5minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493345: fltTcaL3EgrBytes15minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493346: fltTcaL3EgrBytes1hAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493347: fltTcaL3EgrBytes1dAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493348: fltTcaL3EgrBytes1wAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493349: fltTcaL3EgrBytes1moAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493350: fltTcaL3EgrBytes1qtrAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493351: fltTcaL3EgrBytes1yearAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493352: fltTcaL3EgrBytes5minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493353: fltTcaL3EgrBytes15minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493354: fltTcaL3EgrBytes1hAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493355: fltTcaL3EgrBytes1dAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493356: fltTcaL3EgrBytes1wAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493357: fltTcaL3EgrBytes1moAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493358: fltTcaL3EgrBytes1qtrAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493359: fltTcaL3EgrBytes1yearAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493360: fltTcaL3EgrBytes5minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493361: fltTcaL3EgrBytes15minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493362: fltTcaL3EgrBytes1hAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493363: fltTcaL3EgrBytes1dAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493364: fltTcaL3EgrBytes1wAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493365: fltTcaL3EgrBytes1moAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493366: fltTcaL3EgrBytes1qtrAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493367: fltTcaL3EgrBytes1yearAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493368: fltTcaL3EgrBytes5minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493369: fltTcaL3EgrBytes15minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493370: fltTcaL3EgrBytes1hAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493371: fltTcaL3EgrBytes1dAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493372: fltTcaL3EgrBytes1wAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493373: fltTcaL3EgrBytes1moAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493374: fltTcaL3EgrBytes1qtrAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493375: fltTcaL3EgrBytes1yearAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493400: fltTcaL3EgrBytes5minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493401: fltTcaL3EgrBytes15minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493402: fltTcaL3EgrBytes1hAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493403: fltTcaL3EgrBytes1dAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493404: fltTcaL3EgrBytes1wAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493405: fltTcaL3EgrBytes1moAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493406: fltTcaL3EgrBytes1qtrAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493407: fltTcaL3EgrBytes1yearAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493408: fltTcaL3EgrBytes5minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493409: fltTcaL3EgrBytes15minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493410: fltTcaL3EgrBytes1hAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493411: fltTcaL3EgrBytes1dAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493412: fltTcaL3EgrBytes1wAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493413: fltTcaL3EgrBytes1moAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493414: fltTcaL3EgrBytes1qtrAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493415: fltTcaL3EgrBytes1yearAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493488: fltTcaL3EgrBytes5minDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493489: fltTcaL3EgrBytes15minDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493490: fltTcaL3EgrBytes1hDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493491: fltTcaL3EgrBytes1dDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493492: fltTcaL3EgrBytes1wDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493493: fltTcaL3EgrBytes1moDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493494: fltTcaL3EgrBytes1qtrDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493495: fltTcaL3EgrBytes1yearDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493504: fltTcaL3EgrBytes5minDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493505: fltTcaL3EgrBytes15minDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493506: fltTcaL3EgrBytes1hDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493507: fltTcaL3EgrBytes1dDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493508: fltTcaL3EgrBytes1wDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493509: fltTcaL3EgrBytes1moDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493510: fltTcaL3EgrBytes1qtrDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493511: fltTcaL3EgrBytes1yearDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493512: fltTcaL3EgrBytes5minDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493513: fltTcaL3EgrBytes15minDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493514: fltTcaL3EgrBytes1hDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493515: fltTcaL3EgrBytes1dDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493516: fltTcaL3EgrBytes1wDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493517: fltTcaL3EgrBytes1moDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493518: fltTcaL3EgrBytes1qtrDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493519: fltTcaL3EgrBytes1yearDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493520: fltTcaL3EgrBytes5minDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493521: fltTcaL3EgrBytes15minDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493522: fltTcaL3EgrBytes1hDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493523: fltTcaL3EgrBytes1dDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493524: fltTcaL3EgrBytes1wDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493525: fltTcaL3EgrBytes1moDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493526: fltTcaL3EgrBytes1qtrDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493527: fltTcaL3EgrBytes1yearDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493528: fltTcaL3EgrBytes5minDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493529: fltTcaL3EgrBytes15minDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493530: fltTcaL3EgrBytes1hDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493531: fltTcaL3EgrBytes1dDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493532: fltTcaL3EgrBytes1wDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493533: fltTcaL3EgrBytes1moDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493534: fltTcaL3EgrBytes1qtrDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493535: fltTcaL3EgrBytes1yearDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493536: fltTcaL3EgrBytes5minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493537: fltTcaL3EgrBytes15minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493538: fltTcaL3EgrBytes1hDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493539: fltTcaL3EgrBytes1dDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493540: fltTcaL3EgrBytes1wDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493541: fltTcaL3EgrBytes1moDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493542: fltTcaL3EgrBytes1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493543: fltTcaL3EgrBytes1yearDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493568: fltTcaL3EgrBytes5minDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493569: fltTcaL3EgrBytes15minDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493570: fltTcaL3EgrBytes1hDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493571: fltTcaL3EgrBytes1dDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493572: fltTcaL3EgrBytes1wDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493573: fltTcaL3EgrBytes1moDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493574: fltTcaL3EgrBytes1qtrDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493575: fltTcaL3EgrBytes1yearDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493576: fltTcaL3EgrBytes5minDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493577: fltTcaL3EgrBytes15minDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493578: fltTcaL3EgrBytes1hDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493579: fltTcaL3EgrBytes1dDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493580: fltTcaL3EgrBytes1wDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493581: fltTcaL3EgrBytes1moDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493582: fltTcaL3EgrBytes1qtrDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493583: fltTcaL3EgrBytes1yearDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493656: fltTcaL3EgrPkts5minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493657: fltTcaL3EgrPkts15minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493658: fltTcaL3EgrPkts1hAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493659: fltTcaL3EgrPkts1dAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493660: fltTcaL3EgrPkts1wAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493661: fltTcaL3EgrPkts1moAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493662: fltTcaL3EgrPkts1qtrAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493663: fltTcaL3EgrPkts1yearAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493672: fltTcaL3EgrPkts5minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493673: fltTcaL3EgrPkts15minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493674: fltTcaL3EgrPkts1hAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493675: fltTcaL3EgrPkts1dAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493676: fltTcaL3EgrPkts1wAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493677: fltTcaL3EgrPkts1moAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493678: fltTcaL3EgrPkts1qtrAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493679: fltTcaL3EgrPkts1yearAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493680: fltTcaL3EgrPkts5minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493681: fltTcaL3EgrPkts15minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493682: fltTcaL3EgrPkts1hAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493683: fltTcaL3EgrPkts1dAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493684: fltTcaL3EgrPkts1wAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493685: fltTcaL3EgrPkts1moAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493686: fltTcaL3EgrPkts1qtrAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493687: fltTcaL3EgrPkts1yearAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493688: fltTcaL3EgrPkts5minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493689: fltTcaL3EgrPkts15minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493690: fltTcaL3EgrPkts1hAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493691: fltTcaL3EgrPkts1dAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493692: fltTcaL3EgrPkts1wAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493693: fltTcaL3EgrPkts1moAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493694: fltTcaL3EgrPkts1qtrAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493695: fltTcaL3EgrPkts1yearAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493696: fltTcaL3EgrPkts5minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493697: fltTcaL3EgrPkts15minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493698: fltTcaL3EgrPkts1hAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493699: fltTcaL3EgrPkts1dAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493700: fltTcaL3EgrPkts1wAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493701: fltTcaL3EgrPkts1moAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493702: fltTcaL3EgrPkts1qtrAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493703: fltTcaL3EgrPkts1yearAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493704: fltTcaL3EgrPkts5minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493705: fltTcaL3EgrPkts15minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493706: fltTcaL3EgrPkts1hAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493707: fltTcaL3EgrPkts1dAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493708: fltTcaL3EgrPkts1wAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493709: fltTcaL3EgrPkts1moAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493710: fltTcaL3EgrPkts1qtrAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493711: fltTcaL3EgrPkts1yearAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493736: fltTcaL3EgrPkts5minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493737: fltTcaL3EgrPkts15minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493738: fltTcaL3EgrPkts1hAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493739: fltTcaL3EgrPkts1dAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493740: fltTcaL3EgrPkts1wAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493741: fltTcaL3EgrPkts1moAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493742: fltTcaL3EgrPkts1qtrAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493743: fltTcaL3EgrPkts1yearAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493744: fltTcaL3EgrPkts5minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493745: fltTcaL3EgrPkts15minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493746: fltTcaL3EgrPkts1hAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493747: fltTcaL3EgrPkts1dAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493748: fltTcaL3EgrPkts1wAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493749: fltTcaL3EgrPkts1moAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493750: fltTcaL3EgrPkts1qtrAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493751: fltTcaL3EgrPkts1yearAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493824: fltTcaL3EgrPkts5minDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493825: fltTcaL3EgrPkts15minDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493826: fltTcaL3EgrPkts1hDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493827: fltTcaL3EgrPkts1dDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493828: fltTcaL3EgrPkts1wDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493829: fltTcaL3EgrPkts1moDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493830: fltTcaL3EgrPkts1qtrDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493831: fltTcaL3EgrPkts1yearDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493840: fltTcaL3EgrPkts5minDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493841: fltTcaL3EgrPkts15minDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493842: fltTcaL3EgrPkts1hDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493843: fltTcaL3EgrPkts1dDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493844: fltTcaL3EgrPkts1wDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493845: fltTcaL3EgrPkts1moDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493846: fltTcaL3EgrPkts1qtrDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493847: fltTcaL3EgrPkts1yearDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493848: fltTcaL3EgrPkts5minDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493849: fltTcaL3EgrPkts15minDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493850: fltTcaL3EgrPkts1hDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493851: fltTcaL3EgrPkts1dDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493852: fltTcaL3EgrPkts1wDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493853: fltTcaL3EgrPkts1moDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493854: fltTcaL3EgrPkts1qtrDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493855: fltTcaL3EgrPkts1yearDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493856: fltTcaL3EgrPkts5minDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493857: fltTcaL3EgrPkts15minDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493858: fltTcaL3EgrPkts1hDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493859: fltTcaL3EgrPkts1dDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493860: fltTcaL3EgrPkts1wDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493861: fltTcaL3EgrPkts1moDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493862: fltTcaL3EgrPkts1qtrDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493863: fltTcaL3EgrPkts1yearDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493864: fltTcaL3EgrPkts5minDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493865: fltTcaL3EgrPkts15minDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493866: fltTcaL3EgrPkts1hDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493867: fltTcaL3EgrPkts1dDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493868: fltTcaL3EgrPkts1wDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493869: fltTcaL3EgrPkts1moDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493870: fltTcaL3EgrPkts1qtrDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493871: fltTcaL3EgrPkts1yearDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493872: fltTcaL3EgrPkts5minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493873: fltTcaL3EgrPkts15minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493874: fltTcaL3EgrPkts1hDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493875: fltTcaL3EgrPkts1dDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493876: fltTcaL3EgrPkts1wDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493877: fltTcaL3EgrPkts1moDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493878: fltTcaL3EgrPkts1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493879: fltTcaL3EgrPkts1yearDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493904: fltTcaL3EgrPkts5minDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493905: fltTcaL3EgrPkts15minDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493906: fltTcaL3EgrPkts1hDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493907: fltTcaL3EgrPkts1dDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493908: fltTcaL3EgrPkts1wDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493909: fltTcaL3EgrPkts1moDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493910: fltTcaL3EgrPkts1qtrDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493911: fltTcaL3EgrPkts1yearDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493912: fltTcaL3EgrPkts5minDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493913: fltTcaL3EgrPkts15minDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493914: fltTcaL3EgrPkts1hDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493915: fltTcaL3EgrPkts1dDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493916: fltTcaL3EgrPkts1wDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493917: fltTcaL3EgrPkts1moDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493918: fltTcaL3EgrPkts1qtrDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493919: fltTcaL3EgrPkts1yearDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493992: fltTcaL3IngrBytes5minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493993: fltTcaL3IngrBytes15minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493994: fltTcaL3IngrBytes1hAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493995: fltTcaL3IngrBytes1dAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493996: fltTcaL3IngrBytes1wAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493997: fltTcaL3IngrBytes1moAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493998: fltTcaL3IngrBytes1qtrAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F493999: fltTcaL3IngrBytes1yearAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494008: fltTcaL3IngrBytes5minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494009: fltTcaL3IngrBytes15minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494010: fltTcaL3IngrBytes1hAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494011: fltTcaL3IngrBytes1dAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494012: fltTcaL3IngrBytes1wAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494013: fltTcaL3IngrBytes1moAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494014: fltTcaL3IngrBytes1qtrAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494015: fltTcaL3IngrBytes1yearAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494016: fltTcaL3IngrBytes5minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494017: fltTcaL3IngrBytes15minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494018: fltTcaL3IngrBytes1hAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494019: fltTcaL3IngrBytes1dAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494020: fltTcaL3IngrBytes1wAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494021: fltTcaL3IngrBytes1moAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494022: fltTcaL3IngrBytes1qtrAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494023: fltTcaL3IngrBytes1yearAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494024: fltTcaL3IngrBytes5minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494025: fltTcaL3IngrBytes15minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494026: fltTcaL3IngrBytes1hAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494027: fltTcaL3IngrBytes1dAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494028: fltTcaL3IngrBytes1wAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494029: fltTcaL3IngrBytes1moAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494030: fltTcaL3IngrBytes1qtrAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494031: fltTcaL3IngrBytes1yearAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494032: fltTcaL3IngrBytes5minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494033: fltTcaL3IngrBytes15minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494034: fltTcaL3IngrBytes1hAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494035: fltTcaL3IngrBytes1dAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494036: fltTcaL3IngrBytes1wAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494037: fltTcaL3IngrBytes1moAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494038: fltTcaL3IngrBytes1qtrAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494039: fltTcaL3IngrBytes1yearAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494040: fltTcaL3IngrBytes5minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494041: fltTcaL3IngrBytes15minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494042: fltTcaL3IngrBytes1hAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494043: fltTcaL3IngrBytes1dAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494044: fltTcaL3IngrBytes1wAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494045: fltTcaL3IngrBytes1moAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494046: fltTcaL3IngrBytes1qtrAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494047: fltTcaL3IngrBytes1yearAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494072: fltTcaL3IngrBytes5minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494073: fltTcaL3IngrBytes15minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494074: fltTcaL3IngrBytes1hAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494075: fltTcaL3IngrBytes1dAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494076: fltTcaL3IngrBytes1wAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494077: fltTcaL3IngrBytes1moAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494078: fltTcaL3IngrBytes1qtrAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494079: fltTcaL3IngrBytes1yearAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494080: fltTcaL3IngrBytes5minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494081: fltTcaL3IngrBytes15minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494082: fltTcaL3IngrBytes1hAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494083: fltTcaL3IngrBytes1dAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494084: fltTcaL3IngrBytes1wAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494085: fltTcaL3IngrBytes1moAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494086: fltTcaL3IngrBytes1qtrAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494087: fltTcaL3IngrBytes1yearAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494160: fltTcaL3IngrBytes5minDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494161: fltTcaL3IngrBytes15minDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494162: fltTcaL3IngrBytes1hDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494163: fltTcaL3IngrBytes1dDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494164: fltTcaL3IngrBytes1wDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494165: fltTcaL3IngrBytes1moDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494166: fltTcaL3IngrBytes1qtrDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494167: fltTcaL3IngrBytes1yearDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494176: fltTcaL3IngrBytes5minDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494177: fltTcaL3IngrBytes15minDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494178: fltTcaL3IngrBytes1hDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494179: fltTcaL3IngrBytes1dDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494180: fltTcaL3IngrBytes1wDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494181: fltTcaL3IngrBytes1moDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494182: fltTcaL3IngrBytes1qtrDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494183: fltTcaL3IngrBytes1yearDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494184: fltTcaL3IngrBytes5minDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494185: fltTcaL3IngrBytes15minDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494186: fltTcaL3IngrBytes1hDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494187: fltTcaL3IngrBytes1dDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494188: fltTcaL3IngrBytes1wDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494189: fltTcaL3IngrBytes1moDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494190: fltTcaL3IngrBytes1qtrDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494191: fltTcaL3IngrBytes1yearDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494192: fltTcaL3IngrBytes5minDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494193: fltTcaL3IngrBytes15minDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494194: fltTcaL3IngrBytes1hDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494195: fltTcaL3IngrBytes1dDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494196: fltTcaL3IngrBytes1wDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494197: fltTcaL3IngrBytes1moDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494198: fltTcaL3IngrBytes1qtrDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494199: fltTcaL3IngrBytes1yearDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494200: fltTcaL3IngrBytes5minDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494201: fltTcaL3IngrBytes15minDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494202: fltTcaL3IngrBytes1hDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494203: fltTcaL3IngrBytes1dDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494204: fltTcaL3IngrBytes1wDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494205: fltTcaL3IngrBytes1moDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494206: fltTcaL3IngrBytes1qtrDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494207: fltTcaL3IngrBytes1yearDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494208: fltTcaL3IngrBytes5minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494209: fltTcaL3IngrBytes15minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494210: fltTcaL3IngrBytes1hDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494211: fltTcaL3IngrBytes1dDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494212: fltTcaL3IngrBytes1wDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494213: fltTcaL3IngrBytes1moDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494214: fltTcaL3IngrBytes1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494215: fltTcaL3IngrBytes1yearDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494240: fltTcaL3IngrBytes5minDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494241: fltTcaL3IngrBytes15minDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494242: fltTcaL3IngrBytes1hDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494243: fltTcaL3IngrBytes1dDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494244: fltTcaL3IngrBytes1wDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494245: fltTcaL3IngrBytes1moDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494246: fltTcaL3IngrBytes1qtrDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494247: fltTcaL3IngrBytes1yearDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494248: fltTcaL3IngrBytes5minDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494249: fltTcaL3IngrBytes15minDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494250: fltTcaL3IngrBytes1hDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494251: fltTcaL3IngrBytes1dDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494252: fltTcaL3IngrBytes1wDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494253: fltTcaL3IngrBytes1moDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494254: fltTcaL3IngrBytes1qtrDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494255: fltTcaL3IngrBytes1yearDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494328: fltTcaL3IngrPkts5minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494329: fltTcaL3IngrPkts15minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494330: fltTcaL3IngrPkts1hAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494331: fltTcaL3IngrPkts1dAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494332: fltTcaL3IngrPkts1wAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494333: fltTcaL3IngrPkts1moAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494334: fltTcaL3IngrPkts1qtrAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494335: fltTcaL3IngrPkts1yearAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494344: fltTcaL3IngrPkts5minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494345: fltTcaL3IngrPkts15minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494346: fltTcaL3IngrPkts1hAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494347: fltTcaL3IngrPkts1dAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494348: fltTcaL3IngrPkts1wAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494349: fltTcaL3IngrPkts1moAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494350: fltTcaL3IngrPkts1qtrAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494351: fltTcaL3IngrPkts1yearAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494352: fltTcaL3IngrPkts5minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494353: fltTcaL3IngrPkts15minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494354: fltTcaL3IngrPkts1hAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494355: fltTcaL3IngrPkts1dAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494356: fltTcaL3IngrPkts1wAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494357: fltTcaL3IngrPkts1moAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494358: fltTcaL3IngrPkts1qtrAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494359: fltTcaL3IngrPkts1yearAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494360: fltTcaL3IngrPkts5minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494361: fltTcaL3IngrPkts15minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494362: fltTcaL3IngrPkts1hAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494363: fltTcaL3IngrPkts1dAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494364: fltTcaL3IngrPkts1wAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494365: fltTcaL3IngrPkts1moAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494366: fltTcaL3IngrPkts1qtrAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494367: fltTcaL3IngrPkts1yearAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494368: fltTcaL3IngrPkts5minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494369: fltTcaL3IngrPkts15minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494370: fltTcaL3IngrPkts1hAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494371: fltTcaL3IngrPkts1dAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494372: fltTcaL3IngrPkts1wAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494373: fltTcaL3IngrPkts1moAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494374: fltTcaL3IngrPkts1qtrAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494375: fltTcaL3IngrPkts1yearAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494376: fltTcaL3IngrPkts5minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494377: fltTcaL3IngrPkts15minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494378: fltTcaL3IngrPkts1hAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494379: fltTcaL3IngrPkts1dAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494380: fltTcaL3IngrPkts1wAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494381: fltTcaL3IngrPkts1moAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494382: fltTcaL3IngrPkts1qtrAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494383: fltTcaL3IngrPkts1yearAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494408: fltTcaL3IngrPkts5minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494409: fltTcaL3IngrPkts15minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494410: fltTcaL3IngrPkts1hAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494411: fltTcaL3IngrPkts1dAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494412: fltTcaL3IngrPkts1wAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494413: fltTcaL3IngrPkts1moAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494414: fltTcaL3IngrPkts1qtrAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494415: fltTcaL3IngrPkts1yearAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494416: fltTcaL3IngrPkts5minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494417: fltTcaL3IngrPkts15minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494418: fltTcaL3IngrPkts1hAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494419: fltTcaL3IngrPkts1dAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494420: fltTcaL3IngrPkts1wAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494421: fltTcaL3IngrPkts1moAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494422: fltTcaL3IngrPkts1qtrAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494423: fltTcaL3IngrPkts1yearAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494496: fltTcaL3IngrPkts5minDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494497: fltTcaL3IngrPkts15minDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494498: fltTcaL3IngrPkts1hDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494499: fltTcaL3IngrPkts1dDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494500: fltTcaL3IngrPkts1wDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494501: fltTcaL3IngrPkts1moDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494502: fltTcaL3IngrPkts1qtrDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494503: fltTcaL3IngrPkts1yearDropLast

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494512: fltTcaL3IngrPkts5minDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494513: fltTcaL3IngrPkts15minDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494514: fltTcaL3IngrPkts1hDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494515: fltTcaL3IngrPkts1dDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494516: fltTcaL3IngrPkts1wDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494517: fltTcaL3IngrPkts1moDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494518: fltTcaL3IngrPkts1qtrDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494519: fltTcaL3IngrPkts1yearDropCum

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494520: fltTcaL3IngrPkts5minDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494521: fltTcaL3IngrPkts15minDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494522: fltTcaL3IngrPkts1hDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494523: fltTcaL3IngrPkts1dDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494524: fltTcaL3IngrPkts1wDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494525: fltTcaL3IngrPkts1moDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494526: fltTcaL3IngrPkts1qtrDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494527: fltTcaL3IngrPkts1yearDropPer

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494528: fltTcaL3IngrPkts5minDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494529: fltTcaL3IngrPkts15minDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494530: fltTcaL3IngrPkts1hDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494531: fltTcaL3IngrPkts1dDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494532: fltTcaL3IngrPkts1wDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494533: fltTcaL3IngrPkts1moDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494534: fltTcaL3IngrPkts1qtrDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494535: fltTcaL3IngrPkts1yearDropMin

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494536: fltTcaL3IngrPkts5minDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494537: fltTcaL3IngrPkts15minDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494538: fltTcaL3IngrPkts1hDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494539: fltTcaL3IngrPkts1dDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494540: fltTcaL3IngrPkts1wDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494541: fltTcaL3IngrPkts1moDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494542: fltTcaL3IngrPkts1qtrDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494543: fltTcaL3IngrPkts1yearDropMax

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494544: fltTcaL3IngrPkts5minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494545: fltTcaL3IngrPkts15minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494546: fltTcaL3IngrPkts1hDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494547: fltTcaL3IngrPkts1dDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494548: fltTcaL3IngrPkts1wDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494549: fltTcaL3IngrPkts1moDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494550: fltTcaL3IngrPkts1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494551: fltTcaL3IngrPkts1yearDropAvg

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494576: fltTcaL3IngrPkts5minDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494577: fltTcaL3IngrPkts15minDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494578: fltTcaL3IngrPkts1hDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494579: fltTcaL3IngrPkts1dDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494580: fltTcaL3IngrPkts1wDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494581: fltTcaL3IngrPkts1moDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494582: fltTcaL3IngrPkts1qtrDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494583: fltTcaL3IngrPkts1yearDropTr

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494584: fltTcaL3IngrPkts5minDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494585: fltTcaL3IngrPkts15minDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494586: fltTcaL3IngrPkts1hDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494587: fltTcaL3IngrPkts1dDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494588: fltTcaL3IngrPkts1wDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494589: fltTcaL3IngrPkts1moDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494590: fltTcaL3IngrPkts1qtrDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494591: fltTcaL3IngrPkts1yearDropRate

Severity: variable

Explanation: This fault is caused by "mpls vrf ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls vrf ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494664: fltTcaL3MplsEgrBytes5minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494665: fltTcaL3MplsEgrBytes15minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494666: fltTcaL3MplsEgrBytes1hAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494667: fltTcaL3MplsEgrBytes1dAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494668: fltTcaL3MplsEgrBytes1wAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494669: fltTcaL3MplsEgrBytes1moAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494670: fltTcaL3MplsEgrBytes1qtrAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494671: fltTcaL3MplsEgrBytes1yearAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494680: fltTcaL3MplsEgrBytes5minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494681: fltTcaL3MplsEgrBytes15minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494682: fltTcaL3MplsEgrBytes1hAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494683: fltTcaL3MplsEgrBytes1dAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494684: fltTcaL3MplsEgrBytes1wAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494685: fltTcaL3MplsEgrBytes1moAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494686: fltTcaL3MplsEgrBytes1qtrAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494687: fltTcaL3MplsEgrBytes1yearAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494688: fltTcaL3MplsEgrBytes5minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494689: fltTcaL3MplsEgrBytes15minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494690: fltTcaL3MplsEgrBytes1hAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494691: fltTcaL3MplsEgrBytes1dAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494692: fltTcaL3MplsEgrBytes1wAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494693: fltTcaL3MplsEgrBytes1moAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494694: fltTcaL3MplsEgrBytes1qtrAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494695: fltTcaL3MplsEgrBytes1yearAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494696: fltTcaL3MplsEgrBytes5minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494697: fltTcaL3MplsEgrBytes15minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494698: fltTcaL3MplsEgrBytes1hAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494699: fltTcaL3MplsEgrBytes1dAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494700: fltTcaL3MplsEgrBytes1wAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494701: fltTcaL3MplsEgrBytes1moAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494702: fltTcaL3MplsEgrBytes1qtrAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494703: fltTcaL3MplsEgrBytes1yearAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494704: fltTcaL3MplsEgrBytes5minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494705: fltTcaL3MplsEgrBytes15minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494706: fltTcaL3MplsEgrBytes1hAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494707: fltTcaL3MplsEgrBytes1dAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494708: fltTcaL3MplsEgrBytes1wAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494709: fltTcaL3MplsEgrBytes1moAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494710: fltTcaL3MplsEgrBytes1qtrAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494711: fltTcaL3MplsEgrBytes1yearAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494712: fltTcaL3MplsEgrBytes5minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494713: fltTcaL3MplsEgrBytes15minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494714: fltTcaL3MplsEgrBytes1hAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494715: fltTcaL3MplsEgrBytes1dAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494716: fltTcaL3MplsEgrBytes1wAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494717: fltTcaL3MplsEgrBytes1moAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494718: fltTcaL3MplsEgrBytes1qtrAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494719: fltTcaL3MplsEgrBytes1yearAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494744: fltTcaL3MplsEgrBytes5minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494745: fltTcaL3MplsEgrBytes15minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494746: fltTcaL3MplsEgrBytes1hAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494747: fltTcaL3MplsEgrBytes1dAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494748: fltTcaL3MplsEgrBytes1wAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494749: fltTcaL3MplsEgrBytes1moAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494750: fltTcaL3MplsEgrBytes1qtrAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494751: fltTcaL3MplsEgrBytes1yearAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494752: fltTcaL3MplsEgrBytes5minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494753: fltTcaL3MplsEgrBytes15minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494754: fltTcaL3MplsEgrBytes1hAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494755: fltTcaL3MplsEgrBytes1dAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494756: fltTcaL3MplsEgrBytes1wAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494757: fltTcaL3MplsEgrBytes1moAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494758: fltTcaL3MplsEgrBytes1qtrAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494759: fltTcaL3MplsEgrBytes1yearAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494832: fltTcaL3MplsEgrBytes5minDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494833: fltTcaL3MplsEgrBytes15minDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494834: fltTcaL3MplsEgrBytes1hDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494835: fltTcaL3MplsEgrBytes1dDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494836: fltTcaL3MplsEgrBytes1wDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494837: fltTcaL3MplsEgrBytes1moDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494838: fltTcaL3MplsEgrBytes1qtrDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494839: fltTcaL3MplsEgrBytes1yearDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494848: fltTcaL3MplsEgrBytes5minDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494849: fltTcaL3MplsEgrBytes15minDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494850: fltTcaL3MplsEgrBytes1hDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494851: fltTcaL3MplsEgrBytes1dDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494852: fltTcaL3MplsEgrBytes1wDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494853: fltTcaL3MplsEgrBytes1moDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494854: fltTcaL3MplsEgrBytes1qtrDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494855: fltTcaL3MplsEgrBytes1yearDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494856: fltTcaL3MplsEgrBytes5minDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494857: fltTcaL3MplsEgrBytes15minDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494858: fltTcaL3MplsEgrBytes1hDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494859: fltTcaL3MplsEgrBytes1dDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494860: fltTcaL3MplsEgrBytes1wDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494861: fltTcaL3MplsEgrBytes1moDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494862: fltTcaL3MplsEgrBytes1qtrDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494863: fltTcaL3MplsEgrBytes1yearDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494864: fltTcaL3MplsEgrBytes5minDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494865: fltTcaL3MplsEgrBytes15minDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494866: fltTcaL3MplsEgrBytes1hDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494867: fltTcaL3MplsEgrBytes1dDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494868: fltTcaL3MplsEgrBytes1wDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494869: fltTcaL3MplsEgrBytes1moDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494870: fltTcaL3MplsEgrBytes1qtrDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494871: fltTcaL3MplsEgrBytes1yearDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494872: fltTcaL3MplsEgrBytes5minDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494873: fltTcaL3MplsEgrBytes15minDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494874: fltTcaL3MplsEgrBytes1hDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494875: fltTcaL3MplsEgrBytes1dDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494876: fltTcaL3MplsEgrBytes1wDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494877: fltTcaL3MplsEgrBytes1moDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494878: fltTcaL3MplsEgrBytes1qtrDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494879: fltTcaL3MplsEgrBytes1yearDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494880: fltTcaL3MplsEgrBytes5minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494881: fltTcaL3MplsEgrBytes15minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494882: fltTcaL3MplsEgrBytes1hDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494883: fltTcaL3MplsEgrBytes1dDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494884: fltTcaL3MplsEgrBytes1wDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494885: fltTcaL3MplsEgrBytes1moDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494886: fltTcaL3MplsEgrBytes1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494887: fltTcaL3MplsEgrBytes1yearDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494912: fltTcaL3MplsEgrBytes5minDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494913: fltTcaL3MplsEgrBytes15minDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494914: fltTcaL3MplsEgrBytes1hDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494915: fltTcaL3MplsEgrBytes1dDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494916: fltTcaL3MplsEgrBytes1wDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494917: fltTcaL3MplsEgrBytes1moDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494918: fltTcaL3MplsEgrBytes1qtrDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494919: fltTcaL3MplsEgrBytes1yearDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494920: fltTcaL3MplsEgrBytes5minDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494921: fltTcaL3MplsEgrBytes15minDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494922: fltTcaL3MplsEgrBytes1hDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494923: fltTcaL3MplsEgrBytes1dDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494924: fltTcaL3MplsEgrBytes1wDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494925: fltTcaL3MplsEgrBytes1moDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494926: fltTcaL3MplsEgrBytes1qtrDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F494927: fltTcaL3MplsEgrBytes1yearDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495000: fltTcaL3MplsEgrPkts5minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495001: fltTcaL3MplsEgrPkts15minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495002: fltTcaL3MplsEgrPkts1hAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495003: fltTcaL3MplsEgrPkts1dAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495004: fltTcaL3MplsEgrPkts1wAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495005: fltTcaL3MplsEgrPkts1moAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495006: fltTcaL3MplsEgrPkts1qtrAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495007: fltTcaL3MplsEgrPkts1yearAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495016: fltTcaL3MplsEgrPkts5minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495017: fltTcaL3MplsEgrPkts15minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495018: fltTcaL3MplsEgrPkts1hAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495019: fltTcaL3MplsEgrPkts1dAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495020: fltTcaL3MplsEgrPkts1wAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495021: fltTcaL3MplsEgrPkts1moAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495022: fltTcaL3MplsEgrPkts1qtrAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495023: fltTcaL3MplsEgrPkts1yearAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495024: fltTcaL3MplsEgrPkts5minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495025: fltTcaL3MplsEgrPkts15minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495026: fltTcaL3MplsEgrPkts1hAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495027: fltTcaL3MplsEgrPkts1dAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495028: fltTcaL3MplsEgrPkts1wAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495029: fltTcaL3MplsEgrPkts1moAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495030: fltTcaL3MplsEgrPkts1qtrAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495031: fltTcaL3MplsEgrPkts1yearAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495032: fltTcaL3MplsEgrPkts5minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495033: fltTcaL3MplsEgrPkts15minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495034: fltTcaL3MplsEgrPkts1hAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495035: fltTcaL3MplsEgrPkts1dAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495036: fltTcaL3MplsEgrPkts1wAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495037: fltTcaL3MplsEgrPkts1moAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495038: fltTcaL3MplsEgrPkts1qtrAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495039: fltTcaL3MplsEgrPkts1yearAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495040: fltTcaL3MplsEgrPkts5minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495041: fltTcaL3MplsEgrPkts15minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495042: fltTcaL3MplsEgrPkts1hAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495043: fltTcaL3MplsEgrPkts1dAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495044: fltTcaL3MplsEgrPkts1wAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495045: fltTcaL3MplsEgrPkts1moAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495046: fltTcaL3MplsEgrPkts1qtrAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495047: fltTcaL3MplsEgrPkts1yearAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495048: fltTcaL3MplsEgrPkts5minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495049: fltTcaL3MplsEgrPkts15minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495050: fltTcaL3MplsEgrPkts1hAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495051: fltTcaL3MplsEgrPkts1dAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495052: fltTcaL3MplsEgrPkts1wAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495053: fltTcaL3MplsEgrPkts1moAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495054: fltTcaL3MplsEgrPkts1qtrAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495055: fltTcaL3MplsEgrPkts1yearAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495080: fltTcaL3MplsEgrPkts5minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495081: fltTcaL3MplsEgrPkts15minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495082: fltTcaL3MplsEgrPkts1hAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495083: fltTcaL3MplsEgrPkts1dAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495084: fltTcaL3MplsEgrPkts1wAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495085: fltTcaL3MplsEgrPkts1moAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495086: fltTcaL3MplsEgrPkts1qtrAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495087: fltTcaL3MplsEgrPkts1yearAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495088: fltTcaL3MplsEgrPkts5minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495089: fltTcaL3MplsEgrPkts15minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495090: fltTcaL3MplsEgrPkts1hAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495091: fltTcaL3MplsEgrPkts1dAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495092: fltTcaL3MplsEgrPkts1wAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495093: fltTcaL3MplsEgrPkts1moAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495094: fltTcaL3MplsEgrPkts1qtrAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495095: fltTcaL3MplsEgrPkts1yearAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls egress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495168: fltTcaL3MplsEgrPkts5minDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495169: fltTcaL3MplsEgrPkts15minDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495170: fltTcaL3MplsEgrPkts1hDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495171: fltTcaL3MplsEgrPkts1dDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495172: fltTcaL3MplsEgrPkts1wDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495173: fltTcaL3MplsEgrPkts1moDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495174: fltTcaL3MplsEgrPkts1qtrDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495175: fltTcaL3MplsEgrPkts1yearDropLast

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495184: fltTcaL3MplsEgrPkts5minDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495185: fltTcaL3MplsEgrPkts15minDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495186: fltTcaL3MplsEgrPkts1hDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495187: fltTcaL3MplsEgrPkts1dDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495188: fltTcaL3MplsEgrPkts1wDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495189: fltTcaL3MplsEgrPkts1moDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495190: fltTcaL3MplsEgrPkts1qtrDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495191: fltTcaL3MplsEgrPkts1yearDropCum

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495192: fltTcaL3MplsEgrPkts5minDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495193: fltTcaL3MplsEgrPkts15minDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495194: fltTcaL3MplsEgrPkts1hDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495195: fltTcaL3MplsEgrPkts1dDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495196: fltTcaL3MplsEgrPkts1wDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495197: fltTcaL3MplsEgrPkts1moDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495198: fltTcaL3MplsEgrPkts1qtrDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495199: fltTcaL3MplsEgrPkts1yearDropPer

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495200: fltTcaL3MplsEgrPkts5minDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495201: fltTcaL3MplsEgrPkts15minDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495202: fltTcaL3MplsEgrPkts1hDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495203: fltTcaL3MplsEgrPkts1dDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495204: fltTcaL3MplsEgrPkts1wDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495205: fltTcaL3MplsEgrPkts1moDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495206: fltTcaL3MplsEgrPkts1qtrDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495207: fltTcaL3MplsEgrPkts1yearDropMin

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495208: fltTcaL3MplsEgrPkts5minDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495209: fltTcaL3MplsEgrPkts15minDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495210: fltTcaL3MplsEgrPkts1hDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495211: fltTcaL3MplsEgrPkts1dDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495212: fltTcaL3MplsEgrPkts1wDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495213: fltTcaL3MplsEgrPkts1moDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495214: fltTcaL3MplsEgrPkts1qtrDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495215: fltTcaL3MplsEgrPkts1yearDropMax

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495216: fltTcaL3MplsEgrPkts5minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495217: fltTcaL3MplsEgrPkts15minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495218: fltTcaL3MplsEgrPkts1hDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495219: fltTcaL3MplsEgrPkts1dDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495220: fltTcaL3MplsEgrPkts1wDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495221: fltTcaL3MplsEgrPkts1moDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495222: fltTcaL3MplsEgrPkts1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495223: fltTcaL3MplsEgrPkts1yearDropAvg

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495248: fltTcaL3MplsEgrPkts5minDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495249: fltTcaL3MplsEgrPkts15minDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495250: fltTcaL3MplsEgrPkts1hDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495251: fltTcaL3MplsEgrPkts1dDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495252: fltTcaL3MplsEgrPkts1wDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495253: fltTcaL3MplsEgrPkts1moDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495254: fltTcaL3MplsEgrPkts1qtrDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495255: fltTcaL3MplsEgrPkts1yearDropTr

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495256: fltTcaL3MplsEgrPkts5minDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495257: fltTcaL3MplsEgrPkts15minDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495258: fltTcaL3MplsEgrPkts1hDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495259: fltTcaL3MplsEgrPkts1dDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495260: fltTcaL3MplsEgrPkts1wDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495261: fltTcaL3MplsEgrPkts1moDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495262: fltTcaL3MplsEgrPkts1qtrDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495263: fltTcaL3MplsEgrPkts1yearDropRate

Severity: variable

Explanation: This fault is caused by "mpls egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495336: fltTcaL3MplsIngrBytes5minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495337: fltTcaL3MplsIngrBytes15minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495338: fltTcaL3MplsIngrBytes1hAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495339: fltTcaL3MplsIngrBytes1dAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495340: fltTcaL3MplsIngrBytes1wAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495341: fltTcaL3MplsIngrBytes1moAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495342: fltTcaL3MplsIngrBytes1qtrAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495343: fltTcaL3MplsIngrBytes1yearAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495352: fltTcaL3MplsIngrBytes5minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495353: fltTcaL3MplsIngrBytes15minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495354: fltTcaL3MplsIngrBytes1hAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495355: fltTcaL3MplsIngrBytes1dAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495356: fltTcaL3MplsIngrBytes1wAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495357: fltTcaL3MplsIngrBytes1moAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495358: fltTcaL3MplsIngrBytes1qtrAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495359: fltTcaL3MplsIngrBytes1yearAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495360: fltTcaL3MplsIngrBytes5minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495361: fltTcaL3MplsIngrBytes15minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495362: fltTcaL3MplsIngrBytes1hAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495363: fltTcaL3MplsIngrBytes1dAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495364: fltTcaL3MplsIngrBytes1wAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495365: fltTcaL3MplsIngrBytes1moAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495366: fltTcaL3MplsIngrBytes1qtrAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495367: fltTcaL3MplsIngrBytes1yearAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495368: fltTcaL3MplsIngrBytes5minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495369: fltTcaL3MplsIngrBytes15minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495370: fltTcaL3MplsIngrBytes1hAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495371: fltTcaL3MplsIngrBytes1dAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495372: fltTcaL3MplsIngrBytes1wAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495373: fltTcaL3MplsIngrBytes1moAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495374: fltTcaL3MplsIngrBytes1qtrAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495375: fltTcaL3MplsIngrBytes1yearAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495376: fltTcaL3MplsIngrBytes5minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495377: fltTcaL3MplsIngrBytes15minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495378: fltTcaL3MplsIngrBytes1hAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495379: fltTcaL3MplsIngrBytes1dAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495380: fltTcaL3MplsIngrBytes1wAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495381: fltTcaL3MplsIngrBytes1moAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495382: fltTcaL3MplsIngrBytes1qtrAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495383: fltTcaL3MplsIngrBytes1yearAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495384: fltTcaL3MplsIngrBytes5minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495385: fltTcaL3MplsIngrBytes15minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495386: fltTcaL3MplsIngrBytes1hAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495387: fltTcaL3MplsIngrBytes1dAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495388: fltTcaL3MplsIngrBytes1wAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495389: fltTcaL3MplsIngrBytes1moAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495390: fltTcaL3MplsIngrBytes1qtrAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495391: fltTcaL3MplsIngrBytes1yearAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495416: fltTcaL3MplsIngrBytes5minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495417: fltTcaL3MplsIngrBytes15minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495418: fltTcaL3MplsIngrBytes1hAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495419: fltTcaL3MplsIngrBytes1dAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495420: fltTcaL3MplsIngrBytes1wAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495421: fltTcaL3MplsIngrBytes1moAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495422: fltTcaL3MplsIngrBytes1qtrAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495423: fltTcaL3MplsIngrBytes1yearAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495424: fltTcaL3MplsIngrBytes5minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495425: fltTcaL3MplsIngrBytes15minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495426: fltTcaL3MplsIngrBytes1hAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495427: fltTcaL3MplsIngrBytes1dAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495428: fltTcaL3MplsIngrBytes1wAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495429: fltTcaL3MplsIngrBytes1moAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495430: fltTcaL3MplsIngrBytes1qtrAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495431: fltTcaL3MplsIngrBytes1yearAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495504: fltTcaL3MplsIngrBytes5minDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495505: fltTcaL3MplsIngrBytes15minDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495506: fltTcaL3MplsIngrBytes1hDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495507: fltTcaL3MplsIngrBytes1dDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495508: fltTcaL3MplsIngrBytes1wDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495509: fltTcaL3MplsIngrBytes1moDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495510: fltTcaL3MplsIngrBytes1qtrDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495511: fltTcaL3MplsIngrBytes1yearDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495520: fltTcaL3MplsIngrBytes5minDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495521: fltTcaL3MplsIngrBytes15minDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495522: fltTcaL3MplsIngrBytes1hDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495523: fltTcaL3MplsIngrBytes1dDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495524: fltTcaL3MplsIngrBytes1wDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495525: fltTcaL3MplsIngrBytes1moDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495526: fltTcaL3MplsIngrBytes1qtrDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495527: fltTcaL3MplsIngrBytes1yearDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495528: fltTcaL3MplsIngrBytes5minDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495529: fltTcaL3MplsIngrBytes15minDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495530: fltTcaL3MplsIngrBytes1hDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495531: fltTcaL3MplsIngrBytes1dDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495532: fltTcaL3MplsIngrBytes1wDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495533: fltTcaL3MplsIngrBytes1moDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495534: fltTcaL3MplsIngrBytes1qtrDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495535: fltTcaL3MplsIngrBytes1yearDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495536: fltTcaL3MplsIngrBytes5minDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495537: fltTcaL3MplsIngrBytes15minDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495538: fltTcaL3MplsIngrBytes1hDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495539: fltTcaL3MplsIngrBytes1dDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495540: fltTcaL3MplsIngrBytes1wDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495541: fltTcaL3MplsIngrBytes1moDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495542: fltTcaL3MplsIngrBytes1qtrDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495543: fltTcaL3MplsIngrBytes1yearDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495544: fltTcaL3MplsIngrBytes5minDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495545: fltTcaL3MplsIngrBytes15minDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495546: fltTcaL3MplsIngrBytes1hDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495547: fltTcaL3MplsIngrBytes1dDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495548: fltTcaL3MplsIngrBytes1wDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495549: fltTcaL3MplsIngrBytes1moDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495550: fltTcaL3MplsIngrBytes1qtrDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495551: fltTcaL3MplsIngrBytes1yearDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495552: fltTcaL3MplsIngrBytes5minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495553: fltTcaL3MplsIngrBytes15minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495554: fltTcaL3MplsIngrBytes1hDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495555: fltTcaL3MplsIngrBytes1dDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495556: fltTcaL3MplsIngrBytes1wDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495557: fltTcaL3MplsIngrBytes1moDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495558: fltTcaL3MplsIngrBytes1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495559: fltTcaL3MplsIngrBytes1yearDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495584: fltTcaL3MplsIngrBytes5minDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495585: fltTcaL3MplsIngrBytes15minDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495586: fltTcaL3MplsIngrBytes1hDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495587: fltTcaL3MplsIngrBytes1dDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495588: fltTcaL3MplsIngrBytes1wDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495589: fltTcaL3MplsIngrBytes1moDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495590: fltTcaL3MplsIngrBytes1qtrDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495591: fltTcaL3MplsIngrBytes1yearDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495592: fltTcaL3MplsIngrBytes5minDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495593: fltTcaL3MplsIngrBytes15minDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495594: fltTcaL3MplsIngrBytes1hDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495595: fltTcaL3MplsIngrBytes1dDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495596: fltTcaL3MplsIngrBytes1wDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495597: fltTcaL3MplsIngrBytes1moDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495598: fltTcaL3MplsIngrBytes1qtrDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495599: fltTcaL3MplsIngrBytes1yearDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495672: fltTcaL3MplsIngrPkts5minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495673: fltTcaL3MplsIngrPkts15minAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495674: fltTcaL3MplsIngrPkts1hAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495675: fltTcaL3MplsIngrPkts1dAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495676: fltTcaL3MplsIngrPkts1wAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495677: fltTcaL3MplsIngrPkts1moAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495678: fltTcaL3MplsIngrPkts1qtrAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495679: fltTcaL3MplsIngrPkts1yearAdmitLast

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495688: fltTcaL3MplsIngrPkts5minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495689: fltTcaL3MplsIngrPkts15minAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495690: fltTcaL3MplsIngrPkts1hAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495691: fltTcaL3MplsIngrPkts1dAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495692: fltTcaL3MplsIngrPkts1wAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495693: fltTcaL3MplsIngrPkts1moAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495694: fltTcaL3MplsIngrPkts1qtrAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495695: fltTcaL3MplsIngrPkts1yearAdmitCum

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495696: fltTcaL3MplsIngrPkts5minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495697: fltTcaL3MplsIngrPkts15minAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495698: fltTcaL3MplsIngrPkts1hAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495699: fltTcaL3MplsIngrPkts1dAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495700: fltTcaL3MplsIngrPkts1wAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495701: fltTcaL3MplsIngrPkts1moAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495702: fltTcaL3MplsIngrPkts1qtrAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495703: fltTcaL3MplsIngrPkts1yearAdmitPer

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495704: fltTcaL3MplsIngrPkts5minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495705: fltTcaL3MplsIngrPkts15minAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495706: fltTcaL3MplsIngrPkts1hAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495707: fltTcaL3MplsIngrPkts1dAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495708: fltTcaL3MplsIngrPkts1wAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495709: fltTcaL3MplsIngrPkts1moAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495710: fltTcaL3MplsIngrPkts1qtrAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495711: fltTcaL3MplsIngrPkts1yearAdmitMin

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495712: fltTcaL3MplsIngrPkts5minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495713: fltTcaL3MplsIngrPkts15minAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495714: fltTcaL3MplsIngrPkts1hAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495715: fltTcaL3MplsIngrPkts1dAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495716: fltTcaL3MplsIngrPkts1wAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495717: fltTcaL3MplsIngrPkts1moAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495718: fltTcaL3MplsIngrPkts1qtrAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495719: fltTcaL3MplsIngrPkts1yearAdmitMax

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495720: fltTcaL3MplsIngrPkts5minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495721: fltTcaL3MplsIngrPkts15minAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495722: fltTcaL3MplsIngrPkts1hAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495723: fltTcaL3MplsIngrPkts1dAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495724: fltTcaL3MplsIngrPkts1wAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495725: fltTcaL3MplsIngrPkts1moAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495726: fltTcaL3MplsIngrPkts1qtrAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495727: fltTcaL3MplsIngrPkts1yearAdmitAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495752: fltTcaL3MplsIngrPkts5minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495753: fltTcaL3MplsIngrPkts15minAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495754: fltTcaL3MplsIngrPkts1hAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495755: fltTcaL3MplsIngrPkts1dAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495756: fltTcaL3MplsIngrPkts1wAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495757: fltTcaL3MplsIngrPkts1moAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495758: fltTcaL3MplsIngrPkts1qtrAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495759: fltTcaL3MplsIngrPkts1yearAdmitTr

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495760: fltTcaL3MplsIngrPkts5minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495761: fltTcaL3MplsIngrPkts15minAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495762: fltTcaL3MplsIngrPkts1hAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495763: fltTcaL3MplsIngrPkts1dAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495764: fltTcaL3MplsIngrPkts1wAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495765: fltTcaL3MplsIngrPkts1moAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495766: fltTcaL3MplsIngrPkts1qtrAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495767: fltTcaL3MplsIngrPkts1yearAdmitRate

Severity: variable

Explanation: This fault is caused by "mpls ingress admit packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress admit packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495840: fltTcaL3MplsIngrPkts5minDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495841: fltTcaL3MplsIngrPkts15minDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495842: fltTcaL3MplsIngrPkts1hDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495843: fltTcaL3MplsIngrPkts1dDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495844: fltTcaL3MplsIngrPkts1wDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495845: fltTcaL3MplsIngrPkts1moDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495846: fltTcaL3MplsIngrPkts1qtrDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495847: fltTcaL3MplsIngrPkts1yearDropLast

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495856: fltTcaL3MplsIngrPkts5minDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495857: fltTcaL3MplsIngrPkts15minDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495858: fltTcaL3MplsIngrPkts1hDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495859: fltTcaL3MplsIngrPkts1dDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495860: fltTcaL3MplsIngrPkts1wDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495861: fltTcaL3MplsIngrPkts1moDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495862: fltTcaL3MplsIngrPkts1qtrDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495863: fltTcaL3MplsIngrPkts1yearDropCum

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495864: fltTcaL3MplsIngrPkts5minDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495865: fltTcaL3MplsIngrPkts15minDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495866: fltTcaL3MplsIngrPkts1hDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495867: fltTcaL3MplsIngrPkts1dDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495868: fltTcaL3MplsIngrPkts1wDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495869: fltTcaL3MplsIngrPkts1moDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495870: fltTcaL3MplsIngrPkts1qtrDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495871: fltTcaL3MplsIngrPkts1yearDropPer

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495872: fltTcaL3MplsIngrPkts5minDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495873: fltTcaL3MplsIngrPkts15minDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495874: fltTcaL3MplsIngrPkts1hDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495875: fltTcaL3MplsIngrPkts1dDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495876: fltTcaL3MplsIngrPkts1wDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495877: fltTcaL3MplsIngrPkts1moDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495878: fltTcaL3MplsIngrPkts1qtrDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495879: fltTcaL3MplsIngrPkts1yearDropMin

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495880: fltTcaL3MplsIngrPkts5minDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495881: fltTcaL3MplsIngrPkts15minDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495882: fltTcaL3MplsIngrPkts1hDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495883: fltTcaL3MplsIngrPkts1dDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495884: fltTcaL3MplsIngrPkts1wDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495885: fltTcaL3MplsIngrPkts1moDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495886: fltTcaL3MplsIngrPkts1qtrDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495887: fltTcaL3MplsIngrPkts1yearDropMax

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495888: fltTcaL3MplsIngrPkts5minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495889: fltTcaL3MplsIngrPkts15minDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495890: fltTcaL3MplsIngrPkts1hDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495891: fltTcaL3MplsIngrPkts1dDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495892: fltTcaL3MplsIngrPkts1wDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495893: fltTcaL3MplsIngrPkts1moDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495894: fltTcaL3MplsIngrPkts1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495895: fltTcaL3MplsIngrPkts1yearDropAvg

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495920: fltTcaL3MplsIngrPkts5minDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495921: fltTcaL3MplsIngrPkts15minDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495922: fltTcaL3MplsIngrPkts1hDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495923: fltTcaL3MplsIngrPkts1dDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495924: fltTcaL3MplsIngrPkts1wDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495925: fltTcaL3MplsIngrPkts1moDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495926: fltTcaL3MplsIngrPkts1qtrDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495927: fltTcaL3MplsIngrPkts1yearDropTr

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495928: fltTcaL3MplsIngrPkts5minDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495929: fltTcaL3MplsIngrPkts15minDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495930: fltTcaL3MplsIngrPkts1hDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495931: fltTcaL3MplsIngrPkts1dDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495932: fltTcaL3MplsIngrPkts1wDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495933: fltTcaL3MplsIngrPkts1moDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495934: fltTcaL3MplsIngrPkts1qtrDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F495935: fltTcaL3MplsIngrPkts1yearDropRate

Severity: variable

Explanation: This fault is caused by "mpls ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "mpls ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497152: fltTcaCloudNwEgressBytes5minDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497153: fltTcaCloudNwEgressBytes15minDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497154: fltTcaCloudNwEgressBytes1hDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497155: fltTcaCloudNwEgressBytes1dDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497156: fltTcaCloudNwEgressBytes1wDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497157: fltTcaCloudNwEgressBytes1moDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497158: fltTcaCloudNwEgressBytes1qtrDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497159: fltTcaCloudNwEgressBytes1yearDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497168: fltTcaCloudNwEgressBytes5minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497169: fltTcaCloudNwEgressBytes15minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497170: fltTcaCloudNwEgressBytes1hDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497171: fltTcaCloudNwEgressBytes1dDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497172: fltTcaCloudNwEgressBytes1wDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497173: fltTcaCloudNwEgressBytes1moDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497174: fltTcaCloudNwEgressBytes1qtrDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497175: fltTcaCloudNwEgressBytes1yearDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497176: fltTcaCloudNwEgressBytes5minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497177: fltTcaCloudNwEgressBytes15minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497178: fltTcaCloudNwEgressBytes1hDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497179: fltTcaCloudNwEgressBytes1dDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497180: fltTcaCloudNwEgressBytes1wDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497181: fltTcaCloudNwEgressBytes1moDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497182: fltTcaCloudNwEgressBytes1qtrDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497183: fltTcaCloudNwEgressBytes1yearDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497184: fltTcaCloudNwEgressBytes5minDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497185: fltTcaCloudNwEgressBytes15minDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497186: fltTcaCloudNwEgressBytes1hDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497187: fltTcaCloudNwEgressBytes1dDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497188: fltTcaCloudNwEgressBytes1wDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497189: fltTcaCloudNwEgressBytes1moDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497190: fltTcaCloudNwEgressBytes1qtrDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497191: fltTcaCloudNwEgressBytes1yearDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497192: fltTcaCloudNwEgressBytes5minDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497193: fltTcaCloudNwEgressBytes15minDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497194: fltTcaCloudNwEgressBytes1hDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497195: fltTcaCloudNwEgressBytes1dDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497196: fltTcaCloudNwEgressBytes1wDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497197: fltTcaCloudNwEgressBytes1moDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497198: fltTcaCloudNwEgressBytes1qtrDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497199: fltTcaCloudNwEgressBytes1yearDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497200: fltTcaCloudNwEgressBytes5minDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497201: fltTcaCloudNwEgressBytes15minDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497202: fltTcaCloudNwEgressBytes1hDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497203: fltTcaCloudNwEgressBytes1dDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497204: fltTcaCloudNwEgressBytes1wDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497205: fltTcaCloudNwEgressBytes1moDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497206: fltTcaCloudNwEgressBytes1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497207: fltTcaCloudNwEgressBytes1yearDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497232: fltTcaCloudNwEgressBytes5minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497233: fltTcaCloudNwEgressBytes15minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497234: fltTcaCloudNwEgressBytes1hDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497235: fltTcaCloudNwEgressBytes1dDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497236: fltTcaCloudNwEgressBytes1wDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497237: fltTcaCloudNwEgressBytes1moDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497238: fltTcaCloudNwEgressBytes1qtrDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497239: fltTcaCloudNwEgressBytes1yearDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497240: fltTcaCloudNwEgressBytes5minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497241: fltTcaCloudNwEgressBytes15minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497242: fltTcaCloudNwEgressBytes1hDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497243: fltTcaCloudNwEgressBytes1dDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497244: fltTcaCloudNwEgressBytes1wDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497245: fltTcaCloudNwEgressBytes1moDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497246: fltTcaCloudNwEgressBytes1qtrDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497247: fltTcaCloudNwEgressBytes1yearDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497320: fltTcaCloudNwEgressBytesAg5minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497321: fltTcaCloudNwEgressBytesAg15minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497322: fltTcaCloudNwEgressBytesAg1hDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497323: fltTcaCloudNwEgressBytesAg1dDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497324: fltTcaCloudNwEgressBytesAg1wDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497325: fltTcaCloudNwEgressBytesAg1moDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497326: fltTcaCloudNwEgressBytesAg1qtrDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497327: fltTcaCloudNwEgressBytesAg1yearDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497328: fltTcaCloudNwEgressBytesAg5minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497329: fltTcaCloudNwEgressBytesAg15minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497330: fltTcaCloudNwEgressBytesAg1hDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497331: fltTcaCloudNwEgressBytesAg1dDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497332: fltTcaCloudNwEgressBytesAg1wDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497333: fltTcaCloudNwEgressBytesAg1moDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497334: fltTcaCloudNwEgressBytesAg1qtrDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497335: fltTcaCloudNwEgressBytesAg1yearDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497360: fltTcaCloudNwEgressBytesAg5minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497361: fltTcaCloudNwEgressBytesAg15minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497362: fltTcaCloudNwEgressBytesAg1hDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497363: fltTcaCloudNwEgressBytesAg1dDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497364: fltTcaCloudNwEgressBytesAg1wDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497365: fltTcaCloudNwEgressBytesAg1moDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497366: fltTcaCloudNwEgressBytesAg1qtrDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497367: fltTcaCloudNwEgressBytesAg1yearDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497368: fltTcaCloudNwEgressBytesAg5minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497369: fltTcaCloudNwEgressBytesAg15minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497370: fltTcaCloudNwEgressBytesAg1hDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497371: fltTcaCloudNwEgressBytesAg1dDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497372: fltTcaCloudNwEgressBytesAg1wDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497373: fltTcaCloudNwEgressBytesAg1moDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497374: fltTcaCloudNwEgressBytesAg1qtrDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497375: fltTcaCloudNwEgressBytesAg1yearDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497424: fltTcaCloudNwEgressBytes5minUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497425: fltTcaCloudNwEgressBytes15minUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497426: fltTcaCloudNwEgressBytes1hUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497427: fltTcaCloudNwEgressBytes1dUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497428: fltTcaCloudNwEgressBytes1wUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497429: fltTcaCloudNwEgressBytes1moUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497430: fltTcaCloudNwEgressBytes1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497431: fltTcaCloudNwEgressBytes1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497440: fltTcaCloudNwEgressBytes5minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497441: fltTcaCloudNwEgressBytes15minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497442: fltTcaCloudNwEgressBytes1hUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497443: fltTcaCloudNwEgressBytes1dUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497444: fltTcaCloudNwEgressBytes1wUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497445: fltTcaCloudNwEgressBytes1moUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497446: fltTcaCloudNwEgressBytes1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497447: fltTcaCloudNwEgressBytes1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497448: fltTcaCloudNwEgressBytes5minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497449: fltTcaCloudNwEgressBytes15minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497450: fltTcaCloudNwEgressBytes1hUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497451: fltTcaCloudNwEgressBytes1dUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497452: fltTcaCloudNwEgressBytes1wUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497453: fltTcaCloudNwEgressBytes1moUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497454: fltTcaCloudNwEgressBytes1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497455: fltTcaCloudNwEgressBytes1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497456: fltTcaCloudNwEgressBytes5minUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497457: fltTcaCloudNwEgressBytes15minUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497458: fltTcaCloudNwEgressBytes1hUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497459: fltTcaCloudNwEgressBytes1dUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497460: fltTcaCloudNwEgressBytes1wUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497461: fltTcaCloudNwEgressBytes1moUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497462: fltTcaCloudNwEgressBytes1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497463: fltTcaCloudNwEgressBytes1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497464: fltTcaCloudNwEgressBytes5minUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497465: fltTcaCloudNwEgressBytes15minUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497466: fltTcaCloudNwEgressBytes1hUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497467: fltTcaCloudNwEgressBytes1dUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497468: fltTcaCloudNwEgressBytes1wUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497469: fltTcaCloudNwEgressBytes1moUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497470: fltTcaCloudNwEgressBytes1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497471: fltTcaCloudNwEgressBytes1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497472: fltTcaCloudNwEgressBytes5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497473: fltTcaCloudNwEgressBytes15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497474: fltTcaCloudNwEgressBytes1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497475: fltTcaCloudNwEgressBytes1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497476: fltTcaCloudNwEgressBytes1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497477: fltTcaCloudNwEgressBytes1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497478: fltTcaCloudNwEgressBytes1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497479: fltTcaCloudNwEgressBytes1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497504: fltTcaCloudNwEgressBytes5minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497505: fltTcaCloudNwEgressBytes15minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497506: fltTcaCloudNwEgressBytes1hUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497507: fltTcaCloudNwEgressBytes1dUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497508: fltTcaCloudNwEgressBytes1wUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497509: fltTcaCloudNwEgressBytes1moUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497510: fltTcaCloudNwEgressBytes1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497511: fltTcaCloudNwEgressBytes1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497512: fltTcaCloudNwEgressBytes5minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497513: fltTcaCloudNwEgressBytes15minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497514: fltTcaCloudNwEgressBytes1hUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497515: fltTcaCloudNwEgressBytes1dUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497516: fltTcaCloudNwEgressBytes1wUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497517: fltTcaCloudNwEgressBytes1moUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497518: fltTcaCloudNwEgressBytes1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497519: fltTcaCloudNwEgressBytes1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497592: fltTcaCloudNwEgressBytesAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497593: fltTcaCloudNwEgressBytesAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497594: fltTcaCloudNwEgressBytesAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497595: fltTcaCloudNwEgressBytesAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497596: fltTcaCloudNwEgressBytesAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497597: fltTcaCloudNwEgressBytesAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497598: fltTcaCloudNwEgressBytesAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497599: fltTcaCloudNwEgressBytesAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497600: fltTcaCloudNwEgressBytesAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497601: fltTcaCloudNwEgressBytesAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497602: fltTcaCloudNwEgressBytesAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497603: fltTcaCloudNwEgressBytesAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497604: fltTcaCloudNwEgressBytesAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497605: fltTcaCloudNwEgressBytesAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497606: fltTcaCloudNwEgressBytesAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497607: fltTcaCloudNwEgressBytesAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497632: fltTcaCloudNwEgressBytesAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497633: fltTcaCloudNwEgressBytesAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497634: fltTcaCloudNwEgressBytesAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497635: fltTcaCloudNwEgressBytesAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497636: fltTcaCloudNwEgressBytesAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497637: fltTcaCloudNwEgressBytesAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497638: fltTcaCloudNwEgressBytesAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497639: fltTcaCloudNwEgressBytesAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497640: fltTcaCloudNwEgressBytesAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497641: fltTcaCloudNwEgressBytesAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497642: fltTcaCloudNwEgressBytesAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497643: fltTcaCloudNwEgressBytesAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497644: fltTcaCloudNwEgressBytesAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497645: fltTcaCloudNwEgressBytesAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497646: fltTcaCloudNwEgressBytesAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497647: fltTcaCloudNwEgressBytesAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497696: fltTcaCloudNwEgressPkts5minDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497697: fltTcaCloudNwEgressPkts15minDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497698: fltTcaCloudNwEgressPkts1hDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497699: fltTcaCloudNwEgressPkts1dDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497700: fltTcaCloudNwEgressPkts1wDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497701: fltTcaCloudNwEgressPkts1moDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497702: fltTcaCloudNwEgressPkts1qtrDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497703: fltTcaCloudNwEgressPkts1yearDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497712: fltTcaCloudNwEgressPkts5minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497713: fltTcaCloudNwEgressPkts15minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497714: fltTcaCloudNwEgressPkts1hDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497715: fltTcaCloudNwEgressPkts1dDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497716: fltTcaCloudNwEgressPkts1wDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497717: fltTcaCloudNwEgressPkts1moDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497718: fltTcaCloudNwEgressPkts1qtrDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497719: fltTcaCloudNwEgressPkts1yearDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497720: fltTcaCloudNwEgressPkts5minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497721: fltTcaCloudNwEgressPkts15minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497722: fltTcaCloudNwEgressPkts1hDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497723: fltTcaCloudNwEgressPkts1dDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497724: fltTcaCloudNwEgressPkts1wDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497725: fltTcaCloudNwEgressPkts1moDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497726: fltTcaCloudNwEgressPkts1qtrDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497727: fltTcaCloudNwEgressPkts1yearDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497728: fltTcaCloudNwEgressPkts5minDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497729: fltTcaCloudNwEgressPkts15minDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497730: fltTcaCloudNwEgressPkts1hDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497731: fltTcaCloudNwEgressPkts1dDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497732: fltTcaCloudNwEgressPkts1wDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497733: fltTcaCloudNwEgressPkts1moDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497734: fltTcaCloudNwEgressPkts1qtrDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497735: fltTcaCloudNwEgressPkts1yearDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497736: fltTcaCloudNwEgressPkts5minDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497737: fltTcaCloudNwEgressPkts15minDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497738: fltTcaCloudNwEgressPkts1hDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497739: fltTcaCloudNwEgressPkts1dDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497740: fltTcaCloudNwEgressPkts1wDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497741: fltTcaCloudNwEgressPkts1moDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497742: fltTcaCloudNwEgressPkts1qtrDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497743: fltTcaCloudNwEgressPkts1yearDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497744: fltTcaCloudNwEgressPkts5minDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497745: fltTcaCloudNwEgressPkts15minDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497746: fltTcaCloudNwEgressPkts1hDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497747: fltTcaCloudNwEgressPkts1dDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497748: fltTcaCloudNwEgressPkts1wDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497749: fltTcaCloudNwEgressPkts1moDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497750: fltTcaCloudNwEgressPkts1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497751: fltTcaCloudNwEgressPkts1yearDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497776: fltTcaCloudNwEgressPkts5minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497777: fltTcaCloudNwEgressPkts15minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497778: fltTcaCloudNwEgressPkts1hDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497779: fltTcaCloudNwEgressPkts1dDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497780: fltTcaCloudNwEgressPkts1wDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497781: fltTcaCloudNwEgressPkts1moDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497782: fltTcaCloudNwEgressPkts1qtrDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497783: fltTcaCloudNwEgressPkts1yearDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497784: fltTcaCloudNwEgressPkts5minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497785: fltTcaCloudNwEgressPkts15minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497786: fltTcaCloudNwEgressPkts1hDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497787: fltTcaCloudNwEgressPkts1dDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497788: fltTcaCloudNwEgressPkts1wDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497789: fltTcaCloudNwEgressPkts1moDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497790: fltTcaCloudNwEgressPkts1qtrDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497791: fltTcaCloudNwEgressPkts1yearDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497864: fltTcaCloudNwEgressPktsAg5minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497865: fltTcaCloudNwEgressPktsAg15minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497866: fltTcaCloudNwEgressPktsAg1hDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497867: fltTcaCloudNwEgressPktsAg1dDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497868: fltTcaCloudNwEgressPktsAg1wDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497869: fltTcaCloudNwEgressPktsAg1moDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497870: fltTcaCloudNwEgressPktsAg1qtrDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497871: fltTcaCloudNwEgressPktsAg1yearDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497872: fltTcaCloudNwEgressPktsAg5minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497873: fltTcaCloudNwEgressPktsAg15minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497874: fltTcaCloudNwEgressPktsAg1hDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497875: fltTcaCloudNwEgressPktsAg1dDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497876: fltTcaCloudNwEgressPktsAg1wDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497877: fltTcaCloudNwEgressPktsAg1moDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497878: fltTcaCloudNwEgressPktsAg1qtrDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497879: fltTcaCloudNwEgressPktsAg1yearDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497904: fltTcaCloudNwEgressPktsAg5minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497905: fltTcaCloudNwEgressPktsAg15minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497906: fltTcaCloudNwEgressPktsAg1hDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497907: fltTcaCloudNwEgressPktsAg1dDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497908: fltTcaCloudNwEgressPktsAg1wDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497909: fltTcaCloudNwEgressPktsAg1moDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497910: fltTcaCloudNwEgressPktsAg1qtrDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497911: fltTcaCloudNwEgressPktsAg1yearDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497912: fltTcaCloudNwEgressPktsAg5minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497913: fltTcaCloudNwEgressPktsAg15minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497914: fltTcaCloudNwEgressPktsAg1hDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497915: fltTcaCloudNwEgressPktsAg1dDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497916: fltTcaCloudNwEgressPktsAg1wDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497917: fltTcaCloudNwEgressPktsAg1moDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497918: fltTcaCloudNwEgressPktsAg1qtrDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497919: fltTcaCloudNwEgressPktsAg1yearDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497968: fltTcaCloudNwEgressPkts5minUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497969: fltTcaCloudNwEgressPkts15minUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497970: fltTcaCloudNwEgressPkts1hUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497971: fltTcaCloudNwEgressPkts1dUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497972: fltTcaCloudNwEgressPkts1wUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497973: fltTcaCloudNwEgressPkts1moUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497974: fltTcaCloudNwEgressPkts1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497975: fltTcaCloudNwEgressPkts1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497984: fltTcaCloudNwEgressPkts5minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497985: fltTcaCloudNwEgressPkts15minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497986: fltTcaCloudNwEgressPkts1hUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497987: fltTcaCloudNwEgressPkts1dUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497988: fltTcaCloudNwEgressPkts1wUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497989: fltTcaCloudNwEgressPkts1moUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497990: fltTcaCloudNwEgressPkts1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497991: fltTcaCloudNwEgressPkts1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497992: fltTcaCloudNwEgressPkts5minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497993: fltTcaCloudNwEgressPkts15minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497994: fltTcaCloudNwEgressPkts1hUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497995: fltTcaCloudNwEgressPkts1dUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497996: fltTcaCloudNwEgressPkts1wUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497997: fltTcaCloudNwEgressPkts1moUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497998: fltTcaCloudNwEgressPkts1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F497999: fltTcaCloudNwEgressPkts1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498000: fltTcaCloudNwEgressPkts5minUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498001: fltTcaCloudNwEgressPkts15minUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498002: fltTcaCloudNwEgressPkts1hUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498003: fltTcaCloudNwEgressPkts1dUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498004: fltTcaCloudNwEgressPkts1wUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498005: fltTcaCloudNwEgressPkts1moUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498006: fltTcaCloudNwEgressPkts1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498007: fltTcaCloudNwEgressPkts1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498008: fltTcaCloudNwEgressPkts5minUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498009: fltTcaCloudNwEgressPkts15minUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498010: fltTcaCloudNwEgressPkts1hUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498011: fltTcaCloudNwEgressPkts1dUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498012: fltTcaCloudNwEgressPkts1wUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498013: fltTcaCloudNwEgressPkts1moUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498014: fltTcaCloudNwEgressPkts1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498015: fltTcaCloudNwEgressPkts1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498016: fltTcaCloudNwEgressPkts5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498017: fltTcaCloudNwEgressPkts15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498018: fltTcaCloudNwEgressPkts1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498019: fltTcaCloudNwEgressPkts1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498020: fltTcaCloudNwEgressPkts1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498021: fltTcaCloudNwEgressPkts1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498022: fltTcaCloudNwEgressPkts1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498023: fltTcaCloudNwEgressPkts1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498048: fltTcaCloudNwEgressPkts5minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498049: fltTcaCloudNwEgressPkts15minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498050: fltTcaCloudNwEgressPkts1hUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498051: fltTcaCloudNwEgressPkts1dUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498052: fltTcaCloudNwEgressPkts1wUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498053: fltTcaCloudNwEgressPkts1moUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498054: fltTcaCloudNwEgressPkts1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498055: fltTcaCloudNwEgressPkts1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498056: fltTcaCloudNwEgressPkts5minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498057: fltTcaCloudNwEgressPkts15minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498058: fltTcaCloudNwEgressPkts1hUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498059: fltTcaCloudNwEgressPkts1dUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498060: fltTcaCloudNwEgressPkts1wUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498061: fltTcaCloudNwEgressPkts1moUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498062: fltTcaCloudNwEgressPkts1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498063: fltTcaCloudNwEgressPkts1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498136: fltTcaCloudNwEgressPktsAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498137: fltTcaCloudNwEgressPktsAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498138: fltTcaCloudNwEgressPktsAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498139: fltTcaCloudNwEgressPktsAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498140: fltTcaCloudNwEgressPktsAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498141: fltTcaCloudNwEgressPktsAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498142: fltTcaCloudNwEgressPktsAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498143: fltTcaCloudNwEgressPktsAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498144: fltTcaCloudNwEgressPktsAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498145: fltTcaCloudNwEgressPktsAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498146: fltTcaCloudNwEgressPktsAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498147: fltTcaCloudNwEgressPktsAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498148: fltTcaCloudNwEgressPktsAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498149: fltTcaCloudNwEgressPktsAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498150: fltTcaCloudNwEgressPktsAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498151: fltTcaCloudNwEgressPktsAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498176: fltTcaCloudNwEgressPktsAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498177: fltTcaCloudNwEgressPktsAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498178: fltTcaCloudNwEgressPktsAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498179: fltTcaCloudNwEgressPktsAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498180: fltTcaCloudNwEgressPktsAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498181: fltTcaCloudNwEgressPktsAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498182: fltTcaCloudNwEgressPktsAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498183: fltTcaCloudNwEgressPktsAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498184: fltTcaCloudNwEgressPktsAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498185: fltTcaCloudNwEgressPktsAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498186: fltTcaCloudNwEgressPktsAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498187: fltTcaCloudNwEgressPktsAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498188: fltTcaCloudNwEgressPktsAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498189: fltTcaCloudNwEgressPktsAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498190: fltTcaCloudNwEgressPktsAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498191: fltTcaCloudNwEgressPktsAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498240: fltTcaCloudNwIngressBytes5minDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498241: fltTcaCloudNwIngressBytes15minDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498242: fltTcaCloudNwIngressBytes1hDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498243: fltTcaCloudNwIngressBytes1dDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498244: fltTcaCloudNwIngressBytes1wDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498245: fltTcaCloudNwIngressBytes1moDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498246: fltTcaCloudNwIngressBytes1qtrDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498247: fltTcaCloudNwIngressBytes1yearDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498256: fltTcaCloudNwIngressBytes5minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498257: fltTcaCloudNwIngressBytes15minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498258: fltTcaCloudNwIngressBytes1hDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498259: fltTcaCloudNwIngressBytes1dDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498260: fltTcaCloudNwIngressBytes1wDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498261: fltTcaCloudNwIngressBytes1moDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498262: fltTcaCloudNwIngressBytes1qtrDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498263: fltTcaCloudNwIngressBytes1yearDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498264: fltTcaCloudNwIngressBytes5minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498265: fltTcaCloudNwIngressBytes15minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498266: fltTcaCloudNwIngressBytes1hDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498267: fltTcaCloudNwIngressBytes1dDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498268: fltTcaCloudNwIngressBytes1wDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498269: fltTcaCloudNwIngressBytes1moDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498270: fltTcaCloudNwIngressBytes1qtrDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498271: fltTcaCloudNwIngressBytes1yearDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498272: fltTcaCloudNwIngressBytes5minDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498273: fltTcaCloudNwIngressBytes15minDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498274: fltTcaCloudNwIngressBytes1hDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498275: fltTcaCloudNwIngressBytes1dDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498276: fltTcaCloudNwIngressBytes1wDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498277: fltTcaCloudNwIngressBytes1moDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498278: fltTcaCloudNwIngressBytes1qtrDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498279: fltTcaCloudNwIngressBytes1yearDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498280: fltTcaCloudNwIngressBytes5minDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498281: fltTcaCloudNwIngressBytes15minDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498282: fltTcaCloudNwIngressBytes1hDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498283: fltTcaCloudNwIngressBytes1dDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498284: fltTcaCloudNwIngressBytes1wDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498285: fltTcaCloudNwIngressBytes1moDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498286: fltTcaCloudNwIngressBytes1qtrDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498287: fltTcaCloudNwIngressBytes1yearDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498288: fltTcaCloudNwIngressBytes5minDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498289: fltTcaCloudNwIngressBytes15minDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498290: fltTcaCloudNwIngressBytes1hDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498291: fltTcaCloudNwIngressBytes1dDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498292: fltTcaCloudNwIngressBytes1wDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498293: fltTcaCloudNwIngressBytes1moDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498294: fltTcaCloudNwIngressBytes1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498295: fltTcaCloudNwIngressBytes1yearDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498320: fltTcaCloudNwIngressBytes5minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498321: fltTcaCloudNwIngressBytes15minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498322: fltTcaCloudNwIngressBytes1hDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498323: fltTcaCloudNwIngressBytes1dDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498324: fltTcaCloudNwIngressBytes1wDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498325: fltTcaCloudNwIngressBytes1moDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498326: fltTcaCloudNwIngressBytes1qtrDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498327: fltTcaCloudNwIngressBytes1yearDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498328: fltTcaCloudNwIngressBytes5minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498329: fltTcaCloudNwIngressBytes15minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498330: fltTcaCloudNwIngressBytes1hDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498331: fltTcaCloudNwIngressBytes1dDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498332: fltTcaCloudNwIngressBytes1wDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498333: fltTcaCloudNwIngressBytes1moDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498334: fltTcaCloudNwIngressBytes1qtrDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498335: fltTcaCloudNwIngressBytes1yearDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498408: fltTcaCloudNwIngressBytesAg5minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498409: fltTcaCloudNwIngressBytesAg15minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498410: fltTcaCloudNwIngressBytesAg1hDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498411: fltTcaCloudNwIngressBytesAg1dDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498412: fltTcaCloudNwIngressBytesAg1wDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498413: fltTcaCloudNwIngressBytesAg1moDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498414: fltTcaCloudNwIngressBytesAg1qtrDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498415: fltTcaCloudNwIngressBytesAg1yearDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498416: fltTcaCloudNwIngressBytesAg5minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498417: fltTcaCloudNwIngressBytesAg15minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498418: fltTcaCloudNwIngressBytesAg1hDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498419: fltTcaCloudNwIngressBytesAg1dDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498420: fltTcaCloudNwIngressBytesAg1wDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498421: fltTcaCloudNwIngressBytesAg1moDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498422: fltTcaCloudNwIngressBytesAg1qtrDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498423: fltTcaCloudNwIngressBytesAg1yearDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498448: fltTcaCloudNwIngressBytesAg5minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498449: fltTcaCloudNwIngressBytesAg15minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498450: fltTcaCloudNwIngressBytesAg1hDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498451: fltTcaCloudNwIngressBytesAg1dDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498452: fltTcaCloudNwIngressBytesAg1wDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498453: fltTcaCloudNwIngressBytesAg1moDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498454: fltTcaCloudNwIngressBytesAg1qtrDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498455: fltTcaCloudNwIngressBytesAg1yearDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498456: fltTcaCloudNwIngressBytesAg5minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498457: fltTcaCloudNwIngressBytesAg15minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498458: fltTcaCloudNwIngressBytesAg1hDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498459: fltTcaCloudNwIngressBytesAg1dDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498460: fltTcaCloudNwIngressBytesAg1wDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498461: fltTcaCloudNwIngressBytesAg1moDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498462: fltTcaCloudNwIngressBytesAg1qtrDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498463: fltTcaCloudNwIngressBytesAg1yearDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498512: fltTcaCloudNwIngressBytes5minUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498513: fltTcaCloudNwIngressBytes15minUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498514: fltTcaCloudNwIngressBytes1hUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498515: fltTcaCloudNwIngressBytes1dUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498516: fltTcaCloudNwIngressBytes1wUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498517: fltTcaCloudNwIngressBytes1moUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498518: fltTcaCloudNwIngressBytes1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498519: fltTcaCloudNwIngressBytes1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498528: fltTcaCloudNwIngressBytes5minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498529: fltTcaCloudNwIngressBytes15minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498530: fltTcaCloudNwIngressBytes1hUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498531: fltTcaCloudNwIngressBytes1dUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498532: fltTcaCloudNwIngressBytes1wUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498533: fltTcaCloudNwIngressBytes1moUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498534: fltTcaCloudNwIngressBytes1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498535: fltTcaCloudNwIngressBytes1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498536: fltTcaCloudNwIngressBytes5minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498537: fltTcaCloudNwIngressBytes15minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498538: fltTcaCloudNwIngressBytes1hUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498539: fltTcaCloudNwIngressBytes1dUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498540: fltTcaCloudNwIngressBytes1wUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498541: fltTcaCloudNwIngressBytes1moUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498542: fltTcaCloudNwIngressBytes1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498543: fltTcaCloudNwIngressBytes1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498544: fltTcaCloudNwIngressBytes5minUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498545: fltTcaCloudNwIngressBytes15minUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498546: fltTcaCloudNwIngressBytes1hUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498547: fltTcaCloudNwIngressBytes1dUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498548: fltTcaCloudNwIngressBytes1wUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498549: fltTcaCloudNwIngressBytes1moUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498550: fltTcaCloudNwIngressBytes1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498551: fltTcaCloudNwIngressBytes1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498552: fltTcaCloudNwIngressBytes5minUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498553: fltTcaCloudNwIngressBytes15minUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498554: fltTcaCloudNwIngressBytes1hUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498555: fltTcaCloudNwIngressBytes1dUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498556: fltTcaCloudNwIngressBytes1wUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498557: fltTcaCloudNwIngressBytes1moUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498558: fltTcaCloudNwIngressBytes1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498559: fltTcaCloudNwIngressBytes1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498560: fltTcaCloudNwIngressBytes5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498561: fltTcaCloudNwIngressBytes15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498562: fltTcaCloudNwIngressBytes1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498563: fltTcaCloudNwIngressBytes1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498564: fltTcaCloudNwIngressBytes1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498565: fltTcaCloudNwIngressBytes1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498566: fltTcaCloudNwIngressBytes1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498567: fltTcaCloudNwIngressBytes1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498592: fltTcaCloudNwIngressBytes5minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498593: fltTcaCloudNwIngressBytes15minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498594: fltTcaCloudNwIngressBytes1hUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498595: fltTcaCloudNwIngressBytes1dUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498596: fltTcaCloudNwIngressBytes1wUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498597: fltTcaCloudNwIngressBytes1moUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498598: fltTcaCloudNwIngressBytes1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498599: fltTcaCloudNwIngressBytes1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498600: fltTcaCloudNwIngressBytes5minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498601: fltTcaCloudNwIngressBytes15minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498602: fltTcaCloudNwIngressBytes1hUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498603: fltTcaCloudNwIngressBytes1dUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498604: fltTcaCloudNwIngressBytes1wUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498605: fltTcaCloudNwIngressBytes1moUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498606: fltTcaCloudNwIngressBytes1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498607: fltTcaCloudNwIngressBytes1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498680: fltTcaCloudNwIngressBytesAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498681: fltTcaCloudNwIngressBytesAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498682: fltTcaCloudNwIngressBytesAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498683: fltTcaCloudNwIngressBytesAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498684: fltTcaCloudNwIngressBytesAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498685: fltTcaCloudNwIngressBytesAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498686: fltTcaCloudNwIngressBytesAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498687: fltTcaCloudNwIngressBytesAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498688: fltTcaCloudNwIngressBytesAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498689: fltTcaCloudNwIngressBytesAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498690: fltTcaCloudNwIngressBytesAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498691: fltTcaCloudNwIngressBytesAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498692: fltTcaCloudNwIngressBytesAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498693: fltTcaCloudNwIngressBytesAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498694: fltTcaCloudNwIngressBytesAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498695: fltTcaCloudNwIngressBytesAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498720: fltTcaCloudNwIngressBytesAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498721: fltTcaCloudNwIngressBytesAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498722: fltTcaCloudNwIngressBytesAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498723: fltTcaCloudNwIngressBytesAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498724: fltTcaCloudNwIngressBytesAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498725: fltTcaCloudNwIngressBytesAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498726: fltTcaCloudNwIngressBytesAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498727: fltTcaCloudNwIngressBytesAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498728: fltTcaCloudNwIngressBytesAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498729: fltTcaCloudNwIngressBytesAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498730: fltTcaCloudNwIngressBytesAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498731: fltTcaCloudNwIngressBytesAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498732: fltTcaCloudNwIngressBytesAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498733: fltTcaCloudNwIngressBytesAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498734: fltTcaCloudNwIngressBytesAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498735: fltTcaCloudNwIngressBytesAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498784: fltTcaCloudNwIngressPkts5minDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498785: fltTcaCloudNwIngressPkts15minDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498786: fltTcaCloudNwIngressPkts1hDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498787: fltTcaCloudNwIngressPkts1dDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498788: fltTcaCloudNwIngressPkts1wDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498789: fltTcaCloudNwIngressPkts1moDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498790: fltTcaCloudNwIngressPkts1qtrDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498791: fltTcaCloudNwIngressPkts1yearDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498800: fltTcaCloudNwIngressPkts5minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498801: fltTcaCloudNwIngressPkts15minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498802: fltTcaCloudNwIngressPkts1hDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498803: fltTcaCloudNwIngressPkts1dDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498804: fltTcaCloudNwIngressPkts1wDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498805: fltTcaCloudNwIngressPkts1moDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498806: fltTcaCloudNwIngressPkts1qtrDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498807: fltTcaCloudNwIngressPkts1yearDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498808: fltTcaCloudNwIngressPkts5minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498809: fltTcaCloudNwIngressPkts15minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498810: fltTcaCloudNwIngressPkts1hDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498811: fltTcaCloudNwIngressPkts1dDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498812: fltTcaCloudNwIngressPkts1wDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498813: fltTcaCloudNwIngressPkts1moDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498814: fltTcaCloudNwIngressPkts1qtrDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498815: fltTcaCloudNwIngressPkts1yearDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498816: fltTcaCloudNwIngressPkts5minDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498817: fltTcaCloudNwIngressPkts15minDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498818: fltTcaCloudNwIngressPkts1hDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498819: fltTcaCloudNwIngressPkts1dDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498820: fltTcaCloudNwIngressPkts1wDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498821: fltTcaCloudNwIngressPkts1moDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498822: fltTcaCloudNwIngressPkts1qtrDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498823: fltTcaCloudNwIngressPkts1yearDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498824: fltTcaCloudNwIngressPkts5minDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498825: fltTcaCloudNwIngressPkts15minDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498826: fltTcaCloudNwIngressPkts1hDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498827: fltTcaCloudNwIngressPkts1dDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498828: fltTcaCloudNwIngressPkts1wDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498829: fltTcaCloudNwIngressPkts1moDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498830: fltTcaCloudNwIngressPkts1qtrDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498831: fltTcaCloudNwIngressPkts1yearDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498832: fltTcaCloudNwIngressPkts5minDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498833: fltTcaCloudNwIngressPkts15minDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498834: fltTcaCloudNwIngressPkts1hDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498835: fltTcaCloudNwIngressPkts1dDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498836: fltTcaCloudNwIngressPkts1wDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498837: fltTcaCloudNwIngressPkts1moDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498838: fltTcaCloudNwIngressPkts1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498839: fltTcaCloudNwIngressPkts1yearDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498864: fltTcaCloudNwIngressPkts5minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498865: fltTcaCloudNwIngressPkts15minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498866: fltTcaCloudNwIngressPkts1hDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498867: fltTcaCloudNwIngressPkts1dDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498868: fltTcaCloudNwIngressPkts1wDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498869: fltTcaCloudNwIngressPkts1moDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498870: fltTcaCloudNwIngressPkts1qtrDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498871: fltTcaCloudNwIngressPkts1yearDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498872: fltTcaCloudNwIngressPkts5minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498873: fltTcaCloudNwIngressPkts15minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498874: fltTcaCloudNwIngressPkts1hDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498875: fltTcaCloudNwIngressPkts1dDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498876: fltTcaCloudNwIngressPkts1wDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498877: fltTcaCloudNwIngressPkts1moDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498878: fltTcaCloudNwIngressPkts1qtrDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498879: fltTcaCloudNwIngressPkts1yearDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498952: fltTcaCloudNwIngressPktsAg5minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498953: fltTcaCloudNwIngressPktsAg15minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498954: fltTcaCloudNwIngressPktsAg1hDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498955: fltTcaCloudNwIngressPktsAg1dDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498956: fltTcaCloudNwIngressPktsAg1wDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498957: fltTcaCloudNwIngressPktsAg1moDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498958: fltTcaCloudNwIngressPktsAg1qtrDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498959: fltTcaCloudNwIngressPktsAg1yearDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498960: fltTcaCloudNwIngressPktsAg5minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498961: fltTcaCloudNwIngressPktsAg15minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498962: fltTcaCloudNwIngressPktsAg1hDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498963: fltTcaCloudNwIngressPktsAg1dDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498964: fltTcaCloudNwIngressPktsAg1wDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498965: fltTcaCloudNwIngressPktsAg1moDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498966: fltTcaCloudNwIngressPktsAg1qtrDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498967: fltTcaCloudNwIngressPktsAg1yearDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498992: fltTcaCloudNwIngressPktsAg5minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498993: fltTcaCloudNwIngressPktsAg15minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498994: fltTcaCloudNwIngressPktsAg1hDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498995: fltTcaCloudNwIngressPktsAg1dDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498996: fltTcaCloudNwIngressPktsAg1wDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498997: fltTcaCloudNwIngressPktsAg1moDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498998: fltTcaCloudNwIngressPktsAg1qtrDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F498999: fltTcaCloudNwIngressPktsAg1yearDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499000: fltTcaCloudNwIngressPktsAg5minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499001: fltTcaCloudNwIngressPktsAg15minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499002: fltTcaCloudNwIngressPktsAg1hDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499003: fltTcaCloudNwIngressPktsAg1dDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499004: fltTcaCloudNwIngressPktsAg1wDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499005: fltTcaCloudNwIngressPktsAg1moDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499006: fltTcaCloudNwIngressPktsAg1qtrDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499007: fltTcaCloudNwIngressPktsAg1yearDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499056: fltTcaCloudNwIngressPkts5minUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499057: fltTcaCloudNwIngressPkts15minUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499058: fltTcaCloudNwIngressPkts1hUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499059: fltTcaCloudNwIngressPkts1dUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499060: fltTcaCloudNwIngressPkts1wUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499061: fltTcaCloudNwIngressPkts1moUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499062: fltTcaCloudNwIngressPkts1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499063: fltTcaCloudNwIngressPkts1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499072: fltTcaCloudNwIngressPkts5minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499073: fltTcaCloudNwIngressPkts15minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499074: fltTcaCloudNwIngressPkts1hUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499075: fltTcaCloudNwIngressPkts1dUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499076: fltTcaCloudNwIngressPkts1wUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499077: fltTcaCloudNwIngressPkts1moUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499078: fltTcaCloudNwIngressPkts1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499079: fltTcaCloudNwIngressPkts1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499080: fltTcaCloudNwIngressPkts5minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499081: fltTcaCloudNwIngressPkts15minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499082: fltTcaCloudNwIngressPkts1hUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499083: fltTcaCloudNwIngressPkts1dUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499084: fltTcaCloudNwIngressPkts1wUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499085: fltTcaCloudNwIngressPkts1moUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499086: fltTcaCloudNwIngressPkts1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499087: fltTcaCloudNwIngressPkts1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499088: fltTcaCloudNwIngressPkts5minUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499089: fltTcaCloudNwIngressPkts15minUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499090: fltTcaCloudNwIngressPkts1hUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499091: fltTcaCloudNwIngressPkts1dUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499092: fltTcaCloudNwIngressPkts1wUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499093: fltTcaCloudNwIngressPkts1moUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499094: fltTcaCloudNwIngressPkts1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499095: fltTcaCloudNwIngressPkts1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499096: fltTcaCloudNwIngressPkts5minUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499097: fltTcaCloudNwIngressPkts15minUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499098: fltTcaCloudNwIngressPkts1hUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499099: fltTcaCloudNwIngressPkts1dUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499100: fltTcaCloudNwIngressPkts1wUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499101: fltTcaCloudNwIngressPkts1moUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499102: fltTcaCloudNwIngressPkts1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499103: fltTcaCloudNwIngressPkts1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499104: fltTcaCloudNwIngressPkts5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499105: fltTcaCloudNwIngressPkts15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499106: fltTcaCloudNwIngressPkts1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499107: fltTcaCloudNwIngressPkts1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499108: fltTcaCloudNwIngressPkts1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499109: fltTcaCloudNwIngressPkts1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499110: fltTcaCloudNwIngressPkts1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499111: fltTcaCloudNwIngressPkts1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499136: fltTcaCloudNwIngressPkts5minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499137: fltTcaCloudNwIngressPkts15minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499138: fltTcaCloudNwIngressPkts1hUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499139: fltTcaCloudNwIngressPkts1dUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499140: fltTcaCloudNwIngressPkts1wUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499141: fltTcaCloudNwIngressPkts1moUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499142: fltTcaCloudNwIngressPkts1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499143: fltTcaCloudNwIngressPkts1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499144: fltTcaCloudNwIngressPkts5minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499145: fltTcaCloudNwIngressPkts15minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499146: fltTcaCloudNwIngressPkts1hUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499147: fltTcaCloudNwIngressPkts1dUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499148: fltTcaCloudNwIngressPkts1wUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499149: fltTcaCloudNwIngressPkts1moUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499150: fltTcaCloudNwIngressPkts1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499151: fltTcaCloudNwIngressPkts1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499224: fltTcaCloudNwIngressPktsAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499225: fltTcaCloudNwIngressPktsAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499226: fltTcaCloudNwIngressPktsAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499227: fltTcaCloudNwIngressPktsAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499228: fltTcaCloudNwIngressPktsAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499229: fltTcaCloudNwIngressPktsAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499230: fltTcaCloudNwIngressPktsAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499231: fltTcaCloudNwIngressPktsAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499232: fltTcaCloudNwIngressPktsAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499233: fltTcaCloudNwIngressPktsAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499234: fltTcaCloudNwIngressPktsAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499235: fltTcaCloudNwIngressPktsAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499236: fltTcaCloudNwIngressPktsAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499237: fltTcaCloudNwIngressPktsAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499238: fltTcaCloudNwIngressPktsAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499239: fltTcaCloudNwIngressPktsAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499264: fltTcaCloudNwIngressPktsAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499265: fltTcaCloudNwIngressPktsAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499266: fltTcaCloudNwIngressPktsAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499267: fltTcaCloudNwIngressPktsAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499268: fltTcaCloudNwIngressPktsAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499269: fltTcaCloudNwIngressPktsAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499270: fltTcaCloudNwIngressPktsAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499271: fltTcaCloudNwIngressPktsAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499272: fltTcaCloudNwIngressPktsAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499273: fltTcaCloudNwIngressPktsAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499274: fltTcaCloudNwIngressPktsAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499275: fltTcaCloudNwIngressPktsAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499276: fltTcaCloudNwIngressPktsAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499277: fltTcaCloudNwIngressPktsAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499278: fltTcaCloudNwIngressPktsAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F499279: fltTcaCloudNwIngressPktsAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.
