Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420821: fltTcaOspfErrPktStats1moErrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420822: fltTcaOspfErrPktStats1qtrErrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420823: fltTcaOspfErrPktStats1yearErrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420832: fltTcaOspfErrPktStats5minErrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420833: fltTcaOspfErrPktStats15minErrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420834: fltTcaOspfErrPktStats1hErrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420835: fltTcaOspfErrPktStats1dErrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420836: fltTcaOspfErrPktStats1wErrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420837: fltTcaOspfErrPktStats1moErrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420838: fltTcaOspfErrPktStats1qtrErrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420839: fltTcaOspfErrPktStats1yearErrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420840: fltTcaOspfErrPktStats5minErrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420841: fltTcaOspfErrPktStats15minErrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420842: fltTcaOspfErrPktStats1hErrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420843: fltTcaOspfErrPktStats1dErrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420844: fltTcaOspfErrPktStats1wErrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420845: fltTcaOspfErrPktStats1moErrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420846: fltTcaOspfErrPktStats1qtrErrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420847: fltTcaOspfErrPktStats1yearErrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420848: fltTcaOspfErrPktStats5minErrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420849: fltTcaOspfErrPktStats15minErrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420850: fltTcaOspfErrPktStats1hErrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420851: fltTcaOspfErrPktStats1dErrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420852: fltTcaOspfErrPktStats1wErrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420853: fltTcaOspfErrPktStats1moErrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420854: fltTcaOspfErrPktStats1qtrErrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420855: fltTcaOspfErrPktStats1yearErrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420856: fltTcaOspfErrPktStats5minErrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420857: fltTcaOspfErrPktStats15minErrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420858: fltTcaOspfErrPktStats1hErrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420859: fltTcaOspfErrPktStats1dErrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420860: fltTcaOspfErrPktStats1wErrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420861: fltTcaOspfErrPktStats1moErrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420862: fltTcaOspfErrPktStats1qtrErrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420863: fltTcaOspfErrPktStats1yearErrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420864: fltTcaOspfErrPktStats5minErrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420865: fltTcaOspfErrPktStats15minErrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420866: fltTcaOspfErrPktStats1hErrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420867: fltTcaOspfErrPktStats1dErrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420868: fltTcaOspfErrPktStats1wErrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420869: fltTcaOspfErrPktStats1moErrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420870: fltTcaOspfErrPktStats1qtrErrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420871: fltTcaOspfErrPktStats1yearErrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420896: fltTcaOspfErrPktStats5minErrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420897: fltTcaOspfErrPktStats15minErrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420898: fltTcaOspfErrPktStats1hErrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420899: fltTcaOspfErrPktStats1dErrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420900: fltTcaOspfErrPktStats1wErrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420901: fltTcaOspfErrPktStats1moErrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420902: fltTcaOspfErrPktStats1qtrErrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420903: fltTcaOspfErrPktStats1yearErrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420904: fltTcaOspfErrPktStats5minErrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420905: fltTcaOspfErrPktStats15minErrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420906: fltTcaOspfErrPktStats1hErrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420907: fltTcaOspfErrPktStats1dErrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420908: fltTcaOspfErrPktStats1wErrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420909: fltTcaOspfErrPktStats1moErrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420910: fltTcaOspfErrPktStats1qtrErrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420911: fltTcaOspfErrPktStats1yearErrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420984: fltTcaOspfIntfStats5minNoOspfIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420985: fltTcaOspfIntfStats15minNoOspfIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420986: fltTcaOspfIntfStats1hNoOspfIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420987: fltTcaOspfIntfStats1dNoOspfIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420988: fltTcaOspfIntfStats1wNoOspfIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420989: fltTcaOspfIntfStats1moNoOspfIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420990: fltTcaOspfIntfStats1qtrNoOspfIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F420991: fltTcaOspfIntfStats1yearNoOspfIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4210: fltL3extVirtualLIfPBd-profile-mismatch

Severity: major

Explanation: This fault occurs when different external bridge profiles are associated with the same external encapsulation under the l3out

Recommended Action: If you see this fault, take the following actions:

1. Identify all floating svis under the l3Out and note the vlans and the associated external bridge profiles
2. Check if any of the physical domains under these floating svis are using explicit external encapsulation configuration and note the vlans
3. Identify all regular svis under the l3Out and note the vlans and the associated external bridge profiles
4. Ensure the same external bridge profile is configured for the same external encapsulation under the l3Out
5. If the above action did not resolve the fault collect the tech support and contact cisco TAC

F421000: fltTcaOspfIntfStats5minNoOspfIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421001: fltTcaOspfIntfStats15minNoOspfIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421002: fltTcaOspfIntfStats1hNoOspfIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421003: fltTcaOspfIntfStats1dNoOspfIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421004: fltTcaOspfIntfStats1wNoOspfIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421005: fltTcaOspfIntfStats1moNoOspfIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421006: fltTcaOspfIntfStats1qtrNoOspfIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421007: fltTcaOspfIntfStats1yearNoOspfIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421008: fltTcaOspfIntfStats5minNoOspfIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421009: fltTcaOspfIntfStats15minNoOspfIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421010: fltTcaOspfIntfStats1hNoOspfIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421011: fltTcaOspfIntfStats1dNoOspfIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421012: fltTcaOspfIntfStats1wNoOspfIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421013: fltTcaOspfIntfStats1moNoOspfIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421014: fltTcaOspfIntfStats1qtrNoOspfIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421015: fltTcaOspfIntfStats1yearNoOspfIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421016: fltTcaOspfIntfStats5minNoOspfIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421017: fltTcaOspfIntfStats15minNoOspfIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421018: fltTcaOspfIntfStats1hNoOspfIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421019: fltTcaOspfIntfStats1dNoOspfIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421020: fltTcaOspfIntfStats1wNoOspfIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421021: fltTcaOspfIntfStats1moNoOspfIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421022: fltTcaOspfIntfStats1qtrNoOspfIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421023: fltTcaOspfIntfStats1yearNoOspfIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421024: fltTcaOspfIntfStats5minNoOspfIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421025: fltTcaOspfIntfStats15minNoOspfIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421026: fltTcaOspfIntfStats1hNoOspfIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421027: fltTcaOspfIntfStats1dNoOspfIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421028: fltTcaOspfIntfStats1wNoOspfIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421029: fltTcaOspfIntfStats1moNoOspfIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421030: fltTcaOspfIntfStats1qtrNoOspfIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421031: fltTcaOspfIntfStats1yearNoOspfIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421032: fltTcaOspfIntfStats5minNoOspfIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421033: fltTcaOspfIntfStats15minNoOspfIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421034: fltTcaOspfIntfStats1hNoOspfIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421035: fltTcaOspfIntfStats1dNoOspfIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421036: fltTcaOspfIntfStats1wNoOspfIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421037: fltTcaOspfIntfStats1moNoOspfIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421038: fltTcaOspfIntfStats1qtrNoOspfIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421039: fltTcaOspfIntfStats1yearNoOspfIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421064: fltTcaOspfIntfStats5minNoOspfIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421065: fltTcaOspfIntfStats15minNoOspfIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421066: fltTcaOspfIntfStats1hNoOspfIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421067: fltTcaOspfIntfStats1dNoOspfIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421068: fltTcaOspfIntfStats1wNoOspfIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421069: fltTcaOspfIntfStats1moNoOspfIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421070: fltTcaOspfIntfStats1qtrNoOspfIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421071: fltTcaOspfIntfStats1yearNoOspfIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421072: fltTcaOspfIntfStats5minNoOspfIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421073: fltTcaOspfIntfStats15minNoOspfIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421074: fltTcaOspfIntfStats1hNoOspfIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421075: fltTcaOspfIntfStats1dNoOspfIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421076: fltTcaOspfIntfStats1wNoOspfIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421077: fltTcaOspfIntfStats1moNoOspfIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421078: fltTcaOspfIntfStats1qtrNoOspfIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421079: fltTcaOspfIntfStats1yearNoOspfIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "No OSPF Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "No OSPF Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4211: fltL3extRsPathL3OutAttBd-profile-mismatch

Severity: major

Explanation: This fault occurs when different external bridge profiles are associated with the same external encapsulation under the l3out

Recommended Action: If you see this fault, take the following actions:

1. Identify all floating svis under the l3Out and note the vlans and the associated external bridge profiles
2. Check if any of the physical domains under these floating svis are using explicit external encapsulation configuration and note the vlans
3. Identify all regular svis under the l3Out and note the vlans and the associated external bridge profiles
4. Ensure the same external bridge profile is configured for the same external encapsulation under the l3Out
5. If the above action did not resolve the fault collect the tech support and contact cisco TAC

F421152: fltTcaOspfIntfStats5minPassiveIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421153: fltTcaOspfIntfStats15minPassiveIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421154: fltTcaOspfIntfStats1hPassiveIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421155: fltTcaOspfIntfStats1dPassiveIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421156: fltTcaOspfIntfStats1wPassiveIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421157: fltTcaOspfIntfStats1moPassiveIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421158: fltTcaOspfIntfStats1qtrPassiveIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421159: fltTcaOspfIntfStats1yearPassiveIntfPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421168: fltTcaOspfIntfStats5minPassiveIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421169: fltTcaOspfIntfStats15minPassiveIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421170: fltTcaOspfIntfStats1hPassiveIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421171: fltTcaOspfIntfStats1dPassiveIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421172: fltTcaOspfIntfStats1wPassiveIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421173: fltTcaOspfIntfStats1moPassiveIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421174: fltTcaOspfIntfStats1qtrPassiveIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421175: fltTcaOspfIntfStats1yearPassiveIntfPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421176: fltTcaOspfIntfStats5minPassiveIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421177: fltTcaOspfIntfStats15minPassiveIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421178: fltTcaOspfIntfStats1hPassiveIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421179: fltTcaOspfIntfStats1dPassiveIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421180: fltTcaOspfIntfStats1wPassiveIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421181: fltTcaOspfIntfStats1moPassiveIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421182: fltTcaOspfIntfStats1qtrPassiveIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421183: fltTcaOspfIntfStats1yearPassiveIntfPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421184: fltTcaOspfIntfStats5minPassiveIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421185: fltTcaOspfIntfStats15minPassiveIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421186: fltTcaOspfIntfStats1hPassiveIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421187: fltTcaOspfIntfStats1dPassiveIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421188: fltTcaOspfIntfStats1wPassiveIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421189: fltTcaOspfIntfStats1moPassiveIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421190: fltTcaOspfIntfStats1qtrPassiveIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421191: fltTcaOspfIntfStats1yearPassiveIntfPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421192: fltTcaOspfIntfStats5minPassiveIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421193: fltTcaOspfIntfStats15minPassiveIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421194: fltTcaOspfIntfStats1hPassiveIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421195: fltTcaOspfIntfStats1dPassiveIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421196: fltTcaOspfIntfStats1wPassiveIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421197: fltTcaOspfIntfStats1moPassiveIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421198: fltTcaOspfIntfStats1qtrPassiveIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421199: fltTcaOspfIntfStats1yearPassiveIntfPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4212: fltL3extRsDynPathAttBd-profile-mismatch

Severity: major

Explanation: This fault occurs when different external bridge profiles are associated with the same external encapsulation under the l3out

Recommended Action: If you see this fault, take the following actions:

1. Identify all floating svis under the l3Out and note the vlans and the associated external bridge profiles
2. Check if any of the physical domains under these floating svis are using explicit external encapsulation configuration and note the vlans
3. Identify all regular svis under the l3Out and note the vlans and the associated external bridge profiles
4. Ensure the same external bridge profile is configured for the same external encapsulation under the l3Out
5. If the above action did not resolve the fault collect the tech support and contact cisco TAC

F421200: fltTcaOspfIntfStats5minPassiveIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421201: fltTcaOspfIntfStats15minPassiveIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421202: fltTcaOspfIntfStats1hPassiveIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421203: fltTcaOspfIntfStats1dPassiveIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421204: fltTcaOspfIntfStats1wPassiveIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421205: fltTcaOspfIntfStats1moPassiveIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421206: fltTcaOspfIntfStats1qtrPassiveIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421207: fltTcaOspfIntfStats1yearPassiveIntfPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421232: fltTcaOspfIntfStats5minPassiveIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421233: fltTcaOspfIntfStats15minPassiveIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421234: fltTcaOspfIntfStats1hPassiveIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421235: fltTcaOspfIntfStats1dPassiveIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421236: fltTcaOspfIntfStats1wPassiveIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421237: fltTcaOspfIntfStats1moPassiveIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421238: fltTcaOspfIntfStats1qtrPassiveIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421239: fltTcaOspfIntfStats1yearPassiveIntfPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421240: fltTcaOspfIntfStats5minPassiveIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421241: fltTcaOspfIntfStats15minPassiveIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421242: fltTcaOspfIntfStats1hPassiveIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421243: fltTcaOspfIntfStats1dPassiveIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421244: fltTcaOspfIntfStats1wPassiveIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421245: fltTcaOspfIntfStats1moPassiveIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421246: fltTcaOspfIntfStats1qtrPassiveIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421247: fltTcaOspfIntfStats1yearPassiveIntfPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Passive Interface Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Passive Interface Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4213: fltL3extRsDynPathAttAnchor-encap-mismatch

Severity: warning

Explanation: This fault occurs when an encapsulation different from the svi encapsulation is specified for the anchor node attachments

Recommended Action: If you see this fault, take the following actions:

1. Ensure the access encapsulation specified under the physical domain matches with the svi encapsulation

F421320: fltTcaOspfInvalidStats5minInvalidDestAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421321: fltTcaOspfInvalidStats15minInvalidDestAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421322: fltTcaOspfInvalidStats1hInvalidDestAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421323: fltTcaOspfInvalidStats1dInvalidDestAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421324: fltTcaOspfInvalidStats1wInvalidDestAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421325: fltTcaOspfInvalidStats1moInvalidDestAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421326: fltTcaOspfInvalidStats1qtrInvalidDestAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421327: fltTcaOspfInvalidStats1yearInvalidDestAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421336: fltTcaOspfInvalidStats5minInvalidDestAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421337: fltTcaOspfInvalidStats15minInvalidDestAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421338: fltTcaOspfInvalidStats1hInvalidDestAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421339: fltTcaOspfInvalidStats1dInvalidDestAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421340: fltTcaOspfInvalidStats1wInvalidDestAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421341: fltTcaOspfInvalidStats1moInvalidDestAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421342: fltTcaOspfInvalidStats1qtrInvalidDestAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421343: fltTcaOspfInvalidStats1yearInvalidDestAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421344: fltTcaOspfInvalidStats5minInvalidDestAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421345: fltTcaOspfInvalidStats15minInvalidDestAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421346: fltTcaOspfInvalidStats1hInvalidDestAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421347: fltTcaOspfInvalidStats1dInvalidDestAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421348: fltTcaOspfInvalidStats1wInvalidDestAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421349: fltTcaOspfInvalidStats1moInvalidDestAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421350: fltTcaOspfInvalidStats1qtrInvalidDestAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421351: fltTcaOspfInvalidStats1yearInvalidDestAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421352: fltTcaOspfInvalidStats5minInvalidDestAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421353: fltTcaOspfInvalidStats15minInvalidDestAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421354: fltTcaOspfInvalidStats1hInvalidDestAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421355: fltTcaOspfInvalidStats1dInvalidDestAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421356: fltTcaOspfInvalidStats1wInvalidDestAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421357: fltTcaOspfInvalidStats1moInvalidDestAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421358: fltTcaOspfInvalidStats1qtrInvalidDestAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421359: fltTcaOspfInvalidStats1yearInvalidDestAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421360: fltTcaOspfInvalidStats5minInvalidDestAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421361: fltTcaOspfInvalidStats15minInvalidDestAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421362: fltTcaOspfInvalidStats1hInvalidDestAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421363: fltTcaOspfInvalidStats1dInvalidDestAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421364: fltTcaOspfInvalidStats1wInvalidDestAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421365: fltTcaOspfInvalidStats1moInvalidDestAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421366: fltTcaOspfInvalidStats1qtrInvalidDestAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421367: fltTcaOspfInvalidStats1yearInvalidDestAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421368: fltTcaOspfInvalidStats5minInvalidDestAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421369: fltTcaOspfInvalidStats15minInvalidDestAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421370: fltTcaOspfInvalidStats1hInvalidDestAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421371: fltTcaOspfInvalidStats1dInvalidDestAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421372: fltTcaOspfInvalidStats1wInvalidDestAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421373: fltTcaOspfInvalidStats1moInvalidDestAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421374: fltTcaOspfInvalidStats1qtrInvalidDestAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421375: fltTcaOspfInvalidStats1yearInvalidDestAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4214: fltL3extRsPathL3OutAttAccess-encap-node-overlap

Severity: minor

Explanation: This fault occurs when multiple external encapsulations are mapped to the same external BD on the node

Recommended Action: If you see this fault, take the following actions:

1. Ensure only a single external encapsulation is mapped to the external bridge profile or floating SVI on the node
2. Remove the node from the floating node attachment entity to avoid the overlap
3. If the above action did not resolve the fault collect tech support and contact cisco TAC

F421400: fltTcaOspfInvalidStats5minInvalidDestAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421401: fltTcaOspfInvalidStats15minInvalidDestAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421402: fltTcaOspfInvalidStats1hInvalidDestAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421403: fltTcaOspfInvalidStats1dInvalidDestAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421404: fltTcaOspfInvalidStats1wInvalidDestAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421405: fltTcaOspfInvalidStats1moInvalidDestAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421406: fltTcaOspfInvalidStats1qtrInvalidDestAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421407: fltTcaOspfInvalidStats1yearInvalidDestAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421408: fltTcaOspfInvalidStats5minInvalidDestAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421409: fltTcaOspfInvalidStats15minInvalidDestAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421410: fltTcaOspfInvalidStats1hInvalidDestAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421411: fltTcaOspfInvalidStats1dInvalidDestAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421412: fltTcaOspfInvalidStats1wInvalidDestAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421413: fltTcaOspfInvalidStats1moInvalidDestAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421414: fltTcaOspfInvalidStats1qtrInvalidDestAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421415: fltTcaOspfInvalidStats1yearInvalidDestAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Destination Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Destination Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421488: fltTcaOspfInvalidStats5minInvalidSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421489: fltTcaOspfInvalidStats15minInvalidSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421490: fltTcaOspfInvalidStats1hInvalidSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421491: fltTcaOspfInvalidStats1dInvalidSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421492: fltTcaOspfInvalidStats1wInvalidSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421493: fltTcaOspfInvalidStats1moInvalidSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421494: fltTcaOspfInvalidStats1qtrInvalidSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421495: fltTcaOspfInvalidStats1yearInvalidSrcAddrPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4215: fltL3extVirtualLIfPAccess-encap-node-overlap

Severity: minor

Explanation: This fault occurs when multiple external encapsulations are mapped to the same external BD on the node

Recommended Action: If you see this fault, take the following actions:

1. Ensure only a single external encapsulation is mapped to the external bridge profile or floating SVI on the node
2. Remove the node from the floating node attachment entity to avoid the overlap
3. If the above action did not resolve the fault collect tech support and contact cisco TAC

F421504: fltTcaOspfInvalidStats5minInvalidSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421505: fltTcaOspfInvalidStats15minInvalidSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421506: fltTcaOspfInvalidStats1hInvalidSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421507: fltTcaOspfInvalidStats1dInvalidSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421508: fltTcaOspfInvalidStats1wInvalidSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421509: fltTcaOspfInvalidStats1moInvalidSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421510: fltTcaOspfInvalidStats1qtrInvalidSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421511: fltTcaOspfInvalidStats1yearInvalidSrcAddrPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421512: fltTcaOspfInvalidStats5minInvalidSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421513: fltTcaOspfInvalidStats15minInvalidSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421514: fltTcaOspfInvalidStats1hInvalidSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421515: fltTcaOspfInvalidStats1dInvalidSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421516: fltTcaOspfInvalidStats1wInvalidSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421517: fltTcaOspfInvalidStats1moInvalidSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421518: fltTcaOspfInvalidStats1qtrInvalidSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421519: fltTcaOspfInvalidStats1yearInvalidSrcAddrPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421520: fltTcaOspfInvalidStats5minInvalidSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421521: fltTcaOspfInvalidStats15minInvalidSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421522: fltTcaOspfInvalidStats1hInvalidSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421523: fltTcaOspfInvalidStats1dInvalidSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421524: fltTcaOspfInvalidStats1wInvalidSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421525: fltTcaOspfInvalidStats1moInvalidSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421526: fltTcaOspfInvalidStats1qtrInvalidSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421527: fltTcaOspfInvalidStats1yearInvalidSrcAddrPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421528: fltTcaOspfInvalidStats5minInvalidSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421529: fltTcaOspfInvalidStats15minInvalidSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421530: fltTcaOspfInvalidStats1hInvalidSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421531: fltTcaOspfInvalidStats1dInvalidSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421532: fltTcaOspfInvalidStats1wInvalidSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421533: fltTcaOspfInvalidStats1moInvalidSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421534: fltTcaOspfInvalidStats1qtrInvalidSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421535: fltTcaOspfInvalidStats1yearInvalidSrcAddrPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421536: fltTcaOspfInvalidStats5minInvalidSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421537: fltTcaOspfInvalidStats15minInvalidSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421538: fltTcaOspfInvalidStats1hInvalidSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421539: fltTcaOspfInvalidStats1dInvalidSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421540: fltTcaOspfInvalidStats1wInvalidSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421541: fltTcaOspfInvalidStats1moInvalidSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421542: fltTcaOspfInvalidStats1qtrInvalidSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421543: fltTcaOspfInvalidStats1yearInvalidSrcAddrPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421568: fltTcaOspfInvalidStats5minInvalidSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421569: fltTcaOspfInvalidStats15minInvalidSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421570: fltTcaOspfInvalidStats1hInvalidSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421571: fltTcaOspfInvalidStats1dInvalidSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421572: fltTcaOspfInvalidStats1wInvalidSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421573: fltTcaOspfInvalidStats1moInvalidSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421574: fltTcaOspfInvalidStats1qtrInvalidSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421575: fltTcaOspfInvalidStats1yearInvalidSrcAddrPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421576: fltTcaOspfInvalidStats5minInvalidSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421577: fltTcaOspfInvalidStats15minInvalidSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421578: fltTcaOspfInvalidStats1hInvalidSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421579: fltTcaOspfInvalidStats1dInvalidSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421580: fltTcaOspfInvalidStats1wInvalidSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421581: fltTcaOspfInvalidStats1moInvalidSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421582: fltTcaOspfInvalidStats1qtrInvalidSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421583: fltTcaOspfInvalidStats1yearInvalidSrcAddrPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Invalid Source Addr Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Invalid Source Addr Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4216: fltL3extFloatingNodeAccess-encap-node-overlap

Severity: minor

Explanation: This fault occurs when multiple external encapsulations are mapped to the same external BD on the node

Recommended Action: If you see this fault, take the following actions:

1. Ensure only a single external encapsulation is mapped to the external bridge profile or floating SVI on the node
2. Remove the node from the floating node attachment entity to avoid the overlap
3. If the above action did not resolve the fault collect tech support and contact cisco TAC

F421656: fltTcaOspfInvalidStats5minWrongAreaPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421657: fltTcaOspfInvalidStats15minWrongAreaPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421658: fltTcaOspfInvalidStats1hWrongAreaPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421659: fltTcaOspfInvalidStats1dWrongAreaPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421660: fltTcaOspfInvalidStats1wWrongAreaPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421661: fltTcaOspfInvalidStats1moWrongAreaPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421662: fltTcaOspfInvalidStats1qtrWrongAreaPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421663: fltTcaOspfInvalidStats1yearWrongAreaPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421672: fltTcaOspfInvalidStats5minWrongAreaPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421673: fltTcaOspfInvalidStats15minWrongAreaPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421674: fltTcaOspfInvalidStats1hWrongAreaPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421675: fltTcaOspfInvalidStats1dWrongAreaPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421676: fltTcaOspfInvalidStats1wWrongAreaPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421677: fltTcaOspfInvalidStats1moWrongAreaPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421678: fltTcaOspfInvalidStats1qtrWrongAreaPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421679: fltTcaOspfInvalidStats1yearWrongAreaPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421680: fltTcaOspfInvalidStats5minWrongAreaPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421681: fltTcaOspfInvalidStats15minWrongAreaPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421682: fltTcaOspfInvalidStats1hWrongAreaPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421683: fltTcaOspfInvalidStats1dWrongAreaPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421684: fltTcaOspfInvalidStats1wWrongAreaPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421685: fltTcaOspfInvalidStats1moWrongAreaPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421686: fltTcaOspfInvalidStats1qtrWrongAreaPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421687: fltTcaOspfInvalidStats1yearWrongAreaPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421688: fltTcaOspfInvalidStats5minWrongAreaPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421689: fltTcaOspfInvalidStats15minWrongAreaPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421690: fltTcaOspfInvalidStats1hWrongAreaPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421691: fltTcaOspfInvalidStats1dWrongAreaPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421692: fltTcaOspfInvalidStats1wWrongAreaPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421693: fltTcaOspfInvalidStats1moWrongAreaPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421694: fltTcaOspfInvalidStats1qtrWrongAreaPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421695: fltTcaOspfInvalidStats1yearWrongAreaPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421696: fltTcaOspfInvalidStats5minWrongAreaPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421697: fltTcaOspfInvalidStats15minWrongAreaPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421698: fltTcaOspfInvalidStats1hWrongAreaPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421699: fltTcaOspfInvalidStats1dWrongAreaPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421700: fltTcaOspfInvalidStats1wWrongAreaPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421701: fltTcaOspfInvalidStats1moWrongAreaPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421702: fltTcaOspfInvalidStats1qtrWrongAreaPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421703: fltTcaOspfInvalidStats1yearWrongAreaPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421704: fltTcaOspfInvalidStats5minWrongAreaPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421705: fltTcaOspfInvalidStats15minWrongAreaPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421706: fltTcaOspfInvalidStats1hWrongAreaPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421707: fltTcaOspfInvalidStats1dWrongAreaPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421708: fltTcaOspfInvalidStats1wWrongAreaPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421709: fltTcaOspfInvalidStats1moWrongAreaPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421710: fltTcaOspfInvalidStats1qtrWrongAreaPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421711: fltTcaOspfInvalidStats1yearWrongAreaPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421736: fltTcaOspfInvalidStats5minWrongAreaPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421737: fltTcaOspfInvalidStats15minWrongAreaPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421738: fltTcaOspfInvalidStats1hWrongAreaPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421739: fltTcaOspfInvalidStats1dWrongAreaPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421740: fltTcaOspfInvalidStats1wWrongAreaPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421741: fltTcaOspfInvalidStats1moWrongAreaPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421742: fltTcaOspfInvalidStats1qtrWrongAreaPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421743: fltTcaOspfInvalidStats1yearWrongAreaPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421744: fltTcaOspfInvalidStats5minWrongAreaPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421745: fltTcaOspfInvalidStats15minWrongAreaPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421746: fltTcaOspfInvalidStats1hWrongAreaPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421747: fltTcaOspfInvalidStats1dWrongAreaPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421748: fltTcaOspfInvalidStats1wWrongAreaPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421749: fltTcaOspfInvalidStats1moWrongAreaPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421750: fltTcaOspfInvalidStats1qtrWrongAreaPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421751: fltTcaOspfInvalidStats1yearWrongAreaPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Wrong Area Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Wrong Area Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421824: fltTcaOspfLsRcvdErrPktStats5minErrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421825: fltTcaOspfLsRcvdErrPktStats15minErrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421826: fltTcaOspfLsRcvdErrPktStats1hErrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421827: fltTcaOspfLsRcvdErrPktStats1dErrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421828: fltTcaOspfLsRcvdErrPktStats1wErrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421829: fltTcaOspfLsRcvdErrPktStats1moErrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421830: fltTcaOspfLsRcvdErrPktStats1qtrErrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421831: fltTcaOspfLsRcvdErrPktStats1yearErrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421840: fltTcaOspfLsRcvdErrPktStats5minErrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421841: fltTcaOspfLsRcvdErrPktStats15minErrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421842: fltTcaOspfLsRcvdErrPktStats1hErrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421843: fltTcaOspfLsRcvdErrPktStats1dErrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421844: fltTcaOspfLsRcvdErrPktStats1wErrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421845: fltTcaOspfLsRcvdErrPktStats1moErrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421846: fltTcaOspfLsRcvdErrPktStats1qtrErrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421847: fltTcaOspfLsRcvdErrPktStats1yearErrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421848: fltTcaOspfLsRcvdErrPktStats5minErrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421849: fltTcaOspfLsRcvdErrPktStats15minErrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421850: fltTcaOspfLsRcvdErrPktStats1hErrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421851: fltTcaOspfLsRcvdErrPktStats1dErrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421852: fltTcaOspfLsRcvdErrPktStats1wErrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421853: fltTcaOspfLsRcvdErrPktStats1moErrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421854: fltTcaOspfLsRcvdErrPktStats1qtrErrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421855: fltTcaOspfLsRcvdErrPktStats1yearErrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421856: fltTcaOspfLsRcvdErrPktStats5minErrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421857: fltTcaOspfLsRcvdErrPktStats15minErrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421858: fltTcaOspfLsRcvdErrPktStats1hErrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421859: fltTcaOspfLsRcvdErrPktStats1dErrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421860: fltTcaOspfLsRcvdErrPktStats1wErrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421861: fltTcaOspfLsRcvdErrPktStats1moErrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421862: fltTcaOspfLsRcvdErrPktStats1qtrErrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421863: fltTcaOspfLsRcvdErrPktStats1yearErrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421864: fltTcaOspfLsRcvdErrPktStats5minErrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421865: fltTcaOspfLsRcvdErrPktStats15minErrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421866: fltTcaOspfLsRcvdErrPktStats1hErrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421867: fltTcaOspfLsRcvdErrPktStats1dErrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421868: fltTcaOspfLsRcvdErrPktStats1wErrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421869: fltTcaOspfLsRcvdErrPktStats1moErrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421870: fltTcaOspfLsRcvdErrPktStats1qtrErrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421871: fltTcaOspfLsRcvdErrPktStats1yearErrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421872: fltTcaOspfLsRcvdErrPktStats5minErrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421873: fltTcaOspfLsRcvdErrPktStats15minErrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421874: fltTcaOspfLsRcvdErrPktStats1hErrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421875: fltTcaOspfLsRcvdErrPktStats1dErrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421876: fltTcaOspfLsRcvdErrPktStats1wErrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421877: fltTcaOspfLsRcvdErrPktStats1moErrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421878: fltTcaOspfLsRcvdErrPktStats1qtrErrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421879: fltTcaOspfLsRcvdErrPktStats1yearErrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421904: fltTcaOspfLsRcvdErrPktStats5minErrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421905: fltTcaOspfLsRcvdErrPktStats15minErrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421906: fltTcaOspfLsRcvdErrPktStats1hErrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421907: fltTcaOspfLsRcvdErrPktStats1dErrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421908: fltTcaOspfLsRcvdErrPktStats1wErrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421909: fltTcaOspfLsRcvdErrPktStats1moErrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421910: fltTcaOspfLsRcvdErrPktStats1qtrErrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421911: fltTcaOspfLsRcvdErrPktStats1yearErrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421912: fltTcaOspfLsRcvdErrPktStats5minErrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421913: fltTcaOspfLsRcvdErrPktStats15minErrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421914: fltTcaOspfLsRcvdErrPktStats1hErrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421915: fltTcaOspfLsRcvdErrPktStats1dErrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421916: fltTcaOspfLsRcvdErrPktStats1wErrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421917: fltTcaOspfLsRcvdErrPktStats1moErrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421918: fltTcaOspfLsRcvdErrPktStats1qtrErrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421919: fltTcaOspfLsRcvdErrPktStats1yearErrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421992: fltTcaOspfLsRcvdErrPktStats5minErrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421993: fltTcaOspfLsRcvdErrPktStats15minErrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421994: fltTcaOspfLsRcvdErrPktStats1hErrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421995: fltTcaOspfLsRcvdErrPktStats1dErrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421996: fltTcaOspfLsRcvdErrPktStats1wErrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421997: fltTcaOspfLsRcvdErrPktStats1moErrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421998: fltTcaOspfLsRcvdErrPktStats1qtrErrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F421999: fltTcaOspfLsRcvdErrPktStats1yearErrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422008: fltTcaOspfLsRcvdErrPktStats5minErrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422009: fltTcaOspfLsRcvdErrPktStats15minErrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422010: fltTcaOspfLsRcvdErrPktStats1hErrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422011: fltTcaOspfLsRcvdErrPktStats1dErrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422012: fltTcaOspfLsRcvdErrPktStats1wErrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422013: fltTcaOspfLsRcvdErrPktStats1moErrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422014: fltTcaOspfLsRcvdErrPktStats1qtrErrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422015: fltTcaOspfLsRcvdErrPktStats1yearErrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422016: fltTcaOspfLsRcvdErrPktStats5minErrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422017: fltTcaOspfLsRcvdErrPktStats15minErrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422018: fltTcaOspfLsRcvdErrPktStats1hErrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422019: fltTcaOspfLsRcvdErrPktStats1dErrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422020: fltTcaOspfLsRcvdErrPktStats1wErrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422021: fltTcaOspfLsRcvdErrPktStats1moErrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422022: fltTcaOspfLsRcvdErrPktStats1qtrErrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422023: fltTcaOspfLsRcvdErrPktStats1yearErrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422024: fltTcaOspfLsRcvdErrPktStats5minErrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422025: fltTcaOspfLsRcvdErrPktStats15minErrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422026: fltTcaOspfLsRcvdErrPktStats1hErrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422027: fltTcaOspfLsRcvdErrPktStats1dErrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422028: fltTcaOspfLsRcvdErrPktStats1wErrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422029: fltTcaOspfLsRcvdErrPktStats1moErrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422030: fltTcaOspfLsRcvdErrPktStats1qtrErrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422031: fltTcaOspfLsRcvdErrPktStats1yearErrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422032: fltTcaOspfLsRcvdErrPktStats5minErrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422033: fltTcaOspfLsRcvdErrPktStats15minErrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422034: fltTcaOspfLsRcvdErrPktStats1hErrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422035: fltTcaOspfLsRcvdErrPktStats1dErrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422036: fltTcaOspfLsRcvdErrPktStats1wErrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422037: fltTcaOspfLsRcvdErrPktStats1moErrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422038: fltTcaOspfLsRcvdErrPktStats1qtrErrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422039: fltTcaOspfLsRcvdErrPktStats1yearErrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422040: fltTcaOspfLsRcvdErrPktStats5minErrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422041: fltTcaOspfLsRcvdErrPktStats15minErrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422042: fltTcaOspfLsRcvdErrPktStats1hErrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422043: fltTcaOspfLsRcvdErrPktStats1dErrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422044: fltTcaOspfLsRcvdErrPktStats1wErrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422045: fltTcaOspfLsRcvdErrPktStats1moErrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422046: fltTcaOspfLsRcvdErrPktStats1qtrErrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422047: fltTcaOspfLsRcvdErrPktStats1yearErrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422072: fltTcaOspfLsRcvdErrPktStats5minErrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422073: fltTcaOspfLsRcvdErrPktStats15minErrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422074: fltTcaOspfLsRcvdErrPktStats1hErrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422075: fltTcaOspfLsRcvdErrPktStats1dErrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422076: fltTcaOspfLsRcvdErrPktStats1wErrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422077: fltTcaOspfLsRcvdErrPktStats1moErrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422078: fltTcaOspfLsRcvdErrPktStats1qtrErrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422079: fltTcaOspfLsRcvdErrPktStats1yearErrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422080: fltTcaOspfLsRcvdErrPktStats5minErrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422081: fltTcaOspfLsRcvdErrPktStats15minErrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422082: fltTcaOspfLsRcvdErrPktStats1hErrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422083: fltTcaOspfLsRcvdErrPktStats1dErrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422084: fltTcaOspfLsRcvdErrPktStats1wErrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422085: fltTcaOspfLsRcvdErrPktStats1moErrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422086: fltTcaOspfLsRcvdErrPktStats1qtrErrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422087: fltTcaOspfLsRcvdErrPktStats1yearErrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422160: fltTcaOspfLsRcvdErrPktStats5minErrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422161: fltTcaOspfLsRcvdErrPktStats15minErrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422162: fltTcaOspfLsRcvdErrPktStats1hErrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422163: fltTcaOspfLsRcvdErrPktStats1dErrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422164: fltTcaOspfLsRcvdErrPktStats1wErrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422165: fltTcaOspfLsRcvdErrPktStats1moErrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422166: fltTcaOspfLsRcvdErrPktStats1qtrErrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422167: fltTcaOspfLsRcvdErrPktStats1yearErrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422176: fltTcaOspfLsRcvdErrPktStats5minErrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422177: fltTcaOspfLsRcvdErrPktStats15minErrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422178: fltTcaOspfLsRcvdErrPktStats1hErrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422179: fltTcaOspfLsRcvdErrPktStats1dErrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422180: fltTcaOspfLsRcvdErrPktStats1wErrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422181: fltTcaOspfLsRcvdErrPktStats1moErrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422182: fltTcaOspfLsRcvdErrPktStats1qtrErrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422183: fltTcaOspfLsRcvdErrPktStats1yearErrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422184: fltTcaOspfLsRcvdErrPktStats5minErrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422185: fltTcaOspfLsRcvdErrPktStats15minErrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422186: fltTcaOspfLsRcvdErrPktStats1hErrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422187: fltTcaOspfLsRcvdErrPktStats1dErrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422188: fltTcaOspfLsRcvdErrPktStats1wErrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422189: fltTcaOspfLsRcvdErrPktStats1moErrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422190: fltTcaOspfLsRcvdErrPktStats1qtrErrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422191: fltTcaOspfLsRcvdErrPktStats1yearErrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422192: fltTcaOspfLsRcvdErrPktStats5minErrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422193: fltTcaOspfLsRcvdErrPktStats15minErrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422194: fltTcaOspfLsRcvdErrPktStats1hErrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422195: fltTcaOspfLsRcvdErrPktStats1dErrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422196: fltTcaOspfLsRcvdErrPktStats1wErrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422197: fltTcaOspfLsRcvdErrPktStats1moErrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422198: fltTcaOspfLsRcvdErrPktStats1qtrErrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422199: fltTcaOspfLsRcvdErrPktStats1yearErrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4222: fltLicenseManagerAckNotReceived

Severity: major

Explanation: This fault is raised when Smart Agent (SA) failed to receive a RUM report acknowledgement from CSSM or On-Prem.

Recommended Action: If you see this fault, take the following actions:

1. Check if network connectivity has an issue. If it is offline mode, you need to download RUM report and import acknowledgement.

F422200: fltTcaOspfLsRcvdErrPktStats5minErrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422201: fltTcaOspfLsRcvdErrPktStats15minErrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422202: fltTcaOspfLsRcvdErrPktStats1hErrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422203: fltTcaOspfLsRcvdErrPktStats1dErrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422204: fltTcaOspfLsRcvdErrPktStats1wErrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422205: fltTcaOspfLsRcvdErrPktStats1moErrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422206: fltTcaOspfLsRcvdErrPktStats1qtrErrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422207: fltTcaOspfLsRcvdErrPktStats1yearErrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422208: fltTcaOspfLsRcvdErrPktStats5minErrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422209: fltTcaOspfLsRcvdErrPktStats15minErrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422210: fltTcaOspfLsRcvdErrPktStats1hErrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422211: fltTcaOspfLsRcvdErrPktStats1dErrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422212: fltTcaOspfLsRcvdErrPktStats1wErrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422213: fltTcaOspfLsRcvdErrPktStats1moErrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422214: fltTcaOspfLsRcvdErrPktStats1qtrErrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422215: fltTcaOspfLsRcvdErrPktStats1yearErrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422240: fltTcaOspfLsRcvdErrPktStats5minErrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422241: fltTcaOspfLsRcvdErrPktStats15minErrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422242: fltTcaOspfLsRcvdErrPktStats1hErrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422243: fltTcaOspfLsRcvdErrPktStats1dErrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422244: fltTcaOspfLsRcvdErrPktStats1wErrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422245: fltTcaOspfLsRcvdErrPktStats1moErrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422246: fltTcaOspfLsRcvdErrPktStats1qtrErrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422247: fltTcaOspfLsRcvdErrPktStats1yearErrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422248: fltTcaOspfLsRcvdErrPktStats5minErrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422249: fltTcaOspfLsRcvdErrPktStats15minErrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422250: fltTcaOspfLsRcvdErrPktStats1hErrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422251: fltTcaOspfLsRcvdErrPktStats1dErrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422252: fltTcaOspfLsRcvdErrPktStats1wErrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422253: fltTcaOspfLsRcvdErrPktStats1moErrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422254: fltTcaOspfLsRcvdErrPktStats1qtrErrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422255: fltTcaOspfLsRcvdErrPktStats1yearErrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Error LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422328: fltTcaOspfLsRcvdPktStats5minLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422329: fltTcaOspfLsRcvdPktStats15minLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422330: fltTcaOspfLsRcvdPktStats1hLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422331: fltTcaOspfLsRcvdPktStats1dLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422332: fltTcaOspfLsRcvdPktStats1wLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422333: fltTcaOspfLsRcvdPktStats1moLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422334: fltTcaOspfLsRcvdPktStats1qtrLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422335: fltTcaOspfLsRcvdPktStats1yearLsAckPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422344: fltTcaOspfLsRcvdPktStats5minLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422345: fltTcaOspfLsRcvdPktStats15minLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422346: fltTcaOspfLsRcvdPktStats1hLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422347: fltTcaOspfLsRcvdPktStats1dLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422348: fltTcaOspfLsRcvdPktStats1wLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422349: fltTcaOspfLsRcvdPktStats1moLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422350: fltTcaOspfLsRcvdPktStats1qtrLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422351: fltTcaOspfLsRcvdPktStats1yearLsAckPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422352: fltTcaOspfLsRcvdPktStats5minLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422353: fltTcaOspfLsRcvdPktStats15minLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422354: fltTcaOspfLsRcvdPktStats1hLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422355: fltTcaOspfLsRcvdPktStats1dLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422356: fltTcaOspfLsRcvdPktStats1wLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422357: fltTcaOspfLsRcvdPktStats1moLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422358: fltTcaOspfLsRcvdPktStats1qtrLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422359: fltTcaOspfLsRcvdPktStats1yearLsAckPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422360: fltTcaOspfLsRcvdPktStats5minLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422361: fltTcaOspfLsRcvdPktStats15minLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422362: fltTcaOspfLsRcvdPktStats1hLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422363: fltTcaOspfLsRcvdPktStats1dLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422364: fltTcaOspfLsRcvdPktStats1wLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422365: fltTcaOspfLsRcvdPktStats1moLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422366: fltTcaOspfLsRcvdPktStats1qtrLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422367: fltTcaOspfLsRcvdPktStats1yearLsAckPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422368: fltTcaOspfLsRcvdPktStats5minLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422369: fltTcaOspfLsRcvdPktStats15minLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422370: fltTcaOspfLsRcvdPktStats1hLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422371: fltTcaOspfLsRcvdPktStats1dLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422372: fltTcaOspfLsRcvdPktStats1wLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422373: fltTcaOspfLsRcvdPktStats1moLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422374: fltTcaOspfLsRcvdPktStats1qtrLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422375: fltTcaOspfLsRcvdPktStats1yearLsAckPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422376: fltTcaOspfLsRcvdPktStats5minLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422377: fltTcaOspfLsRcvdPktStats15minLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422378: fltTcaOspfLsRcvdPktStats1hLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422379: fltTcaOspfLsRcvdPktStats1dLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422380: fltTcaOspfLsRcvdPktStats1wLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422381: fltTcaOspfLsRcvdPktStats1moLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422382: fltTcaOspfLsRcvdPktStats1qtrLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422383: fltTcaOspfLsRcvdPktStats1yearLsAckPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422408: fltTcaOspfLsRcvdPktStats5minLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422409: fltTcaOspfLsRcvdPktStats15minLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422410: fltTcaOspfLsRcvdPktStats1hLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422411: fltTcaOspfLsRcvdPktStats1dLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422412: fltTcaOspfLsRcvdPktStats1wLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422413: fltTcaOspfLsRcvdPktStats1moLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422414: fltTcaOspfLsRcvdPktStats1qtrLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422415: fltTcaOspfLsRcvdPktStats1yearLsAckPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422416: fltTcaOspfLsRcvdPktStats5minLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422417: fltTcaOspfLsRcvdPktStats15minLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422418: fltTcaOspfLsRcvdPktStats1hLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422419: fltTcaOspfLsRcvdPktStats1dLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422420: fltTcaOspfLsRcvdPktStats1wLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422421: fltTcaOspfLsRcvdPktStats1moLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422422: fltTcaOspfLsRcvdPktStats1qtrLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422423: fltTcaOspfLsRcvdPktStats1yearLsAckPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422496: fltTcaOspfLsRcvdPktStats5minLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422497: fltTcaOspfLsRcvdPktStats15minLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422498: fltTcaOspfLsRcvdPktStats1hLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422499: fltTcaOspfLsRcvdPktStats1dLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422500: fltTcaOspfLsRcvdPktStats1wLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422501: fltTcaOspfLsRcvdPktStats1moLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422502: fltTcaOspfLsRcvdPktStats1qtrLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422503: fltTcaOspfLsRcvdPktStats1yearLsReqPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422512: fltTcaOspfLsRcvdPktStats5minLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422513: fltTcaOspfLsRcvdPktStats15minLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422514: fltTcaOspfLsRcvdPktStats1hLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422515: fltTcaOspfLsRcvdPktStats1dLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422516: fltTcaOspfLsRcvdPktStats1wLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422517: fltTcaOspfLsRcvdPktStats1moLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422518: fltTcaOspfLsRcvdPktStats1qtrLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422519: fltTcaOspfLsRcvdPktStats1yearLsReqPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422520: fltTcaOspfLsRcvdPktStats5minLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422521: fltTcaOspfLsRcvdPktStats15minLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422522: fltTcaOspfLsRcvdPktStats1hLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422523: fltTcaOspfLsRcvdPktStats1dLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422524: fltTcaOspfLsRcvdPktStats1wLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422525: fltTcaOspfLsRcvdPktStats1moLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422526: fltTcaOspfLsRcvdPktStats1qtrLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422527: fltTcaOspfLsRcvdPktStats1yearLsReqPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422528: fltTcaOspfLsRcvdPktStats5minLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422529: fltTcaOspfLsRcvdPktStats15minLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422530: fltTcaOspfLsRcvdPktStats1hLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422531: fltTcaOspfLsRcvdPktStats1dLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422532: fltTcaOspfLsRcvdPktStats1wLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422533: fltTcaOspfLsRcvdPktStats1moLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422534: fltTcaOspfLsRcvdPktStats1qtrLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422535: fltTcaOspfLsRcvdPktStats1yearLsReqPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422536: fltTcaOspfLsRcvdPktStats5minLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422537: fltTcaOspfLsRcvdPktStats15minLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422538: fltTcaOspfLsRcvdPktStats1hLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422539: fltTcaOspfLsRcvdPktStats1dLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422540: fltTcaOspfLsRcvdPktStats1wLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422541: fltTcaOspfLsRcvdPktStats1moLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422542: fltTcaOspfLsRcvdPktStats1qtrLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422543: fltTcaOspfLsRcvdPktStats1yearLsReqPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422544: fltTcaOspfLsRcvdPktStats5minLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422545: fltTcaOspfLsRcvdPktStats15minLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422546: fltTcaOspfLsRcvdPktStats1hLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422547: fltTcaOspfLsRcvdPktStats1dLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422548: fltTcaOspfLsRcvdPktStats1wLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422549: fltTcaOspfLsRcvdPktStats1moLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422550: fltTcaOspfLsRcvdPktStats1qtrLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422551: fltTcaOspfLsRcvdPktStats1yearLsReqPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422576: fltTcaOspfLsRcvdPktStats5minLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422577: fltTcaOspfLsRcvdPktStats15minLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422578: fltTcaOspfLsRcvdPktStats1hLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422579: fltTcaOspfLsRcvdPktStats1dLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422580: fltTcaOspfLsRcvdPktStats1wLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422581: fltTcaOspfLsRcvdPktStats1moLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422582: fltTcaOspfLsRcvdPktStats1qtrLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422583: fltTcaOspfLsRcvdPktStats1yearLsReqPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422584: fltTcaOspfLsRcvdPktStats5minLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422585: fltTcaOspfLsRcvdPktStats15minLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422586: fltTcaOspfLsRcvdPktStats1hLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422587: fltTcaOspfLsRcvdPktStats1dLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422588: fltTcaOspfLsRcvdPktStats1wLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422589: fltTcaOspfLsRcvdPktStats1moLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422590: fltTcaOspfLsRcvdPktStats1qtrLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422591: fltTcaOspfLsRcvdPktStats1yearLsReqPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4226: fltHcloudIngressRuleContractOperCloudIngressRuleContractOperStateDown

Severity: major

Explanation: This fault occurs when an erroneous configuration is pushed for creating a contract.

Recommended Action: If you see this fault, take the following actions:

1. Please check the fault message and make necessary changes to the config for creating the vzFilter and vzEntry.
2. Please check if the other end of this contract (consumer or provider EPg) has deployed correctly or if it has a fault associated.
3. If fault still has not cleared, please contact Cisco TAC.

F422664: fltTcaOspfLsRcvdPktStats5minLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422665: fltTcaOspfLsRcvdPktStats15minLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422666: fltTcaOspfLsRcvdPktStats1hLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422667: fltTcaOspfLsRcvdPktStats1dLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422668: fltTcaOspfLsRcvdPktStats1wLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422669: fltTcaOspfLsRcvdPktStats1moLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422670: fltTcaOspfLsRcvdPktStats1qtrLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422671: fltTcaOspfLsRcvdPktStats1yearLsUpdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422680: fltTcaOspfLsRcvdPktStats5minLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422681: fltTcaOspfLsRcvdPktStats15minLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422682: fltTcaOspfLsRcvdPktStats1hLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422683: fltTcaOspfLsRcvdPktStats1dLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422684: fltTcaOspfLsRcvdPktStats1wLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422685: fltTcaOspfLsRcvdPktStats1moLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422686: fltTcaOspfLsRcvdPktStats1qtrLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422687: fltTcaOspfLsRcvdPktStats1yearLsUpdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422688: fltTcaOspfLsRcvdPktStats5minLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422689: fltTcaOspfLsRcvdPktStats15minLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422690: fltTcaOspfLsRcvdPktStats1hLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422691: fltTcaOspfLsRcvdPktStats1dLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422692: fltTcaOspfLsRcvdPktStats1wLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422693: fltTcaOspfLsRcvdPktStats1moLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422694: fltTcaOspfLsRcvdPktStats1qtrLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422695: fltTcaOspfLsRcvdPktStats1yearLsUpdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422696: fltTcaOspfLsRcvdPktStats5minLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422697: fltTcaOspfLsRcvdPktStats15minLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422698: fltTcaOspfLsRcvdPktStats1hLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422699: fltTcaOspfLsRcvdPktStats1dLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4227: fltHcloudEgressRuleContractOperCloudEgressRuleContractOperStateDown

Severity: major

Explanation: This fault occurs when an erroneous configuration is pushed for creating a contract.

Recommended Action: If you see this fault, take the following actions:

1. Please check the fault message and make necessary changes to the config for creating the vzFilter and vzEntry.
2. Please check if the other end of this contract (consumer or provider EPg) has deployed correctly or if it has a fault associated.
3. If fault still has not cleared, please contact Cisco TAC.

F422700: fltTcaOspfLsRcvdPktStats1wLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422701: fltTcaOspfLsRcvdPktStats1moLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422702: fltTcaOspfLsRcvdPktStats1qtrLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422703: fltTcaOspfLsRcvdPktStats1yearLsUpdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422704: fltTcaOspfLsRcvdPktStats5minLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422705: fltTcaOspfLsRcvdPktStats15minLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422706: fltTcaOspfLsRcvdPktStats1hLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422707: fltTcaOspfLsRcvdPktStats1dLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422708: fltTcaOspfLsRcvdPktStats1wLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422709: fltTcaOspfLsRcvdPktStats1moLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422710: fltTcaOspfLsRcvdPktStats1qtrLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422711: fltTcaOspfLsRcvdPktStats1yearLsUpdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422712: fltTcaOspfLsRcvdPktStats5minLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422713: fltTcaOspfLsRcvdPktStats15minLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422714: fltTcaOspfLsRcvdPktStats1hLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422715: fltTcaOspfLsRcvdPktStats1dLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422716: fltTcaOspfLsRcvdPktStats1wLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422717: fltTcaOspfLsRcvdPktStats1moLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422718: fltTcaOspfLsRcvdPktStats1qtrLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422719: fltTcaOspfLsRcvdPktStats1yearLsUpdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422744: fltTcaOspfLsRcvdPktStats5minLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422745: fltTcaOspfLsRcvdPktStats15minLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422746: fltTcaOspfLsRcvdPktStats1hLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422747: fltTcaOspfLsRcvdPktStats1dLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422748: fltTcaOspfLsRcvdPktStats1wLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422749: fltTcaOspfLsRcvdPktStats1moLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422750: fltTcaOspfLsRcvdPktStats1qtrLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422751: fltTcaOspfLsRcvdPktStats1yearLsUpdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422752: fltTcaOspfLsRcvdPktStats5minLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422753: fltTcaOspfLsRcvdPktStats15minLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422754: fltTcaOspfLsRcvdPktStats1hLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422755: fltTcaOspfLsRcvdPktStats1dLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422756: fltTcaOspfLsRcvdPktStats1wLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422757: fltTcaOspfLsRcvdPktStats1moLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422758: fltTcaOspfLsRcvdPktStats1qtrLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422759: fltTcaOspfLsRcvdPktStats1yearLsUpdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4228: fltHcloudPeerGwOperCloudPeerGwOperStateDown

Severity: minor

Explanation: This fault occurs when the Peer Gateway is down.

Recommended Action: If you see this fault, take the following actions:

1. If fault still has not cleared, please contact Cisco TAC.

F422832: fltTcaOspfLsSentStats5minLsAckPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422833: fltTcaOspfLsSentStats15minLsAckPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422834: fltTcaOspfLsSentStats1hLsAckPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422835: fltTcaOspfLsSentStats1dLsAckPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422836: fltTcaOspfLsSentStats1wLsAckPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422837: fltTcaOspfLsSentStats1moLsAckPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422838: fltTcaOspfLsSentStats1qtrLsAckPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422839: fltTcaOspfLsSentStats1yearLsAckPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422848: fltTcaOspfLsSentStats5minLsAckPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422849: fltTcaOspfLsSentStats15minLsAckPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422850: fltTcaOspfLsSentStats1hLsAckPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422851: fltTcaOspfLsSentStats1dLsAckPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422852: fltTcaOspfLsSentStats1wLsAckPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422853: fltTcaOspfLsSentStats1moLsAckPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422854: fltTcaOspfLsSentStats1qtrLsAckPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422855: fltTcaOspfLsSentStats1yearLsAckPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422856: fltTcaOspfLsSentStats5minLsAckPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422857: fltTcaOspfLsSentStats15minLsAckPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422858: fltTcaOspfLsSentStats1hLsAckPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422859: fltTcaOspfLsSentStats1dLsAckPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422860: fltTcaOspfLsSentStats1wLsAckPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422861: fltTcaOspfLsSentStats1moLsAckPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422862: fltTcaOspfLsSentStats1qtrLsAckPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422863: fltTcaOspfLsSentStats1yearLsAckPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422864: fltTcaOspfLsSentStats5minLsAckPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422865: fltTcaOspfLsSentStats15minLsAckPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422866: fltTcaOspfLsSentStats1hLsAckPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422867: fltTcaOspfLsSentStats1dLsAckPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422868: fltTcaOspfLsSentStats1wLsAckPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422869: fltTcaOspfLsSentStats1moLsAckPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422870: fltTcaOspfLsSentStats1qtrLsAckPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422871: fltTcaOspfLsSentStats1yearLsAckPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422872: fltTcaOspfLsSentStats5minLsAckPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422873: fltTcaOspfLsSentStats15minLsAckPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422874: fltTcaOspfLsSentStats1hLsAckPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422875: fltTcaOspfLsSentStats1dLsAckPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422876: fltTcaOspfLsSentStats1wLsAckPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422877: fltTcaOspfLsSentStats1moLsAckPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422878: fltTcaOspfLsSentStats1qtrLsAckPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422879: fltTcaOspfLsSentStats1yearLsAckPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422880: fltTcaOspfLsSentStats5minLsAckPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422881: fltTcaOspfLsSentStats15minLsAckPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422882: fltTcaOspfLsSentStats1hLsAckPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422883: fltTcaOspfLsSentStats1dLsAckPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422884: fltTcaOspfLsSentStats1wLsAckPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422885: fltTcaOspfLsSentStats1moLsAckPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422886: fltTcaOspfLsSentStats1qtrLsAckPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422887: fltTcaOspfLsSentStats1yearLsAckPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4229: fltHcextnwTunnIfOperCextnwTunnIfOperStateDown

Severity: minor

Explanation: This fault occurs when the hcextnw:TunnIfOper is down.

Recommended Action: If you see this fault, take the following actions:

1. If fault still has not cleared, please contact Cisco TAC.

F422912: fltTcaOspfLsSentStats5minLsAckPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422913: fltTcaOspfLsSentStats15minLsAckPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422914: fltTcaOspfLsSentStats1hLsAckPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422915: fltTcaOspfLsSentStats1dLsAckPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422916: fltTcaOspfLsSentStats1wLsAckPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422917: fltTcaOspfLsSentStats1moLsAckPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422918: fltTcaOspfLsSentStats1qtrLsAckPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422919: fltTcaOspfLsSentStats1yearLsAckPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422920: fltTcaOspfLsSentStats5minLsAckPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422921: fltTcaOspfLsSentStats15minLsAckPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422922: fltTcaOspfLsSentStats1hLsAckPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422923: fltTcaOspfLsSentStats1dLsAckPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422924: fltTcaOspfLsSentStats1wLsAckPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422925: fltTcaOspfLsSentStats1moLsAckPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422926: fltTcaOspfLsSentStats1qtrLsAckPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F422927: fltTcaOspfLsSentStats1yearLsAckPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSACK Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSACK Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4230: fltHcloudHubCtxBgpPeerOperCloudHubCtxBgpPeerOperStateDown

Severity: minor

Explanation: This fault occurs when the Bgp Peer is down.

Recommended Action: If you see this fault, take the following actions:

1. If fault still has not cleared, please contact Cisco TAC.

F423000: fltTcaOspfLsSentStats5minLsReqPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423001: fltTcaOspfLsSentStats15minLsReqPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423002: fltTcaOspfLsSentStats1hLsReqPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423003: fltTcaOspfLsSentStats1dLsReqPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423004: fltTcaOspfLsSentStats1wLsReqPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423005: fltTcaOspfLsSentStats1moLsReqPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423006: fltTcaOspfLsSentStats1qtrLsReqPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423007: fltTcaOspfLsSentStats1yearLsReqPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423016: fltTcaOspfLsSentStats5minLsReqPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423017: fltTcaOspfLsSentStats15minLsReqPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423018: fltTcaOspfLsSentStats1hLsReqPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423019: fltTcaOspfLsSentStats1dLsReqPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423020: fltTcaOspfLsSentStats1wLsReqPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423021: fltTcaOspfLsSentStats1moLsReqPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423022: fltTcaOspfLsSentStats1qtrLsReqPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423023: fltTcaOspfLsSentStats1yearLsReqPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423024: fltTcaOspfLsSentStats5minLsReqPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423025: fltTcaOspfLsSentStats15minLsReqPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423026: fltTcaOspfLsSentStats1hLsReqPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423027: fltTcaOspfLsSentStats1dLsReqPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423028: fltTcaOspfLsSentStats1wLsReqPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423029: fltTcaOspfLsSentStats1moLsReqPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423030: fltTcaOspfLsSentStats1qtrLsReqPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423031: fltTcaOspfLsSentStats1yearLsReqPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423032: fltTcaOspfLsSentStats5minLsReqPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423033: fltTcaOspfLsSentStats15minLsReqPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423034: fltTcaOspfLsSentStats1hLsReqPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423035: fltTcaOspfLsSentStats1dLsReqPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423036: fltTcaOspfLsSentStats1wLsReqPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423037: fltTcaOspfLsSentStats1moLsReqPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423038: fltTcaOspfLsSentStats1qtrLsReqPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423039: fltTcaOspfLsSentStats1yearLsReqPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423040: fltTcaOspfLsSentStats5minLsReqPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423041: fltTcaOspfLsSentStats15minLsReqPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423042: fltTcaOspfLsSentStats1hLsReqPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423043: fltTcaOspfLsSentStats1dLsReqPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423044: fltTcaOspfLsSentStats1wLsReqPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423045: fltTcaOspfLsSentStats1moLsReqPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423046: fltTcaOspfLsSentStats1qtrLsReqPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423047: fltTcaOspfLsSentStats1yearLsReqPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423048: fltTcaOspfLsSentStats5minLsReqPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423049: fltTcaOspfLsSentStats15minLsReqPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423050: fltTcaOspfLsSentStats1hLsReqPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423051: fltTcaOspfLsSentStats1dLsReqPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423052: fltTcaOspfLsSentStats1wLsReqPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423053: fltTcaOspfLsSentStats1moLsReqPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423054: fltTcaOspfLsSentStats1qtrLsReqPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423055: fltTcaOspfLsSentStats1yearLsReqPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423080: fltTcaOspfLsSentStats5minLsReqPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423081: fltTcaOspfLsSentStats15minLsReqPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423082: fltTcaOspfLsSentStats1hLsReqPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423083: fltTcaOspfLsSentStats1dLsReqPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423084: fltTcaOspfLsSentStats1wLsReqPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423085: fltTcaOspfLsSentStats1moLsReqPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423086: fltTcaOspfLsSentStats1qtrLsReqPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423087: fltTcaOspfLsSentStats1yearLsReqPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423088: fltTcaOspfLsSentStats5minLsReqPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423089: fltTcaOspfLsSentStats15minLsReqPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423090: fltTcaOspfLsSentStats1hLsReqPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423091: fltTcaOspfLsSentStats1dLsReqPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423092: fltTcaOspfLsSentStats1wLsReqPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423093: fltTcaOspfLsSentStats1moLsReqPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423094: fltTcaOspfLsSentStats1qtrLsReqPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423095: fltTcaOspfLsSentStats1yearLsReqPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSREQ Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSREQ Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4231: fltHcloudRsExtNetworkToVrfResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F423168: fltTcaOspfLsSentStats5minLsUpdPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423169: fltTcaOspfLsSentStats15minLsUpdPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423170: fltTcaOspfLsSentStats1hLsUpdPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423171: fltTcaOspfLsSentStats1dLsUpdPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423172: fltTcaOspfLsSentStats1wLsUpdPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423173: fltTcaOspfLsSentStats1moLsUpdPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423174: fltTcaOspfLsSentStats1qtrLsUpdPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423175: fltTcaOspfLsSentStats1yearLsUpdPktsSentLast

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423184: fltTcaOspfLsSentStats5minLsUpdPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423185: fltTcaOspfLsSentStats15minLsUpdPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423186: fltTcaOspfLsSentStats1hLsUpdPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423187: fltTcaOspfLsSentStats1dLsUpdPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423188: fltTcaOspfLsSentStats1wLsUpdPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423189: fltTcaOspfLsSentStats1moLsUpdPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423190: fltTcaOspfLsSentStats1qtrLsUpdPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423191: fltTcaOspfLsSentStats1yearLsUpdPktsSentCum

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423192: fltTcaOspfLsSentStats5minLsUpdPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423193: fltTcaOspfLsSentStats15minLsUpdPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423194: fltTcaOspfLsSentStats1hLsUpdPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423195: fltTcaOspfLsSentStats1dLsUpdPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423196: fltTcaOspfLsSentStats1wLsUpdPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423197: fltTcaOspfLsSentStats1moLsUpdPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423198: fltTcaOspfLsSentStats1qtrLsUpdPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423199: fltTcaOspfLsSentStats1yearLsUpdPktsSentPer

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4232: fltHcloudRsHubCtxToACtxResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F423200: fltTcaOspfLsSentStats5minLsUpdPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423201: fltTcaOspfLsSentStats15minLsUpdPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423202: fltTcaOspfLsSentStats1hLsUpdPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423203: fltTcaOspfLsSentStats1dLsUpdPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423204: fltTcaOspfLsSentStats1wLsUpdPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423205: fltTcaOspfLsSentStats1moLsUpdPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423206: fltTcaOspfLsSentStats1qtrLsUpdPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423207: fltTcaOspfLsSentStats1yearLsUpdPktsSentMin

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423208: fltTcaOspfLsSentStats5minLsUpdPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423209: fltTcaOspfLsSentStats15minLsUpdPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423210: fltTcaOspfLsSentStats1hLsUpdPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423211: fltTcaOspfLsSentStats1dLsUpdPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423212: fltTcaOspfLsSentStats1wLsUpdPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423213: fltTcaOspfLsSentStats1moLsUpdPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423214: fltTcaOspfLsSentStats1qtrLsUpdPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423215: fltTcaOspfLsSentStats1yearLsUpdPktsSentMax

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423216: fltTcaOspfLsSentStats5minLsUpdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423217: fltTcaOspfLsSentStats15minLsUpdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423218: fltTcaOspfLsSentStats1hLsUpdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423219: fltTcaOspfLsSentStats1dLsUpdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423220: fltTcaOspfLsSentStats1wLsUpdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423221: fltTcaOspfLsSentStats1moLsUpdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423222: fltTcaOspfLsSentStats1qtrLsUpdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423223: fltTcaOspfLsSentStats1yearLsUpdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423248: fltTcaOspfLsSentStats5minLsUpdPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423249: fltTcaOspfLsSentStats15minLsUpdPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423250: fltTcaOspfLsSentStats1hLsUpdPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423251: fltTcaOspfLsSentStats1dLsUpdPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423252: fltTcaOspfLsSentStats1wLsUpdPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423253: fltTcaOspfLsSentStats1moLsUpdPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423254: fltTcaOspfLsSentStats1qtrLsUpdPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423255: fltTcaOspfLsSentStats1yearLsUpdPktsSentTr

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423256: fltTcaOspfLsSentStats5minLsUpdPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423257: fltTcaOspfLsSentStats15minLsUpdPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423258: fltTcaOspfLsSentStats1hLsUpdPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423259: fltTcaOspfLsSentStats1dLsUpdPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423260: fltTcaOspfLsSentStats1wLsUpdPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423261: fltTcaOspfLsSentStats1moLsUpdPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423262: fltTcaOspfLsSentStats1qtrLsUpdPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423263: fltTcaOspfLsSentStats1yearLsUpdPktsSentRate

Severity: variable

Explanation: This fault is caused by "LSU Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4233: fltHcloudRsVpnConnectionToPeerGwResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F423336: fltTcaOspfLsaStats5minDroppedLsaPktsWhileGRLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423337: fltTcaOspfLsaStats15minDroppedLsaPktsWhileGRLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423338: fltTcaOspfLsaStats1hDroppedLsaPktsWhileGRLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423339: fltTcaOspfLsaStats1dDroppedLsaPktsWhileGRLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423340: fltTcaOspfLsaStats1wDroppedLsaPktsWhileGRLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423341: fltTcaOspfLsaStats1moDroppedLsaPktsWhileGRLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423342: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileGRLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423343: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileGRLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423352: fltTcaOspfLsaStats5minDroppedLsaPktsWhileGRCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423353: fltTcaOspfLsaStats15minDroppedLsaPktsWhileGRCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423354: fltTcaOspfLsaStats1hDroppedLsaPktsWhileGRCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423355: fltTcaOspfLsaStats1dDroppedLsaPktsWhileGRCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423356: fltTcaOspfLsaStats1wDroppedLsaPktsWhileGRCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423357: fltTcaOspfLsaStats1moDroppedLsaPktsWhileGRCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423358: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileGRCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423359: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileGRCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423360: fltTcaOspfLsaStats5minDroppedLsaPktsWhileGRPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423361: fltTcaOspfLsaStats15minDroppedLsaPktsWhileGRPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423362: fltTcaOspfLsaStats1hDroppedLsaPktsWhileGRPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423363: fltTcaOspfLsaStats1dDroppedLsaPktsWhileGRPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423364: fltTcaOspfLsaStats1wDroppedLsaPktsWhileGRPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423365: fltTcaOspfLsaStats1moDroppedLsaPktsWhileGRPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423366: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileGRPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423367: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileGRPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423368: fltTcaOspfLsaStats5minDroppedLsaPktsWhileGRMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423369: fltTcaOspfLsaStats15minDroppedLsaPktsWhileGRMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423370: fltTcaOspfLsaStats1hDroppedLsaPktsWhileGRMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423371: fltTcaOspfLsaStats1dDroppedLsaPktsWhileGRMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423372: fltTcaOspfLsaStats1wDroppedLsaPktsWhileGRMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423373: fltTcaOspfLsaStats1moDroppedLsaPktsWhileGRMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423374: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileGRMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423375: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileGRMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423376: fltTcaOspfLsaStats5minDroppedLsaPktsWhileGRMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423377: fltTcaOspfLsaStats15minDroppedLsaPktsWhileGRMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423378: fltTcaOspfLsaStats1hDroppedLsaPktsWhileGRMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423379: fltTcaOspfLsaStats1dDroppedLsaPktsWhileGRMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423380: fltTcaOspfLsaStats1wDroppedLsaPktsWhileGRMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423381: fltTcaOspfLsaStats1moDroppedLsaPktsWhileGRMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423382: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileGRMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423383: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileGRMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423384: fltTcaOspfLsaStats5minDroppedLsaPktsWhileGRAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423385: fltTcaOspfLsaStats15minDroppedLsaPktsWhileGRAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423386: fltTcaOspfLsaStats1hDroppedLsaPktsWhileGRAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423387: fltTcaOspfLsaStats1dDroppedLsaPktsWhileGRAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423388: fltTcaOspfLsaStats1wDroppedLsaPktsWhileGRAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423389: fltTcaOspfLsaStats1moDroppedLsaPktsWhileGRAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423390: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileGRAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423391: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileGRAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4234: fltHcloudRsVpnConnectionToVpnGwResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F423416: fltTcaOspfLsaStats5minDroppedLsaPktsWhileGRTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423417: fltTcaOspfLsaStats15minDroppedLsaPktsWhileGRTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423418: fltTcaOspfLsaStats1hDroppedLsaPktsWhileGRTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423419: fltTcaOspfLsaStats1dDroppedLsaPktsWhileGRTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423420: fltTcaOspfLsaStats1wDroppedLsaPktsWhileGRTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423421: fltTcaOspfLsaStats1moDroppedLsaPktsWhileGRTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423422: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileGRTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423423: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileGRTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423424: fltTcaOspfLsaStats5minDroppedLsaPktsWhileGRRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423425: fltTcaOspfLsaStats15minDroppedLsaPktsWhileGRRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423426: fltTcaOspfLsaStats1hDroppedLsaPktsWhileGRRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423427: fltTcaOspfLsaStats1dDroppedLsaPktsWhileGRRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423428: fltTcaOspfLsaStats1wDroppedLsaPktsWhileGRRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423429: fltTcaOspfLsaStats1moDroppedLsaPktsWhileGRRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423430: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileGRRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423431: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileGRRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During GR rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During GR" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4235: fltHinventoryRsBgpPeerToVpnConnResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F423504: fltTcaOspfLsaStats5minDroppedLsaPktsWhileSPFLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423505: fltTcaOspfLsaStats15minDroppedLsaPktsWhileSPFLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423506: fltTcaOspfLsaStats1hDroppedLsaPktsWhileSPFLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423507: fltTcaOspfLsaStats1dDroppedLsaPktsWhileSPFLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423508: fltTcaOspfLsaStats1wDroppedLsaPktsWhileSPFLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423509: fltTcaOspfLsaStats1moDroppedLsaPktsWhileSPFLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423510: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileSPFLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423511: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileSPFLast

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423520: fltTcaOspfLsaStats5minDroppedLsaPktsWhileSPFCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423521: fltTcaOspfLsaStats15minDroppedLsaPktsWhileSPFCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423522: fltTcaOspfLsaStats1hDroppedLsaPktsWhileSPFCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423523: fltTcaOspfLsaStats1dDroppedLsaPktsWhileSPFCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423524: fltTcaOspfLsaStats1wDroppedLsaPktsWhileSPFCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423525: fltTcaOspfLsaStats1moDroppedLsaPktsWhileSPFCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423526: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileSPFCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423527: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileSPFCum

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423528: fltTcaOspfLsaStats5minDroppedLsaPktsWhileSPFPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423529: fltTcaOspfLsaStats15minDroppedLsaPktsWhileSPFPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423530: fltTcaOspfLsaStats1hDroppedLsaPktsWhileSPFPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423531: fltTcaOspfLsaStats1dDroppedLsaPktsWhileSPFPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423532: fltTcaOspfLsaStats1wDroppedLsaPktsWhileSPFPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423533: fltTcaOspfLsaStats1moDroppedLsaPktsWhileSPFPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423534: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileSPFPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423535: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileSPFPer

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423536: fltTcaOspfLsaStats5minDroppedLsaPktsWhileSPFMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423537: fltTcaOspfLsaStats15minDroppedLsaPktsWhileSPFMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423538: fltTcaOspfLsaStats1hDroppedLsaPktsWhileSPFMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423539: fltTcaOspfLsaStats1dDroppedLsaPktsWhileSPFMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423540: fltTcaOspfLsaStats1wDroppedLsaPktsWhileSPFMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423541: fltTcaOspfLsaStats1moDroppedLsaPktsWhileSPFMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423542: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileSPFMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423543: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileSPFMin

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423544: fltTcaOspfLsaStats5minDroppedLsaPktsWhileSPFMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423545: fltTcaOspfLsaStats15minDroppedLsaPktsWhileSPFMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423546: fltTcaOspfLsaStats1hDroppedLsaPktsWhileSPFMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423547: fltTcaOspfLsaStats1dDroppedLsaPktsWhileSPFMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423548: fltTcaOspfLsaStats1wDroppedLsaPktsWhileSPFMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423549: fltTcaOspfLsaStats1moDroppedLsaPktsWhileSPFMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423550: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileSPFMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423551: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileSPFMax

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423552: fltTcaOspfLsaStats5minDroppedLsaPktsWhileSPFAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423553: fltTcaOspfLsaStats15minDroppedLsaPktsWhileSPFAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423554: fltTcaOspfLsaStats1hDroppedLsaPktsWhileSPFAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423555: fltTcaOspfLsaStats1dDroppedLsaPktsWhileSPFAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423556: fltTcaOspfLsaStats1wDroppedLsaPktsWhileSPFAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423557: fltTcaOspfLsaStats1moDroppedLsaPktsWhileSPFAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423558: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileSPFAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423559: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileSPFAvg

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423584: fltTcaOspfLsaStats5minDroppedLsaPktsWhileSPFTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423585: fltTcaOspfLsaStats15minDroppedLsaPktsWhileSPFTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423586: fltTcaOspfLsaStats1hDroppedLsaPktsWhileSPFTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423587: fltTcaOspfLsaStats1dDroppedLsaPktsWhileSPFTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423588: fltTcaOspfLsaStats1wDroppedLsaPktsWhileSPFTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423589: fltTcaOspfLsaStats1moDroppedLsaPktsWhileSPFTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423590: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileSPFTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423591: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileSPFTr

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423592: fltTcaOspfLsaStats5minDroppedLsaPktsWhileSPFRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423593: fltTcaOspfLsaStats15minDroppedLsaPktsWhileSPFRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423594: fltTcaOspfLsaStats1hDroppedLsaPktsWhileSPFRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423595: fltTcaOspfLsaStats1dDroppedLsaPktsWhileSPFRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423596: fltTcaOspfLsaStats1wDroppedLsaPktsWhileSPFRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423597: fltTcaOspfLsaStats1moDroppedLsaPktsWhileSPFRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423598: fltTcaOspfLsaStats1qtrDroppedLsaPktsWhileSPFRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423599: fltTcaOspfLsaStats1yearDroppedLsaPktsWhileSPFRate

Severity: variable

Explanation: This fault is caused by "LSA Packets Dropped During SPF rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Packets Dropped During SPF" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4236: fltAaaOauthProviderOauthProvider_Inoperable

Severity: major

Explanation: This fault occurs when the OAuth2 provider is not operational.

Recommended Action: If you see this fault, take the following actions:

1. Verify the IP address and path to the OAuth2 provider are still active and functioning.
2. Ensure the configuration on the OAuth2 provider has not changed.
3. Verify that the OAuth2 provider is still functioning properly
4. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F423672: fltTcaOspfLsaStats5minRcvdLsaPktsIgnoredLast

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423673: fltTcaOspfLsaStats15minRcvdLsaPktsIgnoredLast

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423674: fltTcaOspfLsaStats1hRcvdLsaPktsIgnoredLast

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423675: fltTcaOspfLsaStats1dRcvdLsaPktsIgnoredLast

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423676: fltTcaOspfLsaStats1wRcvdLsaPktsIgnoredLast

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423677: fltTcaOspfLsaStats1moRcvdLsaPktsIgnoredLast

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423678: fltTcaOspfLsaStats1qtrRcvdLsaPktsIgnoredLast

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423679: fltTcaOspfLsaStats1yearRcvdLsaPktsIgnoredLast

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423688: fltTcaOspfLsaStats5minRcvdLsaPktsIgnoredCum

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423689: fltTcaOspfLsaStats15minRcvdLsaPktsIgnoredCum

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423690: fltTcaOspfLsaStats1hRcvdLsaPktsIgnoredCum

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423691: fltTcaOspfLsaStats1dRcvdLsaPktsIgnoredCum

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423692: fltTcaOspfLsaStats1wRcvdLsaPktsIgnoredCum

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423693: fltTcaOspfLsaStats1moRcvdLsaPktsIgnoredCum

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423694: fltTcaOspfLsaStats1qtrRcvdLsaPktsIgnoredCum

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423695: fltTcaOspfLsaStats1yearRcvdLsaPktsIgnoredCum

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423696: fltTcaOspfLsaStats5minRcvdLsaPktsIgnoredPer

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423697: fltTcaOspfLsaStats15minRcvdLsaPktsIgnoredPer

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423698: fltTcaOspfLsaStats1hRcvdLsaPktsIgnoredPer

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423699: fltTcaOspfLsaStats1dRcvdLsaPktsIgnoredPer

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4237: fltAaaOauthProviderOauthProviderInoperable

Severity: major

Explanation: This fault occurs when the OAuth2 provider is not operational.

Recommended Action: If you see this fault, take the following actions:

1. Verify the IP address and path to the OAuth2 provider are still active and functioning.
2. Ensure the configuration on the OAuth2 provider has not changed.
3. Verify that the OAuth2 provider is still functioning properly
4. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F423700: fltTcaOspfLsaStats1wRcvdLsaPktsIgnoredPer

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423701: fltTcaOspfLsaStats1moRcvdLsaPktsIgnoredPer

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423702: fltTcaOspfLsaStats1qtrRcvdLsaPktsIgnoredPer

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423703: fltTcaOspfLsaStats1yearRcvdLsaPktsIgnoredPer

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423704: fltTcaOspfLsaStats5minRcvdLsaPktsIgnoredMin

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423705: fltTcaOspfLsaStats15minRcvdLsaPktsIgnoredMin

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423706: fltTcaOspfLsaStats1hRcvdLsaPktsIgnoredMin

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423707: fltTcaOspfLsaStats1dRcvdLsaPktsIgnoredMin

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423708: fltTcaOspfLsaStats1wRcvdLsaPktsIgnoredMin

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423709: fltTcaOspfLsaStats1moRcvdLsaPktsIgnoredMin

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423710: fltTcaOspfLsaStats1qtrRcvdLsaPktsIgnoredMin

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423711: fltTcaOspfLsaStats1yearRcvdLsaPktsIgnoredMin

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423712: fltTcaOspfLsaStats5minRcvdLsaPktsIgnoredMax

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423713: fltTcaOspfLsaStats15minRcvdLsaPktsIgnoredMax

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423714: fltTcaOspfLsaStats1hRcvdLsaPktsIgnoredMax

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423715: fltTcaOspfLsaStats1dRcvdLsaPktsIgnoredMax

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423716: fltTcaOspfLsaStats1wRcvdLsaPktsIgnoredMax

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423717: fltTcaOspfLsaStats1moRcvdLsaPktsIgnoredMax

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423718: fltTcaOspfLsaStats1qtrRcvdLsaPktsIgnoredMax

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423719: fltTcaOspfLsaStats1yearRcvdLsaPktsIgnoredMax

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423720: fltTcaOspfLsaStats5minRcvdLsaPktsIgnoredAvg

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423721: fltTcaOspfLsaStats15minRcvdLsaPktsIgnoredAvg

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423722: fltTcaOspfLsaStats1hRcvdLsaPktsIgnoredAvg

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423723: fltTcaOspfLsaStats1dRcvdLsaPktsIgnoredAvg

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423724: fltTcaOspfLsaStats1wRcvdLsaPktsIgnoredAvg

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423725: fltTcaOspfLsaStats1moRcvdLsaPktsIgnoredAvg

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423726: fltTcaOspfLsaStats1qtrRcvdLsaPktsIgnoredAvg

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423727: fltTcaOspfLsaStats1yearRcvdLsaPktsIgnoredAvg

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423752: fltTcaOspfLsaStats5minRcvdLsaPktsIgnoredTr

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423753: fltTcaOspfLsaStats15minRcvdLsaPktsIgnoredTr

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423754: fltTcaOspfLsaStats1hRcvdLsaPktsIgnoredTr

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423755: fltTcaOspfLsaStats1dRcvdLsaPktsIgnoredTr

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423756: fltTcaOspfLsaStats1wRcvdLsaPktsIgnoredTr

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423757: fltTcaOspfLsaStats1moRcvdLsaPktsIgnoredTr

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423758: fltTcaOspfLsaStats1qtrRcvdLsaPktsIgnoredTr

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423759: fltTcaOspfLsaStats1yearRcvdLsaPktsIgnoredTr

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423760: fltTcaOspfLsaStats5minRcvdLsaPktsIgnoredRate

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423761: fltTcaOspfLsaStats15minRcvdLsaPktsIgnoredRate

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423762: fltTcaOspfLsaStats1hRcvdLsaPktsIgnoredRate

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423763: fltTcaOspfLsaStats1dRcvdLsaPktsIgnoredRate

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423764: fltTcaOspfLsaStats1wRcvdLsaPktsIgnoredRate

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423765: fltTcaOspfLsaStats1moRcvdLsaPktsIgnoredRate

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423766: fltTcaOspfLsaStats1qtrRcvdLsaPktsIgnoredRate

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423767: fltTcaOspfLsaStats1yearRcvdLsaPktsIgnoredRate

Severity: variable

Explanation: This fault is caused by "Received LSA Packets Ignored rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Received LSA Packets Ignored" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4238: fltSynceEthIfIntfFault

Severity: major

Explanation: This fault occurs when the syncE is configured on an unsupported interface

Recommended Action: To recover from this fault, delete the configuration and enable syncE on only supported interfaces

F423840: fltTcaOspfLsuStats5minLsuFirstTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423841: fltTcaOspfLsuStats15minLsuFirstTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423842: fltTcaOspfLsuStats1hLsuFirstTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423843: fltTcaOspfLsuStats1dLsuFirstTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423844: fltTcaOspfLsuStats1wLsuFirstTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423845: fltTcaOspfLsuStats1moLsuFirstTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423846: fltTcaOspfLsuStats1qtrLsuFirstTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423847: fltTcaOspfLsuStats1yearLsuFirstTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423856: fltTcaOspfLsuStats5minLsuFirstTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423857: fltTcaOspfLsuStats15minLsuFirstTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423858: fltTcaOspfLsuStats1hLsuFirstTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423859: fltTcaOspfLsuStats1dLsuFirstTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423860: fltTcaOspfLsuStats1wLsuFirstTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423861: fltTcaOspfLsuStats1moLsuFirstTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423862: fltTcaOspfLsuStats1qtrLsuFirstTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423863: fltTcaOspfLsuStats1yearLsuFirstTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423864: fltTcaOspfLsuStats5minLsuFirstTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423865: fltTcaOspfLsuStats15minLsuFirstTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423866: fltTcaOspfLsuStats1hLsuFirstTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423867: fltTcaOspfLsuStats1dLsuFirstTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423868: fltTcaOspfLsuStats1wLsuFirstTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423869: fltTcaOspfLsuStats1moLsuFirstTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423870: fltTcaOspfLsuStats1qtrLsuFirstTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423871: fltTcaOspfLsuStats1yearLsuFirstTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423872: fltTcaOspfLsuStats5minLsuFirstTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423873: fltTcaOspfLsuStats15minLsuFirstTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423874: fltTcaOspfLsuStats1hLsuFirstTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423875: fltTcaOspfLsuStats1dLsuFirstTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423876: fltTcaOspfLsuStats1wLsuFirstTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423877: fltTcaOspfLsuStats1moLsuFirstTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423878: fltTcaOspfLsuStats1qtrLsuFirstTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423879: fltTcaOspfLsuStats1yearLsuFirstTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423880: fltTcaOspfLsuStats5minLsuFirstTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423881: fltTcaOspfLsuStats15minLsuFirstTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423882: fltTcaOspfLsuStats1hLsuFirstTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423883: fltTcaOspfLsuStats1dLsuFirstTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423884: fltTcaOspfLsuStats1wLsuFirstTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423885: fltTcaOspfLsuStats1moLsuFirstTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423886: fltTcaOspfLsuStats1qtrLsuFirstTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423887: fltTcaOspfLsuStats1yearLsuFirstTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423888: fltTcaOspfLsuStats5minLsuFirstTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423889: fltTcaOspfLsuStats15minLsuFirstTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423890: fltTcaOspfLsuStats1hLsuFirstTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423891: fltTcaOspfLsuStats1dLsuFirstTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423892: fltTcaOspfLsuStats1wLsuFirstTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423893: fltTcaOspfLsuStats1moLsuFirstTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423894: fltTcaOspfLsuStats1qtrLsuFirstTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423895: fltTcaOspfLsuStats1yearLsuFirstTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4239: fltCoopDomCoopEpThresholds

Severity: major

Explanation: This fault occurs when the toal number of EPs exceeds the threshold value. The threshold value is 90 percent of the total number of synthentic IPs supported by the platform

Recommended Action: Try the following action

1. Use **"1. Move Endpoint to another fabric"** 2. Replace Spines with Spines having higher endpoint scale

F423920: fltTcaOspfLsuStats5minLsuFirstTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423921: fltTcaOspfLsuStats15minLsuFirstTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423922: fltTcaOspfLsuStats1hLsuFirstTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423923: fltTcaOspfLsuStats1dLsuFirstTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423924: fltTcaOspfLsuStats1wLsuFirstTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423925: fltTcaOspfLsuStats1moLsuFirstTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423926: fltTcaOspfLsuStats1qtrLsuFirstTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423927: fltTcaOspfLsuStats1yearLsuFirstTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423928: fltTcaOspfLsuStats5minLsuFirstTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423929: fltTcaOspfLsuStats15minLsuFirstTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423930: fltTcaOspfLsuStats1hLsuFirstTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423931: fltTcaOspfLsuStats1dLsuFirstTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423932: fltTcaOspfLsuStats1wLsuFirstTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423933: fltTcaOspfLsuStats1moLsuFirstTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423934: fltTcaOspfLsuStats1qtrLsuFirstTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F423935: fltTcaOspfLsuStats1yearLsuFirstTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU First Tx Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU First Tx Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424008: fltTcaOspfLsuStats5minLsuForLsreqPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424009: fltTcaOspfLsuStats15minLsuForLsreqPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424010: fltTcaOspfLsuStats1hLsuForLsreqPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424011: fltTcaOspfLsuStats1dLsuForLsreqPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424012: fltTcaOspfLsuStats1wLsuForLsreqPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424013: fltTcaOspfLsuStats1moLsuForLsreqPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424014: fltTcaOspfLsuStats1qtrLsuForLsreqPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424015: fltTcaOspfLsuStats1yearLsuForLsreqPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424024: fltTcaOspfLsuStats5minLsuForLsreqPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424025: fltTcaOspfLsuStats15minLsuForLsreqPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424026: fltTcaOspfLsuStats1hLsuForLsreqPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424027: fltTcaOspfLsuStats1dLsuForLsreqPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424028: fltTcaOspfLsuStats1wLsuForLsreqPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424029: fltTcaOspfLsuStats1moLsuForLsreqPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424030: fltTcaOspfLsuStats1qtrLsuForLsreqPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424031: fltTcaOspfLsuStats1yearLsuForLsreqPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424032: fltTcaOspfLsuStats5minLsuForLsreqPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424033: fltTcaOspfLsuStats15minLsuForLsreqPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424034: fltTcaOspfLsuStats1hLsuForLsreqPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424035: fltTcaOspfLsuStats1dLsuForLsreqPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424036: fltTcaOspfLsuStats1wLsuForLsreqPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424037: fltTcaOspfLsuStats1moLsuForLsreqPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424038: fltTcaOspfLsuStats1qtrLsuForLsreqPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424039: fltTcaOspfLsuStats1yearLsuForLsreqPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424040: fltTcaOspfLsuStats5minLsuForLsreqPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424041: fltTcaOspfLsuStats15minLsuForLsreqPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424042: fltTcaOspfLsuStats1hLsuForLsreqPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424043: fltTcaOspfLsuStats1dLsuForLsreqPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424044: fltTcaOspfLsuStats1wLsuForLsreqPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424045: fltTcaOspfLsuStats1moLsuForLsreqPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424046: fltTcaOspfLsuStats1qtrLsuForLsreqPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424047: fltTcaOspfLsuStats1yearLsuForLsreqPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424048: fltTcaOspfLsuStats5minLsuForLsreqPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424049: fltTcaOspfLsuStats15minLsuForLsreqPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424050: fltTcaOspfLsuStats1hLsuForLsreqPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424051: fltTcaOspfLsuStats1dLsuForLsreqPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424052: fltTcaOspfLsuStats1wLsuForLsreqPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424053: fltTcaOspfLsuStats1moLsuForLsreqPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424054: fltTcaOspfLsuStats1qtrLsuForLsreqPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424055: fltTcaOspfLsuStats1yearLsuForLsreqPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424056: fltTcaOspfLsuStats5minLsuForLsreqPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424057: fltTcaOspfLsuStats15minLsuForLsreqPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424058: fltTcaOspfLsuStats1hLsuForLsreqPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424059: fltTcaOspfLsuStats1dLsuForLsreqPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424060: fltTcaOspfLsuStats1wLsuForLsreqPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424061: fltTcaOspfLsuStats1moLsuForLsreqPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424062: fltTcaOspfLsuStats1qtrLsuForLsreqPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424063: fltTcaOspfLsuStats1yearLsuForLsreqPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424088: fltTcaOspfLsuStats5minLsuForLsreqPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424089: fltTcaOspfLsuStats15minLsuForLsreqPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424090: fltTcaOspfLsuStats1hLsuForLsreqPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424091: fltTcaOspfLsuStats1dLsuForLsreqPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424092: fltTcaOspfLsuStats1wLsuForLsreqPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424093: fltTcaOspfLsuStats1moLsuForLsreqPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424094: fltTcaOspfLsuStats1qtrLsuForLsreqPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424095: fltTcaOspfLsuStats1yearLsuForLsreqPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424096: fltTcaOspfLsuStats5minLsuForLsreqPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424097: fltTcaOspfLsuStats15minLsuForLsreqPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424098: fltTcaOspfLsuStats1hLsuForLsreqPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424099: fltTcaOspfLsuStats1dLsuForLsreqPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4241: fltInfraRsLeafTopoctrlUsbConfigProfilePolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F424100: fltTcaOspfLsuStats1wLsuForLsreqPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424101: fltTcaOspfLsuStats1moLsuForLsreqPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424102: fltTcaOspfLsuStats1qtrLsuForLsreqPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424103: fltTcaOspfLsuStats1yearLsuForLsreqPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets For LSREQ Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets For LSREQ Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424176: fltTcaOspfLsuStats5minLsuPeerTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424177: fltTcaOspfLsuStats15minLsuPeerTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424178: fltTcaOspfLsuStats1hLsuPeerTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424179: fltTcaOspfLsuStats1dLsuPeerTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424180: fltTcaOspfLsuStats1wLsuPeerTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424181: fltTcaOspfLsuStats1moLsuPeerTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424182: fltTcaOspfLsuStats1qtrLsuPeerTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424183: fltTcaOspfLsuStats1yearLsuPeerTxPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424192: fltTcaOspfLsuStats5minLsuPeerTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424193: fltTcaOspfLsuStats15minLsuPeerTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424194: fltTcaOspfLsuStats1hLsuPeerTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424195: fltTcaOspfLsuStats1dLsuPeerTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424196: fltTcaOspfLsuStats1wLsuPeerTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424197: fltTcaOspfLsuStats1moLsuPeerTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424198: fltTcaOspfLsuStats1qtrLsuPeerTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424199: fltTcaOspfLsuStats1yearLsuPeerTxPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4242: fltInfraRsSpineTopoctrlUsbConfigProfilePolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F424200: fltTcaOspfLsuStats5minLsuPeerTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424201: fltTcaOspfLsuStats15minLsuPeerTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424202: fltTcaOspfLsuStats1hLsuPeerTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424203: fltTcaOspfLsuStats1dLsuPeerTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424204: fltTcaOspfLsuStats1wLsuPeerTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424205: fltTcaOspfLsuStats1moLsuPeerTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424206: fltTcaOspfLsuStats1qtrLsuPeerTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424207: fltTcaOspfLsuStats1yearLsuPeerTxPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424208: fltTcaOspfLsuStats5minLsuPeerTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424209: fltTcaOspfLsuStats15minLsuPeerTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424210: fltTcaOspfLsuStats1hLsuPeerTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424211: fltTcaOspfLsuStats1dLsuPeerTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424212: fltTcaOspfLsuStats1wLsuPeerTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424213: fltTcaOspfLsuStats1moLsuPeerTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424214: fltTcaOspfLsuStats1qtrLsuPeerTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424215: fltTcaOspfLsuStats1yearLsuPeerTxPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424216: fltTcaOspfLsuStats5minLsuPeerTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424217: fltTcaOspfLsuStats15minLsuPeerTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424218: fltTcaOspfLsuStats1hLsuPeerTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424219: fltTcaOspfLsuStats1dLsuPeerTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424220: fltTcaOspfLsuStats1wLsuPeerTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424221: fltTcaOspfLsuStats1moLsuPeerTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424222: fltTcaOspfLsuStats1qtrLsuPeerTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424223: fltTcaOspfLsuStats1yearLsuPeerTxPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424224: fltTcaOspfLsuStats5minLsuPeerTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424225: fltTcaOspfLsuStats15minLsuPeerTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424226: fltTcaOspfLsuStats1hLsuPeerTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424227: fltTcaOspfLsuStats1dLsuPeerTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424228: fltTcaOspfLsuStats1wLsuPeerTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424229: fltTcaOspfLsuStats1moLsuPeerTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424230: fltTcaOspfLsuStats1qtrLsuPeerTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424231: fltTcaOspfLsuStats1yearLsuPeerTxPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424256: fltTcaOspfLsuStats5minLsuPeerTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424257: fltTcaOspfLsuStats15minLsuPeerTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424258: fltTcaOspfLsuStats1hLsuPeerTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424259: fltTcaOspfLsuStats1dLsuPeerTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424260: fltTcaOspfLsuStats1wLsuPeerTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424261: fltTcaOspfLsuStats1moLsuPeerTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424262: fltTcaOspfLsuStats1qtrLsuPeerTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424263: fltTcaOspfLsuStats1yearLsuPeerTxPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424264: fltTcaOspfLsuStats5minLsuPeerTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424265: fltTcaOspfLsuStats15minLsuPeerTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424266: fltTcaOspfLsuStats1hLsuPeerTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424267: fltTcaOspfLsuStats1dLsuPeerTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424268: fltTcaOspfLsuStats1wLsuPeerTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424269: fltTcaOspfLsuStats1moLsuPeerTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424270: fltTcaOspfLsuStats1qtrLsuPeerTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424271: fltTcaOspfLsuStats1yearLsuPeerTxPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Packets To Peer rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Packets To Peer" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424344: fltTcaOspfLsuStats5minLsuRexmitPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424345: fltTcaOspfLsuStats15minLsuRexmitPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424346: fltTcaOspfLsuStats1hLsuRexmitPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424347: fltTcaOspfLsuStats1dLsuRexmitPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424348: fltTcaOspfLsuStats1wLsuRexmitPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424349: fltTcaOspfLsuStats1moLsuRexmitPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424350: fltTcaOspfLsuStats1qtrLsuRexmitPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424351: fltTcaOspfLsuStats1yearLsuRexmitPktsLast

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424360: fltTcaOspfLsuStats5minLsuRexmitPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424361: fltTcaOspfLsuStats15minLsuRexmitPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424362: fltTcaOspfLsuStats1hLsuRexmitPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424363: fltTcaOspfLsuStats1dLsuRexmitPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424364: fltTcaOspfLsuStats1wLsuRexmitPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424365: fltTcaOspfLsuStats1moLsuRexmitPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424366: fltTcaOspfLsuStats1qtrLsuRexmitPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424367: fltTcaOspfLsuStats1yearLsuRexmitPktsCum

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424368: fltTcaOspfLsuStats5minLsuRexmitPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424369: fltTcaOspfLsuStats15minLsuRexmitPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424370: fltTcaOspfLsuStats1hLsuRexmitPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424371: fltTcaOspfLsuStats1dLsuRexmitPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424372: fltTcaOspfLsuStats1wLsuRexmitPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424373: fltTcaOspfLsuStats1moLsuRexmitPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424374: fltTcaOspfLsuStats1qtrLsuRexmitPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424375: fltTcaOspfLsuStats1yearLsuRexmitPktsPer

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424376: fltTcaOspfLsuStats5minLsuRexmitPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424377: fltTcaOspfLsuStats15minLsuRexmitPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424378: fltTcaOspfLsuStats1hLsuRexmitPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424379: fltTcaOspfLsuStats1dLsuRexmitPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424380: fltTcaOspfLsuStats1wLsuRexmitPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424381: fltTcaOspfLsuStats1moLsuRexmitPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424382: fltTcaOspfLsuStats1qtrLsuRexmitPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424383: fltTcaOspfLsuStats1yearLsuRexmitPktsMin

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424384: fltTcaOspfLsuStats5minLsuRexmitPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424385: fltTcaOspfLsuStats15minLsuRexmitPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424386: fltTcaOspfLsuStats1hLsuRexmitPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424387: fltTcaOspfLsuStats1dLsuRexmitPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424388: fltTcaOspfLsuStats1wLsuRexmitPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424389: fltTcaOspfLsuStats1moLsuRexmitPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424390: fltTcaOspfLsuStats1qtrLsuRexmitPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424391: fltTcaOspfLsuStats1yearLsuRexmitPktsMax

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424392: fltTcaOspfLsuStats5minLsuRexmitPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424393: fltTcaOspfLsuStats15minLsuRexmitPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424394: fltTcaOspfLsuStats1hLsuRexmitPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424395: fltTcaOspfLsuStats1dLsuRexmitPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424396: fltTcaOspfLsuStats1wLsuRexmitPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424397: fltTcaOspfLsuStats1moLsuRexmitPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424398: fltTcaOspfLsuStats1qtrLsuRexmitPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424399: fltTcaOspfLsuStats1yearLsuRexmitPktsAvg

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4244: fltDhcpClientSwitchImageFindFail

Severity: warning

Explanation: This fault is raised when there is no auto-upgrade policy during poap conversion process

Recommended Action: If you see this fault, take the following actions:

1. Upload a switch image to apic repository
2. If the above actions did not resolve the issue, collect a **tech-support** file and contact Cisco TAC.

F424424: fltTcaOspfLsuStats5minLsuRexmitPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424425: fltTcaOspfLsuStats15minLsuRexmitPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424426: fltTcaOspfLsuStats1hLsuRexmitPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424427: fltTcaOspfLsuStats1dLsuRexmitPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424428: fltTcaOspfLsuStats1wLsuRexmitPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424429: fltTcaOspfLsuStats1moLsuRexmitPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424430: fltTcaOspfLsuStats1qtrLsuRexmitPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424431: fltTcaOspfLsuStats1yearLsuRexmitPktsTr

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424432: fltTcaOspfLsuStats5minLsuRexmitPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424433: fltTcaOspfLsuStats15minLsuRexmitPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424434: fltTcaOspfLsuStats1hLsuRexmitPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424435: fltTcaOspfLsuStats1dLsuRexmitPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424436: fltTcaOspfLsuStats1wLsuRexmitPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424437: fltTcaOspfLsuStats1moLsuRexmitPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424438: fltTcaOspfLsuStats1qtrLsuRexmitPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424439: fltTcaOspfLsuStats1yearLsuRexmitPktsRate

Severity: variable

Explanation: This fault is caused by "LSU Retransmission Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSU Retransmission Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4245: fltDhcpNodeIdentPOperPoapConversionFailed

Severity: major

Explanation: This fault is raised when poap conversion failed

Recommended Action: If you see this fault, take the following actions:

1. Collect a **tech-support** file and contact Cisco TAC.

F424512: fltTcaOspfPeerPktStats5minPeerNotFoundPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424513: fltTcaOspfPeerPktStats15minPeerNotFoundPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424514: fltTcaOspfPeerPktStats1hPeerNotFoundPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424515: fltTcaOspfPeerPktStats1dPeerNotFoundPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424516: fltTcaOspfPeerPktStats1wPeerNotFoundPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424517: fltTcaOspfPeerPktStats1moPeerNotFoundPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424518: fltTcaOspfPeerPktStats1qtrPeerNotFoundPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424519: fltTcaOspfPeerPktStats1yearPeerNotFoundPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424528: fltTcaOspfPeerPktStats5minPeerNotFoundPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424529: fltTcaOspfPeerPktStats15minPeerNotFoundPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424530: fltTcaOspfPeerPktStats1hPeerNotFoundPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424531: fltTcaOspfPeerPktStats1dPeerNotFoundPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424532: fltTcaOspfPeerPktStats1wPeerNotFoundPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424533: fltTcaOspfPeerPktStats1moPeerNotFoundPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424534: fltTcaOspfPeerPktStats1qtrPeerNotFoundPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424535: fltTcaOspfPeerPktStats1yearPeerNotFoundPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424536: fltTcaOspfPeerPktStats5minPeerNotFoundPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424537: fltTcaOspfPeerPktStats15minPeerNotFoundPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424538: fltTcaOspfPeerPktStats1hPeerNotFoundPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424539: fltTcaOspfPeerPktStats1dPeerNotFoundPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424540: fltTcaOspfPeerPktStats1wPeerNotFoundPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424541: fltTcaOspfPeerPktStats1moPeerNotFoundPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424542: fltTcaOspfPeerPktStats1qtrPeerNotFoundPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424543: fltTcaOspfPeerPktStats1yearPeerNotFoundPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424544: fltTcaOspfPeerPktStats5minPeerNotFoundPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424545: fltTcaOspfPeerPktStats15minPeerNotFoundPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424546: fltTcaOspfPeerPktStats1hPeerNotFoundPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424547: fltTcaOspfPeerPktStats1dPeerNotFoundPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424548: fltTcaOspfPeerPktStats1wPeerNotFoundPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424549: fltTcaOspfPeerPktStats1moPeerNotFoundPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424550: fltTcaOspfPeerPktStats1qtrPeerNotFoundPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424551: fltTcaOspfPeerPktStats1yearPeerNotFoundPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424552: fltTcaOspfPeerPktStats5minPeerNotFoundPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424553: fltTcaOspfPeerPktStats15minPeerNotFoundPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424554: fltTcaOspfPeerPktStats1hPeerNotFoundPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424555: fltTcaOspfPeerPktStats1dPeerNotFoundPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424556: fltTcaOspfPeerPktStats1wPeerNotFoundPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424557: fltTcaOspfPeerPktStats1moPeerNotFoundPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424558: fltTcaOspfPeerPktStats1qtrPeerNotFoundPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424559: fltTcaOspfPeerPktStats1yearPeerNotFoundPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424560: fltTcaOspfPeerPktStats5minPeerNotFoundPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424561: fltTcaOspfPeerPktStats15minPeerNotFoundPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424562: fltTcaOspfPeerPktStats1hPeerNotFoundPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424563: fltTcaOspfPeerPktStats1dPeerNotFoundPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424564: fltTcaOspfPeerPktStats1wPeerNotFoundPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424565: fltTcaOspfPeerPktStats1moPeerNotFoundPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424566: fltTcaOspfPeerPktStats1qtrPeerNotFoundPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424567: fltTcaOspfPeerPktStats1yearPeerNotFoundPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424592: fltTcaOspfPeerPktStats5minPeerNotFoundPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424593: fltTcaOspfPeerPktStats15minPeerNotFoundPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424594: fltTcaOspfPeerPktStats1hPeerNotFoundPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424595: fltTcaOspfPeerPktStats1dPeerNotFoundPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424596: fltTcaOspfPeerPktStats1wPeerNotFoundPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424597: fltTcaOspfPeerPktStats1moPeerNotFoundPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424598: fltTcaOspfPeerPktStats1qtrPeerNotFoundPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424599: fltTcaOspfPeerPktStats1yearPeerNotFoundPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424600: fltTcaOspfPeerPktStats5minPeerNotFoundPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424601: fltTcaOspfPeerPktStats15minPeerNotFoundPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424602: fltTcaOspfPeerPktStats1hPeerNotFoundPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424603: fltTcaOspfPeerPktStats1dPeerNotFoundPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424604: fltTcaOspfPeerPktStats1wPeerNotFoundPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424605: fltTcaOspfPeerPktStats1moPeerNotFoundPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424606: fltTcaOspfPeerPktStats1qtrPeerNotFoundPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424607: fltTcaOspfPeerPktStats1yearPeerNotFoundPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer Not Found Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Not Found Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424680: fltTcaOspfPeerPktStats5minPeerRtrIdChgdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424681: fltTcaOspfPeerPktStats15minPeerRtrIdChgdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424682: fltTcaOspfPeerPktStats1hPeerRtrIdChgdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424683: fltTcaOspfPeerPktStats1dPeerRtrIdChgdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424684: fltTcaOspfPeerPktStats1wPeerRtrIdChgdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424685: fltTcaOspfPeerPktStats1moPeerRtrIdChgdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424686: fltTcaOspfPeerPktStats1qtrPeerRtrIdChgdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424687: fltTcaOspfPeerPktStats1yearPeerRtrIdChgdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424696: fltTcaOspfPeerPktStats5minPeerRtrIdChgdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424697: fltTcaOspfPeerPktStats15minPeerRtrIdChgdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424698: fltTcaOspfPeerPktStats1hPeerRtrIdChgdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424699: fltTcaOspfPeerPktStats1dPeerRtrIdChgdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4247: fltDhcpNodeConvPOperPoapConversionSuccess

Severity: minor

Explanation: This fault is raised when poap conversion is success

Recommended Action: If you see this fault, take the following actions:

1. Delete the NodeConvP this interface is associated with.

F424700: fltTcaOspfPeerPktStats1wPeerRtrIdChgdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424701: fltTcaOspfPeerPktStats1moPeerRtrIdChgdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424702: fltTcaOspfPeerPktStats1qtrPeerRtrIdChgdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424703: fltTcaOspfPeerPktStats1yearPeerRtrIdChgdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424704: fltTcaOspfPeerPktStats5minPeerRtrIdChgdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424705: fltTcaOspfPeerPktStats15minPeerRtrIdChgdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424706: fltTcaOspfPeerPktStats1hPeerRtrIdChgdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424707: fltTcaOspfPeerPktStats1dPeerRtrIdChgdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424708: fltTcaOspfPeerPktStats1wPeerRtrIdChgdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424709: fltTcaOspfPeerPktStats1moPeerRtrIdChgdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424710: fltTcaOspfPeerPktStats1qtrPeerRtrIdChgdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424711: fltTcaOspfPeerPktStats1yearPeerRtrIdChgdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424712: fltTcaOspfPeerPktStats5minPeerRtrIdChgdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424713: fltTcaOspfPeerPktStats15minPeerRtrIdChgdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424714: fltTcaOspfPeerPktStats1hPeerRtrIdChgdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424715: fltTcaOspfPeerPktStats1dPeerRtrIdChgdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424716: fltTcaOspfPeerPktStats1wPeerRtrIdChgdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424717: fltTcaOspfPeerPktStats1moPeerRtrIdChgdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424718: fltTcaOspfPeerPktStats1qtrPeerRtrIdChgdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424719: fltTcaOspfPeerPktStats1yearPeerRtrIdChgdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424720: fltTcaOspfPeerPktStats5minPeerRtrIdChgdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424721: fltTcaOspfPeerPktStats15minPeerRtrIdChgdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424722: fltTcaOspfPeerPktStats1hPeerRtrIdChgdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424723: fltTcaOspfPeerPktStats1dPeerRtrIdChgdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424724: fltTcaOspfPeerPktStats1wPeerRtrIdChgdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424725: fltTcaOspfPeerPktStats1moPeerRtrIdChgdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424726: fltTcaOspfPeerPktStats1qtrPeerRtrIdChgdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424727: fltTcaOspfPeerPktStats1yearPeerRtrIdChgdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424728: fltTcaOspfPeerPktStats5minPeerRtrIdChgdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424729: fltTcaOspfPeerPktStats15minPeerRtrIdChgdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424730: fltTcaOspfPeerPktStats1hPeerRtrIdChgdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424731: fltTcaOspfPeerPktStats1dPeerRtrIdChgdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424732: fltTcaOspfPeerPktStats1wPeerRtrIdChgdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424733: fltTcaOspfPeerPktStats1moPeerRtrIdChgdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424734: fltTcaOspfPeerPktStats1qtrPeerRtrIdChgdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424735: fltTcaOspfPeerPktStats1yearPeerRtrIdChgdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424760: fltTcaOspfPeerPktStats5minPeerRtrIdChgdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424761: fltTcaOspfPeerPktStats15minPeerRtrIdChgdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424762: fltTcaOspfPeerPktStats1hPeerRtrIdChgdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424763: fltTcaOspfPeerPktStats1dPeerRtrIdChgdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424764: fltTcaOspfPeerPktStats1wPeerRtrIdChgdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424765: fltTcaOspfPeerPktStats1moPeerRtrIdChgdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424766: fltTcaOspfPeerPktStats1qtrPeerRtrIdChgdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424767: fltTcaOspfPeerPktStats1yearPeerRtrIdChgdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424768: fltTcaOspfPeerPktStats5minPeerRtrIdChgdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424769: fltTcaOspfPeerPktStats15minPeerRtrIdChgdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424770: fltTcaOspfPeerPktStats1hPeerRtrIdChgdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424771: fltTcaOspfPeerPktStats1dPeerRtrIdChgdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424772: fltTcaOspfPeerPktStats1wPeerRtrIdChgdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424773: fltTcaOspfPeerPktStats1moPeerRtrIdChgdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424774: fltTcaOspfPeerPktStats1qtrPeerRtrIdChgdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424775: fltTcaOspfPeerPktStats1yearPeerRtrIdChgdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Peer RouterId Changed Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer RouterId Changed Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4248: fltAcEntityFabricPortExceeded

Severity: major

Explanation: This fault occurs when there is an increase in the number of fabric ports greater than 32 and is in the trail mode.

Recommended Action: To recover from this fault, try the following actions

1. If the fault occurred because of number of fabric ports exceeding 32 when the trail mode is configured, the atomic ongoing mode should be changed to path mode

F424848: fltTcaOspfPeerStats5minAdjCntLast

Severity: variable

Explanation: This fault is caused by "Adjacency Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424849: fltTcaOspfPeerStats15minAdjCntLast

Severity: variable

Explanation: This fault is caused by "Adjacency Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424850: fltTcaOspfPeerStats1hAdjCntLast

Severity: variable

Explanation: This fault is caused by "Adjacency Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424851: fltTcaOspfPeerStats1dAdjCntLast

Severity: variable

Explanation: This fault is caused by "Adjacency Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424852: fltTcaOspfPeerStats1wAdjCntLast

Severity: variable

Explanation: This fault is caused by "Adjacency Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424853: fltTcaOspfPeerStats1moAdjCntLast

Severity: variable

Explanation: This fault is caused by "Adjacency Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424854: fltTcaOspfPeerStats1qtrAdjCntLast

Severity: variable

Explanation: This fault is caused by "Adjacency Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424855: fltTcaOspfPeerStats1yearAdjCntLast

Severity: variable

Explanation: This fault is caused by "Adjacency Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424864: fltTcaOspfPeerStats5minAdjCntCum

Severity: variable

Explanation: This fault is caused by "Adjacency Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424865: fltTcaOspfPeerStats15minAdjCntCum

Severity: variable

Explanation: This fault is caused by "Adjacency Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424866: fltTcaOspfPeerStats1hAdjCntCum

Severity: variable

Explanation: This fault is caused by "Adjacency Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424867: fltTcaOspfPeerStats1dAdjCntCum

Severity: variable

Explanation: This fault is caused by "Adjacency Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424868: fltTcaOspfPeerStats1wAdjCntCum

Severity: variable

Explanation: This fault is caused by "Adjacency Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424869: fltTcaOspfPeerStats1moAdjCntCum

Severity: variable

Explanation: This fault is caused by "Adjacency Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424870: fltTcaOspfPeerStats1qtrAdjCntCum

Severity: variable

Explanation: This fault is caused by "Adjacency Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424871: fltTcaOspfPeerStats1yearAdjCntCum

Severity: variable

Explanation: This fault is caused by "Adjacency Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424872: fltTcaOspfPeerStats5minAdjCntPer

Severity: variable

Explanation: This fault is caused by "Adjacency Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424873: fltTcaOspfPeerStats15minAdjCntPer

Severity: variable

Explanation: This fault is caused by "Adjacency Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424874: fltTcaOspfPeerStats1hAdjCntPer

Severity: variable

Explanation: This fault is caused by "Adjacency Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424875: fltTcaOspfPeerStats1dAdjCntPer

Severity: variable

Explanation: This fault is caused by "Adjacency Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424876: fltTcaOspfPeerStats1wAdjCntPer

Severity: variable

Explanation: This fault is caused by "Adjacency Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424877: fltTcaOspfPeerStats1moAdjCntPer

Severity: variable

Explanation: This fault is caused by "Adjacency Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424878: fltTcaOspfPeerStats1qtrAdjCntPer

Severity: variable

Explanation: This fault is caused by "Adjacency Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424879: fltTcaOspfPeerStats1yearAdjCntPer

Severity: variable

Explanation: This fault is caused by "Adjacency Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424880: fltTcaOspfPeerStats5minAdjCntMin

Severity: variable

Explanation: This fault is caused by "Adjacency Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424881: fltTcaOspfPeerStats15minAdjCntMin

Severity: variable

Explanation: This fault is caused by "Adjacency Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424882: fltTcaOspfPeerStats1hAdjCntMin

Severity: variable

Explanation: This fault is caused by "Adjacency Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424883: fltTcaOspfPeerStats1dAdjCntMin

Severity: variable

Explanation: This fault is caused by "Adjacency Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424884: fltTcaOspfPeerStats1wAdjCntMin

Severity: variable

Explanation: This fault is caused by "Adjacency Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424885: fltTcaOspfPeerStats1moAdjCntMin

Severity: variable

Explanation: This fault is caused by "Adjacency Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424886: fltTcaOspfPeerStats1qtrAdjCntMin

Severity: variable

Explanation: This fault is caused by "Adjacency Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424887: fltTcaOspfPeerStats1yearAdjCntMin

Severity: variable

Explanation: This fault is caused by "Adjacency Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424888: fltTcaOspfPeerStats5minAdjCntMax

Severity: variable

Explanation: This fault is caused by "Adjacency Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424889: fltTcaOspfPeerStats15minAdjCntMax

Severity: variable

Explanation: This fault is caused by "Adjacency Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424890: fltTcaOspfPeerStats1hAdjCntMax

Severity: variable

Explanation: This fault is caused by "Adjacency Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424891: fltTcaOspfPeerStats1dAdjCntMax

Severity: variable

Explanation: This fault is caused by "Adjacency Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424892: fltTcaOspfPeerStats1wAdjCntMax

Severity: variable

Explanation: This fault is caused by "Adjacency Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424893: fltTcaOspfPeerStats1moAdjCntMax

Severity: variable

Explanation: This fault is caused by "Adjacency Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424894: fltTcaOspfPeerStats1qtrAdjCntMax

Severity: variable

Explanation: This fault is caused by "Adjacency Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424895: fltTcaOspfPeerStats1yearAdjCntMax

Severity: variable

Explanation: This fault is caused by "Adjacency Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424896: fltTcaOspfPeerStats5minAdjCntAvg

Severity: variable

Explanation: This fault is caused by "Adjacency Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424897: fltTcaOspfPeerStats15minAdjCntAvg

Severity: variable

Explanation: This fault is caused by "Adjacency Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424898: fltTcaOspfPeerStats1hAdjCntAvg

Severity: variable

Explanation: This fault is caused by "Adjacency Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424899: fltTcaOspfPeerStats1dAdjCntAvg

Severity: variable

Explanation: This fault is caused by "Adjacency Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4249: fltApPluginClusterHasVApic

Severity: minor

Explanation: Cluster has virtual APIC.

Recommended Action: Apps are not supported in clusters that have virtual APIC. Please remove the App.

F424900: fltTcaOspfPeerStats1wAdjCntAvg

Severity: variable

Explanation: This fault is caused by "Adjacency Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424901: fltTcaOspfPeerStats1moAdjCntAvg

Severity: variable

Explanation: This fault is caused by "Adjacency Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424902: fltTcaOspfPeerStats1qtrAdjCntAvg

Severity: variable

Explanation: This fault is caused by "Adjacency Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424903: fltTcaOspfPeerStats1yearAdjCntAvg

Severity: variable

Explanation: This fault is caused by "Adjacency Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424928: fltTcaOspfPeerStats5minAdjCntTr

Severity: variable

Explanation: This fault is caused by "Adjacency Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424929: fltTcaOspfPeerStats15minAdjCntTr

Severity: variable

Explanation: This fault is caused by "Adjacency Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424930: fltTcaOspfPeerStats1hAdjCntTr

Severity: variable

Explanation: This fault is caused by "Adjacency Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424931: fltTcaOspfPeerStats1dAdjCntTr

Severity: variable

Explanation: This fault is caused by "Adjacency Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424932: fltTcaOspfPeerStats1wAdjCntTr

Severity: variable

Explanation: This fault is caused by "Adjacency Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424933: fltTcaOspfPeerStats1moAdjCntTr

Severity: variable

Explanation: This fault is caused by "Adjacency Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424934: fltTcaOspfPeerStats1qtrAdjCntTr

Severity: variable

Explanation: This fault is caused by "Adjacency Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424935: fltTcaOspfPeerStats1yearAdjCntTr

Severity: variable

Explanation: This fault is caused by "Adjacency Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424936: fltTcaOspfPeerStats5minAdjCntRate

Severity: variable

Explanation: This fault is caused by "Adjacency Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424937: fltTcaOspfPeerStats15minAdjCntRate

Severity: variable

Explanation: This fault is caused by "Adjacency Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424938: fltTcaOspfPeerStats1hAdjCntRate

Severity: variable

Explanation: This fault is caused by "Adjacency Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424939: fltTcaOspfPeerStats1dAdjCntRate

Severity: variable

Explanation: This fault is caused by "Adjacency Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424940: fltTcaOspfPeerStats1wAdjCntRate

Severity: variable

Explanation: This fault is caused by "Adjacency Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424941: fltTcaOspfPeerStats1moAdjCntRate

Severity: variable

Explanation: This fault is caused by "Adjacency Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424942: fltTcaOspfPeerStats1qtrAdjCntRate

Severity: variable

Explanation: This fault is caused by "Adjacency Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F424943: fltTcaOspfPeerStats1yearAdjCntRate

Severity: variable

Explanation: This fault is caused by "Adjacency Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Adjacency Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425016: fltTcaOspfPeerStats5minFloodToPeerCntLast

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425017: fltTcaOspfPeerStats15minFloodToPeerCntLast

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425018: fltTcaOspfPeerStats1hFloodToPeerCntLast

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425019: fltTcaOspfPeerStats1dFloodToPeerCntLast

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425020: fltTcaOspfPeerStats1wFloodToPeerCntLast

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425021: fltTcaOspfPeerStats1moFloodToPeerCntLast

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425022: fltTcaOspfPeerStats1qtrFloodToPeerCntLast

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425023: fltTcaOspfPeerStats1yearFloodToPeerCntLast

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425032: fltTcaOspfPeerStats5minFloodToPeerCntCum

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425033: fltTcaOspfPeerStats15minFloodToPeerCntCum

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425034: fltTcaOspfPeerStats1hFloodToPeerCntCum

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425035: fltTcaOspfPeerStats1dFloodToPeerCntCum

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425036: fltTcaOspfPeerStats1wFloodToPeerCntCum

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425037: fltTcaOspfPeerStats1moFloodToPeerCntCum

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425038: fltTcaOspfPeerStats1qtrFloodToPeerCntCum

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425039: fltTcaOspfPeerStats1yearFloodToPeerCntCum

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425040: fltTcaOspfPeerStats5minFloodToPeerCntPer

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425041: fltTcaOspfPeerStats15minFloodToPeerCntPer

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425042: fltTcaOspfPeerStats1hFloodToPeerCntPer

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425043: fltTcaOspfPeerStats1dFloodToPeerCntPer

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425044: fltTcaOspfPeerStats1wFloodToPeerCntPer

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425045: fltTcaOspfPeerStats1moFloodToPeerCntPer

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425046: fltTcaOspfPeerStats1qtrFloodToPeerCntPer

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425047: fltTcaOspfPeerStats1yearFloodToPeerCntPer

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425048: fltTcaOspfPeerStats5minFloodToPeerCntMin

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425049: fltTcaOspfPeerStats15minFloodToPeerCntMin

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425050: fltTcaOspfPeerStats1hFloodToPeerCntMin

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425051: fltTcaOspfPeerStats1dFloodToPeerCntMin

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425052: fltTcaOspfPeerStats1wFloodToPeerCntMin

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425053: fltTcaOspfPeerStats1moFloodToPeerCntMin

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425054: fltTcaOspfPeerStats1qtrFloodToPeerCntMin

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425055: fltTcaOspfPeerStats1yearFloodToPeerCntMin

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425056: fltTcaOspfPeerStats5minFloodToPeerCntMax

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425057: fltTcaOspfPeerStats15minFloodToPeerCntMax

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425058: fltTcaOspfPeerStats1hFloodToPeerCntMax

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425059: fltTcaOspfPeerStats1dFloodToPeerCntMax

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425060: fltTcaOspfPeerStats1wFloodToPeerCntMax

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425061: fltTcaOspfPeerStats1moFloodToPeerCntMax

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425062: fltTcaOspfPeerStats1qtrFloodToPeerCntMax

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425063: fltTcaOspfPeerStats1yearFloodToPeerCntMax

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425064: fltTcaOspfPeerStats5minFloodToPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425065: fltTcaOspfPeerStats15minFloodToPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425066: fltTcaOspfPeerStats1hFloodToPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425067: fltTcaOspfPeerStats1dFloodToPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425068: fltTcaOspfPeerStats1wFloodToPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425069: fltTcaOspfPeerStats1moFloodToPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425070: fltTcaOspfPeerStats1qtrFloodToPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425071: fltTcaOspfPeerStats1yearFloodToPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425096: fltTcaOspfPeerStats5minFloodToPeerCntTr

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425097: fltTcaOspfPeerStats15minFloodToPeerCntTr

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425098: fltTcaOspfPeerStats1hFloodToPeerCntTr

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425099: fltTcaOspfPeerStats1dFloodToPeerCntTr

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4251: fltCloudRsProviderToAccessPolicyResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F425100: fltTcaOspfPeerStats1wFloodToPeerCntTr

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425101: fltTcaOspfPeerStats1moFloodToPeerCntTr

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425102: fltTcaOspfPeerStats1qtrFloodToPeerCntTr

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425103: fltTcaOspfPeerStats1yearFloodToPeerCntTr

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425104: fltTcaOspfPeerStats5minFloodToPeerCntRate

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425105: fltTcaOspfPeerStats15minFloodToPeerCntRate

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425106: fltTcaOspfPeerStats1hFloodToPeerCntRate

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425107: fltTcaOspfPeerStats1dFloodToPeerCntRate

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425108: fltTcaOspfPeerStats1wFloodToPeerCntRate

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425109: fltTcaOspfPeerStats1moFloodToPeerCntRate

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425110: fltTcaOspfPeerStats1qtrFloodToPeerCntRate

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425111: fltTcaOspfPeerStats1yearFloodToPeerCntRate

Severity: variable

Explanation: This fault is caused by "Flood To Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood To Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425184: fltTcaOspfPeerStats5minGrHelperPeerCntLast

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425185: fltTcaOspfPeerStats15minGrHelperPeerCntLast

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425186: fltTcaOspfPeerStats1hGrHelperPeerCntLast

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425187: fltTcaOspfPeerStats1dGrHelperPeerCntLast

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425188: fltTcaOspfPeerStats1wGrHelperPeerCntLast

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425189: fltTcaOspfPeerStats1moGrHelperPeerCntLast

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425190: fltTcaOspfPeerStats1qtrGrHelperPeerCntLast

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425191: fltTcaOspfPeerStats1yearGrHelperPeerCntLast

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4252: fltHcloudRsAcctToAccessPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F425200: fltTcaOspfPeerStats5minGrHelperPeerCntCum

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425201: fltTcaOspfPeerStats15minGrHelperPeerCntCum

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425202: fltTcaOspfPeerStats1hGrHelperPeerCntCum

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425203: fltTcaOspfPeerStats1dGrHelperPeerCntCum

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425204: fltTcaOspfPeerStats1wGrHelperPeerCntCum

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425205: fltTcaOspfPeerStats1moGrHelperPeerCntCum

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425206: fltTcaOspfPeerStats1qtrGrHelperPeerCntCum

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425207: fltTcaOspfPeerStats1yearGrHelperPeerCntCum

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425208: fltTcaOspfPeerStats5minGrHelperPeerCntPer

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425209: fltTcaOspfPeerStats15minGrHelperPeerCntPer

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425210: fltTcaOspfPeerStats1hGrHelperPeerCntPer

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425211: fltTcaOspfPeerStats1dGrHelperPeerCntPer

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425212: fltTcaOspfPeerStats1wGrHelperPeerCntPer

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425213: fltTcaOspfPeerStats1moGrHelperPeerCntPer

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425214: fltTcaOspfPeerStats1qtrGrHelperPeerCntPer

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425215: fltTcaOspfPeerStats1yearGrHelperPeerCntPer

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425216: fltTcaOspfPeerStats5minGrHelperPeerCntMin

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425217: fltTcaOspfPeerStats15minGrHelperPeerCntMin

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425218: fltTcaOspfPeerStats1hGrHelperPeerCntMin

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425219: fltTcaOspfPeerStats1dGrHelperPeerCntMin

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425220: fltTcaOspfPeerStats1wGrHelperPeerCntMin

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425221: fltTcaOspfPeerStats1moGrHelperPeerCntMin

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425222: fltTcaOspfPeerStats1qtrGrHelperPeerCntMin

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425223: fltTcaOspfPeerStats1yearGrHelperPeerCntMin

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425224: fltTcaOspfPeerStats5minGrHelperPeerCntMax

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425225: fltTcaOspfPeerStats15minGrHelperPeerCntMax

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425226: fltTcaOspfPeerStats1hGrHelperPeerCntMax

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425227: fltTcaOspfPeerStats1dGrHelperPeerCntMax

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425228: fltTcaOspfPeerStats1wGrHelperPeerCntMax

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425229: fltTcaOspfPeerStats1moGrHelperPeerCntMax

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425230: fltTcaOspfPeerStats1qtrGrHelperPeerCntMax

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425231: fltTcaOspfPeerStats1yearGrHelperPeerCntMax

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425232: fltTcaOspfPeerStats5minGrHelperPeerCntAvg

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425233: fltTcaOspfPeerStats15minGrHelperPeerCntAvg

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425234: fltTcaOspfPeerStats1hGrHelperPeerCntAvg

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425235: fltTcaOspfPeerStats1dGrHelperPeerCntAvg

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425236: fltTcaOspfPeerStats1wGrHelperPeerCntAvg

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425237: fltTcaOspfPeerStats1moGrHelperPeerCntAvg

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425238: fltTcaOspfPeerStats1qtrGrHelperPeerCntAvg

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425239: fltTcaOspfPeerStats1yearGrHelperPeerCntAvg

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425264: fltTcaOspfPeerStats5minGrHelperPeerCntTr

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425265: fltTcaOspfPeerStats15minGrHelperPeerCntTr

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425266: fltTcaOspfPeerStats1hGrHelperPeerCntTr

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425267: fltTcaOspfPeerStats1dGrHelperPeerCntTr

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425268: fltTcaOspfPeerStats1wGrHelperPeerCntTr

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425269: fltTcaOspfPeerStats1moGrHelperPeerCntTr

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425270: fltTcaOspfPeerStats1qtrGrHelperPeerCntTr

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425271: fltTcaOspfPeerStats1yearGrHelperPeerCntTr

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425272: fltTcaOspfPeerStats5minGrHelperPeerCntRate

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425273: fltTcaOspfPeerStats15minGrHelperPeerCntRate

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425274: fltTcaOspfPeerStats1hGrHelperPeerCntRate

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425275: fltTcaOspfPeerStats1dGrHelperPeerCntRate

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425276: fltTcaOspfPeerStats1wGrHelperPeerCntRate

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425277: fltTcaOspfPeerStats1moGrHelperPeerCntRate

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425278: fltTcaOspfPeerStats1qtrGrHelperPeerCntRate

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425279: fltTcaOspfPeerStats1yearGrHelperPeerCntRate

Severity: variable

Explanation: This fault is caused by "GR Helper Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "GR Helper Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4253: fltHcloudRsHubCtxToHubCtxGroupResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F425352: fltTcaOspfPeerStats5minPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425353: fltTcaOspfPeerStats15minPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425354: fltTcaOspfPeerStats1hPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425355: fltTcaOspfPeerStats1dPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425356: fltTcaOspfPeerStats1wPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425357: fltTcaOspfPeerStats1moPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425358: fltTcaOspfPeerStats1qtrPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425359: fltTcaOspfPeerStats1yearPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425368: fltTcaOspfPeerStats5minPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425369: fltTcaOspfPeerStats15minPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425370: fltTcaOspfPeerStats1hPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425371: fltTcaOspfPeerStats1dPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425372: fltTcaOspfPeerStats1wPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425373: fltTcaOspfPeerStats1moPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425374: fltTcaOspfPeerStats1qtrPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425375: fltTcaOspfPeerStats1yearPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425376: fltTcaOspfPeerStats5minPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425377: fltTcaOspfPeerStats15minPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425378: fltTcaOspfPeerStats1hPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425379: fltTcaOspfPeerStats1dPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425380: fltTcaOspfPeerStats1wPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425381: fltTcaOspfPeerStats1moPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425382: fltTcaOspfPeerStats1qtrPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425383: fltTcaOspfPeerStats1yearPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425384: fltTcaOspfPeerStats5minPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425385: fltTcaOspfPeerStats15minPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425386: fltTcaOspfPeerStats1hPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425387: fltTcaOspfPeerStats1dPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425388: fltTcaOspfPeerStats1wPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425389: fltTcaOspfPeerStats1moPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425390: fltTcaOspfPeerStats1qtrPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425391: fltTcaOspfPeerStats1yearPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425392: fltTcaOspfPeerStats5minPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425393: fltTcaOspfPeerStats15minPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425394: fltTcaOspfPeerStats1hPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425395: fltTcaOspfPeerStats1dPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425396: fltTcaOspfPeerStats1wPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425397: fltTcaOspfPeerStats1moPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425398: fltTcaOspfPeerStats1qtrPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425399: fltTcaOspfPeerStats1yearPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4254: fltHcloudRsVrfToRouteTableResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F425400: fltTcaOspfPeerStats5minPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425401: fltTcaOspfPeerStats15minPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425402: fltTcaOspfPeerStats1hPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425403: fltTcaOspfPeerStats1dPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425404: fltTcaOspfPeerStats1wPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425405: fltTcaOspfPeerStats1moPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425406: fltTcaOspfPeerStats1qtrPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425407: fltTcaOspfPeerStats1yearPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425432: fltTcaOspfPeerStats5minPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425433: fltTcaOspfPeerStats15minPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425434: fltTcaOspfPeerStats1hPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425435: fltTcaOspfPeerStats1dPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425436: fltTcaOspfPeerStats1wPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425437: fltTcaOspfPeerStats1moPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425438: fltTcaOspfPeerStats1qtrPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425439: fltTcaOspfPeerStats1yearPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425440: fltTcaOspfPeerStats5minPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425441: fltTcaOspfPeerStats15minPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425442: fltTcaOspfPeerStats1hPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425443: fltTcaOspfPeerStats1dPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425444: fltTcaOspfPeerStats1wPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425445: fltTcaOspfPeerStats1moPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425446: fltTcaOspfPeerStats1qtrPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425447: fltTcaOspfPeerStats1yearPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4255: fltL3extRsPathL3OutAttAccess-encap-bd-map-conflict

Severity: minor

Explanation: This fault occurs when a single external encapsulation is mapped to multiple external BDs on the node

Recommended Action: If you see this fault, take the following actions:

1. Ensure that an external encapsulation is mapped to only one external bridge profile or floating SVI on the node
2. Remove one of the conflicting floating node attachment entities from the node to avoid this conflict
3. If the above action did not resolve the fault collect tech support and contact cisco TAC

F425520: fltTcaOspfRcvdPktStats5minDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425521: fltTcaOspfRcvdPktStats15minDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425522: fltTcaOspfRcvdPktStats1hDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425523: fltTcaOspfRcvdPktStats1dDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425524: fltTcaOspfRcvdPktStats1wDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425525: fltTcaOspfRcvdPktStats1moDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425526: fltTcaOspfRcvdPktStats1qtrDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425527: fltTcaOspfRcvdPktStats1yearDbdPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425536: fltTcaOspfRcvdPktStats5minDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425537: fltTcaOspfRcvdPktStats15minDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425538: fltTcaOspfRcvdPktStats1hDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425539: fltTcaOspfRcvdPktStats1dDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425540: fltTcaOspfRcvdPktStats1wDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425541: fltTcaOspfRcvdPktStats1moDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425542: fltTcaOspfRcvdPktStats1qtrDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425543: fltTcaOspfRcvdPktStats1yearDbdPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425544: fltTcaOspfRcvdPktStats5minDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425545: fltTcaOspfRcvdPktStats15minDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425546: fltTcaOspfRcvdPktStats1hDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425547: fltTcaOspfRcvdPktStats1dDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425548: fltTcaOspfRcvdPktStats1wDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425549: fltTcaOspfRcvdPktStats1moDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425550: fltTcaOspfRcvdPktStats1qtrDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425551: fltTcaOspfRcvdPktStats1yearDbdPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425552: fltTcaOspfRcvdPktStats5minDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425553: fltTcaOspfRcvdPktStats15minDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425554: fltTcaOspfRcvdPktStats1hDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425555: fltTcaOspfRcvdPktStats1dDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425556: fltTcaOspfRcvdPktStats1wDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425557: fltTcaOspfRcvdPktStats1moDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425558: fltTcaOspfRcvdPktStats1qtrDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425559: fltTcaOspfRcvdPktStats1yearDbdPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425560: fltTcaOspfRcvdPktStats5minDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425561: fltTcaOspfRcvdPktStats15minDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425562: fltTcaOspfRcvdPktStats1hDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425563: fltTcaOspfRcvdPktStats1dDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425564: fltTcaOspfRcvdPktStats1wDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425565: fltTcaOspfRcvdPktStats1moDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425566: fltTcaOspfRcvdPktStats1qtrDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425567: fltTcaOspfRcvdPktStats1yearDbdPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425568: fltTcaOspfRcvdPktStats5minDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425569: fltTcaOspfRcvdPktStats15minDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425570: fltTcaOspfRcvdPktStats1hDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425571: fltTcaOspfRcvdPktStats1dDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425572: fltTcaOspfRcvdPktStats1wDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425573: fltTcaOspfRcvdPktStats1moDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425574: fltTcaOspfRcvdPktStats1qtrDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425575: fltTcaOspfRcvdPktStats1yearDbdPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4256: fltL3extVirtualLIfPAccess-encap-bd-map-conflict

Severity: minor

Explanation: This fault occurs when a single external encapsulation is mapped to multiple external BDs on the node

Recommended Action: If you see this fault, take the following actions:

1. Ensure that an external encapsulation is mapped to only one external bridge profile or floating SVI on the node
2. Remove one of the conflicting floating node attachment entities from the node to avoid this conflict
3. If the above action did not resolve the fault collect tech support and contact cisco TAC

F425600: fltTcaOspfRcvdPktStats5minDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425601: fltTcaOspfRcvdPktStats15minDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425602: fltTcaOspfRcvdPktStats1hDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425603: fltTcaOspfRcvdPktStats1dDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425604: fltTcaOspfRcvdPktStats1wDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425605: fltTcaOspfRcvdPktStats1moDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425606: fltTcaOspfRcvdPktStats1qtrDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425607: fltTcaOspfRcvdPktStats1yearDbdPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425608: fltTcaOspfRcvdPktStats5minDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425609: fltTcaOspfRcvdPktStats15minDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425610: fltTcaOspfRcvdPktStats1hDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425611: fltTcaOspfRcvdPktStats1dDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425612: fltTcaOspfRcvdPktStats1wDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425613: fltTcaOspfRcvdPktStats1moDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425614: fltTcaOspfRcvdPktStats1qtrDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425615: fltTcaOspfRcvdPktStats1yearDbdPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425688: fltTcaOspfRcvdPktStats5minHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425689: fltTcaOspfRcvdPktStats15minHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425690: fltTcaOspfRcvdPktStats1hHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425691: fltTcaOspfRcvdPktStats1dHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425692: fltTcaOspfRcvdPktStats1wHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425693: fltTcaOspfRcvdPktStats1moHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425694: fltTcaOspfRcvdPktStats1qtrHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425695: fltTcaOspfRcvdPktStats1yearHelloPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4257: fltL3extFloatingNodeAccess-encap-bd-map-conflict

Severity: minor

Explanation: This fault occurs when a single external encapsulation is mapped to multiple external BDs on the node

Recommended Action: If you see this fault, take the following actions:

1. Ensure that an external encapsulation is mapped to only one external bridge profile or floating SVI on the node
2. Remove one of the conflicting floating node attachment entities from the node to avoid this conflict
3. If the above action did not resolve the fault collect tech support and contact cisco TAC

F425704: fltTcaOspfRcvdPktStats5minHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425705: fltTcaOspfRcvdPktStats15minHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425706: fltTcaOspfRcvdPktStats1hHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425707: fltTcaOspfRcvdPktStats1dHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425708: fltTcaOspfRcvdPktStats1wHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425709: fltTcaOspfRcvdPktStats1moHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425710: fltTcaOspfRcvdPktStats1qtrHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425711: fltTcaOspfRcvdPktStats1yearHelloPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425712: fltTcaOspfRcvdPktStats5minHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425713: fltTcaOspfRcvdPktStats15minHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425714: fltTcaOspfRcvdPktStats1hHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425715: fltTcaOspfRcvdPktStats1dHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425716: fltTcaOspfRcvdPktStats1wHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425717: fltTcaOspfRcvdPktStats1moHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425718: fltTcaOspfRcvdPktStats1qtrHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425719: fltTcaOspfRcvdPktStats1yearHelloPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425720: fltTcaOspfRcvdPktStats5minHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425721: fltTcaOspfRcvdPktStats15minHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425722: fltTcaOspfRcvdPktStats1hHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425723: fltTcaOspfRcvdPktStats1dHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425724: fltTcaOspfRcvdPktStats1wHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425725: fltTcaOspfRcvdPktStats1moHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425726: fltTcaOspfRcvdPktStats1qtrHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425727: fltTcaOspfRcvdPktStats1yearHelloPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425728: fltTcaOspfRcvdPktStats5minHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425729: fltTcaOspfRcvdPktStats15minHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425730: fltTcaOspfRcvdPktStats1hHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425731: fltTcaOspfRcvdPktStats1dHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425732: fltTcaOspfRcvdPktStats1wHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425733: fltTcaOspfRcvdPktStats1moHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425734: fltTcaOspfRcvdPktStats1qtrHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425735: fltTcaOspfRcvdPktStats1yearHelloPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425736: fltTcaOspfRcvdPktStats5minHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425737: fltTcaOspfRcvdPktStats15minHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425738: fltTcaOspfRcvdPktStats1hHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425739: fltTcaOspfRcvdPktStats1dHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425740: fltTcaOspfRcvdPktStats1wHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425741: fltTcaOspfRcvdPktStats1moHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425742: fltTcaOspfRcvdPktStats1qtrHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425743: fltTcaOspfRcvdPktStats1yearHelloPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425768: fltTcaOspfRcvdPktStats5minHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425769: fltTcaOspfRcvdPktStats15minHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425770: fltTcaOspfRcvdPktStats1hHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425771: fltTcaOspfRcvdPktStats1dHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425772: fltTcaOspfRcvdPktStats1wHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425773: fltTcaOspfRcvdPktStats1moHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425774: fltTcaOspfRcvdPktStats1qtrHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425775: fltTcaOspfRcvdPktStats1yearHelloPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425776: fltTcaOspfRcvdPktStats5minHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425777: fltTcaOspfRcvdPktStats15minHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425778: fltTcaOspfRcvdPktStats1hHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425779: fltTcaOspfRcvdPktStats1dHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425780: fltTcaOspfRcvdPktStats1wHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425781: fltTcaOspfRcvdPktStats1moHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425782: fltTcaOspfRcvdPktStats1qtrHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425783: fltTcaOspfRcvdPktStats1yearHelloPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4258: fltBgpSiteOfOriginDefConfig-failed

Severity: minor

Explanation: This fault occurs when bgp Soo value conflicts.

Recommended Action: If you see this fault, please fix soo value config.

F425856: fltTcaOspfRcvdPktStats5minTotalPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Total Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425857: fltTcaOspfRcvdPktStats15minTotalPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Total Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425858: fltTcaOspfRcvdPktStats1hTotalPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Total Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425859: fltTcaOspfRcvdPktStats1dTotalPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Total Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425860: fltTcaOspfRcvdPktStats1wTotalPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Total Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425861: fltTcaOspfRcvdPktStats1moTotalPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Total Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425862: fltTcaOspfRcvdPktStats1qtrTotalPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Total Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425863: fltTcaOspfRcvdPktStats1yearTotalPktsRcvdLast

Severity: variable

Explanation: This fault is caused by "Total Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425872: fltTcaOspfRcvdPktStats5minTotalPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Total Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425873: fltTcaOspfRcvdPktStats15minTotalPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Total Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425874: fltTcaOspfRcvdPktStats1hTotalPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Total Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425875: fltTcaOspfRcvdPktStats1dTotalPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Total Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425876: fltTcaOspfRcvdPktStats1wTotalPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Total Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425877: fltTcaOspfRcvdPktStats1moTotalPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Total Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425878: fltTcaOspfRcvdPktStats1qtrTotalPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Total Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425879: fltTcaOspfRcvdPktStats1yearTotalPktsRcvdCum

Severity: variable

Explanation: This fault is caused by "Total Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425880: fltTcaOspfRcvdPktStats5minTotalPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Total Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425881: fltTcaOspfRcvdPktStats15minTotalPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Total Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425882: fltTcaOspfRcvdPktStats1hTotalPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Total Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425883: fltTcaOspfRcvdPktStats1dTotalPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Total Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425884: fltTcaOspfRcvdPktStats1wTotalPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Total Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425885: fltTcaOspfRcvdPktStats1moTotalPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Total Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425886: fltTcaOspfRcvdPktStats1qtrTotalPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Total Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425887: fltTcaOspfRcvdPktStats1yearTotalPktsRcvdPer

Severity: variable

Explanation: This fault is caused by "Total Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425888: fltTcaOspfRcvdPktStats5minTotalPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Total Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425889: fltTcaOspfRcvdPktStats15minTotalPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Total Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425890: fltTcaOspfRcvdPktStats1hTotalPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Total Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425891: fltTcaOspfRcvdPktStats1dTotalPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Total Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425892: fltTcaOspfRcvdPktStats1wTotalPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Total Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425893: fltTcaOspfRcvdPktStats1moTotalPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Total Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425894: fltTcaOspfRcvdPktStats1qtrTotalPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Total Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425895: fltTcaOspfRcvdPktStats1yearTotalPktsRcvdMin

Severity: variable

Explanation: This fault is caused by "Total Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425896: fltTcaOspfRcvdPktStats5minTotalPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Total Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425897: fltTcaOspfRcvdPktStats15minTotalPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Total Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425898: fltTcaOspfRcvdPktStats1hTotalPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Total Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425899: fltTcaOspfRcvdPktStats1dTotalPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Total Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425900: fltTcaOspfRcvdPktStats1wTotalPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Total Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425901: fltTcaOspfRcvdPktStats1moTotalPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Total Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425902: fltTcaOspfRcvdPktStats1qtrTotalPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Total Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425903: fltTcaOspfRcvdPktStats1yearTotalPktsRcvdMax

Severity: variable

Explanation: This fault is caused by "Total Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425904: fltTcaOspfRcvdPktStats5minTotalPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425905: fltTcaOspfRcvdPktStats15minTotalPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425906: fltTcaOspfRcvdPktStats1hTotalPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425907: fltTcaOspfRcvdPktStats1dTotalPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425908: fltTcaOspfRcvdPktStats1wTotalPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425909: fltTcaOspfRcvdPktStats1moTotalPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425910: fltTcaOspfRcvdPktStats1qtrTotalPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425911: fltTcaOspfRcvdPktStats1yearTotalPktsRcvdAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425936: fltTcaOspfRcvdPktStats5minTotalPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Total Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425937: fltTcaOspfRcvdPktStats15minTotalPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Total Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425938: fltTcaOspfRcvdPktStats1hTotalPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Total Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425939: fltTcaOspfRcvdPktStats1dTotalPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Total Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425940: fltTcaOspfRcvdPktStats1wTotalPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Total Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425941: fltTcaOspfRcvdPktStats1moTotalPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Total Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425942: fltTcaOspfRcvdPktStats1qtrTotalPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Total Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425943: fltTcaOspfRcvdPktStats1yearTotalPktsRcvdTr

Severity: variable

Explanation: This fault is caused by "Total Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425944: fltTcaOspfRcvdPktStats5minTotalPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Total Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425945: fltTcaOspfRcvdPktStats15minTotalPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Total Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425946: fltTcaOspfRcvdPktStats1hTotalPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Total Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425947: fltTcaOspfRcvdPktStats1dTotalPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Total Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425948: fltTcaOspfRcvdPktStats1wTotalPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Total Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425949: fltTcaOspfRcvdPktStats1moTotalPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Total Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425950: fltTcaOspfRcvdPktStats1qtrTotalPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Total Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F425951: fltTcaOspfRcvdPktStats1yearTotalPktsRcvdRate

Severity: variable

Explanation: This fault is caused by "Total Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4260: fltL3extRsOutToFBRGroupResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F426024: fltTcaOspfSelfStats5minEvCntLast

Severity: variable

Explanation: This fault is caused by "If Events Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426025: fltTcaOspfSelfStats15minEvCntLast

Severity: variable

Explanation: This fault is caused by "If Events Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426026: fltTcaOspfSelfStats1hEvCntLast

Severity: variable

Explanation: This fault is caused by "If Events Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426027: fltTcaOspfSelfStats1dEvCntLast

Severity: variable

Explanation: This fault is caused by "If Events Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426028: fltTcaOspfSelfStats1wEvCntLast

Severity: variable

Explanation: This fault is caused by "If Events Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426029: fltTcaOspfSelfStats1moEvCntLast

Severity: variable

Explanation: This fault is caused by "If Events Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426030: fltTcaOspfSelfStats1qtrEvCntLast

Severity: variable

Explanation: This fault is caused by "If Events Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426031: fltTcaOspfSelfStats1yearEvCntLast

Severity: variable

Explanation: This fault is caused by "If Events Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426040: fltTcaOspfSelfStats5minEvCntCum

Severity: variable

Explanation: This fault is caused by "If Events Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426041: fltTcaOspfSelfStats15minEvCntCum

Severity: variable

Explanation: This fault is caused by "If Events Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426042: fltTcaOspfSelfStats1hEvCntCum

Severity: variable

Explanation: This fault is caused by "If Events Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426043: fltTcaOspfSelfStats1dEvCntCum

Severity: variable

Explanation: This fault is caused by "If Events Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426044: fltTcaOspfSelfStats1wEvCntCum

Severity: variable

Explanation: This fault is caused by "If Events Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426045: fltTcaOspfSelfStats1moEvCntCum

Severity: variable

Explanation: This fault is caused by "If Events Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426046: fltTcaOspfSelfStats1qtrEvCntCum

Severity: variable

Explanation: This fault is caused by "If Events Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426047: fltTcaOspfSelfStats1yearEvCntCum

Severity: variable

Explanation: This fault is caused by "If Events Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426048: fltTcaOspfSelfStats5minEvCntPer

Severity: variable

Explanation: This fault is caused by "If Events Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426049: fltTcaOspfSelfStats15minEvCntPer

Severity: variable

Explanation: This fault is caused by "If Events Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426050: fltTcaOspfSelfStats1hEvCntPer

Severity: variable

Explanation: This fault is caused by "If Events Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426051: fltTcaOspfSelfStats1dEvCntPer

Severity: variable

Explanation: This fault is caused by "If Events Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426052: fltTcaOspfSelfStats1wEvCntPer

Severity: variable

Explanation: This fault is caused by "If Events Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426053: fltTcaOspfSelfStats1moEvCntPer

Severity: variable

Explanation: This fault is caused by "If Events Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426054: fltTcaOspfSelfStats1qtrEvCntPer

Severity: variable

Explanation: This fault is caused by "If Events Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426055: fltTcaOspfSelfStats1yearEvCntPer

Severity: variable

Explanation: This fault is caused by "If Events Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426056: fltTcaOspfSelfStats5minEvCntMin

Severity: variable

Explanation: This fault is caused by "If Events Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426057: fltTcaOspfSelfStats15minEvCntMin

Severity: variable

Explanation: This fault is caused by "If Events Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426058: fltTcaOspfSelfStats1hEvCntMin

Severity: variable

Explanation: This fault is caused by "If Events Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426059: fltTcaOspfSelfStats1dEvCntMin

Severity: variable

Explanation: This fault is caused by "If Events Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426060: fltTcaOspfSelfStats1wEvCntMin

Severity: variable

Explanation: This fault is caused by "If Events Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426061: fltTcaOspfSelfStats1moEvCntMin

Severity: variable

Explanation: This fault is caused by "If Events Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426062: fltTcaOspfSelfStats1qtrEvCntMin

Severity: variable

Explanation: This fault is caused by "If Events Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426063: fltTcaOspfSelfStats1yearEvCntMin

Severity: variable

Explanation: This fault is caused by "If Events Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426064: fltTcaOspfSelfStats5minEvCntMax

Severity: variable

Explanation: This fault is caused by "If Events Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426065: fltTcaOspfSelfStats15minEvCntMax

Severity: variable

Explanation: This fault is caused by "If Events Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426066: fltTcaOspfSelfStats1hEvCntMax

Severity: variable

Explanation: This fault is caused by "If Events Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426067: fltTcaOspfSelfStats1dEvCntMax

Severity: variable

Explanation: This fault is caused by "If Events Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426068: fltTcaOspfSelfStats1wEvCntMax

Severity: variable

Explanation: This fault is caused by "If Events Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426069: fltTcaOspfSelfStats1moEvCntMax

Severity: variable

Explanation: This fault is caused by "If Events Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426070: fltTcaOspfSelfStats1qtrEvCntMax

Severity: variable

Explanation: This fault is caused by "If Events Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426071: fltTcaOspfSelfStats1yearEvCntMax

Severity: variable

Explanation: This fault is caused by "If Events Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426072: fltTcaOspfSelfStats5minEvCntAvg

Severity: variable

Explanation: This fault is caused by "If Events Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426073: fltTcaOspfSelfStats15minEvCntAvg

Severity: variable

Explanation: This fault is caused by "If Events Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426074: fltTcaOspfSelfStats1hEvCntAvg

Severity: variable

Explanation: This fault is caused by "If Events Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426075: fltTcaOspfSelfStats1dEvCntAvg

Severity: variable

Explanation: This fault is caused by "If Events Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426076: fltTcaOspfSelfStats1wEvCntAvg

Severity: variable

Explanation: This fault is caused by "If Events Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426077: fltTcaOspfSelfStats1moEvCntAvg

Severity: variable

Explanation: This fault is caused by "If Events Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426078: fltTcaOspfSelfStats1qtrEvCntAvg

Severity: variable

Explanation: This fault is caused by "If Events Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426079: fltTcaOspfSelfStats1yearEvCntAvg

Severity: variable

Explanation: This fault is caused by "If Events Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4261: fltRtctrlRsSetPolicyTagToInstPResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F426104: fltTcaOspfSelfStats5minEvCntTr

Severity: variable

Explanation: This fault is caused by "If Events Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426105: fltTcaOspfSelfStats15minEvCntTr

Severity: variable

Explanation: This fault is caused by "If Events Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426106: fltTcaOspfSelfStats1hEvCntTr

Severity: variable

Explanation: This fault is caused by "If Events Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426107: fltTcaOspfSelfStats1dEvCntTr

Severity: variable

Explanation: This fault is caused by "If Events Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426108: fltTcaOspfSelfStats1wEvCntTr

Severity: variable

Explanation: This fault is caused by "If Events Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426109: fltTcaOspfSelfStats1moEvCntTr

Severity: variable

Explanation: This fault is caused by "If Events Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426110: fltTcaOspfSelfStats1qtrEvCntTr

Severity: variable

Explanation: This fault is caused by "If Events Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426111: fltTcaOspfSelfStats1yearEvCntTr

Severity: variable

Explanation: This fault is caused by "If Events Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426112: fltTcaOspfSelfStats5minEvCntRate

Severity: variable

Explanation: This fault is caused by "If Events Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426113: fltTcaOspfSelfStats15minEvCntRate

Severity: variable

Explanation: This fault is caused by "If Events Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426114: fltTcaOspfSelfStats1hEvCntRate

Severity: variable

Explanation: This fault is caused by "If Events Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426115: fltTcaOspfSelfStats1dEvCntRate

Severity: variable

Explanation: This fault is caused by "If Events Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426116: fltTcaOspfSelfStats1wEvCntRate

Severity: variable

Explanation: This fault is caused by "If Events Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426117: fltTcaOspfSelfStats1moEvCntRate

Severity: variable

Explanation: This fault is caused by "If Events Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426118: fltTcaOspfSelfStats1qtrEvCntRate

Severity: variable

Explanation: This fault is caused by "If Events Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426119: fltTcaOspfSelfStats1yearEvCntRate

Severity: variable

Explanation: This fault is caused by "If Events Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "If Events Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426192: fltTcaOspfSelfStats5minLsaCntLast

Severity: variable

Explanation: This fault is caused by "LSA Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426193: fltTcaOspfSelfStats15minLsaCntLast

Severity: variable

Explanation: This fault is caused by "LSA Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426194: fltTcaOspfSelfStats1hLsaCntLast

Severity: variable

Explanation: This fault is caused by "LSA Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426195: fltTcaOspfSelfStats1dLsaCntLast

Severity: variable

Explanation: This fault is caused by "LSA Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426196: fltTcaOspfSelfStats1wLsaCntLast

Severity: variable

Explanation: This fault is caused by "LSA Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426197: fltTcaOspfSelfStats1moLsaCntLast

Severity: variable

Explanation: This fault is caused by "LSA Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426198: fltTcaOspfSelfStats1qtrLsaCntLast

Severity: variable

Explanation: This fault is caused by "LSA Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426199: fltTcaOspfSelfStats1yearLsaCntLast

Severity: variable

Explanation: This fault is caused by "LSA Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4262: fltHcloudRsVpnConnectionToRouteTableResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F426208: fltTcaOspfSelfStats5minLsaCntCum

Severity: variable

Explanation: This fault is caused by "LSA Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426209: fltTcaOspfSelfStats15minLsaCntCum

Severity: variable

Explanation: This fault is caused by "LSA Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426210: fltTcaOspfSelfStats1hLsaCntCum

Severity: variable

Explanation: This fault is caused by "LSA Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426211: fltTcaOspfSelfStats1dLsaCntCum

Severity: variable

Explanation: This fault is caused by "LSA Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426212: fltTcaOspfSelfStats1wLsaCntCum

Severity: variable

Explanation: This fault is caused by "LSA Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426213: fltTcaOspfSelfStats1moLsaCntCum

Severity: variable

Explanation: This fault is caused by "LSA Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426214: fltTcaOspfSelfStats1qtrLsaCntCum

Severity: variable

Explanation: This fault is caused by "LSA Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426215: fltTcaOspfSelfStats1yearLsaCntCum

Severity: variable

Explanation: This fault is caused by "LSA Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426216: fltTcaOspfSelfStats5minLsaCntPer

Severity: variable

Explanation: This fault is caused by "LSA Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426217: fltTcaOspfSelfStats15minLsaCntPer

Severity: variable

Explanation: This fault is caused by "LSA Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426218: fltTcaOspfSelfStats1hLsaCntPer

Severity: variable

Explanation: This fault is caused by "LSA Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426219: fltTcaOspfSelfStats1dLsaCntPer

Severity: variable

Explanation: This fault is caused by "LSA Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426220: fltTcaOspfSelfStats1wLsaCntPer

Severity: variable

Explanation: This fault is caused by "LSA Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426221: fltTcaOspfSelfStats1moLsaCntPer

Severity: variable

Explanation: This fault is caused by "LSA Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426222: fltTcaOspfSelfStats1qtrLsaCntPer

Severity: variable

Explanation: This fault is caused by "LSA Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426223: fltTcaOspfSelfStats1yearLsaCntPer

Severity: variable

Explanation: This fault is caused by "LSA Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426224: fltTcaOspfSelfStats5minLsaCntMin

Severity: variable

Explanation: This fault is caused by "LSA Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426225: fltTcaOspfSelfStats15minLsaCntMin

Severity: variable

Explanation: This fault is caused by "LSA Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426226: fltTcaOspfSelfStats1hLsaCntMin

Severity: variable

Explanation: This fault is caused by "LSA Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426227: fltTcaOspfSelfStats1dLsaCntMin

Severity: variable

Explanation: This fault is caused by "LSA Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426228: fltTcaOspfSelfStats1wLsaCntMin

Severity: variable

Explanation: This fault is caused by "LSA Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426229: fltTcaOspfSelfStats1moLsaCntMin

Severity: variable

Explanation: This fault is caused by "LSA Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426230: fltTcaOspfSelfStats1qtrLsaCntMin

Severity: variable

Explanation: This fault is caused by "LSA Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426231: fltTcaOspfSelfStats1yearLsaCntMin

Severity: variable

Explanation: This fault is caused by "LSA Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426232: fltTcaOspfSelfStats5minLsaCntMax

Severity: variable

Explanation: This fault is caused by "LSA Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426233: fltTcaOspfSelfStats15minLsaCntMax

Severity: variable

Explanation: This fault is caused by "LSA Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426234: fltTcaOspfSelfStats1hLsaCntMax

Severity: variable

Explanation: This fault is caused by "LSA Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426235: fltTcaOspfSelfStats1dLsaCntMax

Severity: variable

Explanation: This fault is caused by "LSA Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426236: fltTcaOspfSelfStats1wLsaCntMax

Severity: variable

Explanation: This fault is caused by "LSA Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426237: fltTcaOspfSelfStats1moLsaCntMax

Severity: variable

Explanation: This fault is caused by "LSA Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426238: fltTcaOspfSelfStats1qtrLsaCntMax

Severity: variable

Explanation: This fault is caused by "LSA Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426239: fltTcaOspfSelfStats1yearLsaCntMax

Severity: variable

Explanation: This fault is caused by "LSA Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426240: fltTcaOspfSelfStats5minLsaCntAvg

Severity: variable

Explanation: This fault is caused by "LSA Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426241: fltTcaOspfSelfStats15minLsaCntAvg

Severity: variable

Explanation: This fault is caused by "LSA Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426242: fltTcaOspfSelfStats1hLsaCntAvg

Severity: variable

Explanation: This fault is caused by "LSA Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426243: fltTcaOspfSelfStats1dLsaCntAvg

Severity: variable

Explanation: This fault is caused by "LSA Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426244: fltTcaOspfSelfStats1wLsaCntAvg

Severity: variable

Explanation: This fault is caused by "LSA Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426245: fltTcaOspfSelfStats1moLsaCntAvg

Severity: variable

Explanation: This fault is caused by "LSA Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426246: fltTcaOspfSelfStats1qtrLsaCntAvg

Severity: variable

Explanation: This fault is caused by "LSA Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426247: fltTcaOspfSelfStats1yearLsaCntAvg

Severity: variable

Explanation: This fault is caused by "LSA Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426272: fltTcaOspfSelfStats5minLsaCntTr

Severity: variable

Explanation: This fault is caused by "LSA Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426273: fltTcaOspfSelfStats15minLsaCntTr

Severity: variable

Explanation: This fault is caused by "LSA Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426274: fltTcaOspfSelfStats1hLsaCntTr

Severity: variable

Explanation: This fault is caused by "LSA Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426275: fltTcaOspfSelfStats1dLsaCntTr

Severity: variable

Explanation: This fault is caused by "LSA Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426276: fltTcaOspfSelfStats1wLsaCntTr

Severity: variable

Explanation: This fault is caused by "LSA Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426277: fltTcaOspfSelfStats1moLsaCntTr

Severity: variable

Explanation: This fault is caused by "LSA Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426278: fltTcaOspfSelfStats1qtrLsaCntTr

Severity: variable

Explanation: This fault is caused by "LSA Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426279: fltTcaOspfSelfStats1yearLsaCntTr

Severity: variable

Explanation: This fault is caused by "LSA Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426280: fltTcaOspfSelfStats5minLsaCntRate

Severity: variable

Explanation: This fault is caused by "LSA Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426281: fltTcaOspfSelfStats15minLsaCntRate

Severity: variable

Explanation: This fault is caused by "LSA Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426282: fltTcaOspfSelfStats1hLsaCntRate

Severity: variable

Explanation: This fault is caused by "LSA Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426283: fltTcaOspfSelfStats1dLsaCntRate

Severity: variable

Explanation: This fault is caused by "LSA Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426284: fltTcaOspfSelfStats1wLsaCntRate

Severity: variable

Explanation: This fault is caused by "LSA Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426285: fltTcaOspfSelfStats1moLsaCntRate

Severity: variable

Explanation: This fault is caused by "LSA Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426286: fltTcaOspfSelfStats1qtrLsaCntRate

Severity: variable

Explanation: This fault is caused by "LSA Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426287: fltTcaOspfSelfStats1yearLsaCntRate

Severity: variable

Explanation: This fault is caused by "LSA Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "LSA Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426360: fltTcaOspfSelfStats5minPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426361: fltTcaOspfSelfStats15minPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426362: fltTcaOspfSelfStats1hPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426363: fltTcaOspfSelfStats1dPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426364: fltTcaOspfSelfStats1wPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426365: fltTcaOspfSelfStats1moPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426366: fltTcaOspfSelfStats1qtrPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426367: fltTcaOspfSelfStats1yearPeerCntLast

Severity: variable

Explanation: This fault is caused by "Peer Count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426376: fltTcaOspfSelfStats5minPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426377: fltTcaOspfSelfStats15minPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426378: fltTcaOspfSelfStats1hPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426379: fltTcaOspfSelfStats1dPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426380: fltTcaOspfSelfStats1wPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426381: fltTcaOspfSelfStats1moPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426382: fltTcaOspfSelfStats1qtrPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426383: fltTcaOspfSelfStats1yearPeerCntCum

Severity: variable

Explanation: This fault is caused by "Peer Count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426384: fltTcaOspfSelfStats5minPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426385: fltTcaOspfSelfStats15minPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426386: fltTcaOspfSelfStats1hPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426387: fltTcaOspfSelfStats1dPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426388: fltTcaOspfSelfStats1wPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426389: fltTcaOspfSelfStats1moPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426390: fltTcaOspfSelfStats1qtrPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426391: fltTcaOspfSelfStats1yearPeerCntPer

Severity: variable

Explanation: This fault is caused by "Peer Count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426392: fltTcaOspfSelfStats5minPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426393: fltTcaOspfSelfStats15minPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426394: fltTcaOspfSelfStats1hPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426395: fltTcaOspfSelfStats1dPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426396: fltTcaOspfSelfStats1wPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426397: fltTcaOspfSelfStats1moPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426398: fltTcaOspfSelfStats1qtrPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426399: fltTcaOspfSelfStats1yearPeerCntMin

Severity: variable

Explanation: This fault is caused by "Peer Count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426400: fltTcaOspfSelfStats5minPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426401: fltTcaOspfSelfStats15minPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426402: fltTcaOspfSelfStats1hPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426403: fltTcaOspfSelfStats1dPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426404: fltTcaOspfSelfStats1wPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426405: fltTcaOspfSelfStats1moPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426406: fltTcaOspfSelfStats1qtrPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426407: fltTcaOspfSelfStats1yearPeerCntMax

Severity: variable

Explanation: This fault is caused by "Peer Count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426408: fltTcaOspfSelfStats5minPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426409: fltTcaOspfSelfStats15minPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426410: fltTcaOspfSelfStats1hPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426411: fltTcaOspfSelfStats1dPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426412: fltTcaOspfSelfStats1wPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426413: fltTcaOspfSelfStats1moPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426414: fltTcaOspfSelfStats1qtrPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426415: fltTcaOspfSelfStats1yearPeerCntAvg

Severity: variable

Explanation: This fault is caused by "Peer Count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426440: fltTcaOspfSelfStats5minPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426441: fltTcaOspfSelfStats15minPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426442: fltTcaOspfSelfStats1hPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426443: fltTcaOspfSelfStats1dPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426444: fltTcaOspfSelfStats1wPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426445: fltTcaOspfSelfStats1moPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426446: fltTcaOspfSelfStats1qtrPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426447: fltTcaOspfSelfStats1yearPeerCntTr

Severity: variable

Explanation: This fault is caused by "Peer Count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426448: fltTcaOspfSelfStats5minPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426449: fltTcaOspfSelfStats15minPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426450: fltTcaOspfSelfStats1hPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426451: fltTcaOspfSelfStats1dPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426452: fltTcaOspfSelfStats1wPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426453: fltTcaOspfSelfStats1moPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426454: fltTcaOspfSelfStats1qtrPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426455: fltTcaOspfSelfStats1yearPeerCntRate

Severity: variable

Explanation: This fault is caused by "Peer Count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Peer Count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426528: fltTcaOspfSentPktErrStats5minDroppedSendPktsLast

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426529: fltTcaOspfSentPktErrStats15minDroppedSendPktsLast

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426530: fltTcaOspfSentPktErrStats1hDroppedSendPktsLast

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426531: fltTcaOspfSentPktErrStats1dDroppedSendPktsLast

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426532: fltTcaOspfSentPktErrStats1wDroppedSendPktsLast

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426533: fltTcaOspfSentPktErrStats1moDroppedSendPktsLast

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426534: fltTcaOspfSentPktErrStats1qtrDroppedSendPktsLast

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426535: fltTcaOspfSentPktErrStats1yearDroppedSendPktsLast

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426544: fltTcaOspfSentPktErrStats5minDroppedSendPktsCum

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426545: fltTcaOspfSentPktErrStats15minDroppedSendPktsCum

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426546: fltTcaOspfSentPktErrStats1hDroppedSendPktsCum

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426547: fltTcaOspfSentPktErrStats1dDroppedSendPktsCum

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426548: fltTcaOspfSentPktErrStats1wDroppedSendPktsCum

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426549: fltTcaOspfSentPktErrStats1moDroppedSendPktsCum

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426550: fltTcaOspfSentPktErrStats1qtrDroppedSendPktsCum

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426551: fltTcaOspfSentPktErrStats1yearDroppedSendPktsCum

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426552: fltTcaOspfSentPktErrStats5minDroppedSendPktsPer

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426553: fltTcaOspfSentPktErrStats15minDroppedSendPktsPer

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426554: fltTcaOspfSentPktErrStats1hDroppedSendPktsPer

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426555: fltTcaOspfSentPktErrStats1dDroppedSendPktsPer

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426556: fltTcaOspfSentPktErrStats1wDroppedSendPktsPer

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426557: fltTcaOspfSentPktErrStats1moDroppedSendPktsPer

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426558: fltTcaOspfSentPktErrStats1qtrDroppedSendPktsPer

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426559: fltTcaOspfSentPktErrStats1yearDroppedSendPktsPer

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426560: fltTcaOspfSentPktErrStats5minDroppedSendPktsMin

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426561: fltTcaOspfSentPktErrStats15minDroppedSendPktsMin

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426562: fltTcaOspfSentPktErrStats1hDroppedSendPktsMin

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426563: fltTcaOspfSentPktErrStats1dDroppedSendPktsMin

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426564: fltTcaOspfSentPktErrStats1wDroppedSendPktsMin

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426565: fltTcaOspfSentPktErrStats1moDroppedSendPktsMin

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426566: fltTcaOspfSentPktErrStats1qtrDroppedSendPktsMin

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426567: fltTcaOspfSentPktErrStats1yearDroppedSendPktsMin

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426568: fltTcaOspfSentPktErrStats5minDroppedSendPktsMax

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426569: fltTcaOspfSentPktErrStats15minDroppedSendPktsMax

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426570: fltTcaOspfSentPktErrStats1hDroppedSendPktsMax

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426571: fltTcaOspfSentPktErrStats1dDroppedSendPktsMax

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426572: fltTcaOspfSentPktErrStats1wDroppedSendPktsMax

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426573: fltTcaOspfSentPktErrStats1moDroppedSendPktsMax

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426574: fltTcaOspfSentPktErrStats1qtrDroppedSendPktsMax

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426575: fltTcaOspfSentPktErrStats1yearDroppedSendPktsMax

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426576: fltTcaOspfSentPktErrStats5minDroppedSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426577: fltTcaOspfSentPktErrStats15minDroppedSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426578: fltTcaOspfSentPktErrStats1hDroppedSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426579: fltTcaOspfSentPktErrStats1dDroppedSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426580: fltTcaOspfSentPktErrStats1wDroppedSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426581: fltTcaOspfSentPktErrStats1moDroppedSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426582: fltTcaOspfSentPktErrStats1qtrDroppedSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426583: fltTcaOspfSentPktErrStats1yearDroppedSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4266: fltPtpIfPtpUnsupportedForPortSpeed

Severity: major

Explanation: This fault indicates PTP configuration is not compatible with port speed, which results in higher accuracy corrections.

Recommended Action: None

1. If you are still seeing this, create **tech-support** ticket and contact Cisco TAC

F426608: fltTcaOspfSentPktErrStats5minDroppedSendPktsTr

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426609: fltTcaOspfSentPktErrStats15minDroppedSendPktsTr

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426610: fltTcaOspfSentPktErrStats1hDroppedSendPktsTr

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426611: fltTcaOspfSentPktErrStats1dDroppedSendPktsTr

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426612: fltTcaOspfSentPktErrStats1wDroppedSendPktsTr

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426613: fltTcaOspfSentPktErrStats1moDroppedSendPktsTr

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426614: fltTcaOspfSentPktErrStats1qtrDroppedSendPktsTr

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426615: fltTcaOspfSentPktErrStats1yearDroppedSendPktsTr

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426616: fltTcaOspfSentPktErrStats5minDroppedSendPktsRate

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426617: fltTcaOspfSentPktErrStats15minDroppedSendPktsRate

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426618: fltTcaOspfSentPktErrStats1hDroppedSendPktsRate

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426619: fltTcaOspfSentPktErrStats1dDroppedSendPktsRate

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426620: fltTcaOspfSentPktErrStats1wDroppedSendPktsRate

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426621: fltTcaOspfSentPktErrStats1moDroppedSendPktsRate

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426622: fltTcaOspfSentPktErrStats1qtrDroppedSendPktsRate

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426623: fltTcaOspfSentPktErrStats1yearDroppedSendPktsRate

Severity: variable

Explanation: This fault is caused by "Dropped Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Dropped Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426696: fltTcaOspfSentPktErrStats5minErrSendPktsLast

Severity: variable

Explanation: This fault is caused by "Error Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426697: fltTcaOspfSentPktErrStats15minErrSendPktsLast

Severity: variable

Explanation: This fault is caused by "Error Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426698: fltTcaOspfSentPktErrStats1hErrSendPktsLast

Severity: variable

Explanation: This fault is caused by "Error Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426699: fltTcaOspfSentPktErrStats1dErrSendPktsLast

Severity: variable

Explanation: This fault is caused by "Error Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426700: fltTcaOspfSentPktErrStats1wErrSendPktsLast

Severity: variable

Explanation: This fault is caused by "Error Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426701: fltTcaOspfSentPktErrStats1moErrSendPktsLast

Severity: variable

Explanation: This fault is caused by "Error Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426702: fltTcaOspfSentPktErrStats1qtrErrSendPktsLast

Severity: variable

Explanation: This fault is caused by "Error Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426703: fltTcaOspfSentPktErrStats1yearErrSendPktsLast

Severity: variable

Explanation: This fault is caused by "Error Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426712: fltTcaOspfSentPktErrStats5minErrSendPktsCum

Severity: variable

Explanation: This fault is caused by "Error Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426713: fltTcaOspfSentPktErrStats15minErrSendPktsCum

Severity: variable

Explanation: This fault is caused by "Error Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426714: fltTcaOspfSentPktErrStats1hErrSendPktsCum

Severity: variable

Explanation: This fault is caused by "Error Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426715: fltTcaOspfSentPktErrStats1dErrSendPktsCum

Severity: variable

Explanation: This fault is caused by "Error Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426716: fltTcaOspfSentPktErrStats1wErrSendPktsCum

Severity: variable

Explanation: This fault is caused by "Error Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426717: fltTcaOspfSentPktErrStats1moErrSendPktsCum

Severity: variable

Explanation: This fault is caused by "Error Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426718: fltTcaOspfSentPktErrStats1qtrErrSendPktsCum

Severity: variable

Explanation: This fault is caused by "Error Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426719: fltTcaOspfSentPktErrStats1yearErrSendPktsCum

Severity: variable

Explanation: This fault is caused by "Error Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426720: fltTcaOspfSentPktErrStats5minErrSendPktsPer

Severity: variable

Explanation: This fault is caused by "Error Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426721: fltTcaOspfSentPktErrStats15minErrSendPktsPer

Severity: variable

Explanation: This fault is caused by "Error Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426722: fltTcaOspfSentPktErrStats1hErrSendPktsPer

Severity: variable

Explanation: This fault is caused by "Error Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426723: fltTcaOspfSentPktErrStats1dErrSendPktsPer

Severity: variable

Explanation: This fault is caused by "Error Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426724: fltTcaOspfSentPktErrStats1wErrSendPktsPer

Severity: variable

Explanation: This fault is caused by "Error Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426725: fltTcaOspfSentPktErrStats1moErrSendPktsPer

Severity: variable

Explanation: This fault is caused by "Error Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426726: fltTcaOspfSentPktErrStats1qtrErrSendPktsPer

Severity: variable

Explanation: This fault is caused by "Error Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426727: fltTcaOspfSentPktErrStats1yearErrSendPktsPer

Severity: variable

Explanation: This fault is caused by "Error Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426728: fltTcaOspfSentPktErrStats5minErrSendPktsMin

Severity: variable

Explanation: This fault is caused by "Error Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426729: fltTcaOspfSentPktErrStats15minErrSendPktsMin

Severity: variable

Explanation: This fault is caused by "Error Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426730: fltTcaOspfSentPktErrStats1hErrSendPktsMin

Severity: variable

Explanation: This fault is caused by "Error Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426731: fltTcaOspfSentPktErrStats1dErrSendPktsMin

Severity: variable

Explanation: This fault is caused by "Error Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426732: fltTcaOspfSentPktErrStats1wErrSendPktsMin

Severity: variable

Explanation: This fault is caused by "Error Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426733: fltTcaOspfSentPktErrStats1moErrSendPktsMin

Severity: variable

Explanation: This fault is caused by "Error Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426734: fltTcaOspfSentPktErrStats1qtrErrSendPktsMin

Severity: variable

Explanation: This fault is caused by "Error Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426735: fltTcaOspfSentPktErrStats1yearErrSendPktsMin

Severity: variable

Explanation: This fault is caused by "Error Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426736: fltTcaOspfSentPktErrStats5minErrSendPktsMax

Severity: variable

Explanation: This fault is caused by "Error Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426737: fltTcaOspfSentPktErrStats15minErrSendPktsMax

Severity: variable

Explanation: This fault is caused by "Error Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426738: fltTcaOspfSentPktErrStats1hErrSendPktsMax

Severity: variable

Explanation: This fault is caused by "Error Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426739: fltTcaOspfSentPktErrStats1dErrSendPktsMax

Severity: variable

Explanation: This fault is caused by "Error Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426740: fltTcaOspfSentPktErrStats1wErrSendPktsMax

Severity: variable

Explanation: This fault is caused by "Error Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426741: fltTcaOspfSentPktErrStats1moErrSendPktsMax

Severity: variable

Explanation: This fault is caused by "Error Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426742: fltTcaOspfSentPktErrStats1qtrErrSendPktsMax

Severity: variable

Explanation: This fault is caused by "Error Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426743: fltTcaOspfSentPktErrStats1yearErrSendPktsMax

Severity: variable

Explanation: This fault is caused by "Error Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426744: fltTcaOspfSentPktErrStats5minErrSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Error Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426745: fltTcaOspfSentPktErrStats15minErrSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Error Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426746: fltTcaOspfSentPktErrStats1hErrSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Error Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426747: fltTcaOspfSentPktErrStats1dErrSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Error Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426748: fltTcaOspfSentPktErrStats1wErrSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Error Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426749: fltTcaOspfSentPktErrStats1moErrSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Error Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426750: fltTcaOspfSentPktErrStats1qtrErrSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Error Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426751: fltTcaOspfSentPktErrStats1yearErrSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Error Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426776: fltTcaOspfSentPktErrStats5minErrSendPktsTr

Severity: variable

Explanation: This fault is caused by "Error Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426777: fltTcaOspfSentPktErrStats15minErrSendPktsTr

Severity: variable

Explanation: This fault is caused by "Error Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426778: fltTcaOspfSentPktErrStats1hErrSendPktsTr

Severity: variable

Explanation: This fault is caused by "Error Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426779: fltTcaOspfSentPktErrStats1dErrSendPktsTr

Severity: variable

Explanation: This fault is caused by "Error Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426780: fltTcaOspfSentPktErrStats1wErrSendPktsTr

Severity: variable

Explanation: This fault is caused by "Error Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426781: fltTcaOspfSentPktErrStats1moErrSendPktsTr

Severity: variable

Explanation: This fault is caused by "Error Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426782: fltTcaOspfSentPktErrStats1qtrErrSendPktsTr

Severity: variable

Explanation: This fault is caused by "Error Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426783: fltTcaOspfSentPktErrStats1yearErrSendPktsTr

Severity: variable

Explanation: This fault is caused by "Error Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426784: fltTcaOspfSentPktErrStats5minErrSendPktsRate

Severity: variable

Explanation: This fault is caused by "Error Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426785: fltTcaOspfSentPktErrStats15minErrSendPktsRate

Severity: variable

Explanation: This fault is caused by "Error Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426786: fltTcaOspfSentPktErrStats1hErrSendPktsRate

Severity: variable

Explanation: This fault is caused by "Error Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426787: fltTcaOspfSentPktErrStats1dErrSendPktsRate

Severity: variable

Explanation: This fault is caused by "Error Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426788: fltTcaOspfSentPktErrStats1wErrSendPktsRate

Severity: variable

Explanation: This fault is caused by "Error Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426789: fltTcaOspfSentPktErrStats1moErrSendPktsRate

Severity: variable

Explanation: This fault is caused by "Error Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426790: fltTcaOspfSentPktErrStats1qtrErrSendPktsRate

Severity: variable

Explanation: This fault is caused by "Error Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426791: fltTcaOspfSentPktErrStats1yearErrSendPktsRate

Severity: variable

Explanation: This fault is caused by "Error Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Error Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4268: fltMcpIfMcpMaxVlanLimit

Severity: minor

Explanation: This fault occurs when mcp vlan reaches the max limit 256 on the interface

Recommended Action: To recover from this fault, try the following actions

1. Review the network topology and vlan configuration on the node and
2. If the above action did not resolve the issue, generate the **show tech-support** file and contact Cisco TAC.

F426864: fltTcaOspfSentPktErrStats5minUnknownSendPktsLast

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426865: fltTcaOspfSentPktErrStats15minUnknownSendPktsLast

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426866: fltTcaOspfSentPktErrStats1hUnknownSendPktsLast

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426867: fltTcaOspfSentPktErrStats1dUnknownSendPktsLast

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426868: fltTcaOspfSentPktErrStats1wUnknownSendPktsLast

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426869: fltTcaOspfSentPktErrStats1moUnknownSendPktsLast

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426870: fltTcaOspfSentPktErrStats1qtrUnknownSendPktsLast

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426871: fltTcaOspfSentPktErrStats1yearUnknownSendPktsLast

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426880: fltTcaOspfSentPktErrStats5minUnknownSendPktsCum

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426881: fltTcaOspfSentPktErrStats15minUnknownSendPktsCum

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426882: fltTcaOspfSentPktErrStats1hUnknownSendPktsCum

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426883: fltTcaOspfSentPktErrStats1dUnknownSendPktsCum

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426884: fltTcaOspfSentPktErrStats1wUnknownSendPktsCum

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426885: fltTcaOspfSentPktErrStats1moUnknownSendPktsCum

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426886: fltTcaOspfSentPktErrStats1qtrUnknownSendPktsCum

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426887: fltTcaOspfSentPktErrStats1yearUnknownSendPktsCum

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426888: fltTcaOspfSentPktErrStats5minUnknownSendPktsPer

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426889: fltTcaOspfSentPktErrStats15minUnknownSendPktsPer

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426890: fltTcaOspfSentPktErrStats1hUnknownSendPktsPer

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426891: fltTcaOspfSentPktErrStats1dUnknownSendPktsPer

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426892: fltTcaOspfSentPktErrStats1wUnknownSendPktsPer

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426893: fltTcaOspfSentPktErrStats1moUnknownSendPktsPer

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426894: fltTcaOspfSentPktErrStats1qtrUnknownSendPktsPer

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426895: fltTcaOspfSentPktErrStats1yearUnknownSendPktsPer

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426896: fltTcaOspfSentPktErrStats5minUnknownSendPktsMin

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426897: fltTcaOspfSentPktErrStats15minUnknownSendPktsMin

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426898: fltTcaOspfSentPktErrStats1hUnknownSendPktsMin

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426899: fltTcaOspfSentPktErrStats1dUnknownSendPktsMin

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4269: fltMcpInstMcpMaxVlanLimit

Severity: major

Explanation: This fault occurs when mcp vlan reaches the max limit 2000

Recommended Action: To recover from this fault, try the following actions

1. Review the network topology and vlan configuration on the node and
2. If the above action did not resolve the issue, generate the **show tech-support** file and contact Cisco TAC.

F426900: fltTcaOspfSentPktErrStats1wUnknownSendPktsMin

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426901: fltTcaOspfSentPktErrStats1moUnknownSendPktsMin

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426902: fltTcaOspfSentPktErrStats1qtrUnknownSendPktsMin

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426903: fltTcaOspfSentPktErrStats1yearUnknownSendPktsMin

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426904: fltTcaOspfSentPktErrStats5minUnknownSendPktsMax

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426905: fltTcaOspfSentPktErrStats15minUnknownSendPktsMax

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426906: fltTcaOspfSentPktErrStats1hUnknownSendPktsMax

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426907: fltTcaOspfSentPktErrStats1dUnknownSendPktsMax

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426908: fltTcaOspfSentPktErrStats1wUnknownSendPktsMax

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426909: fltTcaOspfSentPktErrStats1moUnknownSendPktsMax

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426910: fltTcaOspfSentPktErrStats1qtrUnknownSendPktsMax

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426911: fltTcaOspfSentPktErrStats1yearUnknownSendPktsMax

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426912: fltTcaOspfSentPktErrStats5minUnknownSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426913: fltTcaOspfSentPktErrStats15minUnknownSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426914: fltTcaOspfSentPktErrStats1hUnknownSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426915: fltTcaOspfSentPktErrStats1dUnknownSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426916: fltTcaOspfSentPktErrStats1wUnknownSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426917: fltTcaOspfSentPktErrStats1moUnknownSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426918: fltTcaOspfSentPktErrStats1qtrUnknownSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426919: fltTcaOspfSentPktErrStats1yearUnknownSendPktsAvg

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426944: fltTcaOspfSentPktErrStats5minUnknownSendPktsTr

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426945: fltTcaOspfSentPktErrStats15minUnknownSendPktsTr

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426946: fltTcaOspfSentPktErrStats1hUnknownSendPktsTr

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426947: fltTcaOspfSentPktErrStats1dUnknownSendPktsTr

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426948: fltTcaOspfSentPktErrStats1wUnknownSendPktsTr

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426949: fltTcaOspfSentPktErrStats1moUnknownSendPktsTr

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426950: fltTcaOspfSentPktErrStats1qtrUnknownSendPktsTr

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426951: fltTcaOspfSentPktErrStats1yearUnknownSendPktsTr

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426952: fltTcaOspfSentPktErrStats5minUnknownSendPktsRate

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426953: fltTcaOspfSentPktErrStats15minUnknownSendPktsRate

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426954: fltTcaOspfSentPktErrStats1hUnknownSendPktsRate

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426955: fltTcaOspfSentPktErrStats1dUnknownSendPktsRate

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426956: fltTcaOspfSentPktErrStats1wUnknownSendPktsRate

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426957: fltTcaOspfSentPktErrStats1moUnknownSendPktsRate

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426958: fltTcaOspfSentPktErrStats1qtrUnknownSendPktsRate

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F426959: fltTcaOspfSentPktErrStats1yearUnknownSendPktsRate

Severity: variable

Explanation: This fault is caused by "Unknown Send Packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Unknown Send Packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427032: fltTcaOspfSentPktStats5minDbdPktsSentLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427033: fltTcaOspfSentPktStats15minDbdPktsSentLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427034: fltTcaOspfSentPktStats1hDbdPktsSentLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427035: fltTcaOspfSentPktStats1dDbdPktsSentLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427036: fltTcaOspfSentPktStats1wDbdPktsSentLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427037: fltTcaOspfSentPktStats1moDbdPktsSentLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427038: fltTcaOspfSentPktStats1qtrDbdPktsSentLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427039: fltTcaOspfSentPktStats1yearDbdPktsSentLast

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427048: fltTcaOspfSentPktStats5minDbdPktsSentCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427049: fltTcaOspfSentPktStats15minDbdPktsSentCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427050: fltTcaOspfSentPktStats1hDbdPktsSentCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427051: fltTcaOspfSentPktStats1dDbdPktsSentCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427052: fltTcaOspfSentPktStats1wDbdPktsSentCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427053: fltTcaOspfSentPktStats1moDbdPktsSentCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427054: fltTcaOspfSentPktStats1qtrDbdPktsSentCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427055: fltTcaOspfSentPktStats1yearDbdPktsSentCum

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427056: fltTcaOspfSentPktStats5minDbdPktsSentPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427057: fltTcaOspfSentPktStats15minDbdPktsSentPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427058: fltTcaOspfSentPktStats1hDbdPktsSentPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427059: fltTcaOspfSentPktStats1dDbdPktsSentPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427060: fltTcaOspfSentPktStats1wDbdPktsSentPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427061: fltTcaOspfSentPktStats1moDbdPktsSentPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427062: fltTcaOspfSentPktStats1qtrDbdPktsSentPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427063: fltTcaOspfSentPktStats1yearDbdPktsSentPer

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427064: fltTcaOspfSentPktStats5minDbdPktsSentMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427065: fltTcaOspfSentPktStats15minDbdPktsSentMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427066: fltTcaOspfSentPktStats1hDbdPktsSentMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427067: fltTcaOspfSentPktStats1dDbdPktsSentMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427068: fltTcaOspfSentPktStats1wDbdPktsSentMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427069: fltTcaOspfSentPktStats1moDbdPktsSentMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427070: fltTcaOspfSentPktStats1qtrDbdPktsSentMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427071: fltTcaOspfSentPktStats1yearDbdPktsSentMin

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427072: fltTcaOspfSentPktStats5minDbdPktsSentMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427073: fltTcaOspfSentPktStats15minDbdPktsSentMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427074: fltTcaOspfSentPktStats1hDbdPktsSentMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427075: fltTcaOspfSentPktStats1dDbdPktsSentMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427076: fltTcaOspfSentPktStats1wDbdPktsSentMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427077: fltTcaOspfSentPktStats1moDbdPktsSentMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427078: fltTcaOspfSentPktStats1qtrDbdPktsSentMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427079: fltTcaOspfSentPktStats1yearDbdPktsSentMax

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427080: fltTcaOspfSentPktStats5minDbdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427081: fltTcaOspfSentPktStats15minDbdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427082: fltTcaOspfSentPktStats1hDbdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427083: fltTcaOspfSentPktStats1dDbdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427084: fltTcaOspfSentPktStats1wDbdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427085: fltTcaOspfSentPktStats1moDbdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427086: fltTcaOspfSentPktStats1qtrDbdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427087: fltTcaOspfSentPktStats1yearDbdPktsSentAvg

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427112: fltTcaOspfSentPktStats5minDbdPktsSentTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427113: fltTcaOspfSentPktStats15minDbdPktsSentTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427114: fltTcaOspfSentPktStats1hDbdPktsSentTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427115: fltTcaOspfSentPktStats1dDbdPktsSentTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427116: fltTcaOspfSentPktStats1wDbdPktsSentTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427117: fltTcaOspfSentPktStats1moDbdPktsSentTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427118: fltTcaOspfSentPktStats1qtrDbdPktsSentTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427119: fltTcaOspfSentPktStats1yearDbdPktsSentTr

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427120: fltTcaOspfSentPktStats5minDbdPktsSentRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427121: fltTcaOspfSentPktStats15minDbdPktsSentRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427122: fltTcaOspfSentPktStats1hDbdPktsSentRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427123: fltTcaOspfSentPktStats1dDbdPktsSentRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427124: fltTcaOspfSentPktStats1wDbdPktsSentRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427125: fltTcaOspfSentPktStats1moDbdPktsSentRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427126: fltTcaOspfSentPktStats1qtrDbdPktsSentRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427127: fltTcaOspfSentPktStats1yearDbdPktsSentRate

Severity: variable

Explanation: This fault is caused by "DBD Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "DBD Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427200: fltTcaOspfSentPktStats5minHelloPktsSentLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427201: fltTcaOspfSentPktStats15minHelloPktsSentLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427202: fltTcaOspfSentPktStats1hHelloPktsSentLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427203: fltTcaOspfSentPktStats1dHelloPktsSentLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427204: fltTcaOspfSentPktStats1wHelloPktsSentLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427205: fltTcaOspfSentPktStats1moHelloPktsSentLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427206: fltTcaOspfSentPktStats1qtrHelloPktsSentLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427207: fltTcaOspfSentPktStats1yearHelloPktsSentLast

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427216: fltTcaOspfSentPktStats5minHelloPktsSentCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427217: fltTcaOspfSentPktStats15minHelloPktsSentCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427218: fltTcaOspfSentPktStats1hHelloPktsSentCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427219: fltTcaOspfSentPktStats1dHelloPktsSentCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427220: fltTcaOspfSentPktStats1wHelloPktsSentCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427221: fltTcaOspfSentPktStats1moHelloPktsSentCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427222: fltTcaOspfSentPktStats1qtrHelloPktsSentCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427223: fltTcaOspfSentPktStats1yearHelloPktsSentCum

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427224: fltTcaOspfSentPktStats5minHelloPktsSentPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427225: fltTcaOspfSentPktStats15minHelloPktsSentPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427226: fltTcaOspfSentPktStats1hHelloPktsSentPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427227: fltTcaOspfSentPktStats1dHelloPktsSentPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427228: fltTcaOspfSentPktStats1wHelloPktsSentPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427229: fltTcaOspfSentPktStats1moHelloPktsSentPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427230: fltTcaOspfSentPktStats1qtrHelloPktsSentPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427231: fltTcaOspfSentPktStats1yearHelloPktsSentPer

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427232: fltTcaOspfSentPktStats5minHelloPktsSentMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427233: fltTcaOspfSentPktStats15minHelloPktsSentMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427234: fltTcaOspfSentPktStats1hHelloPktsSentMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427235: fltTcaOspfSentPktStats1dHelloPktsSentMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427236: fltTcaOspfSentPktStats1wHelloPktsSentMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427237: fltTcaOspfSentPktStats1moHelloPktsSentMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427238: fltTcaOspfSentPktStats1qtrHelloPktsSentMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427239: fltTcaOspfSentPktStats1yearHelloPktsSentMin

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427240: fltTcaOspfSentPktStats5minHelloPktsSentMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427241: fltTcaOspfSentPktStats15minHelloPktsSentMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427242: fltTcaOspfSentPktStats1hHelloPktsSentMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427243: fltTcaOspfSentPktStats1dHelloPktsSentMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427244: fltTcaOspfSentPktStats1wHelloPktsSentMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427245: fltTcaOspfSentPktStats1moHelloPktsSentMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427246: fltTcaOspfSentPktStats1qtrHelloPktsSentMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427247: fltTcaOspfSentPktStats1yearHelloPktsSentMax

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427248: fltTcaOspfSentPktStats5minHelloPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427249: fltTcaOspfSentPktStats15minHelloPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427250: fltTcaOspfSentPktStats1hHelloPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427251: fltTcaOspfSentPktStats1dHelloPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427252: fltTcaOspfSentPktStats1wHelloPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427253: fltTcaOspfSentPktStats1moHelloPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427254: fltTcaOspfSentPktStats1qtrHelloPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427255: fltTcaOspfSentPktStats1yearHelloPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427280: fltTcaOspfSentPktStats5minHelloPktsSentTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427281: fltTcaOspfSentPktStats15minHelloPktsSentTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427282: fltTcaOspfSentPktStats1hHelloPktsSentTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427283: fltTcaOspfSentPktStats1dHelloPktsSentTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427284: fltTcaOspfSentPktStats1wHelloPktsSentTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427285: fltTcaOspfSentPktStats1moHelloPktsSentTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427286: fltTcaOspfSentPktStats1qtrHelloPktsSentTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427287: fltTcaOspfSentPktStats1yearHelloPktsSentTr

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427288: fltTcaOspfSentPktStats5minHelloPktsSentRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427289: fltTcaOspfSentPktStats15minHelloPktsSentRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427290: fltTcaOspfSentPktStats1hHelloPktsSentRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427291: fltTcaOspfSentPktStats1dHelloPktsSentRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427292: fltTcaOspfSentPktStats1wHelloPktsSentRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427293: fltTcaOspfSentPktStats1moHelloPktsSentRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427294: fltTcaOspfSentPktStats1qtrHelloPktsSentRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427295: fltTcaOspfSentPktStats1yearHelloPktsSentRate

Severity: variable

Explanation: This fault is caused by "Hello Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Hello Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427368: fltTcaOspfSentPktStats5minTotalPktsSentLast

Severity: variable

Explanation: This fault is caused by "Total Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427369: fltTcaOspfSentPktStats15minTotalPktsSentLast

Severity: variable

Explanation: This fault is caused by "Total Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427370: fltTcaOspfSentPktStats1hTotalPktsSentLast

Severity: variable

Explanation: This fault is caused by "Total Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427371: fltTcaOspfSentPktStats1dTotalPktsSentLast

Severity: variable

Explanation: This fault is caused by "Total Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427372: fltTcaOspfSentPktStats1wTotalPktsSentLast

Severity: variable

Explanation: This fault is caused by "Total Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427373: fltTcaOspfSentPktStats1moTotalPktsSentLast

Severity: variable

Explanation: This fault is caused by "Total Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427374: fltTcaOspfSentPktStats1qtrTotalPktsSentLast

Severity: variable

Explanation: This fault is caused by "Total Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427375: fltTcaOspfSentPktStats1yearTotalPktsSentLast

Severity: variable

Explanation: This fault is caused by "Total Packets Sent current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427384: fltTcaOspfSentPktStats5minTotalPktsSentCum

Severity: variable

Explanation: This fault is caused by "Total Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427385: fltTcaOspfSentPktStats15minTotalPktsSentCum

Severity: variable

Explanation: This fault is caused by "Total Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427386: fltTcaOspfSentPktStats1hTotalPktsSentCum

Severity: variable

Explanation: This fault is caused by "Total Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427387: fltTcaOspfSentPktStats1dTotalPktsSentCum

Severity: variable

Explanation: This fault is caused by "Total Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427388: fltTcaOspfSentPktStats1wTotalPktsSentCum

Severity: variable

Explanation: This fault is caused by "Total Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427389: fltTcaOspfSentPktStats1moTotalPktsSentCum

Severity: variable

Explanation: This fault is caused by "Total Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427390: fltTcaOspfSentPktStats1qtrTotalPktsSentCum

Severity: variable

Explanation: This fault is caused by "Total Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427391: fltTcaOspfSentPktStats1yearTotalPktsSentCum

Severity: variable

Explanation: This fault is caused by "Total Packets Sent cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427392: fltTcaOspfSentPktStats5minTotalPktsSentPer

Severity: variable

Explanation: This fault is caused by "Total Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427393: fltTcaOspfSentPktStats15minTotalPktsSentPer

Severity: variable

Explanation: This fault is caused by "Total Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427394: fltTcaOspfSentPktStats1hTotalPktsSentPer

Severity: variable

Explanation: This fault is caused by "Total Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427395: fltTcaOspfSentPktStats1dTotalPktsSentPer

Severity: variable

Explanation: This fault is caused by "Total Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427396: fltTcaOspfSentPktStats1wTotalPktsSentPer

Severity: variable

Explanation: This fault is caused by "Total Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427397: fltTcaOspfSentPktStats1moTotalPktsSentPer

Severity: variable

Explanation: This fault is caused by "Total Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427398: fltTcaOspfSentPktStats1qtrTotalPktsSentPer

Severity: variable

Explanation: This fault is caused by "Total Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427399: fltTcaOspfSentPktStats1yearTotalPktsSentPer

Severity: variable

Explanation: This fault is caused by "Total Packets Sent periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427400: fltTcaOspfSentPktStats5minTotalPktsSentMin

Severity: variable

Explanation: This fault is caused by "Total Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427401: fltTcaOspfSentPktStats15minTotalPktsSentMin

Severity: variable

Explanation: This fault is caused by "Total Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427402: fltTcaOspfSentPktStats1hTotalPktsSentMin

Severity: variable

Explanation: This fault is caused by "Total Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427403: fltTcaOspfSentPktStats1dTotalPktsSentMin

Severity: variable

Explanation: This fault is caused by "Total Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427404: fltTcaOspfSentPktStats1wTotalPktsSentMin

Severity: variable

Explanation: This fault is caused by "Total Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427405: fltTcaOspfSentPktStats1moTotalPktsSentMin

Severity: variable

Explanation: This fault is caused by "Total Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427406: fltTcaOspfSentPktStats1qtrTotalPktsSentMin

Severity: variable

Explanation: This fault is caused by "Total Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427407: fltTcaOspfSentPktStats1yearTotalPktsSentMin

Severity: variable

Explanation: This fault is caused by "Total Packets Sent minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427408: fltTcaOspfSentPktStats5minTotalPktsSentMax

Severity: variable

Explanation: This fault is caused by "Total Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427409: fltTcaOspfSentPktStats15minTotalPktsSentMax

Severity: variable

Explanation: This fault is caused by "Total Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427410: fltTcaOspfSentPktStats1hTotalPktsSentMax

Severity: variable

Explanation: This fault is caused by "Total Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427411: fltTcaOspfSentPktStats1dTotalPktsSentMax

Severity: variable

Explanation: This fault is caused by "Total Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427412: fltTcaOspfSentPktStats1wTotalPktsSentMax

Severity: variable

Explanation: This fault is caused by "Total Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427413: fltTcaOspfSentPktStats1moTotalPktsSentMax

Severity: variable

Explanation: This fault is caused by "Total Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427414: fltTcaOspfSentPktStats1qtrTotalPktsSentMax

Severity: variable

Explanation: This fault is caused by "Total Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427415: fltTcaOspfSentPktStats1yearTotalPktsSentMax

Severity: variable

Explanation: This fault is caused by "Total Packets Sent maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427416: fltTcaOspfSentPktStats5minTotalPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427417: fltTcaOspfSentPktStats15minTotalPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427418: fltTcaOspfSentPktStats1hTotalPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427419: fltTcaOspfSentPktStats1dTotalPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427420: fltTcaOspfSentPktStats1wTotalPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427421: fltTcaOspfSentPktStats1moTotalPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427422: fltTcaOspfSentPktStats1qtrTotalPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427423: fltTcaOspfSentPktStats1yearTotalPktsSentAvg

Severity: variable

Explanation: This fault is caused by "Total Packets Sent average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427448: fltTcaOspfSentPktStats5minTotalPktsSentTr

Severity: variable

Explanation: This fault is caused by "Total Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427449: fltTcaOspfSentPktStats15minTotalPktsSentTr

Severity: variable

Explanation: This fault is caused by "Total Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427450: fltTcaOspfSentPktStats1hTotalPktsSentTr

Severity: variable

Explanation: This fault is caused by "Total Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427451: fltTcaOspfSentPktStats1dTotalPktsSentTr

Severity: variable

Explanation: This fault is caused by "Total Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427452: fltTcaOspfSentPktStats1wTotalPktsSentTr

Severity: variable

Explanation: This fault is caused by "Total Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427453: fltTcaOspfSentPktStats1moTotalPktsSentTr

Severity: variable

Explanation: This fault is caused by "Total Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427454: fltTcaOspfSentPktStats1qtrTotalPktsSentTr

Severity: variable

Explanation: This fault is caused by "Total Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427455: fltTcaOspfSentPktStats1yearTotalPktsSentTr

Severity: variable

Explanation: This fault is caused by "Total Packets Sent trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427456: fltTcaOspfSentPktStats5minTotalPktsSentRate

Severity: variable

Explanation: This fault is caused by "Total Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427457: fltTcaOspfSentPktStats15minTotalPktsSentRate

Severity: variable

Explanation: This fault is caused by "Total Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427458: fltTcaOspfSentPktStats1hTotalPktsSentRate

Severity: variable

Explanation: This fault is caused by "Total Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427459: fltTcaOspfSentPktStats1dTotalPktsSentRate

Severity: variable

Explanation: This fault is caused by "Total Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427460: fltTcaOspfSentPktStats1wTotalPktsSentRate

Severity: variable

Explanation: This fault is caused by "Total Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427461: fltTcaOspfSentPktStats1moTotalPktsSentRate

Severity: variable

Explanation: This fault is caused by "Total Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427462: fltTcaOspfSentPktStats1qtrTotalPktsSentRate

Severity: variable

Explanation: This fault is caused by "Total Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427463: fltTcaOspfSentPktStats1yearTotalPktsSentRate

Severity: variable

Explanation: This fault is caused by "Total Packets Sent rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Total Packets Sent" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427536: fltTcaOspfThrottleStats5minFloodPktSendIpThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427537: fltTcaOspfThrottleStats15minFloodPktSendIpThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427538: fltTcaOspfThrottleStats1hFloodPktSendIpThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427539: fltTcaOspfThrottleStats1dFloodPktSendIpThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427540: fltTcaOspfThrottleStats1wFloodPktSendIpThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427541: fltTcaOspfThrottleStats1moFloodPktSendIpThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427542: fltTcaOspfThrottleStats1qtrFloodPktSendIpThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427543: fltTcaOspfThrottleStats1yearFloodPktSendIpThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427552: fltTcaOspfThrottleStats5minFloodPktSendIpThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427553: fltTcaOspfThrottleStats15minFloodPktSendIpThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427554: fltTcaOspfThrottleStats1hFloodPktSendIpThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427555: fltTcaOspfThrottleStats1dFloodPktSendIpThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427556: fltTcaOspfThrottleStats1wFloodPktSendIpThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427557: fltTcaOspfThrottleStats1moFloodPktSendIpThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427558: fltTcaOspfThrottleStats1qtrFloodPktSendIpThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427559: fltTcaOspfThrottleStats1yearFloodPktSendIpThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427560: fltTcaOspfThrottleStats5minFloodPktSendIpThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427561: fltTcaOspfThrottleStats15minFloodPktSendIpThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427562: fltTcaOspfThrottleStats1hFloodPktSendIpThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427563: fltTcaOspfThrottleStats1dFloodPktSendIpThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427564: fltTcaOspfThrottleStats1wFloodPktSendIpThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427565: fltTcaOspfThrottleStats1moFloodPktSendIpThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427566: fltTcaOspfThrottleStats1qtrFloodPktSendIpThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427567: fltTcaOspfThrottleStats1yearFloodPktSendIpThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427568: fltTcaOspfThrottleStats5minFloodPktSendIpThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427569: fltTcaOspfThrottleStats15minFloodPktSendIpThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427570: fltTcaOspfThrottleStats1hFloodPktSendIpThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427571: fltTcaOspfThrottleStats1dFloodPktSendIpThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427572: fltTcaOspfThrottleStats1wFloodPktSendIpThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427573: fltTcaOspfThrottleStats1moFloodPktSendIpThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427574: fltTcaOspfThrottleStats1qtrFloodPktSendIpThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427575: fltTcaOspfThrottleStats1yearFloodPktSendIpThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427576: fltTcaOspfThrottleStats5minFloodPktSendIpThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427577: fltTcaOspfThrottleStats15minFloodPktSendIpThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427578: fltTcaOspfThrottleStats1hFloodPktSendIpThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427579: fltTcaOspfThrottleStats1dFloodPktSendIpThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427580: fltTcaOspfThrottleStats1wFloodPktSendIpThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427581: fltTcaOspfThrottleStats1moFloodPktSendIpThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427582: fltTcaOspfThrottleStats1qtrFloodPktSendIpThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427583: fltTcaOspfThrottleStats1yearFloodPktSendIpThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427584: fltTcaOspfThrottleStats5minFloodPktSendIpThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427585: fltTcaOspfThrottleStats15minFloodPktSendIpThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427586: fltTcaOspfThrottleStats1hFloodPktSendIpThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427587: fltTcaOspfThrottleStats1dFloodPktSendIpThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427588: fltTcaOspfThrottleStats1wFloodPktSendIpThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427589: fltTcaOspfThrottleStats1moFloodPktSendIpThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427590: fltTcaOspfThrottleStats1qtrFloodPktSendIpThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427591: fltTcaOspfThrottleStats1yearFloodPktSendIpThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427616: fltTcaOspfThrottleStats5minFloodPktSendIpThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427617: fltTcaOspfThrottleStats15minFloodPktSendIpThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427618: fltTcaOspfThrottleStats1hFloodPktSendIpThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427619: fltTcaOspfThrottleStats1dFloodPktSendIpThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427620: fltTcaOspfThrottleStats1wFloodPktSendIpThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427621: fltTcaOspfThrottleStats1moFloodPktSendIpThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427622: fltTcaOspfThrottleStats1qtrFloodPktSendIpThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427623: fltTcaOspfThrottleStats1yearFloodPktSendIpThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427624: fltTcaOspfThrottleStats5minFloodPktSendIpThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427625: fltTcaOspfThrottleStats15minFloodPktSendIpThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427626: fltTcaOspfThrottleStats1hFloodPktSendIpThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427627: fltTcaOspfThrottleStats1dFloodPktSendIpThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427628: fltTcaOspfThrottleStats1wFloodPktSendIpThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427629: fltTcaOspfThrottleStats1moFloodPktSendIpThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427630: fltTcaOspfThrottleStats1qtrFloodPktSendIpThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427631: fltTcaOspfThrottleStats1yearFloodPktSendIpThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send IP Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send IP Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4277: fltFvRsSubnetToRtSummPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F427704: fltTcaOspfThrottleStats5minFloodPktSendTokenThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427705: fltTcaOspfThrottleStats15minFloodPktSendTokenThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427706: fltTcaOspfThrottleStats1hFloodPktSendTokenThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427707: fltTcaOspfThrottleStats1dFloodPktSendTokenThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427708: fltTcaOspfThrottleStats1wFloodPktSendTokenThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427709: fltTcaOspfThrottleStats1moFloodPktSendTokenThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427710: fltTcaOspfThrottleStats1qtrFloodPktSendTokenThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427711: fltTcaOspfThrottleStats1yearFloodPktSendTokenThrottleLast

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427720: fltTcaOspfThrottleStats5minFloodPktSendTokenThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427721: fltTcaOspfThrottleStats15minFloodPktSendTokenThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427722: fltTcaOspfThrottleStats1hFloodPktSendTokenThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427723: fltTcaOspfThrottleStats1dFloodPktSendTokenThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427724: fltTcaOspfThrottleStats1wFloodPktSendTokenThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427725: fltTcaOspfThrottleStats1moFloodPktSendTokenThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427726: fltTcaOspfThrottleStats1qtrFloodPktSendTokenThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427727: fltTcaOspfThrottleStats1yearFloodPktSendTokenThrottleCum

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427728: fltTcaOspfThrottleStats5minFloodPktSendTokenThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427729: fltTcaOspfThrottleStats15minFloodPktSendTokenThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427730: fltTcaOspfThrottleStats1hFloodPktSendTokenThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427731: fltTcaOspfThrottleStats1dFloodPktSendTokenThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427732: fltTcaOspfThrottleStats1wFloodPktSendTokenThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427733: fltTcaOspfThrottleStats1moFloodPktSendTokenThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427734: fltTcaOspfThrottleStats1qtrFloodPktSendTokenThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427735: fltTcaOspfThrottleStats1yearFloodPktSendTokenThrottlePer

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427736: fltTcaOspfThrottleStats5minFloodPktSendTokenThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427737: fltTcaOspfThrottleStats15minFloodPktSendTokenThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427738: fltTcaOspfThrottleStats1hFloodPktSendTokenThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427739: fltTcaOspfThrottleStats1dFloodPktSendTokenThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427740: fltTcaOspfThrottleStats1wFloodPktSendTokenThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427741: fltTcaOspfThrottleStats1moFloodPktSendTokenThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427742: fltTcaOspfThrottleStats1qtrFloodPktSendTokenThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427743: fltTcaOspfThrottleStats1yearFloodPktSendTokenThrottleMin

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427744: fltTcaOspfThrottleStats5minFloodPktSendTokenThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427745: fltTcaOspfThrottleStats15minFloodPktSendTokenThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427746: fltTcaOspfThrottleStats1hFloodPktSendTokenThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427747: fltTcaOspfThrottleStats1dFloodPktSendTokenThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427748: fltTcaOspfThrottleStats1wFloodPktSendTokenThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427749: fltTcaOspfThrottleStats1moFloodPktSendTokenThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427750: fltTcaOspfThrottleStats1qtrFloodPktSendTokenThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427751: fltTcaOspfThrottleStats1yearFloodPktSendTokenThrottleMax

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427752: fltTcaOspfThrottleStats5minFloodPktSendTokenThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427753: fltTcaOspfThrottleStats15minFloodPktSendTokenThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427754: fltTcaOspfThrottleStats1hFloodPktSendTokenThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427755: fltTcaOspfThrottleStats1dFloodPktSendTokenThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427756: fltTcaOspfThrottleStats1wFloodPktSendTokenThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427757: fltTcaOspfThrottleStats1moFloodPktSendTokenThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427758: fltTcaOspfThrottleStats1qtrFloodPktSendTokenThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427759: fltTcaOspfThrottleStats1yearFloodPktSendTokenThrottleAvg

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427784: fltTcaOspfThrottleStats5minFloodPktSendTokenThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427785: fltTcaOspfThrottleStats15minFloodPktSendTokenThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427786: fltTcaOspfThrottleStats1hFloodPktSendTokenThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427787: fltTcaOspfThrottleStats1dFloodPktSendTokenThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427788: fltTcaOspfThrottleStats1wFloodPktSendTokenThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427789: fltTcaOspfThrottleStats1moFloodPktSendTokenThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427790: fltTcaOspfThrottleStats1qtrFloodPktSendTokenThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427791: fltTcaOspfThrottleStats1yearFloodPktSendTokenThrottleTr

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427792: fltTcaOspfThrottleStats5minFloodPktSendTokenThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427793: fltTcaOspfThrottleStats15minFloodPktSendTokenThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427794: fltTcaOspfThrottleStats1hFloodPktSendTokenThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427795: fltTcaOspfThrottleStats1dFloodPktSendTokenThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427796: fltTcaOspfThrottleStats1wFloodPktSendTokenThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427797: fltTcaOspfThrottleStats1moFloodPktSendTokenThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427798: fltTcaOspfThrottleStats1qtrFloodPktSendTokenThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F427799: fltTcaOspfThrottleStats1yearFloodPktSendTokenThrottleRate

Severity: variable

Explanation: This fault is caused by "Flood Packet Send Token Throttle rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Flood Packet Send Token Throttle" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4278: fltInfraRsSyncEthIfPolBndlGrpResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4282: fltFvRsExportToFabricProfileResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4283: fltFvRsImportFromFabricProfileResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F428576: fltTcaSlaICMPEchoStats5minFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428577: fltTcaSlaICMPEchoStats15minFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428578: fltTcaSlaICMPEchoStats1hFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428579: fltTcaSlaICMPEchoStats1dFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428580: fltTcaSlaICMPEchoStats1wFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428581: fltTcaSlaICMPEchoStats1moFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428582: fltTcaSlaICMPEchoStats1qtrFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428583: fltTcaSlaICMPEchoStats1yearFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428592: fltTcaSlaICMPEchoStats5minFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428593: fltTcaSlaICMPEchoStats15minFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428594: fltTcaSlaICMPEchoStats1hFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428595: fltTcaSlaICMPEchoStats1dFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428596: fltTcaSlaICMPEchoStats1wFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428597: fltTcaSlaICMPEchoStats1moFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428598: fltTcaSlaICMPEchoStats1qtrFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428599: fltTcaSlaICMPEchoStats1yearFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4286: fltHinventoryRsVpnTunnelToVpnConnResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F428600: fltTcaSlaICMPEchoStats5minFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428601: fltTcaSlaICMPEchoStats15minFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428602: fltTcaSlaICMPEchoStats1hFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428603: fltTcaSlaICMPEchoStats1dFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428604: fltTcaSlaICMPEchoStats1wFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428605: fltTcaSlaICMPEchoStats1moFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428606: fltTcaSlaICMPEchoStats1qtrFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428607: fltTcaSlaICMPEchoStats1yearFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428608: fltTcaSlaICMPEchoStats5minFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428609: fltTcaSlaICMPEchoStats15minFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428610: fltTcaSlaICMPEchoStats1hFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428611: fltTcaSlaICMPEchoStats1dFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428612: fltTcaSlaICMPEchoStats1wFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428613: fltTcaSlaICMPEchoStats1moFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428614: fltTcaSlaICMPEchoStats1qtrFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428615: fltTcaSlaICMPEchoStats1yearFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428616: fltTcaSlaICMPEchoStats5minFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428617: fltTcaSlaICMPEchoStats15minFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428618: fltTcaSlaICMPEchoStats1hFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428619: fltTcaSlaICMPEchoStats1dFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428620: fltTcaSlaICMPEchoStats1wFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428621: fltTcaSlaICMPEchoStats1moFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428622: fltTcaSlaICMPEchoStats1qtrFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428623: fltTcaSlaICMPEchoStats1yearFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428624: fltTcaSlaICMPEchoStats5minFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428625: fltTcaSlaICMPEchoStats15minFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428626: fltTcaSlaICMPEchoStats1hFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428627: fltTcaSlaICMPEchoStats1dFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428628: fltTcaSlaICMPEchoStats1wFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428629: fltTcaSlaICMPEchoStats1moFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428630: fltTcaSlaICMPEchoStats1qtrFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428631: fltTcaSlaICMPEchoStats1yearFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428656: fltTcaSlaICMPEchoStats5minFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428657: fltTcaSlaICMPEchoStats15minFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428658: fltTcaSlaICMPEchoStats1hFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428659: fltTcaSlaICMPEchoStats1dFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428660: fltTcaSlaICMPEchoStats1wFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428661: fltTcaSlaICMPEchoStats1moFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428662: fltTcaSlaICMPEchoStats1qtrFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428663: fltTcaSlaICMPEchoStats1yearFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428664: fltTcaSlaICMPEchoStats5minFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428665: fltTcaSlaICMPEchoStats15minFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428666: fltTcaSlaICMPEchoStats1hFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428667: fltTcaSlaICMPEchoStats1dFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428668: fltTcaSlaICMPEchoStats1wFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428669: fltTcaSlaICMPEchoStats1moFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428670: fltTcaSlaICMPEchoStats1qtrFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428671: fltTcaSlaICMPEchoStats1yearFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428744: fltTcaSlaICMPEchoStats5minRttLast

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428745: fltTcaSlaICMPEchoStats15minRttLast

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428746: fltTcaSlaICMPEchoStats1hRttLast

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428747: fltTcaSlaICMPEchoStats1dRttLast

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428748: fltTcaSlaICMPEchoStats1wRttLast

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428749: fltTcaSlaICMPEchoStats1moRttLast

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428750: fltTcaSlaICMPEchoStats1qtrRttLast

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428751: fltTcaSlaICMPEchoStats1yearRttLast

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428752: fltTcaSlaICMPEchoStats5minRttMin

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428753: fltTcaSlaICMPEchoStats15minRttMin

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428754: fltTcaSlaICMPEchoStats1hRttMin

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428755: fltTcaSlaICMPEchoStats1dRttMin

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428756: fltTcaSlaICMPEchoStats1wRttMin

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428757: fltTcaSlaICMPEchoStats1moRttMin

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428758: fltTcaSlaICMPEchoStats1qtrRttMin

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428759: fltTcaSlaICMPEchoStats1yearRttMin

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428760: fltTcaSlaICMPEchoStats5minRttMax

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428761: fltTcaSlaICMPEchoStats15minRttMax

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428762: fltTcaSlaICMPEchoStats1hRttMax

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428763: fltTcaSlaICMPEchoStats1dRttMax

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428764: fltTcaSlaICMPEchoStats1wRttMax

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428765: fltTcaSlaICMPEchoStats1moRttMax

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428766: fltTcaSlaICMPEchoStats1qtrRttMax

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428767: fltTcaSlaICMPEchoStats1yearRttMax

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428768: fltTcaSlaICMPEchoStats5minRttAvg

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428769: fltTcaSlaICMPEchoStats15minRttAvg

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428770: fltTcaSlaICMPEchoStats1hRttAvg

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428771: fltTcaSlaICMPEchoStats1dRttAvg

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428772: fltTcaSlaICMPEchoStats1wRttAvg

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428773: fltTcaSlaICMPEchoStats1moRttAvg

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428774: fltTcaSlaICMPEchoStats1qtrRttAvg

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428775: fltTcaSlaICMPEchoStats1yearRttAvg

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428808: fltTcaSlaICMPEchoStats5minRttTr

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428809: fltTcaSlaICMPEchoStats15minRttTr

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428810: fltTcaSlaICMPEchoStats1hRttTr

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428811: fltTcaSlaICMPEchoStats1dRttTr

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428812: fltTcaSlaICMPEchoStats1wRttTr

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428813: fltTcaSlaICMPEchoStats1moRttTr

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428814: fltTcaSlaICMPEchoStats1qtrRttTr

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428815: fltTcaSlaICMPEchoStats1yearRttTr

Severity: variable

Explanation: This fault is caused by "ICMP Echo Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ICMP Echo Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428864: fltTcaSlaICMPEchoStats5minSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428865: fltTcaSlaICMPEchoStats15minSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428866: fltTcaSlaICMPEchoStats1hSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428867: fltTcaSlaICMPEchoStats1dSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428868: fltTcaSlaICMPEchoStats1wSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428869: fltTcaSlaICMPEchoStats1moSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428870: fltTcaSlaICMPEchoStats1qtrSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428871: fltTcaSlaICMPEchoStats1yearSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428880: fltTcaSlaICMPEchoStats5minSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428881: fltTcaSlaICMPEchoStats15minSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428882: fltTcaSlaICMPEchoStats1hSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428883: fltTcaSlaICMPEchoStats1dSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428884: fltTcaSlaICMPEchoStats1wSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428885: fltTcaSlaICMPEchoStats1moSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428886: fltTcaSlaICMPEchoStats1qtrSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428887: fltTcaSlaICMPEchoStats1yearSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428888: fltTcaSlaICMPEchoStats5minSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428889: fltTcaSlaICMPEchoStats15minSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428890: fltTcaSlaICMPEchoStats1hSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428891: fltTcaSlaICMPEchoStats1dSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428892: fltTcaSlaICMPEchoStats1wSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428893: fltTcaSlaICMPEchoStats1moSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428894: fltTcaSlaICMPEchoStats1qtrSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428895: fltTcaSlaICMPEchoStats1yearSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428896: fltTcaSlaICMPEchoStats5minSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428897: fltTcaSlaICMPEchoStats15minSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428898: fltTcaSlaICMPEchoStats1hSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428899: fltTcaSlaICMPEchoStats1dSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428900: fltTcaSlaICMPEchoStats1wSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428901: fltTcaSlaICMPEchoStats1moSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428902: fltTcaSlaICMPEchoStats1qtrSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428903: fltTcaSlaICMPEchoStats1yearSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428904: fltTcaSlaICMPEchoStats5minSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428905: fltTcaSlaICMPEchoStats15minSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428906: fltTcaSlaICMPEchoStats1hSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428907: fltTcaSlaICMPEchoStats1dSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428908: fltTcaSlaICMPEchoStats1wSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428909: fltTcaSlaICMPEchoStats1moSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428910: fltTcaSlaICMPEchoStats1qtrSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428911: fltTcaSlaICMPEchoStats1yearSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428912: fltTcaSlaICMPEchoStats5minSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428913: fltTcaSlaICMPEchoStats15minSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428914: fltTcaSlaICMPEchoStats1hSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428915: fltTcaSlaICMPEchoStats1dSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428916: fltTcaSlaICMPEchoStats1wSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428917: fltTcaSlaICMPEchoStats1moSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428918: fltTcaSlaICMPEchoStats1qtrSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428919: fltTcaSlaICMPEchoStats1yearSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428944: fltTcaSlaICMPEchoStats5minSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428945: fltTcaSlaICMPEchoStats15minSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428946: fltTcaSlaICMPEchoStats1hSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428947: fltTcaSlaICMPEchoStats1dSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428948: fltTcaSlaICMPEchoStats1wSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428949: fltTcaSlaICMPEchoStats1moSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428950: fltTcaSlaICMPEchoStats1qtrSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428951: fltTcaSlaICMPEchoStats1yearSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428952: fltTcaSlaICMPEchoStats5minSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428953: fltTcaSlaICMPEchoStats15minSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428954: fltTcaSlaICMPEchoStats1hSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428955: fltTcaSlaICMPEchoStats1dSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428956: fltTcaSlaICMPEchoStats1wSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428957: fltTcaSlaICMPEchoStats1moSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428958: fltTcaSlaICMPEchoStats1qtrSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F428959: fltTcaSlaICMPEchoStats1yearSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4290: fltLicenseManagerTrustTokenNotInstalled

Severity: warning

Explanation: This fault is raised when a product instance ID token is not installed on APIC yet.

Recommended Action: If you see this fault, take the following actions:

1. A invalid product instance ID token could be a possible root cause. Log on CSSM (Cisco Smart Software Manager) UI to create a new product instance ID token and configure network settings again.

F429032: fltTcaSlaICMPEchoStats5minTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429033: fltTcaSlaICMPEchoStats15minTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429034: fltTcaSlaICMPEchoStats1hTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429035: fltTcaSlaICMPEchoStats1dTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429036: fltTcaSlaICMPEchoStats1wTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429037: fltTcaSlaICMPEchoStats1moTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429038: fltTcaSlaICMPEchoStats1qtrTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429039: fltTcaSlaICMPEchoStats1yearTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429048: fltTcaSlaICMPEchoStats5minTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429049: fltTcaSlaICMPEchoStats15minTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429050: fltTcaSlaICMPEchoStats1hTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429051: fltTcaSlaICMPEchoStats1dTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429052: fltTcaSlaICMPEchoStats1wTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429053: fltTcaSlaICMPEchoStats1moTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429054: fltTcaSlaICMPEchoStats1qtrTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429055: fltTcaSlaICMPEchoStats1yearTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429056: fltTcaSlaICMPEchoStats5minTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429057: fltTcaSlaICMPEchoStats15minTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429058: fltTcaSlaICMPEchoStats1hTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429059: fltTcaSlaICMPEchoStats1dTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429060: fltTcaSlaICMPEchoStats1wTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429061: fltTcaSlaICMPEchoStats1moTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429062: fltTcaSlaICMPEchoStats1qtrTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429063: fltTcaSlaICMPEchoStats1yearTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429064: fltTcaSlaICMPEchoStats5minTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429065: fltTcaSlaICMPEchoStats15minTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429066: fltTcaSlaICMPEchoStats1hTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429067: fltTcaSlaICMPEchoStats1dTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429068: fltTcaSlaICMPEchoStats1wTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429069: fltTcaSlaICMPEchoStats1moTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429070: fltTcaSlaICMPEchoStats1qtrTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429071: fltTcaSlaICMPEchoStats1yearTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429072: fltTcaSlaICMPEchoStats5minTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429073: fltTcaSlaICMPEchoStats15minTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429074: fltTcaSlaICMPEchoStats1hTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429075: fltTcaSlaICMPEchoStats1dTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429076: fltTcaSlaICMPEchoStats1wTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429077: fltTcaSlaICMPEchoStats1moTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429078: fltTcaSlaICMPEchoStats1qtrTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429079: fltTcaSlaICMPEchoStats1yearTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429080: fltTcaSlaICMPEchoStats5minTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429081: fltTcaSlaICMPEchoStats15minTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429082: fltTcaSlaICMPEchoStats1hTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429083: fltTcaSlaICMPEchoStats1dTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429084: fltTcaSlaICMPEchoStats1wTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429085: fltTcaSlaICMPEchoStats1moTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429086: fltTcaSlaICMPEchoStats1qtrTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429087: fltTcaSlaICMPEchoStats1yearTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4291: fltLicenseManagerCommFailure

Severity: major

Explanation: This fault is raised when Smart Agent (SA) has a communication issue with CSSM or On-Prem.

Recommended Action: If you see this fault, take the following actions:

1. Check if DNS is configured, URL is correct, and network connectivity has any issue between SA and CSSM or between SA and On-Prem.

F429112: fltTcaSlaICMPEchoStats5minTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429113: fltTcaSlaICMPEchoStats15minTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429114: fltTcaSlaICMPEchoStats1hTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429115: fltTcaSlaICMPEchoStats1dTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429116: fltTcaSlaICMPEchoStats1wTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429117: fltTcaSlaICMPEchoStats1moTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429118: fltTcaSlaICMPEchoStats1qtrTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429119: fltTcaSlaICMPEchoStats1yearTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429120: fltTcaSlaICMPEchoStats5minTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429121: fltTcaSlaICMPEchoStats15minTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429122: fltTcaSlaICMPEchoStats1hTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429123: fltTcaSlaICMPEchoStats1dTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429124: fltTcaSlaICMPEchoStats1wTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429125: fltTcaSlaICMPEchoStats1moTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429126: fltTcaSlaICMPEchoStats1qtrTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429127: fltTcaSlaICMPEchoStats1yearTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429200: fltTcaSlaTCPConnectStats5minFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429201: fltTcaSlaTCPConnectStats15minFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429202: fltTcaSlaTCPConnectStats1hFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429203: fltTcaSlaTCPConnectStats1dFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429204: fltTcaSlaTCPConnectStats1wFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429205: fltTcaSlaTCPConnectStats1moFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429206: fltTcaSlaTCPConnectStats1qtrFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429207: fltTcaSlaTCPConnectStats1yearFailuresLast

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429216: fltTcaSlaTCPConnectStats5minFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429217: fltTcaSlaTCPConnectStats15minFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429218: fltTcaSlaTCPConnectStats1hFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429219: fltTcaSlaTCPConnectStats1dFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429220: fltTcaSlaTCPConnectStats1wFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429221: fltTcaSlaTCPConnectStats1moFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429222: fltTcaSlaTCPConnectStats1qtrFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429223: fltTcaSlaTCPConnectStats1yearFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429224: fltTcaSlaTCPConnectStats5minFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429225: fltTcaSlaTCPConnectStats15minFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429226: fltTcaSlaTCPConnectStats1hFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429227: fltTcaSlaTCPConnectStats1dFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429228: fltTcaSlaTCPConnectStats1wFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429229: fltTcaSlaTCPConnectStats1moFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429230: fltTcaSlaTCPConnectStats1qtrFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429231: fltTcaSlaTCPConnectStats1yearFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429232: fltTcaSlaTCPConnectStats5minFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429233: fltTcaSlaTCPConnectStats15minFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429234: fltTcaSlaTCPConnectStats1hFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429235: fltTcaSlaTCPConnectStats1dFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429236: fltTcaSlaTCPConnectStats1wFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429237: fltTcaSlaTCPConnectStats1moFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429238: fltTcaSlaTCPConnectStats1qtrFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429239: fltTcaSlaTCPConnectStats1yearFailuresMin

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429240: fltTcaSlaTCPConnectStats5minFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429241: fltTcaSlaTCPConnectStats15minFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429242: fltTcaSlaTCPConnectStats1hFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429243: fltTcaSlaTCPConnectStats1dFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429244: fltTcaSlaTCPConnectStats1wFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429245: fltTcaSlaTCPConnectStats1moFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429246: fltTcaSlaTCPConnectStats1qtrFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429247: fltTcaSlaTCPConnectStats1yearFailuresMax

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429248: fltTcaSlaTCPConnectStats5minFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429249: fltTcaSlaTCPConnectStats15minFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429250: fltTcaSlaTCPConnectStats1hFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429251: fltTcaSlaTCPConnectStats1dFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429252: fltTcaSlaTCPConnectStats1wFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429253: fltTcaSlaTCPConnectStats1moFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429254: fltTcaSlaTCPConnectStats1qtrFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429255: fltTcaSlaTCPConnectStats1yearFailuresAvg

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429280: fltTcaSlaTCPConnectStats5minFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429281: fltTcaSlaTCPConnectStats15minFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429282: fltTcaSlaTCPConnectStats1hFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429283: fltTcaSlaTCPConnectStats1dFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429284: fltTcaSlaTCPConnectStats1wFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429285: fltTcaSlaTCPConnectStats1moFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429286: fltTcaSlaTCPConnectStats1qtrFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429287: fltTcaSlaTCPConnectStats1yearFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429288: fltTcaSlaTCPConnectStats5minFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429289: fltTcaSlaTCPConnectStats15minFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429290: fltTcaSlaTCPConnectStats1hFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429291: fltTcaSlaTCPConnectStats1dFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429292: fltTcaSlaTCPConnectStats1wFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429293: fltTcaSlaTCPConnectStats1moFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429294: fltTcaSlaTCPConnectStats1qtrFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429295: fltTcaSlaTCPConnectStats1yearFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429368: fltTcaSlaTCPConnectStats5minRttLast

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429369: fltTcaSlaTCPConnectStats15minRttLast

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429370: fltTcaSlaTCPConnectStats1hRttLast

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429371: fltTcaSlaTCPConnectStats1dRttLast

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429372: fltTcaSlaTCPConnectStats1wRttLast

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429373: fltTcaSlaTCPConnectStats1moRttLast

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429374: fltTcaSlaTCPConnectStats1qtrRttLast

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429375: fltTcaSlaTCPConnectStats1yearRttLast

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time current value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429376: fltTcaSlaTCPConnectStats5minRttMin

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429377: fltTcaSlaTCPConnectStats15minRttMin

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429378: fltTcaSlaTCPConnectStats1hRttMin

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429379: fltTcaSlaTCPConnectStats1dRttMin

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429380: fltTcaSlaTCPConnectStats1wRttMin

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429381: fltTcaSlaTCPConnectStats1moRttMin

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429382: fltTcaSlaTCPConnectStats1qtrRttMin

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429383: fltTcaSlaTCPConnectStats1yearRttMin

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429384: fltTcaSlaTCPConnectStats5minRttMax

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429385: fltTcaSlaTCPConnectStats15minRttMax

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429386: fltTcaSlaTCPConnectStats1hRttMax

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429387: fltTcaSlaTCPConnectStats1dRttMax

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429388: fltTcaSlaTCPConnectStats1wRttMax

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429389: fltTcaSlaTCPConnectStats1moRttMax

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429390: fltTcaSlaTCPConnectStats1qtrRttMax

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429391: fltTcaSlaTCPConnectStats1yearRttMax

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429392: fltTcaSlaTCPConnectStats5minRttAvg

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429393: fltTcaSlaTCPConnectStats15minRttAvg

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429394: fltTcaSlaTCPConnectStats1hRttAvg

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429395: fltTcaSlaTCPConnectStats1dRttAvg

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429396: fltTcaSlaTCPConnectStats1wRttAvg

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429397: fltTcaSlaTCPConnectStats1moRttAvg

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429398: fltTcaSlaTCPConnectStats1qtrRttAvg

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429399: fltTcaSlaTCPConnectStats1yearRttAvg

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time average value" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429432: fltTcaSlaTCPConnectStats5minRttTr

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429433: fltTcaSlaTCPConnectStats15minRttTr

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429434: fltTcaSlaTCPConnectStats1hRttTr

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429435: fltTcaSlaTCPConnectStats1dRttTr

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429436: fltTcaSlaTCPConnectStats1wRttTr

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429437: fltTcaSlaTCPConnectStats1moRttTr

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429438: fltTcaSlaTCPConnectStats1qtrRttTr

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429439: fltTcaSlaTCPConnectStats1yearRttTr

Severity: variable

Explanation: This fault is caused by "TCP Connect Round Trip Time trend" statistical property crossing threshold level.

Recommended Action: Check the values of "TCP Connect Round Trip Time" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429488: fltTcaSlaTCPConnectStats5minSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429489: fltTcaSlaTCPConnectStats15minSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429490: fltTcaSlaTCPConnectStats1hSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429491: fltTcaSlaTCPConnectStats1dSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429492: fltTcaSlaTCPConnectStats1wSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429493: fltTcaSlaTCPConnectStats1moSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429494: fltTcaSlaTCPConnectStats1qtrSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429495: fltTcaSlaTCPConnectStats1yearSuccessLast

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4295: fltCloudRsListenerToVipResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F429504: fltTcaSlaTCPConnectStats5minSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429505: fltTcaSlaTCPConnectStats15minSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429506: fltTcaSlaTCPConnectStats1hSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429507: fltTcaSlaTCPConnectStats1dSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429508: fltTcaSlaTCPConnectStats1wSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429509: fltTcaSlaTCPConnectStats1moSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429510: fltTcaSlaTCPConnectStats1qtrSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429511: fltTcaSlaTCPConnectStats1yearSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429512: fltTcaSlaTCPConnectStats5minSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429513: fltTcaSlaTCPConnectStats15minSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429514: fltTcaSlaTCPConnectStats1hSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429515: fltTcaSlaTCPConnectStats1dSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429516: fltTcaSlaTCPConnectStats1wSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429517: fltTcaSlaTCPConnectStats1moSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429518: fltTcaSlaTCPConnectStats1qtrSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429519: fltTcaSlaTCPConnectStats1yearSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429520: fltTcaSlaTCPConnectStats5minSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429521: fltTcaSlaTCPConnectStats15minSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429522: fltTcaSlaTCPConnectStats1hSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429523: fltTcaSlaTCPConnectStats1dSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429524: fltTcaSlaTCPConnectStats1wSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429525: fltTcaSlaTCPConnectStats1moSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429526: fltTcaSlaTCPConnectStats1qtrSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429527: fltTcaSlaTCPConnectStats1yearSuccessMin

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429528: fltTcaSlaTCPConnectStats5minSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429529: fltTcaSlaTCPConnectStats15minSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429530: fltTcaSlaTCPConnectStats1hSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429531: fltTcaSlaTCPConnectStats1dSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429532: fltTcaSlaTCPConnectStats1wSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429533: fltTcaSlaTCPConnectStats1moSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429534: fltTcaSlaTCPConnectStats1qtrSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429535: fltTcaSlaTCPConnectStats1yearSuccessMax

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429536: fltTcaSlaTCPConnectStats5minSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429537: fltTcaSlaTCPConnectStats15minSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429538: fltTcaSlaTCPConnectStats1hSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429539: fltTcaSlaTCPConnectStats1dSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429540: fltTcaSlaTCPConnectStats1wSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429541: fltTcaSlaTCPConnectStats1moSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429542: fltTcaSlaTCPConnectStats1qtrSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429543: fltTcaSlaTCPConnectStats1yearSuccessAvg

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429568: fltTcaSlaTCPConnectStats5minSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429569: fltTcaSlaTCPConnectStats15minSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429570: fltTcaSlaTCPConnectStats1hSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429571: fltTcaSlaTCPConnectStats1dSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429572: fltTcaSlaTCPConnectStats1wSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429573: fltTcaSlaTCPConnectStats1moSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429574: fltTcaSlaTCPConnectStats1qtrSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429575: fltTcaSlaTCPConnectStats1yearSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429576: fltTcaSlaTCPConnectStats5minSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429577: fltTcaSlaTCPConnectStats15minSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429578: fltTcaSlaTCPConnectStats1hSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429579: fltTcaSlaTCPConnectStats1dSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429580: fltTcaSlaTCPConnectStats1wSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429581: fltTcaSlaTCPConnectStats1moSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429582: fltTcaSlaTCPConnectStats1qtrSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429583: fltTcaSlaTCPConnectStats1yearSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4296: fltDhcpClientPoapConversionNotSupported

Severity: minor

Explanation: This fault is raised when Cisco NXOS to ACI POAP can not happen as the node is old-generation

Recommended Action: If you see this fault, take the following actions:

1. Collect a **tech-support** file and contact Cisco TAC.

F429656: fltTcaSlaTCPConnectStats5minTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429657: fltTcaSlaTCPConnectStats15minTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429658: fltTcaSlaTCPConnectStats1hTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429659: fltTcaSlaTCPConnectStats1dTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429660: fltTcaSlaTCPConnectStats1wTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429661: fltTcaSlaTCPConnectStats1moTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429662: fltTcaSlaTCPConnectStats1qtrTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429663: fltTcaSlaTCPConnectStats1yearTxPktsLast

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429672: fltTcaSlaTCPConnectStats5minTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429673: fltTcaSlaTCPConnectStats15minTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429674: fltTcaSlaTCPConnectStats1hTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429675: fltTcaSlaTCPConnectStats1dTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429676: fltTcaSlaTCPConnectStats1wTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429677: fltTcaSlaTCPConnectStats1moTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429678: fltTcaSlaTCPConnectStats1qtrTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429679: fltTcaSlaTCPConnectStats1yearTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429680: fltTcaSlaTCPConnectStats5minTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429681: fltTcaSlaTCPConnectStats15minTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429682: fltTcaSlaTCPConnectStats1hTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429683: fltTcaSlaTCPConnectStats1dTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429684: fltTcaSlaTCPConnectStats1wTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429685: fltTcaSlaTCPConnectStats1moTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429686: fltTcaSlaTCPConnectStats1qtrTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429687: fltTcaSlaTCPConnectStats1yearTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429688: fltTcaSlaTCPConnectStats5minTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429689: fltTcaSlaTCPConnectStats15minTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429690: fltTcaSlaTCPConnectStats1hTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429691: fltTcaSlaTCPConnectStats1dTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429692: fltTcaSlaTCPConnectStats1wTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429693: fltTcaSlaTCPConnectStats1moTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429694: fltTcaSlaTCPConnectStats1qtrTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429695: fltTcaSlaTCPConnectStats1yearTxPktsMin

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429696: fltTcaSlaTCPConnectStats5minTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429697: fltTcaSlaTCPConnectStats15minTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429698: fltTcaSlaTCPConnectStats1hTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429699: fltTcaSlaTCPConnectStats1dTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4297: fltCoopDomCoopEpExceptionList

Severity: major

Explanation: This fault occurs when the low watermark that is 60 percent is hit on the spine becauase of the EP moves in the EP exception list, The penalty factor for the exception list will be set to 1 for 10 mins and then it will be updated back with the previous value

Recommended Action: Try the following action

1. Please reduce the number of EPs in the exception list

F429700: fltTcaSlaTCPConnectStats1wTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429701: fltTcaSlaTCPConnectStats1moTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429702: fltTcaSlaTCPConnectStats1qtrTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429703: fltTcaSlaTCPConnectStats1yearTxPktsMax

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429704: fltTcaSlaTCPConnectStats5minTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429705: fltTcaSlaTCPConnectStats15minTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429706: fltTcaSlaTCPConnectStats1hTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429707: fltTcaSlaTCPConnectStats1dTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429708: fltTcaSlaTCPConnectStats1wTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429709: fltTcaSlaTCPConnectStats1moTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429710: fltTcaSlaTCPConnectStats1qtrTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429711: fltTcaSlaTCPConnectStats1yearTxPktsAvg

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429736: fltTcaSlaTCPConnectStats5minTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429737: fltTcaSlaTCPConnectStats15minTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429738: fltTcaSlaTCPConnectStats1hTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429739: fltTcaSlaTCPConnectStats1dTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429740: fltTcaSlaTCPConnectStats1wTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429741: fltTcaSlaTCPConnectStats1moTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429742: fltTcaSlaTCPConnectStats1qtrTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429743: fltTcaSlaTCPConnectStats1yearTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429744: fltTcaSlaTCPConnectStats5minTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429745: fltTcaSlaTCPConnectStats15minTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429746: fltTcaSlaTCPConnectStats1hTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429747: fltTcaSlaTCPConnectStats1dTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429748: fltTcaSlaTCPConnectStats1wTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429749: fltTcaSlaTCPConnectStats1moTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429750: fltTcaSlaTCPConnectStats1qtrTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429751: fltTcaSlaTCPConnectStats1yearTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4298: fltCoopDomCoopEpNormalList

Severity: major

Explanation: This fault occurs when the low watermark that is 60 percent is hit on the spine becauase of the EP moves and the higher EP penalty factor. The penalty factor will be set to 1 for 10 mins and then it will be updated back with the previous value

Recommended Action: Try the following action

1. Please reduce the EP penalty factor

F4299: fltFvAssocNodeDefConfig-failed

Severity: minor

Explanation: This fault is raised when a Vrf level Routing policy has configuration issue

Recommended Action: If you see this fault, please check and reconfigure the Routing policy

F429960: fltTcaBfdPduStats5minFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429961: fltTcaBfdPduStats15minFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429962: fltTcaBfdPduStats1hFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429963: fltTcaBfdPduStats1dFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429964: fltTcaBfdPduStats1wFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429965: fltTcaBfdPduStats1moFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429966: fltTcaBfdPduStats1qtrFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429967: fltTcaBfdPduStats1yearFlapsLast

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429976: fltTcaBfdPduStats5minFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429977: fltTcaBfdPduStats15minFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429978: fltTcaBfdPduStats1hFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429979: fltTcaBfdPduStats1dFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429980: fltTcaBfdPduStats1wFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429981: fltTcaBfdPduStats1moFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429982: fltTcaBfdPduStats1qtrFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429983: fltTcaBfdPduStats1yearFlapsCum

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429984: fltTcaBfdPduStats5minFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429985: fltTcaBfdPduStats15minFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429986: fltTcaBfdPduStats1hFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429987: fltTcaBfdPduStats1dFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429988: fltTcaBfdPduStats1wFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429989: fltTcaBfdPduStats1moFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429990: fltTcaBfdPduStats1qtrFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429991: fltTcaBfdPduStats1yearFlapsPer

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429992: fltTcaBfdPduStats5minFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429993: fltTcaBfdPduStats15minFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429994: fltTcaBfdPduStats1hFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429995: fltTcaBfdPduStats1dFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429996: fltTcaBfdPduStats1wFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429997: fltTcaBfdPduStats1moFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429998: fltTcaBfdPduStats1qtrFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F429999: fltTcaBfdPduStats1yearFlapsMin

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430000: fltTcaBfdPduStats5minFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430001: fltTcaBfdPduStats15minFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430002: fltTcaBfdPduStats1hFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430003: fltTcaBfdPduStats1dFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430004: fltTcaBfdPduStats1wFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430005: fltTcaBfdPduStats1moFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430006: fltTcaBfdPduStats1qtrFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430007: fltTcaBfdPduStats1yearFlapsMax

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430008: fltTcaBfdPduStats5minFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430009: fltTcaBfdPduStats15minFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430010: fltTcaBfdPduStats1hFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430011: fltTcaBfdPduStats1dFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430012: fltTcaBfdPduStats1wFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430013: fltTcaBfdPduStats1moFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430014: fltTcaBfdPduStats1qtrFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430015: fltTcaBfdPduStats1yearFlapsAvg

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430040: fltTcaBfdPduStats5minFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430041: fltTcaBfdPduStats15minFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430042: fltTcaBfdPduStats1hFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430043: fltTcaBfdPduStats1dFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430044: fltTcaBfdPduStats1wFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430045: fltTcaBfdPduStats1moFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430046: fltTcaBfdPduStats1qtrFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430047: fltTcaBfdPduStats1yearFlapsTr

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430048: fltTcaBfdPduStats5minFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430049: fltTcaBfdPduStats15minFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430050: fltTcaBfdPduStats1hFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430051: fltTcaBfdPduStats1dFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430052: fltTcaBfdPduStats1wFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430053: fltTcaBfdPduStats1moFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430054: fltTcaBfdPduStats1qtrFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430055: fltTcaBfdPduStats1yearFlapsRate

Severity: variable

Explanation: This fault is caused by "Number of BFD Session Flaps rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Number of BFD Session Flaps" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4301: fltBfdInstBfdMaxSessionLimit

Severity: major

Explanation: This fault occurs when the total number of BFD sessions on the leaf reaches the maximum supported limit of 2048.

Recommended Action: Please do not configure any new BFD session, without removing the older ones.

F430128: fltTcaBfdPduStats5minPduRcvdLast

Severity: variable

Explanation: This fault is caused by "Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430129: fltTcaBfdPduStats15minPduRcvdLast

Severity: variable

Explanation: This fault is caused by "Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430130: fltTcaBfdPduStats1hPduRcvdLast

Severity: variable

Explanation: This fault is caused by "Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430131: fltTcaBfdPduStats1dPduRcvdLast

Severity: variable

Explanation: This fault is caused by "Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430132: fltTcaBfdPduStats1wPduRcvdLast

Severity: variable

Explanation: This fault is caused by "Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430133: fltTcaBfdPduStats1moPduRcvdLast

Severity: variable

Explanation: This fault is caused by "Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430134: fltTcaBfdPduStats1qtrPduRcvdLast

Severity: variable

Explanation: This fault is caused by "Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430135: fltTcaBfdPduStats1yearPduRcvdLast

Severity: variable

Explanation: This fault is caused by "Packets Received current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430144: fltTcaBfdPduStats5minPduRcvdCum

Severity: variable

Explanation: This fault is caused by "Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430145: fltTcaBfdPduStats15minPduRcvdCum

Severity: variable

Explanation: This fault is caused by "Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430146: fltTcaBfdPduStats1hPduRcvdCum

Severity: variable

Explanation: This fault is caused by "Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430147: fltTcaBfdPduStats1dPduRcvdCum

Severity: variable

Explanation: This fault is caused by "Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430148: fltTcaBfdPduStats1wPduRcvdCum

Severity: variable

Explanation: This fault is caused by "Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430149: fltTcaBfdPduStats1moPduRcvdCum

Severity: variable

Explanation: This fault is caused by "Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430150: fltTcaBfdPduStats1qtrPduRcvdCum

Severity: variable

Explanation: This fault is caused by "Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430151: fltTcaBfdPduStats1yearPduRcvdCum

Severity: variable

Explanation: This fault is caused by "Packets Received cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430152: fltTcaBfdPduStats5minPduRcvdPer

Severity: variable

Explanation: This fault is caused by "Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430153: fltTcaBfdPduStats15minPduRcvdPer

Severity: variable

Explanation: This fault is caused by "Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430154: fltTcaBfdPduStats1hPduRcvdPer

Severity: variable

Explanation: This fault is caused by "Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430155: fltTcaBfdPduStats1dPduRcvdPer

Severity: variable

Explanation: This fault is caused by "Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430156: fltTcaBfdPduStats1wPduRcvdPer

Severity: variable

Explanation: This fault is caused by "Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430157: fltTcaBfdPduStats1moPduRcvdPer

Severity: variable

Explanation: This fault is caused by "Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430158: fltTcaBfdPduStats1qtrPduRcvdPer

Severity: variable

Explanation: This fault is caused by "Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430159: fltTcaBfdPduStats1yearPduRcvdPer

Severity: variable

Explanation: This fault is caused by "Packets Received periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430160: fltTcaBfdPduStats5minPduRcvdMin

Severity: variable

Explanation: This fault is caused by "Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430161: fltTcaBfdPduStats15minPduRcvdMin

Severity: variable

Explanation: This fault is caused by "Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430162: fltTcaBfdPduStats1hPduRcvdMin

Severity: variable

Explanation: This fault is caused by "Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430163: fltTcaBfdPduStats1dPduRcvdMin

Severity: variable

Explanation: This fault is caused by "Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430164: fltTcaBfdPduStats1wPduRcvdMin

Severity: variable

Explanation: This fault is caused by "Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430165: fltTcaBfdPduStats1moPduRcvdMin

Severity: variable

Explanation: This fault is caused by "Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430166: fltTcaBfdPduStats1qtrPduRcvdMin

Severity: variable

Explanation: This fault is caused by "Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430167: fltTcaBfdPduStats1yearPduRcvdMin

Severity: variable

Explanation: This fault is caused by "Packets Received minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430168: fltTcaBfdPduStats5minPduRcvdMax

Severity: variable

Explanation: This fault is caused by "Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430169: fltTcaBfdPduStats15minPduRcvdMax

Severity: variable

Explanation: This fault is caused by "Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430170: fltTcaBfdPduStats1hPduRcvdMax

Severity: variable

Explanation: This fault is caused by "Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430171: fltTcaBfdPduStats1dPduRcvdMax

Severity: variable

Explanation: This fault is caused by "Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430172: fltTcaBfdPduStats1wPduRcvdMax

Severity: variable

Explanation: This fault is caused by "Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430173: fltTcaBfdPduStats1moPduRcvdMax

Severity: variable

Explanation: This fault is caused by "Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430174: fltTcaBfdPduStats1qtrPduRcvdMax

Severity: variable

Explanation: This fault is caused by "Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430175: fltTcaBfdPduStats1yearPduRcvdMax

Severity: variable

Explanation: This fault is caused by "Packets Received maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430176: fltTcaBfdPduStats5minPduRcvdAvg

Severity: variable

Explanation: This fault is caused by "Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430177: fltTcaBfdPduStats15minPduRcvdAvg

Severity: variable

Explanation: This fault is caused by "Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430178: fltTcaBfdPduStats1hPduRcvdAvg

Severity: variable

Explanation: This fault is caused by "Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430179: fltTcaBfdPduStats1dPduRcvdAvg

Severity: variable

Explanation: This fault is caused by "Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430180: fltTcaBfdPduStats1wPduRcvdAvg

Severity: variable

Explanation: This fault is caused by "Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430181: fltTcaBfdPduStats1moPduRcvdAvg

Severity: variable

Explanation: This fault is caused by "Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430182: fltTcaBfdPduStats1qtrPduRcvdAvg

Severity: variable

Explanation: This fault is caused by "Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430183: fltTcaBfdPduStats1yearPduRcvdAvg

Severity: variable

Explanation: This fault is caused by "Packets Received average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4302: fltBfdInstBfdTimersUnsupported

Severity: major

Explanation: This fault occurs when the BFD timer values are not supported for the current BFD session scale.

Recommended Action: Following are the minimum supported timer values. For 256 sessions or less - minTx:50, minRx:50, multiplier:3 For more than 256 sessions - minTx:300, minRx:300, multiplier:3 Please modify any unsupported timer vlaues under BFD Global and Interface policies(both IPv4 & IPv6).

F430208: fltTcaBfdPduStats5minPduRcvdTr

Severity: variable

Explanation: This fault is caused by "Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430209: fltTcaBfdPduStats15minPduRcvdTr

Severity: variable

Explanation: This fault is caused by "Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430210: fltTcaBfdPduStats1hPduRcvdTr

Severity: variable

Explanation: This fault is caused by "Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430211: fltTcaBfdPduStats1dPduRcvdTr

Severity: variable

Explanation: This fault is caused by "Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430212: fltTcaBfdPduStats1wPduRcvdTr

Severity: variable

Explanation: This fault is caused by "Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430213: fltTcaBfdPduStats1moPduRcvdTr

Severity: variable

Explanation: This fault is caused by "Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430214: fltTcaBfdPduStats1qtrPduRcvdTr

Severity: variable

Explanation: This fault is caused by "Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430215: fltTcaBfdPduStats1yearPduRcvdTr

Severity: variable

Explanation: This fault is caused by "Packets Received trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430216: fltTcaBfdPduStats5minPduRcvdRate

Severity: variable

Explanation: This fault is caused by "Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430217: fltTcaBfdPduStats15minPduRcvdRate

Severity: variable

Explanation: This fault is caused by "Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430218: fltTcaBfdPduStats1hPduRcvdRate

Severity: variable

Explanation: This fault is caused by "Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430219: fltTcaBfdPduStats1dPduRcvdRate

Severity: variable

Explanation: This fault is caused by "Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430220: fltTcaBfdPduStats1wPduRcvdRate

Severity: variable

Explanation: This fault is caused by "Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430221: fltTcaBfdPduStats1moPduRcvdRate

Severity: variable

Explanation: This fault is caused by "Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430222: fltTcaBfdPduStats1qtrPduRcvdRate

Severity: variable

Explanation: This fault is caused by "Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430223: fltTcaBfdPduStats1yearPduRcvdRate

Severity: variable

Explanation: This fault is caused by "Packets Received rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Received" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430296: fltTcaBfdPduStats5minPduSentLast

Severity: variable

Explanation: This fault is caused by "Packets Transmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430297: fltTcaBfdPduStats15minPduSentLast

Severity: variable

Explanation: This fault is caused by "Packets Transmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430298: fltTcaBfdPduStats1hPduSentLast

Severity: variable

Explanation: This fault is caused by "Packets Transmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430299: fltTcaBfdPduStats1dPduSentLast

Severity: variable

Explanation: This fault is caused by "Packets Transmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4303: fltHcloudVpnConnectionOperCloudVpnConnectionFault

Severity: major

Explanation: This fault occurs when an error configuring a VPN connection.

Recommended Action: If you see this fault, take the following actions:

1. Please check the fault message and make necessary changes to the config for creating the VPN connection.
2. If fault still has not cleared, please contact Cisco TAC.

F430300: fltTcaBfdPduStats1wPduSentLast

Severity: variable

Explanation: This fault is caused by "Packets Transmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430301: fltTcaBfdPduStats1moPduSentLast

Severity: variable

Explanation: This fault is caused by "Packets Transmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430302: fltTcaBfdPduStats1qtrPduSentLast

Severity: variable

Explanation: This fault is caused by "Packets Transmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430303: fltTcaBfdPduStats1yearPduSentLast

Severity: variable

Explanation: This fault is caused by "Packets Transmitted current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430312: fltTcaBfdPduStats5minPduSentCum

Severity: variable

Explanation: This fault is caused by "Packets Transmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430313: fltTcaBfdPduStats15minPduSentCum

Severity: variable

Explanation: This fault is caused by "Packets Transmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430314: fltTcaBfdPduStats1hPduSentCum

Severity: variable

Explanation: This fault is caused by "Packets Transmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430315: fltTcaBfdPduStats1dPduSentCum

Severity: variable

Explanation: This fault is caused by "Packets Transmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430316: fltTcaBfdPduStats1wPduSentCum

Severity: variable

Explanation: This fault is caused by "Packets Transmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430317: fltTcaBfdPduStats1moPduSentCum

Severity: variable

Explanation: This fault is caused by "Packets Transmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430318: fltTcaBfdPduStats1qtrPduSentCum

Severity: variable

Explanation: This fault is caused by "Packets Transmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430319: fltTcaBfdPduStats1yearPduSentCum

Severity: variable

Explanation: This fault is caused by "Packets Transmitted cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430320: fltTcaBfdPduStats5minPduSentPer

Severity: variable

Explanation: This fault is caused by "Packets Transmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430321: fltTcaBfdPduStats15minPduSentPer

Severity: variable

Explanation: This fault is caused by "Packets Transmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430322: fltTcaBfdPduStats1hPduSentPer

Severity: variable

Explanation: This fault is caused by "Packets Transmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430323: fltTcaBfdPduStats1dPduSentPer

Severity: variable

Explanation: This fault is caused by "Packets Transmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430324: fltTcaBfdPduStats1wPduSentPer

Severity: variable

Explanation: This fault is caused by "Packets Transmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430325: fltTcaBfdPduStats1moPduSentPer

Severity: variable

Explanation: This fault is caused by "Packets Transmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430326: fltTcaBfdPduStats1qtrPduSentPer

Severity: variable

Explanation: This fault is caused by "Packets Transmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430327: fltTcaBfdPduStats1yearPduSentPer

Severity: variable

Explanation: This fault is caused by "Packets Transmitted periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430328: fltTcaBfdPduStats5minPduSentMin

Severity: variable

Explanation: This fault is caused by "Packets Transmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430329: fltTcaBfdPduStats15minPduSentMin

Severity: variable

Explanation: This fault is caused by "Packets Transmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430330: fltTcaBfdPduStats1hPduSentMin

Severity: variable

Explanation: This fault is caused by "Packets Transmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430331: fltTcaBfdPduStats1dPduSentMin

Severity: variable

Explanation: This fault is caused by "Packets Transmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430332: fltTcaBfdPduStats1wPduSentMin

Severity: variable

Explanation: This fault is caused by "Packets Transmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430333: fltTcaBfdPduStats1moPduSentMin

Severity: variable

Explanation: This fault is caused by "Packets Transmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430334: fltTcaBfdPduStats1qtrPduSentMin

Severity: variable

Explanation: This fault is caused by "Packets Transmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430335: fltTcaBfdPduStats1yearPduSentMin

Severity: variable

Explanation: This fault is caused by "Packets Transmitted minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430336: fltTcaBfdPduStats5minPduSentMax

Severity: variable

Explanation: This fault is caused by "Packets Transmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430337: fltTcaBfdPduStats15minPduSentMax

Severity: variable

Explanation: This fault is caused by "Packets Transmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430338: fltTcaBfdPduStats1hPduSentMax

Severity: variable

Explanation: This fault is caused by "Packets Transmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430339: fltTcaBfdPduStats1dPduSentMax

Severity: variable

Explanation: This fault is caused by "Packets Transmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430340: fltTcaBfdPduStats1wPduSentMax

Severity: variable

Explanation: This fault is caused by "Packets Transmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430341: fltTcaBfdPduStats1moPduSentMax

Severity: variable

Explanation: This fault is caused by "Packets Transmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430342: fltTcaBfdPduStats1qtrPduSentMax

Severity: variable

Explanation: This fault is caused by "Packets Transmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430343: fltTcaBfdPduStats1yearPduSentMax

Severity: variable

Explanation: This fault is caused by "Packets Transmitted maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430344: fltTcaBfdPduStats5minPduSentAvg

Severity: variable

Explanation: This fault is caused by "Packets Transmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430345: fltTcaBfdPduStats15minPduSentAvg

Severity: variable

Explanation: This fault is caused by "Packets Transmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430346: fltTcaBfdPduStats1hPduSentAvg

Severity: variable

Explanation: This fault is caused by "Packets Transmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430347: fltTcaBfdPduStats1dPduSentAvg

Severity: variable

Explanation: This fault is caused by "Packets Transmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430348: fltTcaBfdPduStats1wPduSentAvg

Severity: variable

Explanation: This fault is caused by "Packets Transmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430349: fltTcaBfdPduStats1moPduSentAvg

Severity: variable

Explanation: This fault is caused by "Packets Transmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430350: fltTcaBfdPduStats1qtrPduSentAvg

Severity: variable

Explanation: This fault is caused by "Packets Transmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430351: fltTcaBfdPduStats1yearPduSentAvg

Severity: variable

Explanation: This fault is caused by "Packets Transmitted average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430376: fltTcaBfdPduStats5minPduSentTr

Severity: variable

Explanation: This fault is caused by "Packets Transmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430377: fltTcaBfdPduStats15minPduSentTr

Severity: variable

Explanation: This fault is caused by "Packets Transmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430378: fltTcaBfdPduStats1hPduSentTr

Severity: variable

Explanation: This fault is caused by "Packets Transmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430379: fltTcaBfdPduStats1dPduSentTr

Severity: variable

Explanation: This fault is caused by "Packets Transmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430380: fltTcaBfdPduStats1wPduSentTr

Severity: variable

Explanation: This fault is caused by "Packets Transmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430381: fltTcaBfdPduStats1moPduSentTr

Severity: variable

Explanation: This fault is caused by "Packets Transmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430382: fltTcaBfdPduStats1qtrPduSentTr

Severity: variable

Explanation: This fault is caused by "Packets Transmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430383: fltTcaBfdPduStats1yearPduSentTr

Severity: variable

Explanation: This fault is caused by "Packets Transmitted trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430384: fltTcaBfdPduStats5minPduSentRate

Severity: variable

Explanation: This fault is caused by "Packets Transmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430385: fltTcaBfdPduStats15minPduSentRate

Severity: variable

Explanation: This fault is caused by "Packets Transmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430386: fltTcaBfdPduStats1hPduSentRate

Severity: variable

Explanation: This fault is caused by "Packets Transmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430387: fltTcaBfdPduStats1dPduSentRate

Severity: variable

Explanation: This fault is caused by "Packets Transmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430388: fltTcaBfdPduStats1wPduSentRate

Severity: variable

Explanation: This fault is caused by "Packets Transmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430389: fltTcaBfdPduStats1moPduSentRate

Severity: variable

Explanation: This fault is caused by "Packets Transmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430390: fltTcaBfdPduStats1qtrPduSentRate

Severity: variable

Explanation: This fault is caused by "Packets Transmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F430391: fltTcaBfdPduStats1yearPduSentRate

Severity: variable

Explanation: This fault is caused by "Packets Transmitted rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Packets Transmitted" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4304: fltPimInterVRFEntryPolConfIssue

Severity: minor

Explanation: This fault occurs due to missing/empty route-map in InterVRF configuration.

Recommended Action: If you see this fault, please verify that a non-empty route-map is associated with interVRF policy.

F4305: fltFvIntraVrfFabricImpRtctrlPConflictingConfig

Severity: warning

Explanation: This fault occurs when there is a Route Profile or Node from VRF import policy is missing

Recommended Action: If you see this fault, take the following actions:

1. Select a Route Profile and Node for the VRF Import policy and check if fault is cleared
2. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC

F4306: fltFvFabricExpRtctrlPConflictingConfig

Severity: warning

Explanation: This fault occurs when there is a Route Profile or Node from VRF export policy is missing

Recommended Action: If you see this fault, take the following actions:

1. Select a Route Profile and Node for the VRF Export policy and check if fault is cleared
2. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC

F4307: fltFvRtSummSubnetConflictingConfig

Severity: warning

Explanation: This fault occurs when there is a Route Summarization policy is missing from rtsumSubnet

Recommended Action: If you see this fault, take the following actions:

1. Select a Route Summarization policy under the rtsumSubnet and check if fault is cleared
2. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC

F4308: fltFvCtxRtSummPolConflictingConfig

Severity: warning

Explanation: This fault occurs when BGP Rtsum subnet or Node is missing in Route Summarization policy

Recommended Action: If you see this fault, take the following actions:

1. Create a BGP Rtsum subnet and Node and check if fault is cleared

2. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC

F4310: fltLicenseManagerAckImportFailure

Severity: major

Explanation: This fault is raised when import of RUM report acknowledgement is failed.

Recommended Action: If you see this fault, take the following actions:

1. Download a RUM report from APIC and import it into CSSM. Download acknowledgement from CSSM and import it into APIC.

F4311: fltCoopEpDampCoopEpFreeze

Severity: warning

Explanation: This fault occurs when an EP moves in freeze state

Recommended Action: Try the following action

1. Use **"show coop internal info repo ep dampening"** command on the spine to see the list of dampened EPs

F4313: fltEthpmFaultEmiRetrainConfigNotSupported

Severity: warning

Explanation: This fault occurs when port is configured as a EMI Retrain enable port on an unsupported platform

Recommended Action: To recover from this fault, disable EMI Retrain config on the port

F4316: fltHcloudRsListenerToVipResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4318: fltMcpIfMcpIntfConfigFailed

Severity: major

Explanation: This fault occurs when mcp strict mode is enabled on the fex port

Recommended Action: If you see this fault, take the following actions

1. Disable mcp strict mode from the fex interface

F432528: fltTcaSlaICMPEchoStatsAg5minFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432529: fltTcaSlaICMPEchoStatsAg15minFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432530: fltTcaSlaICMPEchoStatsAg1hFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432531: fltTcaSlaICMPEchoStatsAg1dFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432532: fltTcaSlaICMPEchoStatsAg1wFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432533: fltTcaSlaICMPEchoStatsAg1moFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432534: fltTcaSlaICMPEchoStatsAg1qtrFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432535: fltTcaSlaICMPEchoStatsAg1yearFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432536: fltTcaSlaICMPEchoStatsAg5minFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432537: fltTcaSlaICMPEchoStatsAg15minFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432538: fltTcaSlaICMPEchoStatsAg1hFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432539: fltTcaSlaICMPEchoStatsAg1dFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432540: fltTcaSlaICMPEchoStatsAg1wFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432541: fltTcaSlaICMPEchoStatsAg1moFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432542: fltTcaSlaICMPEchoStatsAg1qtrFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432543: fltTcaSlaICMPEchoStatsAg1yearFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432568: fltTcaSlaICMPEchoStatsAg5minFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432569: fltTcaSlaICMPEchoStatsAg15minFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432570: fltTcaSlaICMPEchoStatsAg1hFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432571: fltTcaSlaICMPEchoStatsAg1dFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432572: fltTcaSlaICMPEchoStatsAg1wFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432573: fltTcaSlaICMPEchoStatsAg1moFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432574: fltTcaSlaICMPEchoStatsAg1qtrFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432575: fltTcaSlaICMPEchoStatsAg1yearFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432576: fltTcaSlaICMPEchoStatsAg5minFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432577: fltTcaSlaICMPEchoStatsAg15minFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432578: fltTcaSlaICMPEchoStatsAg1hFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432579: fltTcaSlaICMPEchoStatsAg1dFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432580: fltTcaSlaICMPEchoStatsAg1wFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432581: fltTcaSlaICMPEchoStatsAg1moFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432582: fltTcaSlaICMPEchoStatsAg1qtrFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432583: fltTcaSlaICMPEchoStatsAg1yearFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432632: fltTcaSlaICMPEchoStatsAg5minSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432633: fltTcaSlaICMPEchoStatsAg15minSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432634: fltTcaSlaICMPEchoStatsAg1hSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432635: fltTcaSlaICMPEchoStatsAg1dSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432636: fltTcaSlaICMPEchoStatsAg1wSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432637: fltTcaSlaICMPEchoStatsAg1moSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432638: fltTcaSlaICMPEchoStatsAg1qtrSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432639: fltTcaSlaICMPEchoStatsAg1yearSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432640: fltTcaSlaICMPEchoStatsAg5minSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432641: fltTcaSlaICMPEchoStatsAg15minSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432642: fltTcaSlaICMPEchoStatsAg1hSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432643: fltTcaSlaICMPEchoStatsAg1dSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432644: fltTcaSlaICMPEchoStatsAg1wSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432645: fltTcaSlaICMPEchoStatsAg1moSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432646: fltTcaSlaICMPEchoStatsAg1qtrSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432647: fltTcaSlaICMPEchoStatsAg1yearSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432672: fltTcaSlaICMPEchoStatsAg5minSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432673: fltTcaSlaICMPEchoStatsAg15minSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432674: fltTcaSlaICMPEchoStatsAg1hSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432675: fltTcaSlaICMPEchoStatsAg1dSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432676: fltTcaSlaICMPEchoStatsAg1wSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432677: fltTcaSlaICMPEchoStatsAg1moSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432678: fltTcaSlaICMPEchoStatsAg1qtrSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432679: fltTcaSlaICMPEchoStatsAg1yearSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432680: fltTcaSlaICMPEchoStatsAg5minSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432681: fltTcaSlaICMPEchoStatsAg15minSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432682: fltTcaSlaICMPEchoStatsAg1hSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432683: fltTcaSlaICMPEchoStatsAg1dSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432684: fltTcaSlaICMPEchoStatsAg1wSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432685: fltTcaSlaICMPEchoStatsAg1moSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432686: fltTcaSlaICMPEchoStatsAg1qtrSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432687: fltTcaSlaICMPEchoStatsAg1yearSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432736: fltTcaSlaICMPEchoStatsAg5minTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432737: fltTcaSlaICMPEchoStatsAg15minTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432738: fltTcaSlaICMPEchoStatsAg1hTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432739: fltTcaSlaICMPEchoStatsAg1dTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432740: fltTcaSlaICMPEchoStatsAg1wTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432741: fltTcaSlaICMPEchoStatsAg1moTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432742: fltTcaSlaICMPEchoStatsAg1qtrTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432743: fltTcaSlaICMPEchoStatsAg1yearTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432744: fltTcaSlaICMPEchoStatsAg5minTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432745: fltTcaSlaICMPEchoStatsAg15minTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432746: fltTcaSlaICMPEchoStatsAg1hTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432747: fltTcaSlaICMPEchoStatsAg1dTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432748: fltTcaSlaICMPEchoStatsAg1wTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432749: fltTcaSlaICMPEchoStatsAg1moTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432750: fltTcaSlaICMPEchoStatsAg1qtrTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432751: fltTcaSlaICMPEchoStatsAg1yearTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432776: fltTcaSlaICMPEchoStatsAg5minTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432777: fltTcaSlaICMPEchoStatsAg15minTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432778: fltTcaSlaICMPEchoStatsAg1hTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432779: fltTcaSlaICMPEchoStatsAg1dTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432780: fltTcaSlaICMPEchoStatsAg1wTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432781: fltTcaSlaICMPEchoStatsAg1moTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432782: fltTcaSlaICMPEchoStatsAg1qtrTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432783: fltTcaSlaICMPEchoStatsAg1yearTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432784: fltTcaSlaICMPEchoStatsAg5minTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432785: fltTcaSlaICMPEchoStatsAg15minTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432786: fltTcaSlaICMPEchoStatsAg1hTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432787: fltTcaSlaICMPEchoStatsAg1dTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432788: fltTcaSlaICMPEchoStatsAg1wTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432789: fltTcaSlaICMPEchoStatsAg1moTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432790: fltTcaSlaICMPEchoStatsAg1qtrTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432791: fltTcaSlaICMPEchoStatsAg1yearTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted ICMP Echo probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted ICMP Echo probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4328: fltHcloudRsLBToEpResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F432840: fltTcaSlaTCPConnectStatsAg5minFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432841: fltTcaSlaTCPConnectStatsAg15minFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432842: fltTcaSlaTCPConnectStatsAg1hFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432843: fltTcaSlaTCPConnectStatsAg1dFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432844: fltTcaSlaTCPConnectStatsAg1wFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432845: fltTcaSlaTCPConnectStatsAg1moFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432846: fltTcaSlaTCPConnectStatsAg1qtrFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432847: fltTcaSlaTCPConnectStatsAg1yearFailuresCum

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432848: fltTcaSlaTCPConnectStatsAg5minFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432849: fltTcaSlaTCPConnectStatsAg15minFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432850: fltTcaSlaTCPConnectStatsAg1hFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432851: fltTcaSlaTCPConnectStatsAg1dFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432852: fltTcaSlaTCPConnectStatsAg1wFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432853: fltTcaSlaTCPConnectStatsAg1moFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432854: fltTcaSlaTCPConnectStatsAg1qtrFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432855: fltTcaSlaTCPConnectStatsAg1yearFailuresPer

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432880: fltTcaSlaTCPConnectStatsAg5minFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432881: fltTcaSlaTCPConnectStatsAg15minFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432882: fltTcaSlaTCPConnectStatsAg1hFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432883: fltTcaSlaTCPConnectStatsAg1dFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432884: fltTcaSlaTCPConnectStatsAg1wFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432885: fltTcaSlaTCPConnectStatsAg1moFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432886: fltTcaSlaTCPConnectStatsAg1qtrFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432887: fltTcaSlaTCPConnectStatsAg1yearFailuresTr

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432888: fltTcaSlaTCPConnectStatsAg5minFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432889: fltTcaSlaTCPConnectStatsAg15minFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432890: fltTcaSlaTCPConnectStatsAg1hFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432891: fltTcaSlaTCPConnectStatsAg1dFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432892: fltTcaSlaTCPConnectStatsAg1wFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432893: fltTcaSlaTCPConnectStatsAg1moFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432894: fltTcaSlaTCPConnectStatsAg1qtrFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432895: fltTcaSlaTCPConnectStatsAg1yearFailuresRate

Severity: variable

Explanation: This fault is caused by "number of failed TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of failed TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4329: fltSpanExtendedOperStFailed

Severity: major

Explanation: This fault occurs when span filter entry creation fails due to lack of hw resources

Recommended Action: To recover from this fault, try the following actions

1. Try removing existing filter entries to allow this filter entry create to succeed

F432944: fltTcaSlaTCPConnectStatsAg5minSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432945: fltTcaSlaTCPConnectStatsAg15minSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432946: fltTcaSlaTCPConnectStatsAg1hSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432947: fltTcaSlaTCPConnectStatsAg1dSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432948: fltTcaSlaTCPConnectStatsAg1wSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432949: fltTcaSlaTCPConnectStatsAg1moSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432950: fltTcaSlaTCPConnectStatsAg1qtrSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432951: fltTcaSlaTCPConnectStatsAg1yearSuccessCum

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432952: fltTcaSlaTCPConnectStatsAg5minSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432953: fltTcaSlaTCPConnectStatsAg15minSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432954: fltTcaSlaTCPConnectStatsAg1hSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432955: fltTcaSlaTCPConnectStatsAg1dSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432956: fltTcaSlaTCPConnectStatsAg1wSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432957: fltTcaSlaTCPConnectStatsAg1moSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432958: fltTcaSlaTCPConnectStatsAg1qtrSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432959: fltTcaSlaTCPConnectStatsAg1yearSuccessPer

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432984: fltTcaSlaTCPConnectStatsAg5minSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432985: fltTcaSlaTCPConnectStatsAg15minSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432986: fltTcaSlaTCPConnectStatsAg1hSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432987: fltTcaSlaTCPConnectStatsAg1dSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432988: fltTcaSlaTCPConnectStatsAg1wSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432989: fltTcaSlaTCPConnectStatsAg1moSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432990: fltTcaSlaTCPConnectStatsAg1qtrSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432991: fltTcaSlaTCPConnectStatsAg1yearSuccessTr

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432992: fltTcaSlaTCPConnectStatsAg5minSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432993: fltTcaSlaTCPConnectStatsAg15minSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432994: fltTcaSlaTCPConnectStatsAg1hSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432995: fltTcaSlaTCPConnectStatsAg1dSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432996: fltTcaSlaTCPConnectStatsAg1wSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432997: fltTcaSlaTCPConnectStatsAg1moSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432998: fltTcaSlaTCPConnectStatsAg1qtrSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F432999: fltTcaSlaTCPConnectStatsAg1yearSuccessRate

Severity: variable

Explanation: This fault is caused by "number of successful TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of successful TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4330: fltSpanExtendedRangeNotSupportedError

Severity: major

Explanation: This fault occurs when span filter entry creation fails due to invalid combination of ranges. If Srcport/DsPort is a range then DSCP/Dot1p cannot be a range and vice versa OR When src/dst port values are present, protocol cannot be unspecified

Recommended Action: To recover from this fault, try the following actions

1. Create a filter entry with a single value of DSCP/Dot1p if srcPort/DstPort is a range and vice-versa OR create a filter entry with Protocol when src/dst port is present

F433048: fltTcaSlaTCPConnectStatsAg5minTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433049: fltTcaSlaTCPConnectStatsAg15minTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433050: fltTcaSlaTCPConnectStatsAg1hTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433051: fltTcaSlaTCPConnectStatsAg1dTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433052: fltTcaSlaTCPConnectStatsAg1wTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433053: fltTcaSlaTCPConnectStatsAg1moTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433054: fltTcaSlaTCPConnectStatsAg1qtrTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433055: fltTcaSlaTCPConnectStatsAg1yearTxPktsCum

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433056: fltTcaSlaTCPConnectStatsAg5minTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433057: fltTcaSlaTCPConnectStatsAg15minTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433058: fltTcaSlaTCPConnectStatsAg1hTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433059: fltTcaSlaTCPConnectStatsAg1dTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433060: fltTcaSlaTCPConnectStatsAg1wTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433061: fltTcaSlaTCPConnectStatsAg1moTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433062: fltTcaSlaTCPConnectStatsAg1qtrTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433063: fltTcaSlaTCPConnectStatsAg1yearTxPktsPer

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433088: fltTcaSlaTCPConnectStatsAg5minTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433089: fltTcaSlaTCPConnectStatsAg15minTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433090: fltTcaSlaTCPConnectStatsAg1hTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433091: fltTcaSlaTCPConnectStatsAg1dTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433092: fltTcaSlaTCPConnectStatsAg1wTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433093: fltTcaSlaTCPConnectStatsAg1moTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433094: fltTcaSlaTCPConnectStatsAg1qtrTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433095: fltTcaSlaTCPConnectStatsAg1yearTxPktsTr

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433096: fltTcaSlaTCPConnectStatsAg5minTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433097: fltTcaSlaTCPConnectStatsAg15minTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433098: fltTcaSlaTCPConnectStatsAg1hTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433099: fltTcaSlaTCPConnectStatsAg1dTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433100: fltTcaSlaTCPConnectStatsAg1wTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433101: fltTcaSlaTCPConnectStatsAg1moTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433102: fltTcaSlaTCPConnectStatsAg1qtrTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F433103: fltTcaSlaTCPConnectStatsAg1yearTxPktsRate

Severity: variable

Explanation: This fault is caused by "number of transmitted TCP Connect probes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "number of transmitted TCP Connect probes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F4332: fltSpanExtendedHwError

Severity: major

Explanation: This fault occurs when span filter entry creation fails due to hardware failure/error

Recommended Action: To recover from this fault, try the following actions

1. Try removing existing filter entries to allow this filter entry create to succeed

F4333: fltMacsecIfOperStLimitExceeded

Severity: warning

Explanation: This fault occurs when the max session exceeded

Recommended Action: To recover, remove some high power optics and reconfigure macsec session

F4334: fltMacsecFabIfOperStLimitExceeded

Severity: warning

Explanation: This fault occurs when the max session exceeds the limit allowed

Recommended Action: To recover, remove all high power optics and reconfigure macsec session

F4336: fltMcpIfMcpIntfConfigFailedQinQEdge

Severity: major

Explanation: This fault occurs when mcp strict mode is enabled on the qinq edge port

Recommended Action: If you see this fault, take the following actions

1. Disable mcp strict mode from the qinq edge interface

F4337: fltValidatorContractScaleCapProcessingScaleConfigurationChangeWarning

Severity: warning

Explanation: This fault occurs when configuration reached verified scalability guide.

Recommended Action: If you see this fault, create a **tech-support** file and contact Cisco TAC

F4338: fltEthpmFaultHpoMaxSupportedLimitExceeded

Severity: warning

Explanation: This fault is raised upon insertion of a high power optic in a module when the max supported number of high power optics already exist

Recommended Action: To recover from this fault, user must reduce the number of high power optics to max supported

F4339: fltEthpmFaultHpoNotAllowedDueToMACsecSessions

Severity: warning

Explanation: This fault is raised upon insertion of a high power optic in a module when the current number of MACsec sessions exceeds the number that allows insertion of a high power optic

Recommended Action: To recover from this fault, remove any existing high power optics from the module

F4341: fltProcMemUsageMemUtilMinor

Severity: minor

Explanation: This fault is raised when system memory usage goes above the threshold value.

Recommended Action: If you see this fault repeatedly, take the following actions:

1. Try to free up some unused memory. Check memory usage by dumping /proc/meminfo and top command.
2. If the above actions did not resolve the issue, collect **tech-support** file and contact Cisco TAC.

F4342: fltProcMemUsageMemUtilMajor

Severity: major

Explanation: This fault is raised when system memory usage goes above the threshold value.

Recommended Action: If you see this fault repeatedly, take the following actions:

1. Try to free up some unused memory. Check memory usage by dumping /proc/meminfo and top command.
2. If the above actions did not resolve the issue, collect **tech-support** file and contact Cisco TAC.

F4343: fltTelemetrySnCertDownloadStatusFailed

Severity: major

Explanation: This fault occurs when NDI certs generation fails on a controller

Recommended Action: If you see this fault, take the following actions:

1. Create a **tech-support** file and contact Cisco TAC.

F4344: fltTelemetrySnCertDownloadStatusNodeFailed

Severity: major

Explanation: This fault occurs when NDI certs generation fails on a node

Recommended Action: If you see this fault, take the following actions:

1. Create a **tech-support** file and contact Cisco TAC.

F4345: fltDhcpDiscoveryHealthDhcpFreeIp

Severity: major

Explanation: This fault is raised when dhcpPool or dhcpExtPool are running out of freeIps

Recommended Action: If you see this fault, take the following actions:

1. Check if corresponding dhcpPool or dhcpExtPool has free ip available or not.
2. If there is no free ip available, increase the pool size
3. If there is free ip available, Collect a **tech-support** file and contact Cisco TAC.

F4347: fltInfraRsSubPortAccBndlSubgrpResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4352: fltOspfDomRtrIdConfigConflictErr

Severity: warning

Explanation: This fault occurs when there is router id config conflict between ospf neighbours

Recommended Action: To recover from this fault, fix the conflict router id configs from the switch

F4353: fltOspfv3DomRtrIdConfigConflictErr

Severity: warning

Explanation: This fault occurs when there is router id config conflict between ospf neighbours

Recommended Action: To recover from this fault, fix the conflict router id configs from the switch

F4354: fltL3extSummSubnetConfigIssuesConfig-failed

Severity: major

Explanation: This fault is raised when l3extsubnet is configured for a subnet that already has fvRtSummSubnet

Recommended Action: If you see this fault, please either remove the fvRtSummSubnet or the l3extsubnet of the prefix

F4356: fltFvSummSubnetConfigIssuesConfig-failed

Severity: major

Explanation: This fault is raised when fvRtSummSubnet is configured for a subnet that already has l3extsubnet

Recommended Action: If you see this fault, please either remove the fvRtSummSubnet or the l3extsubnet of the prefix

F4361: fltInfraFailedAutoUpgradeFailedAutoUpgrade

Severity: critical

Explanation: This fault occurs when auto-upgrade for a controller fails.

Recommended Action: If you see this fault, take the following actions:

1. The message included with the fault will also include a reason that causes the failure of auto-upgrade for a controller. Investigate the reason and correct it.
2. After fix the issue, decommission/clean reboot/recommission that controller to re-trigger the auto upgrade.
3. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F4366: fltPimRsSWEntryToCandPolResolveFail

Severity: warning

Explanation: The object refers to an object that was not found.

Recommended Action: Make sure that referenced object exists and the name is spelled correctly in the relation object.

F4367: fltConfigpushLongUpdateInProgress

Severity: minor

Explanation: Configuration transactions in progress for more than 2 min.

Recommended Action: If you see this fault, wait for the configuration transactions to finish. It is not advisable to make further configuration changes.

F4368: fltLldpIfInvalidConnPortOutofService

Severity: major

Explanation: This fault occurs when a port is out-of-service because of a invalid connection with a undiscovered node. e.g leaf to another undiscovered leaf or spine to another undiscovered spine

Recommended Action: If you see this fault, take the following actions:

1. Ignore this fault when a leaf is connected to a tier-2 leaf. It will be automatically cleared once the tier-2 leaf will discover.
2. Ignore this fault when a remote leaf's fabric port is connected to another remote leaf.It will be automatically cleared once the remote leaf will discover. (remote leaf back to back)
3. Ignore this fault when a one pod's spine is connected to another pod's spine.It will be automatically cleared once the spine will discover.(mupti pod back to back)
4. Ignore this fault when a a node is connected to dual mode capable node during conversion.It will be automatically cleared once the node will discover. (dual mode switch conversion)
5. Ensure the device connected to the port is the correct device.

6. Ensure the device connected to the port is configured properly for the fabric it is being connected to.
7. If the device being connected is being reprovisioned from another fabric, ensure that the config on that device has been factory reset
8. If above actions did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F4373: fltProcPlatformPlatformLVFault

Severity: minor

Explanation: This fault occurs when there are unexpected LVs on the controller.

Recommended Action: If you see this fault, take the following actions:

1. Create a **tech-support** file and contact Cisco TAC.

F4376: fltEqptExtChOperStLinkRemovedOffline

Severity: critical

Explanation: FEX is offline due to link removal

Recommended Action: To recover from this fault, try the following actions:

1. Check if link between FEX and Switch is up

F4388: fltEqptStorageInode-Warning

Severity: warning

Explanation: This fault occurs when the utilization of storage inodes capacity on a controller is greater than 75%

Recommended Action: If you see this fault, take the following actions:

1. Cleanup any files created by the user on the partition on the storage device that the fault was produced on to free up space.
2. Cleaning of old core files (which are not needed for any investigation) can be accomplished as follows:
3. In the UI, go to Admin - Import/Export - Export Policies - Core - default - Operational, then click on old core files which are not needed for further use and delete.
4. Cleaning of techsupport files can be accompolished as follows:
5. In the UI, go to Admin - Import/Export - Export Policies - default - Operational, then click on individual techsupport files and delete.
6. If the above action did not resolve the issue, create a **tech-support** file and contact Cisco TAC.

F4389: fltEqptStorageInode-Major

Severity: major

Explanation: This fault occurs when storage inodes utilization is between 85% and 90%

Recommended Action: If you see this fault, take the following action:

1. Cleanup any files created by the user on the partition on the storage device that the fault was produced on to free up space
2. Cleaning of old core files (which are not needed for any investigation) can be accomplished as follows: In the UI, go to Admin -> Import/Export -> Export Policies -> Core -> default -> Operational, then click on old core files which are not needed for further use and delete.

3. Cleaning of techsupport files can be accompolished as follows: In the UI, go to Admin -> Import/Export -> Export Policies -> default -> Operational, then click on individual techsupport files and delete.
4. If the above action did not resolve the issue, create a **show tech-support** file and contact Cisco TAC.

F4390: fltEqptStorageInode-Critical

Severity: critical

Explanation: This fault occurs when storage inodes capacity utilization is greater than 90%

Recommended Action: If you see this fault, take the following action:

1. Cleanup any files created by the user on the partition on the storage device that the fault was produced on to free up space
2. Cleaning of old core files (which are not needed for any investigation) can be accomplished as follows: In the UI, go to Admin - Import/Export - Export Policies - Core - default - Operational, then click on old core files which are not needed for further use and delete.
3. Cleaning of techsupport files can be accompolished as follows: In the UI, go to Admin - Import/Export - Export Policies - default - Operational, then click on individual techsupport files and delete.
4. Cleaning of Old Image files can be accompolished as follows: In the UI, go to Admin - Firmware - Images, then click on individual Image files and delete.
5. If the above action did not resolve the issue, create a **show tech-support** file and contact Cisco TAC.

F440192: fltTcaCloudEgressBytes5minDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440193: fltTcaCloudEgressBytes15minDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440194: fltTcaCloudEgressBytes1hDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440195: fltTcaCloudEgressBytes1dDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440196: fltTcaCloudEgressBytes1wDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440197: fltTcaCloudEgressBytes1moDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440198: fltTcaCloudEgressBytes1qtrDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440199: fltTcaCloudEgressBytes1yearDropLast

Severity: variable

Explanation: This fault is caused by "egress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440208: fltTcaCloudEgressBytes5minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440209: fltTcaCloudEgressBytes15minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440210: fltTcaCloudEgressBytes1hDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440211: fltTcaCloudEgressBytes1dDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440212: fltTcaCloudEgressBytes1wDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440213: fltTcaCloudEgressBytes1moDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440214: fltTcaCloudEgressBytes1qtrDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440215: fltTcaCloudEgressBytes1yearDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440216: fltTcaCloudEgressBytes5minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440217: fltTcaCloudEgressBytes15minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440218: fltTcaCloudEgressBytes1hDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440219: fltTcaCloudEgressBytes1dDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440220: fltTcaCloudEgressBytes1wDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440221: fltTcaCloudEgressBytes1moDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440222: fltTcaCloudEgressBytes1qtrDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440223: fltTcaCloudEgressBytes1yearDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440224: fltTcaCloudEgressBytes5minDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440225: fltTcaCloudEgressBytes15minDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440226: fltTcaCloudEgressBytes1hDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440227: fltTcaCloudEgressBytes1dDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440228: fltTcaCloudEgressBytes1wDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440229: fltTcaCloudEgressBytes1moDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440230: fltTcaCloudEgressBytes1qtrDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440231: fltTcaCloudEgressBytes1yearDropMin

Severity: variable

Explanation: This fault is caused by "egress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440232: fltTcaCloudEgressBytes5minDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440233: fltTcaCloudEgressBytes15minDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440234: fltTcaCloudEgressBytes1hDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440235: fltTcaCloudEgressBytes1dDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440236: fltTcaCloudEgressBytes1wDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440237: fltTcaCloudEgressBytes1moDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440238: fltTcaCloudEgressBytes1qtrDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440239: fltTcaCloudEgressBytes1yearDropMax

Severity: variable

Explanation: This fault is caused by "egress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440240: fltTcaCloudEgressBytes5minDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440241: fltTcaCloudEgressBytes15minDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440242: fltTcaCloudEgressBytes1hDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440243: fltTcaCloudEgressBytes1dDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440244: fltTcaCloudEgressBytes1wDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440245: fltTcaCloudEgressBytes1moDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440246: fltTcaCloudEgressBytes1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440247: fltTcaCloudEgressBytes1yearDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440272: fltTcaCloudEgressBytes5minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440273: fltTcaCloudEgressBytes15minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440274: fltTcaCloudEgressBytes1hDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440275: fltTcaCloudEgressBytes1dDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440276: fltTcaCloudEgressBytes1wDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440277: fltTcaCloudEgressBytes1moDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440278: fltTcaCloudEgressBytes1qtrDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440279: fltTcaCloudEgressBytes1yearDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440280: fltTcaCloudEgressBytes5minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440281: fltTcaCloudEgressBytes15minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440282: fltTcaCloudEgressBytes1hDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440283: fltTcaCloudEgressBytes1dDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440284: fltTcaCloudEgressBytes1wDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440285: fltTcaCloudEgressBytes1moDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440286: fltTcaCloudEgressBytes1qtrDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440287: fltTcaCloudEgressBytes1yearDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440360: fltTcaCloudEgressBytesAg5minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440361: fltTcaCloudEgressBytesAg15minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440362: fltTcaCloudEgressBytesAg1hDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440363: fltTcaCloudEgressBytesAg1dDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440364: fltTcaCloudEgressBytesAg1wDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440365: fltTcaCloudEgressBytesAg1moDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440366: fltTcaCloudEgressBytesAg1qtrDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440367: fltTcaCloudEgressBytesAg1yearDropCum

Severity: variable

Explanation: This fault is caused by "egress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440368: fltTcaCloudEgressBytesAg5minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440369: fltTcaCloudEgressBytesAg15minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440370: fltTcaCloudEgressBytesAg1hDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440371: fltTcaCloudEgressBytesAg1dDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440372: fltTcaCloudEgressBytesAg1wDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440373: fltTcaCloudEgressBytesAg1moDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440374: fltTcaCloudEgressBytesAg1qtrDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440375: fltTcaCloudEgressBytesAg1yearDropPer

Severity: variable

Explanation: This fault is caused by "egress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440400: fltTcaCloudEgressBytesAg5minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440401: fltTcaCloudEgressBytesAg15minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440402: fltTcaCloudEgressBytesAg1hDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440403: fltTcaCloudEgressBytesAg1dDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440404: fltTcaCloudEgressBytesAg1wDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440405: fltTcaCloudEgressBytesAg1moDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440406: fltTcaCloudEgressBytesAg1qtrDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440407: fltTcaCloudEgressBytesAg1yearDropTr

Severity: variable

Explanation: This fault is caused by "egress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440408: fltTcaCloudEgressBytesAg5minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440409: fltTcaCloudEgressBytesAg15minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440410: fltTcaCloudEgressBytesAg1hDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440411: fltTcaCloudEgressBytesAg1dDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440412: fltTcaCloudEgressBytesAg1wDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440413: fltTcaCloudEgressBytesAg1moDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440414: fltTcaCloudEgressBytesAg1qtrDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440415: fltTcaCloudEgressBytesAg1yearDropRate

Severity: variable

Explanation: This fault is caused by "egress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440464: fltTcaCloudEgressBytes5minUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440465: fltTcaCloudEgressBytes15minUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440466: fltTcaCloudEgressBytes1hUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440467: fltTcaCloudEgressBytes1dUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440468: fltTcaCloudEgressBytes1wUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440469: fltTcaCloudEgressBytes1moUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440470: fltTcaCloudEgressBytes1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440471: fltTcaCloudEgressBytes1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440480: fltTcaCloudEgressBytes5minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440481: fltTcaCloudEgressBytes15minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440482: fltTcaCloudEgressBytes1hUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440483: fltTcaCloudEgressBytes1dUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440484: fltTcaCloudEgressBytes1wUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440485: fltTcaCloudEgressBytes1moUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440486: fltTcaCloudEgressBytes1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440487: fltTcaCloudEgressBytes1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440488: fltTcaCloudEgressBytes5minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440489: fltTcaCloudEgressBytes15minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440490: fltTcaCloudEgressBytes1hUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440491: fltTcaCloudEgressBytes1dUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440492: fltTcaCloudEgressBytes1wUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440493: fltTcaCloudEgressBytes1moUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440494: fltTcaCloudEgressBytes1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440495: fltTcaCloudEgressBytes1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440496: fltTcaCloudEgressBytes5minUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440497: fltTcaCloudEgressBytes15minUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440498: fltTcaCloudEgressBytes1hUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440499: fltTcaCloudEgressBytes1dUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440500: fltTcaCloudEgressBytes1wUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440501: fltTcaCloudEgressBytes1moUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440502: fltTcaCloudEgressBytes1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440503: fltTcaCloudEgressBytes1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440504: fltTcaCloudEgressBytes5minUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440505: fltTcaCloudEgressBytes15minUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440506: fltTcaCloudEgressBytes1hUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440507: fltTcaCloudEgressBytes1dUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440508: fltTcaCloudEgressBytes1wUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440509: fltTcaCloudEgressBytes1moUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440510: fltTcaCloudEgressBytes1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440511: fltTcaCloudEgressBytes1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440512: fltTcaCloudEgressBytes5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440513: fltTcaCloudEgressBytes15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440514: fltTcaCloudEgressBytes1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440515: fltTcaCloudEgressBytes1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440516: fltTcaCloudEgressBytes1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440517: fltTcaCloudEgressBytes1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440518: fltTcaCloudEgressBytes1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440519: fltTcaCloudEgressBytes1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440544: fltTcaCloudEgressBytes5minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440545: fltTcaCloudEgressBytes15minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440546: fltTcaCloudEgressBytes1hUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440547: fltTcaCloudEgressBytes1dUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440548: fltTcaCloudEgressBytes1wUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440549: fltTcaCloudEgressBytes1moUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440550: fltTcaCloudEgressBytes1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440551: fltTcaCloudEgressBytes1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440552: fltTcaCloudEgressBytes5minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440553: fltTcaCloudEgressBytes15minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440554: fltTcaCloudEgressBytes1hUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440555: fltTcaCloudEgressBytes1dUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440556: fltTcaCloudEgressBytes1wUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440557: fltTcaCloudEgressBytes1moUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440558: fltTcaCloudEgressBytes1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440559: fltTcaCloudEgressBytes1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440632: fltTcaCloudEgressBytesAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440633: fltTcaCloudEgressBytesAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440634: fltTcaCloudEgressBytesAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440635: fltTcaCloudEgressBytesAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440636: fltTcaCloudEgressBytesAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440637: fltTcaCloudEgressBytesAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440638: fltTcaCloudEgressBytesAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440639: fltTcaCloudEgressBytesAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440640: fltTcaCloudEgressBytesAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440641: fltTcaCloudEgressBytesAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440642: fltTcaCloudEgressBytesAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440643: fltTcaCloudEgressBytesAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440644: fltTcaCloudEgressBytesAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440645: fltTcaCloudEgressBytesAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440646: fltTcaCloudEgressBytesAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440647: fltTcaCloudEgressBytesAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440672: fltTcaCloudEgressBytesAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440673: fltTcaCloudEgressBytesAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440674: fltTcaCloudEgressBytesAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440675: fltTcaCloudEgressBytesAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440676: fltTcaCloudEgressBytesAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440677: fltTcaCloudEgressBytesAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440678: fltTcaCloudEgressBytesAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440679: fltTcaCloudEgressBytesAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440680: fltTcaCloudEgressBytesAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440681: fltTcaCloudEgressBytesAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440682: fltTcaCloudEgressBytesAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440683: fltTcaCloudEgressBytesAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440684: fltTcaCloudEgressBytesAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440685: fltTcaCloudEgressBytesAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440686: fltTcaCloudEgressBytesAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440687: fltTcaCloudEgressBytesAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440736: fltTcaCloudEgressPkts5minDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440737: fltTcaCloudEgressPkts15minDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440738: fltTcaCloudEgressPkts1hDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440739: fltTcaCloudEgressPkts1dDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440740: fltTcaCloudEgressPkts1wDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440741: fltTcaCloudEgressPkts1moDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440742: fltTcaCloudEgressPkts1qtrDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440743: fltTcaCloudEgressPkts1yearDropLast

Severity: variable

Explanation: This fault is caused by "egress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440752: fltTcaCloudEgressPkts5minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440753: fltTcaCloudEgressPkts15minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440754: fltTcaCloudEgressPkts1hDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440755: fltTcaCloudEgressPkts1dDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440756: fltTcaCloudEgressPkts1wDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440757: fltTcaCloudEgressPkts1moDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440758: fltTcaCloudEgressPkts1qtrDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440759: fltTcaCloudEgressPkts1yearDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440760: fltTcaCloudEgressPkts5minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440761: fltTcaCloudEgressPkts15minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440762: fltTcaCloudEgressPkts1hDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440763: fltTcaCloudEgressPkts1dDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440764: fltTcaCloudEgressPkts1wDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440765: fltTcaCloudEgressPkts1moDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440766: fltTcaCloudEgressPkts1qtrDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440767: fltTcaCloudEgressPkts1yearDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440768: fltTcaCloudEgressPkts5minDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440769: fltTcaCloudEgressPkts15minDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440770: fltTcaCloudEgressPkts1hDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440771: fltTcaCloudEgressPkts1dDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440772: fltTcaCloudEgressPkts1wDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440773: fltTcaCloudEgressPkts1moDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440774: fltTcaCloudEgressPkts1qtrDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440775: fltTcaCloudEgressPkts1yearDropMin

Severity: variable

Explanation: This fault is caused by "egress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440776: fltTcaCloudEgressPkts5minDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440777: fltTcaCloudEgressPkts15minDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440778: fltTcaCloudEgressPkts1hDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440779: fltTcaCloudEgressPkts1dDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440780: fltTcaCloudEgressPkts1wDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440781: fltTcaCloudEgressPkts1moDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440782: fltTcaCloudEgressPkts1qtrDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440783: fltTcaCloudEgressPkts1yearDropMax

Severity: variable

Explanation: This fault is caused by "egress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440784: fltTcaCloudEgressPkts5minDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440785: fltTcaCloudEgressPkts15minDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440786: fltTcaCloudEgressPkts1hDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440787: fltTcaCloudEgressPkts1dDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440788: fltTcaCloudEgressPkts1wDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440789: fltTcaCloudEgressPkts1moDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440790: fltTcaCloudEgressPkts1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440791: fltTcaCloudEgressPkts1yearDropAvg

Severity: variable

Explanation: This fault is caused by "egress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440816: fltTcaCloudEgressPkts5minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440817: fltTcaCloudEgressPkts15minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440818: fltTcaCloudEgressPkts1hDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440819: fltTcaCloudEgressPkts1dDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440820: fltTcaCloudEgressPkts1wDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440821: fltTcaCloudEgressPkts1moDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440822: fltTcaCloudEgressPkts1qtrDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440823: fltTcaCloudEgressPkts1yearDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440824: fltTcaCloudEgressPkts5minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440825: fltTcaCloudEgressPkts15minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440826: fltTcaCloudEgressPkts1hDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440827: fltTcaCloudEgressPkts1dDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440828: fltTcaCloudEgressPkts1wDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440829: fltTcaCloudEgressPkts1moDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440830: fltTcaCloudEgressPkts1qtrDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440831: fltTcaCloudEgressPkts1yearDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440904: fltTcaCloudEgressPktsAg5minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440905: fltTcaCloudEgressPktsAg15minDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440906: fltTcaCloudEgressPktsAg1hDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440907: fltTcaCloudEgressPktsAg1dDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440908: fltTcaCloudEgressPktsAg1wDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440909: fltTcaCloudEgressPktsAg1moDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440910: fltTcaCloudEgressPktsAg1qtrDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440911: fltTcaCloudEgressPktsAg1yearDropCum

Severity: variable

Explanation: This fault is caused by "egress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440912: fltTcaCloudEgressPktsAg5minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440913: fltTcaCloudEgressPktsAg15minDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440914: fltTcaCloudEgressPktsAg1hDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440915: fltTcaCloudEgressPktsAg1dDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440916: fltTcaCloudEgressPktsAg1wDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440917: fltTcaCloudEgressPktsAg1moDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440918: fltTcaCloudEgressPktsAg1qtrDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440919: fltTcaCloudEgressPktsAg1yearDropPer

Severity: variable

Explanation: This fault is caused by "egress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440944: fltTcaCloudEgressPktsAg5minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440945: fltTcaCloudEgressPktsAg15minDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440946: fltTcaCloudEgressPktsAg1hDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440947: fltTcaCloudEgressPktsAg1dDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440948: fltTcaCloudEgressPktsAg1wDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440949: fltTcaCloudEgressPktsAg1moDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440950: fltTcaCloudEgressPktsAg1qtrDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440951: fltTcaCloudEgressPktsAg1yearDropTr

Severity: variable

Explanation: This fault is caused by "egress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440952: fltTcaCloudEgressPktsAg5minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440953: fltTcaCloudEgressPktsAg15minDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440954: fltTcaCloudEgressPktsAg1hDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440955: fltTcaCloudEgressPktsAg1dDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440956: fltTcaCloudEgressPktsAg1wDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440957: fltTcaCloudEgressPktsAg1moDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440958: fltTcaCloudEgressPktsAg1qtrDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F440959: fltTcaCloudEgressPktsAg1yearDropRate

Severity: variable

Explanation: This fault is caused by "egress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441008: fltTcaCloudEgressPkts5minUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441009: fltTcaCloudEgressPkts15minUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441010: fltTcaCloudEgressPkts1hUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441011: fltTcaCloudEgressPkts1dUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441012: fltTcaCloudEgressPkts1wUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441013: fltTcaCloudEgressPkts1moUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441014: fltTcaCloudEgressPkts1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441015: fltTcaCloudEgressPkts1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "egress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441024: fltTcaCloudEgressPkts5minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441025: fltTcaCloudEgressPkts15minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441026: fltTcaCloudEgressPkts1hUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441027: fltTcaCloudEgressPkts1dUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441028: fltTcaCloudEgressPkts1wUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441029: fltTcaCloudEgressPkts1moUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441030: fltTcaCloudEgressPkts1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441031: fltTcaCloudEgressPkts1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441032: fltTcaCloudEgressPkts5minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441033: fltTcaCloudEgressPkts15minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441034: fltTcaCloudEgressPkts1hUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441035: fltTcaCloudEgressPkts1dUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441036: fltTcaCloudEgressPkts1wUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441037: fltTcaCloudEgressPkts1moUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441038: fltTcaCloudEgressPkts1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441039: fltTcaCloudEgressPkts1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441040: fltTcaCloudEgressPkts5minUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441041: fltTcaCloudEgressPkts15minUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441042: fltTcaCloudEgressPkts1hUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441043: fltTcaCloudEgressPkts1dUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441044: fltTcaCloudEgressPkts1wUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441045: fltTcaCloudEgressPkts1moUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441046: fltTcaCloudEgressPkts1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441047: fltTcaCloudEgressPkts1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "egress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441048: fltTcaCloudEgressPkts5minUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441049: fltTcaCloudEgressPkts15minUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441050: fltTcaCloudEgressPkts1hUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441051: fltTcaCloudEgressPkts1dUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441052: fltTcaCloudEgressPkts1wUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441053: fltTcaCloudEgressPkts1moUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441054: fltTcaCloudEgressPkts1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441055: fltTcaCloudEgressPkts1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "egress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441056: fltTcaCloudEgressPkts5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441057: fltTcaCloudEgressPkts15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441058: fltTcaCloudEgressPkts1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441059: fltTcaCloudEgressPkts1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441060: fltTcaCloudEgressPkts1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441061: fltTcaCloudEgressPkts1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441062: fltTcaCloudEgressPkts1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441063: fltTcaCloudEgressPkts1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "egress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441088: fltTcaCloudEgressPkts5minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441089: fltTcaCloudEgressPkts15minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441090: fltTcaCloudEgressPkts1hUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441091: fltTcaCloudEgressPkts1dUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441092: fltTcaCloudEgressPkts1wUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441093: fltTcaCloudEgressPkts1moUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441094: fltTcaCloudEgressPkts1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441095: fltTcaCloudEgressPkts1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441096: fltTcaCloudEgressPkts5minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441097: fltTcaCloudEgressPkts15minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441098: fltTcaCloudEgressPkts1hUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441099: fltTcaCloudEgressPkts1dUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441100: fltTcaCloudEgressPkts1wUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441101: fltTcaCloudEgressPkts1moUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441102: fltTcaCloudEgressPkts1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441103: fltTcaCloudEgressPkts1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441176: fltTcaCloudEgressPktsAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441177: fltTcaCloudEgressPktsAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441178: fltTcaCloudEgressPktsAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441179: fltTcaCloudEgressPktsAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441180: fltTcaCloudEgressPktsAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441181: fltTcaCloudEgressPktsAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441182: fltTcaCloudEgressPktsAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441183: fltTcaCloudEgressPktsAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "egress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441184: fltTcaCloudEgressPktsAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441185: fltTcaCloudEgressPktsAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441186: fltTcaCloudEgressPktsAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441187: fltTcaCloudEgressPktsAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441188: fltTcaCloudEgressPktsAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441189: fltTcaCloudEgressPktsAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441190: fltTcaCloudEgressPktsAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441191: fltTcaCloudEgressPktsAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "egress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441216: fltTcaCloudEgressPktsAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441217: fltTcaCloudEgressPktsAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441218: fltTcaCloudEgressPktsAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441219: fltTcaCloudEgressPktsAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441220: fltTcaCloudEgressPktsAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441221: fltTcaCloudEgressPktsAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441222: fltTcaCloudEgressPktsAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441223: fltTcaCloudEgressPktsAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "egress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441224: fltTcaCloudEgressPktsAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441225: fltTcaCloudEgressPktsAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441226: fltTcaCloudEgressPktsAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441227: fltTcaCloudEgressPktsAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441228: fltTcaCloudEgressPktsAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441229: fltTcaCloudEgressPktsAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441230: fltTcaCloudEgressPktsAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441231: fltTcaCloudEgressPktsAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "egress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "egress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441280: fltTcaCloudIngressBytes5minDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441281: fltTcaCloudIngressBytes15minDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441282: fltTcaCloudIngressBytes1hDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441283: fltTcaCloudIngressBytes1dDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441284: fltTcaCloudIngressBytes1wDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441285: fltTcaCloudIngressBytes1moDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441286: fltTcaCloudIngressBytes1qtrDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441287: fltTcaCloudIngressBytes1yearDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441296: fltTcaCloudIngressBytes5minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441297: fltTcaCloudIngressBytes15minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441298: fltTcaCloudIngressBytes1hDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441299: fltTcaCloudIngressBytes1dDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441300: fltTcaCloudIngressBytes1wDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441301: fltTcaCloudIngressBytes1moDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441302: fltTcaCloudIngressBytes1qtrDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441303: fltTcaCloudIngressBytes1yearDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441304: fltTcaCloudIngressBytes5minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441305: fltTcaCloudIngressBytes15minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441306: fltTcaCloudIngressBytes1hDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441307: fltTcaCloudIngressBytes1dDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441308: fltTcaCloudIngressBytes1wDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441309: fltTcaCloudIngressBytes1moDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441310: fltTcaCloudIngressBytes1qtrDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441311: fltTcaCloudIngressBytes1yearDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441312: fltTcaCloudIngressBytes5minDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441313: fltTcaCloudIngressBytes15minDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441314: fltTcaCloudIngressBytes1hDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441315: fltTcaCloudIngressBytes1dDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441316: fltTcaCloudIngressBytes1wDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441317: fltTcaCloudIngressBytes1moDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441318: fltTcaCloudIngressBytes1qtrDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441319: fltTcaCloudIngressBytes1yearDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441320: fltTcaCloudIngressBytes5minDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441321: fltTcaCloudIngressBytes15minDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441322: fltTcaCloudIngressBytes1hDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441323: fltTcaCloudIngressBytes1dDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441324: fltTcaCloudIngressBytes1wDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441325: fltTcaCloudIngressBytes1moDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441326: fltTcaCloudIngressBytes1qtrDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441327: fltTcaCloudIngressBytes1yearDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441328: fltTcaCloudIngressBytes5minDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441329: fltTcaCloudIngressBytes15minDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441330: fltTcaCloudIngressBytes1hDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441331: fltTcaCloudIngressBytes1dDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441332: fltTcaCloudIngressBytes1wDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441333: fltTcaCloudIngressBytes1moDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441334: fltTcaCloudIngressBytes1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441335: fltTcaCloudIngressBytes1yearDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441360: fltTcaCloudIngressBytes5minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441361: fltTcaCloudIngressBytes15minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441362: fltTcaCloudIngressBytes1hDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441363: fltTcaCloudIngressBytes1dDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441364: fltTcaCloudIngressBytes1wDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441365: fltTcaCloudIngressBytes1moDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441366: fltTcaCloudIngressBytes1qtrDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441367: fltTcaCloudIngressBytes1yearDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441368: fltTcaCloudIngressBytes5minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441369: fltTcaCloudIngressBytes15minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441370: fltTcaCloudIngressBytes1hDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441371: fltTcaCloudIngressBytes1dDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441372: fltTcaCloudIngressBytes1wDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441373: fltTcaCloudIngressBytes1moDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441374: fltTcaCloudIngressBytes1qtrDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441375: fltTcaCloudIngressBytes1yearDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441448: fltTcaCloudIngressBytesAg5minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441449: fltTcaCloudIngressBytesAg15minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441450: fltTcaCloudIngressBytesAg1hDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441451: fltTcaCloudIngressBytesAg1dDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441452: fltTcaCloudIngressBytesAg1wDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441453: fltTcaCloudIngressBytesAg1moDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441454: fltTcaCloudIngressBytesAg1qtrDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441455: fltTcaCloudIngressBytesAg1yearDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441456: fltTcaCloudIngressBytesAg5minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441457: fltTcaCloudIngressBytesAg15minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441458: fltTcaCloudIngressBytesAg1hDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441459: fltTcaCloudIngressBytesAg1dDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441460: fltTcaCloudIngressBytesAg1wDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441461: fltTcaCloudIngressBytesAg1moDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441462: fltTcaCloudIngressBytesAg1qtrDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441463: fltTcaCloudIngressBytesAg1yearDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441488: fltTcaCloudIngressBytesAg5minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441489: fltTcaCloudIngressBytesAg15minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441490: fltTcaCloudIngressBytesAg1hDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441491: fltTcaCloudIngressBytesAg1dDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441492: fltTcaCloudIngressBytesAg1wDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441493: fltTcaCloudIngressBytesAg1moDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441494: fltTcaCloudIngressBytesAg1qtrDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441495: fltTcaCloudIngressBytesAg1yearDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441496: fltTcaCloudIngressBytesAg5minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441497: fltTcaCloudIngressBytesAg15minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441498: fltTcaCloudIngressBytesAg1hDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441499: fltTcaCloudIngressBytesAg1dDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441500: fltTcaCloudIngressBytesAg1wDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441501: fltTcaCloudIngressBytesAg1moDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441502: fltTcaCloudIngressBytesAg1qtrDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441503: fltTcaCloudIngressBytesAg1yearDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441552: fltTcaCloudIngressBytes5minUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441553: fltTcaCloudIngressBytes15minUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441554: fltTcaCloudIngressBytes1hUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441555: fltTcaCloudIngressBytes1dUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441556: fltTcaCloudIngressBytes1wUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441557: fltTcaCloudIngressBytes1moUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441558: fltTcaCloudIngressBytes1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441559: fltTcaCloudIngressBytes1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441568: fltTcaCloudIngressBytes5minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441569: fltTcaCloudIngressBytes15minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441570: fltTcaCloudIngressBytes1hUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441571: fltTcaCloudIngressBytes1dUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441572: fltTcaCloudIngressBytes1wUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441573: fltTcaCloudIngressBytes1moUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441574: fltTcaCloudIngressBytes1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441575: fltTcaCloudIngressBytes1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441576: fltTcaCloudIngressBytes5minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441577: fltTcaCloudIngressBytes15minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441578: fltTcaCloudIngressBytes1hUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441579: fltTcaCloudIngressBytes1dUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441580: fltTcaCloudIngressBytes1wUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441581: fltTcaCloudIngressBytes1moUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441582: fltTcaCloudIngressBytes1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441583: fltTcaCloudIngressBytes1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441584: fltTcaCloudIngressBytes5minUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441585: fltTcaCloudIngressBytes15minUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441586: fltTcaCloudIngressBytes1hUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441587: fltTcaCloudIngressBytes1dUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441588: fltTcaCloudIngressBytes1wUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441589: fltTcaCloudIngressBytes1moUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441590: fltTcaCloudIngressBytes1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441591: fltTcaCloudIngressBytes1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441592: fltTcaCloudIngressBytes5minUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441593: fltTcaCloudIngressBytes15minUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441594: fltTcaCloudIngressBytes1hUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441595: fltTcaCloudIngressBytes1dUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441596: fltTcaCloudIngressBytes1wUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441597: fltTcaCloudIngressBytes1moUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441598: fltTcaCloudIngressBytes1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441599: fltTcaCloudIngressBytes1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441600: fltTcaCloudIngressBytes5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441601: fltTcaCloudIngressBytes15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441602: fltTcaCloudIngressBytes1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441603: fltTcaCloudIngressBytes1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441604: fltTcaCloudIngressBytes1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441605: fltTcaCloudIngressBytes1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441606: fltTcaCloudIngressBytes1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441607: fltTcaCloudIngressBytes1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441632: fltTcaCloudIngressBytes5minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441633: fltTcaCloudIngressBytes15minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441634: fltTcaCloudIngressBytes1hUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441635: fltTcaCloudIngressBytes1dUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441636: fltTcaCloudIngressBytes1wUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441637: fltTcaCloudIngressBytes1moUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441638: fltTcaCloudIngressBytes1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441639: fltTcaCloudIngressBytes1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441640: fltTcaCloudIngressBytes5minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441641: fltTcaCloudIngressBytes15minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441642: fltTcaCloudIngressBytes1hUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441643: fltTcaCloudIngressBytes1dUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441644: fltTcaCloudIngressBytes1wUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441645: fltTcaCloudIngressBytes1moUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441646: fltTcaCloudIngressBytes1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441647: fltTcaCloudIngressBytes1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441720: fltTcaCloudIngressBytesAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441721: fltTcaCloudIngressBytesAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441722: fltTcaCloudIngressBytesAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441723: fltTcaCloudIngressBytesAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441724: fltTcaCloudIngressBytesAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441725: fltTcaCloudIngressBytesAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441726: fltTcaCloudIngressBytesAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441727: fltTcaCloudIngressBytesAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441728: fltTcaCloudIngressBytesAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441729: fltTcaCloudIngressBytesAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441730: fltTcaCloudIngressBytesAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441731: fltTcaCloudIngressBytesAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441732: fltTcaCloudIngressBytesAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441733: fltTcaCloudIngressBytesAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441734: fltTcaCloudIngressBytesAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441735: fltTcaCloudIngressBytesAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441760: fltTcaCloudIngressBytesAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441761: fltTcaCloudIngressBytesAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441762: fltTcaCloudIngressBytesAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441763: fltTcaCloudIngressBytesAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441764: fltTcaCloudIngressBytesAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441765: fltTcaCloudIngressBytesAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441766: fltTcaCloudIngressBytesAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441767: fltTcaCloudIngressBytesAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441768: fltTcaCloudIngressBytesAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441769: fltTcaCloudIngressBytesAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441770: fltTcaCloudIngressBytesAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441771: fltTcaCloudIngressBytesAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441772: fltTcaCloudIngressBytesAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441773: fltTcaCloudIngressBytesAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441774: fltTcaCloudIngressBytesAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441775: fltTcaCloudIngressBytesAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast bytes rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast bytes" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441824: fltTcaCloudIngressPkts5minDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441825: fltTcaCloudIngressPkts15minDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441826: fltTcaCloudIngressPkts1hDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441827: fltTcaCloudIngressPkts1dDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441828: fltTcaCloudIngressPkts1wDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441829: fltTcaCloudIngressPkts1moDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441830: fltTcaCloudIngressPkts1qtrDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441831: fltTcaCloudIngressPkts1yearDropLast

Severity: variable

Explanation: This fault is caused by "ingress drop packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441840: fltTcaCloudIngressPkts5minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441841: fltTcaCloudIngressPkts15minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441842: fltTcaCloudIngressPkts1hDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441843: fltTcaCloudIngressPkts1dDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441844: fltTcaCloudIngressPkts1wDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441845: fltTcaCloudIngressPkts1moDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441846: fltTcaCloudIngressPkts1qtrDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441847: fltTcaCloudIngressPkts1yearDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441848: fltTcaCloudIngressPkts5minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441849: fltTcaCloudIngressPkts15minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441850: fltTcaCloudIngressPkts1hDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441851: fltTcaCloudIngressPkts1dDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441852: fltTcaCloudIngressPkts1wDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441853: fltTcaCloudIngressPkts1moDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441854: fltTcaCloudIngressPkts1qtrDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441855: fltTcaCloudIngressPkts1yearDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441856: fltTcaCloudIngressPkts5minDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441857: fltTcaCloudIngressPkts15minDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441858: fltTcaCloudIngressPkts1hDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441859: fltTcaCloudIngressPkts1dDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441860: fltTcaCloudIngressPkts1wDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441861: fltTcaCloudIngressPkts1moDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441862: fltTcaCloudIngressPkts1qtrDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441863: fltTcaCloudIngressPkts1yearDropMin

Severity: variable

Explanation: This fault is caused by "ingress drop packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441864: fltTcaCloudIngressPkts5minDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441865: fltTcaCloudIngressPkts15minDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441866: fltTcaCloudIngressPkts1hDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441867: fltTcaCloudIngressPkts1dDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441868: fltTcaCloudIngressPkts1wDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441869: fltTcaCloudIngressPkts1moDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441870: fltTcaCloudIngressPkts1qtrDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441871: fltTcaCloudIngressPkts1yearDropMax

Severity: variable

Explanation: This fault is caused by "ingress drop packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441872: fltTcaCloudIngressPkts5minDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441873: fltTcaCloudIngressPkts15minDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441874: fltTcaCloudIngressPkts1hDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441875: fltTcaCloudIngressPkts1dDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441876: fltTcaCloudIngressPkts1wDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441877: fltTcaCloudIngressPkts1moDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441878: fltTcaCloudIngressPkts1qtrDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441879: fltTcaCloudIngressPkts1yearDropAvg

Severity: variable

Explanation: This fault is caused by "ingress drop packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441904: fltTcaCloudIngressPkts5minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441905: fltTcaCloudIngressPkts15minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441906: fltTcaCloudIngressPkts1hDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441907: fltTcaCloudIngressPkts1dDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441908: fltTcaCloudIngressPkts1wDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441909: fltTcaCloudIngressPkts1moDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441910: fltTcaCloudIngressPkts1qtrDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441911: fltTcaCloudIngressPkts1yearDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441912: fltTcaCloudIngressPkts5minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441913: fltTcaCloudIngressPkts15minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441914: fltTcaCloudIngressPkts1hDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441915: fltTcaCloudIngressPkts1dDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441916: fltTcaCloudIngressPkts1wDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441917: fltTcaCloudIngressPkts1moDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441918: fltTcaCloudIngressPkts1qtrDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441919: fltTcaCloudIngressPkts1yearDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441992: fltTcaCloudIngressPktsAg5minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441993: fltTcaCloudIngressPktsAg15minDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441994: fltTcaCloudIngressPktsAg1hDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441995: fltTcaCloudIngressPktsAg1dDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441996: fltTcaCloudIngressPktsAg1wDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441997: fltTcaCloudIngressPktsAg1moDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441998: fltTcaCloudIngressPktsAg1qtrDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F441999: fltTcaCloudIngressPktsAg1yearDropCum

Severity: variable

Explanation: This fault is caused by "ingress drop packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442000: fltTcaCloudIngressPktsAg5minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442001: fltTcaCloudIngressPktsAg15minDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442002: fltTcaCloudIngressPktsAg1hDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442003: fltTcaCloudIngressPktsAg1dDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442004: fltTcaCloudIngressPktsAg1wDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442005: fltTcaCloudIngressPktsAg1moDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442006: fltTcaCloudIngressPktsAg1qtrDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442007: fltTcaCloudIngressPktsAg1yearDropPer

Severity: variable

Explanation: This fault is caused by "ingress drop packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442032: fltTcaCloudIngressPktsAg5minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442033: fltTcaCloudIngressPktsAg15minDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442034: fltTcaCloudIngressPktsAg1hDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442035: fltTcaCloudIngressPktsAg1dDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442036: fltTcaCloudIngressPktsAg1wDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442037: fltTcaCloudIngressPktsAg1moDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442038: fltTcaCloudIngressPktsAg1qtrDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442039: fltTcaCloudIngressPktsAg1yearDropTr

Severity: variable

Explanation: This fault is caused by "ingress drop packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442040: fltTcaCloudIngressPktsAg5minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442041: fltTcaCloudIngressPktsAg15minDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442042: fltTcaCloudIngressPktsAg1hDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442043: fltTcaCloudIngressPktsAg1dDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442044: fltTcaCloudIngressPktsAg1wDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442045: fltTcaCloudIngressPktsAg1moDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442046: fltTcaCloudIngressPktsAg1qtrDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442047: fltTcaCloudIngressPktsAg1yearDropRate

Severity: variable

Explanation: This fault is caused by "ingress drop packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress drop packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442096: fltTcaCloudIngressPkts5minUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442097: fltTcaCloudIngressPkts15minUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442098: fltTcaCloudIngressPkts1hUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442099: fltTcaCloudIngressPkts1dUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442100: fltTcaCloudIngressPkts1wUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442101: fltTcaCloudIngressPkts1moUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442102: fltTcaCloudIngressPkts1qtrUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442103: fltTcaCloudIngressPkts1yearUnicastLast

Severity: variable

Explanation: This fault is caused by "ingress unicast packets current value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442112: fltTcaCloudIngressPkts5minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442113: fltTcaCloudIngressPkts15minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442114: fltTcaCloudIngressPkts1hUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442115: fltTcaCloudIngressPkts1dUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442116: fltTcaCloudIngressPkts1wUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442117: fltTcaCloudIngressPkts1moUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442118: fltTcaCloudIngressPkts1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442119: fltTcaCloudIngressPkts1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442120: fltTcaCloudIngressPkts5minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442121: fltTcaCloudIngressPkts15minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442122: fltTcaCloudIngressPkts1hUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442123: fltTcaCloudIngressPkts1dUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442124: fltTcaCloudIngressPkts1wUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442125: fltTcaCloudIngressPkts1moUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442126: fltTcaCloudIngressPkts1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442127: fltTcaCloudIngressPkts1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442128: fltTcaCloudIngressPkts5minUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442129: fltTcaCloudIngressPkts15minUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442130: fltTcaCloudIngressPkts1hUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442131: fltTcaCloudIngressPkts1dUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442132: fltTcaCloudIngressPkts1wUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442133: fltTcaCloudIngressPkts1moUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442134: fltTcaCloudIngressPkts1qtrUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442135: fltTcaCloudIngressPkts1yearUnicastMin

Severity: variable

Explanation: This fault is caused by "ingress unicast packets minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442136: fltTcaCloudIngressPkts5minUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442137: fltTcaCloudIngressPkts15minUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442138: fltTcaCloudIngressPkts1hUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442139: fltTcaCloudIngressPkts1dUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442140: fltTcaCloudIngressPkts1wUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442141: fltTcaCloudIngressPkts1moUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442142: fltTcaCloudIngressPkts1qtrUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442143: fltTcaCloudIngressPkts1yearUnicastMax

Severity: variable

Explanation: This fault is caused by "ingress unicast packets maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442144: fltTcaCloudIngressPkts5minUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442145: fltTcaCloudIngressPkts15minUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442146: fltTcaCloudIngressPkts1hUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442147: fltTcaCloudIngressPkts1dUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442148: fltTcaCloudIngressPkts1wUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442149: fltTcaCloudIngressPkts1moUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442150: fltTcaCloudIngressPkts1qtrUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442151: fltTcaCloudIngressPkts1yearUnicastAvg

Severity: variable

Explanation: This fault is caused by "ingress unicast packets average value" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442176: fltTcaCloudIngressPkts5minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442177: fltTcaCloudIngressPkts15minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442178: fltTcaCloudIngressPkts1hUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442179: fltTcaCloudIngressPkts1dUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442180: fltTcaCloudIngressPkts1wUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442181: fltTcaCloudIngressPkts1moUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442182: fltTcaCloudIngressPkts1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442183: fltTcaCloudIngressPkts1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442184: fltTcaCloudIngressPkts5minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442185: fltTcaCloudIngressPkts15minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442186: fltTcaCloudIngressPkts1hUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442187: fltTcaCloudIngressPkts1dUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442188: fltTcaCloudIngressPkts1wUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442189: fltTcaCloudIngressPkts1moUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442190: fltTcaCloudIngressPkts1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442191: fltTcaCloudIngressPkts1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442264: fltTcaCloudIngressPktsAg5minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442265: fltTcaCloudIngressPktsAg15minUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442266: fltTcaCloudIngressPktsAg1hUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442267: fltTcaCloudIngressPktsAg1dUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442268: fltTcaCloudIngressPktsAg1wUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442269: fltTcaCloudIngressPktsAg1moUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442270: fltTcaCloudIngressPktsAg1qtrUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442271: fltTcaCloudIngressPktsAg1yearUnicastCum

Severity: variable

Explanation: This fault is caused by "ingress unicast packets cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442272: fltTcaCloudIngressPktsAg5minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442273: fltTcaCloudIngressPktsAg15minUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442274: fltTcaCloudIngressPktsAg1hUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442275: fltTcaCloudIngressPktsAg1dUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442276: fltTcaCloudIngressPktsAg1wUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442277: fltTcaCloudIngressPktsAg1moUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442278: fltTcaCloudIngressPktsAg1qtrUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442279: fltTcaCloudIngressPktsAg1yearUnicastPer

Severity: variable

Explanation: This fault is caused by "ingress unicast packets periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442304: fltTcaCloudIngressPktsAg5minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442305: fltTcaCloudIngressPktsAg15minUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442306: fltTcaCloudIngressPktsAg1hUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442307: fltTcaCloudIngressPktsAg1dUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442308: fltTcaCloudIngressPktsAg1wUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442309: fltTcaCloudIngressPktsAg1moUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442310: fltTcaCloudIngressPktsAg1qtrUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442311: fltTcaCloudIngressPktsAg1yearUnicastTr

Severity: variable

Explanation: This fault is caused by "ingress unicast packets trend" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442312: fltTcaCloudIngressPktsAg5minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442313: fltTcaCloudIngressPktsAg15minUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442314: fltTcaCloudIngressPktsAg1hUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442315: fltTcaCloudIngressPktsAg1dUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442316: fltTcaCloudIngressPktsAg1wUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442317: fltTcaCloudIngressPktsAg1moUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442318: fltTcaCloudIngressPktsAg1qtrUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F442319: fltTcaCloudIngressPktsAg1yearUnicastRate

Severity: variable

Explanation: This fault is caused by "ingress unicast packets rate" statistical property crossing threshold level.

Recommended Action: Check the values of "ingress unicast packets" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450296: fltTcaEqptcapacityMcastEntry5minPerLast

Severity: variable

Explanation: This fault is caused by "Multicast usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450297: fltTcaEqptcapacityMcastEntry15minPerLast

Severity: variable

Explanation: This fault is caused by "Multicast usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450298: fltTcaEqptcapacityMcastEntry1hPerLast

Severity: variable

Explanation: This fault is caused by "Multicast usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450299: fltTcaEqptcapacityMcastEntry1dPerLast

Severity: variable

Explanation: This fault is caused by "Multicast usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450300: fltTcaEqptcapacityMcastEntry1wPerLast

Severity: variable

Explanation: This fault is caused by "Multicast usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450301: fltTcaEqptcapacityMcastEntry1moPerLast

Severity: variable

Explanation: This fault is caused by "Multicast usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450302: fltTcaEqptcapacityMcastEntry1qtrPerLast

Severity: variable

Explanation: This fault is caused by "Multicast usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450303: fltTcaEqptcapacityMcastEntry1yearPerLast

Severity: variable

Explanation: This fault is caused by "Multicast usage current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450304: fltTcaEqptcapacityMcastEntry5minPerMin

Severity: variable

Explanation: This fault is caused by "Multicast usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450305: fltTcaEqptcapacityMcastEntry15minPerMin

Severity: variable

Explanation: This fault is caused by "Multicast usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450306: fltTcaEqptcapacityMcastEntry1hPerMin

Severity: variable

Explanation: This fault is caused by "Multicast usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450307: fltTcaEqptcapacityMcastEntry1dPerMin

Severity: variable

Explanation: This fault is caused by "Multicast usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450308: fltTcaEqptcapacityMcastEntry1wPerMin

Severity: variable

Explanation: This fault is caused by "Multicast usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450309: fltTcaEqptcapacityMcastEntry1moPerMin

Severity: variable

Explanation: This fault is caused by "Multicast usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450310: fltTcaEqptcapacityMcastEntry1qtrPerMin

Severity: variable

Explanation: This fault is caused by "Multicast usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450311: fltTcaEqptcapacityMcastEntry1yearPerMin

Severity: variable

Explanation: This fault is caused by "Multicast usage minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450312: fltTcaEqptcapacityMcastEntry5minPerMax

Severity: variable

Explanation: This fault is caused by "Multicast usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450313: fltTcaEqptcapacityMcastEntry15minPerMax

Severity: variable

Explanation: This fault is caused by "Multicast usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450314: fltTcaEqptcapacityMcastEntry1hPerMax

Severity: variable

Explanation: This fault is caused by "Multicast usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450315: fltTcaEqptcapacityMcastEntry1dPerMax

Severity: variable

Explanation: This fault is caused by "Multicast usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450316: fltTcaEqptcapacityMcastEntry1wPerMax

Severity: variable

Explanation: This fault is caused by "Multicast usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450317: fltTcaEqptcapacityMcastEntry1moPerMax

Severity: variable

Explanation: This fault is caused by "Multicast usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450318: fltTcaEqptcapacityMcastEntry1qtrPerMax

Severity: variable

Explanation: This fault is caused by "Multicast usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450319: fltTcaEqptcapacityMcastEntry1yearPerMax

Severity: variable

Explanation: This fault is caused by "Multicast usage maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450320: fltTcaEqptcapacityMcastEntry5minPerAvg

Severity: variable

Explanation: This fault is caused by "Multicast usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450321: fltTcaEqptcapacityMcastEntry15minPerAvg

Severity: variable

Explanation: This fault is caused by "Multicast usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450322: fltTcaEqptcapacityMcastEntry1hPerAvg

Severity: variable

Explanation: This fault is caused by "Multicast usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450323: fltTcaEqptcapacityMcastEntry1dPerAvg

Severity: variable

Explanation: This fault is caused by "Multicast usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450324: fltTcaEqptcapacityMcastEntry1wPerAvg

Severity: variable

Explanation: This fault is caused by "Multicast usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450325: fltTcaEqptcapacityMcastEntry1moPerAvg

Severity: variable

Explanation: This fault is caused by "Multicast usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450326: fltTcaEqptcapacityMcastEntry1qtrPerAvg

Severity: variable

Explanation: This fault is caused by "Multicast usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450327: fltTcaEqptcapacityMcastEntry1yearPerAvg

Severity: variable

Explanation: This fault is caused by "Multicast usage average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450360: fltTcaEqptcapacityMcastEntry5minPerTr

Severity: variable

Explanation: This fault is caused by "Multicast usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450361: fltTcaEqptcapacityMcastEntry15minPerTr

Severity: variable

Explanation: This fault is caused by "Multicast usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450362: fltTcaEqptcapacityMcastEntry1hPerTr

Severity: variable

Explanation: This fault is caused by "Multicast usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450363: fltTcaEqptcapacityMcastEntry1dPerTr

Severity: variable

Explanation: This fault is caused by "Multicast usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450364: fltTcaEqptcapacityMcastEntry1wPerTr

Severity: variable

Explanation: This fault is caused by "Multicast usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450365: fltTcaEqptcapacityMcastEntry1moPerTr

Severity: variable

Explanation: This fault is caused by "Multicast usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450366: fltTcaEqptcapacityMcastEntry1qtrPerTr

Severity: variable

Explanation: This fault is caused by "Multicast usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F450367: fltTcaEqptcapacityMcastEntry1yearPerTr

Severity: variable

Explanation: This fault is caused by "Multicast usage trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Multicast usage" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452424: fltTcaCloudLBStats5minHTTPCode_ELB_5XX_CountLast

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452425: fltTcaCloudLBStats15minHTTPCode_ELB_5XX_CountLast

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452426: fltTcaCloudLBStats1hHTTPCode_ELB_5XX_CountLast

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452427: fltTcaCloudLBStats1dHTTPCode_ELB_5XX_CountLast

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452428: fltTcaCloudLBStats1wHTTPCode_ELB_5XX_CountLast

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452429: fltTcaCloudLBStats1moHTTPCode_ELB_5XX_CountLast

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452430: fltTcaCloudLBStats1qtrHTTPCode_ELB_5XX_CountLast

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452431: fltTcaCloudLBStats1yearHTTPCode_ELB_5XX_CountLast

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452440: fltTcaCloudLBStats5minHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452441: fltTcaCloudLBStats15minHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452442: fltTcaCloudLBStats1hHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452443: fltTcaCloudLBStats1dHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452444: fltTcaCloudLBStats1wHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452445: fltTcaCloudLBStats1moHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452446: fltTcaCloudLBStats1qtrHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452447: fltTcaCloudLBStats1yearHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452448: fltTcaCloudLBStats5minHTTPCode_ELB_5XX_CountPer

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452449: fltTcaCloudLBStats15minHTTPCode_ELB_5XX_CountPer

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452450: fltTcaCloudLBStats1hHTTPCode_ELB_5XX_CountPer

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452451: fltTcaCloudLBStats1dHTTPCode_ELB_5XX_CountPer

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452452: fltTcaCloudLBStats1wHTTPCode_ELB_5XX_CountPer

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452453: fltTcaCloudLBStats1moHTTPCode_ELB_5XX_CountPer

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452454: fltTcaCloudLBStats1qtrHTTPCode_ELB_5XX_CountPer

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452455: fltTcaCloudLBStats1yearHTTPCode_ELB_5XX_CountPer

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452456: fltTcaCloudLBStats5minHTTPCode_ELB_5XX_CountMin

Severity: variable

Explanation: This fault is caused by "Native LB HTTP 5XX error count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452457: fltTcaCloudLBStats15minHTTPCode_ELB_5XX_CountMin

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452458: fltTcaCloudLBStats1hHTTPCode_ELB_5XX_CountMin

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452459: fltTcaCloudLBStats1dHTTPCode_ELB_5XX_CountMin

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452460: fltTcaCloudLBStats1wHTTPCode_ELB_5XX_CountMin

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452461: fltTcaCloudLBStats1moHTTPCode_ELB_5XX_CountMin

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452462: fltTcaCloudLBStats1qtrHTTPCode_ELB_5XX_CountMin

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452463: fltTcaCloudLBStats1yearHTTPCode_ELB_5XX_CountMin

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452464: fltTcaCloudLBStats5minHTTPCode_ELB_5XX_CountMax

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452465: fltTcaCloudLBStats15minHTTPCode_ELB_5XX_CountMax

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452466: fltTcaCloudLBStats1hHTTPCode_ELB_5XX_CountMax

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452467: fltTcaCloudLBStats1dHTTPCode_ELB_5XX_CountMax

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452468: fltTcaCloudLBStats1wHTTPCode_ELB_5XX_CountMax

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452469: fltTcaCloudLBStats1moHTTPCode_ELB_5XX_CountMax

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452470: fltTcaCloudLBStats1qtrHTTPCode_ELB_5XX_CountMax

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452471: fltTcaCloudLBStats1yearHTTPCode_ELB_5XX_CountMax

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452472: fltTcaCloudLBStats5minHTTPCode_ELB_5XX_CountAvg

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452473: fltTcaCloudLBStats15minHTTPCode_ELB_5XX_CountAvg

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452474: fltTcaCloudLBStats1hHTTPCode_ELB_5XX_CountAvg

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452475: fltTcaCloudLBStats1dHTTPCode_ELB_5XX_CountAvg

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452476: fltTcaCloudLBStats1wHTTPCode_ELB_5XX_CountAvg

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452477: fltTcaCloudLBStats1moHTTPCode_ELB_5XX_CountAvg

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452478: fltTcaCloudLBStats1qtrHTTPCode_ELB_5XX_CountAvg

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452479: fltTcaCloudLBStats1yearHTTPCode_ELB_5XX_CountAvg

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452504: fltTcaCloudLBStats5minHTTPCode_ELB_5XX_CountTr

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452505: fltTcaCloudLBStats15minHTTPCode_ELB_5XX_CountTr

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452506: fltTcaCloudLBStats1hHTTPCode_ELB_5XX_CountTr

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452507: fltTcaCloudLBStats1dHTTPCode_ELB_5XX_CountTr

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452508: fltTcaCloudLBStats1wHTTPCode_ELB_5XX_CountTr

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452509: fltTcaCloudLBStats1moHTTPCode_ELB_5XX_CountTr

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452510: fltTcaCloudLBStats1qtrHTTPCode_ELB_5XX_CountTr

Severity: variable

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452512: fltTcaCloudLBStats5minHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452513: fltTcaCloudLBStats15minHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452514: fltTcaCloudLBStats1hHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452515: fltTcaCloudLBStats1dHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452516: fltTcaCloudLBStats1wHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452517: fltTcaCloudLBStats1moHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452518: fltTcaCloudLBStats1qtrHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452519: fltTcaCloudLBStats1yearHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452592: fltTcaCloudLBStatsAg5minHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452593: fltTcaCloudLBStatsAg15minHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452594: fltTcaCloudLBStatsAg1hHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452595: fltTcaCloudLBStatsAg1dHTTPCode_ELB_5XX_CountCum

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452596: fltTcaCloudLBStatsAg1wHTTPCode_ELB_5XX_CountCum

F452644: fltTcaCloudLBStatsAg1wHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452645: fltTcaCloudLBStatsAg1moHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452646: fltTcaCloudLBStatsAg1qtrHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452647: fltTcaCloudLBStatsAg1yearHTTPCode_ELB_5XX_CountRate

Severity: variable

Explanation: This fault is caused by "Native LB HTPP 5XX error count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Native LB HTPP 5XX error count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452696: fltTcaCloudLBStats5minRejectedConnectionCountLast

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452697: fltTcaCloudLBStats15minRejectedConnectionCountLast

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452698: fltTcaCloudLBStats1hRejectedConnectionCountLast

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452699: fltTcaCloudLBStats1dRejectedConnectionCountLast

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452700: fltTcaCloudLBStats1wRejectedConnectionCountLast

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452701: fltTcaCloudLBStats1moRejectedConnectionCountLast

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452702: fltTcaCloudLBStats1qtrRejectedConnectionCountLast

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452703: fltTcaCloudLBStats1yearRejectedConnectionCountLast

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count current value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452712: fltTcaCloudLBStats5minRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452713: fltTcaCloudLBStats15minRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452714: fltTcaCloudLBStats1hRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452715: fltTcaCloudLBStats1dRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452716: fltTcaCloudLBStats1wRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452717: fltTcaCloudLBStats1moRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452718: fltTcaCloudLBStats1qtrRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452719: fltTcaCloudLBStats1yearRejectedConnectionCountCum

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count cumulative" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452720: fltTcaCloudLBStats5minRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452721: fltTcaCloudLBStats15minRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452722: fltTcaCloudLBStats1hRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452723: fltTcaCloudLBStats1dRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452724: fltTcaCloudLBStats1wRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452725: fltTcaCloudLBStats1moRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452726: fltTcaCloudLBStats1qtrRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452727: fltTcaCloudLBStats1yearRejectedConnectionCountPer

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count periodic" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452728: fltTcaCloudLBStats5minRejectedConnectionCountMin

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452729: fltTcaCloudLBStats15minRejectedConnectionCountMin

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452730: fltTcaCloudLBStats1hRejectedConnectionCountMin

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452731: fltTcaCloudLBStats1dRejectedConnectionCountMin

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452732: fltTcaCloudLBStats1wRejectedConnectionCountMin

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452733: fltTcaCloudLBStats1moRejectedConnectionCountMin

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452734: fltTcaCloudLBStats1qtrRejectedConnectionCountMin

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452735: fltTcaCloudLBStats1yearRejectedConnectionCountMin

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count minimum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452736: fltTcaCloudLBStats5minRejectedConnectionCountMax

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452737: fltTcaCloudLBStats15minRejectedConnectionCountMax

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452738: fltTcaCloudLBStats1hRejectedConnectionCountMax

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452739: fltTcaCloudLBStats1dRejectedConnectionCountMax

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452740: fltTcaCloudLBStats1wRejectedConnectionCountMax

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452741: fltTcaCloudLBStats1moRejectedConnectionCountMax

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452742: fltTcaCloudLBStats1qtrRejectedConnectionCountMax

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452743: fltTcaCloudLBStats1yearRejectedConnectionCountMax

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count maximum value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452744: fltTcaCloudLBStats5minRejectedConnectionCountAvg

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452745: fltTcaCloudLBStats15minRejectedConnectionCountAvg

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452746: fltTcaCloudLBStats1hRejectedConnectionCountAvg

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452747: fltTcaCloudLBStats1dRejectedConnectionCountAvg

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452748: fltTcaCloudLBStats1wRejectedConnectionCountAvg

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452749: fltTcaCloudLBStats1moRejectedConnectionCountAvg

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452750: fltTcaCloudLBStats1qtrRejectedConnectionCountAvg

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452751: fltTcaCloudLBStats1yearRejectedConnectionCountAvg

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count average value" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452776: fltTcaCloudLBStats5minRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452777: fltTcaCloudLBStats15minRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452778: fltTcaCloudLBStats1hRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452779: fltTcaCloudLBStats1dRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452780: fltTcaCloudLBStats1wRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452781: fltTcaCloudLBStats1moRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452782: fltTcaCloudLBStats1qtrRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452783: fltTcaCloudLBStats1yearRejectedConnectionCountTr

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count trend" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452784: fltTcaCloudLBStats5minRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452785: fltTcaCloudLBStats15minRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452786: fltTcaCloudLBStats1hRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.

Recommended Action: Check the values of "Nantive LB rejected requests count" statistical counter and either correct the conditions that cause the counter values to cross certain threshold levels, or adjust the threshold values in monitoring policies.

F452787: fltTcaCloudLBStats1dRejectedConnectionCountRate

Severity: variable

Explanation: This fault is caused by "Nantive LB rejected requests count rate" statistical property crossing threshold level.
