

New and Changed Information

This document provides release-specific information for each new and changed feature in Cisco Data Mobility Manager.

The *Cisco MDS 9000 Family Data Mobility Manager Configuration Guide* applies to Cisco NX-OS Release 4.2(1), but includes all features in Cisco SAN-OS releases. If you are running Cisco SAN-OS 3.x or lower software on an MDS switch, refer to the *Cisco MDS 9000 Family Data Mobility Manager Configuration Guide* for the release train that applies to the release on your switch.

Note

As of NX-OS Release 4.1(1b), SAN-OS has been changed to NX-OS. References to SAN-OS releases before 4.1(1b) still apply.

To check for additional information about this release, refer to the *Cisco MDS 9000 Family Release Notes for Cisco MDS NX-OS Releases* available at the following Cisco Systems website:

http://www.cisco.com/en/US/products/ps5989/prod_release_notes_list.html

Table 1 summarizes the new and changed features as described in the *Cisco MDS 9000 Family Data Mobility Manager Configuration Guide*, and tells you where they are documented. The table includes a brief description of each new feature and the release in which the change occurred.

Table 1 **New and Changed Features for Cisco Data Mobility Manager**

Feature	GUI Change	Description	Changed in Release	Where Documented
Storage-based Method 3	Screenshots added for storage-based Method 3.	After creating a job, the DMM wizard checks if conditions are met before proceeding to the next step.	4.2(1)	Chapter 5, “Using the DMM GUI for Data Migration”
Method 3	New option in the DMM configuration wizard for creating a job.	Allows you to choose the method to perform a data migration job.	4.1(3)	Chapter 5, “Using the DMM GUI for Data Migration”
Method 3 Topology	New topology for DMM method 3.	Describes the DMM method 3 topology in detail. Added three configurations — single-fabric, two-fabric and three-fabric	4.1(3) 4.2(1)	Chapter 3, “Understanding DMM SAN Topologies”
