

## Preface

---

This preface describes the audience, organization, and conventions of the *Cisco Fabric Manager System Management Configuration Guide*. It also provides information on how to obtain related documentation.

## Audience

This guide is for experienced network administrators who are responsible for configuring and maintaining the Cisco MDS 9000 Family of multilayer directors and fabric switches.

## Organization

This guide is organized as follows:

Chapter	Title	Description
Chapter 1	<a href="#">System Management Overview</a>	Provides an overview of the system management features to monitor and manage a switch using the CLI.
Chapter 2	<a href="#">Using the CFS Infrastructure</a>	Explains the use of the Cisco Fabric Services (CFS) infrastructure to enable efficient database distribution.
Chapter 3	<a href="#">Configuring System Message Logging</a>	Describes how system message logging is configured and displayed.
Chapter 4	<a href="#">Configuring Call Home</a>	Provides details on the Call Home service and includes information on Call Home, event triggers, contact information, destination profiles, and e-mail options.
Chapter 5	<a href="#">Scheduling Maintenance Jobs</a>	Describes the Cisco MDS command scheduler feature that helps you schedule configuration and maintenance jobs in any switch in the Cisco MDS 9000 Family.
Chapter 6	<a href="#">Monitoring System Processes and Logs</a>	Provides information on displaying system processes and status. It also provides information on configuring core and log files, HA policy, heartbeat and watchdog checks, and upgrade resets.

***Send documentation comments to [fm-docfeedback@cisco.com](mailto:fm-docfeedback@cisco.com)***

Chapter	Title	Description
Chapter 8	Configuring RMON	Provides details on using RMONs to configure alarms and events.
Chapter 9	Configuring SNMP	Provides details on how you can use SNMP to modify a role that was created using CLI.
Chapter 10	Configuring Domain Parameters	Explains the Fibre Channel domain (fcdomain) feature, which includes principal switch selection, domain ID distribution, FC ID allocation, and fabric reconfiguration functions.
Chapter 11	Monitoring Network Traffic Using SPAN	Describes the Switched Port Analyzer (SPAN), SPAN sources, filters, SPAN sessions, SD port characteristics, and configuration details.
Chapter 12	Configuring Fabric Configuration Server	Describes how the fabric configuration server (FCS) feature is configured and displayed.

## Document Conventions

Command descriptions use these conventions:

<b>boldface font</b>	Commands and keywords are in boldface.
<i>italic font</i>	Arguments for which you supply values are in italics.
[ ]	Elements in square brackets are optional.
[ x   y   z ]	Optional alternative keywords are grouped in brackets and separated by vertical bars.

Screen examples use these conventions:

screen font	Terminal sessions and information the switch displays are in screen font.
<b>boldface screen font</b>	Information you must enter is in boldface screen font.
<i>italic screen font</i>	Arguments for which you supply values are in italic screen font.
< >	Nonprinting characters, such as passwords, are in angle brackets.
[ ]	Default responses to system prompts are in square brackets.
!, #	An exclamation point (!) or a pound sign (#) at the beginning of a line of code indicates a comment line.

This document uses the following conventions:

### Note

Means reader *take note*. Notes contain helpful suggestions or references to material not covered in the manual.

***Send documentation comments to [fm-docfeedback@cisco.com](mailto:fm-docfeedback@cisco.com)***

**Caution**

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

## Related Documentation

The documentation set for the Cisco MDS 9000 Family includes the following documents. To find a document online, use the Cisco MDS NX-OS Documentation Locator at:
