

Cisco Nexus 1000V and Microsoft Hyper-V Compatibility Information, Release 5.2(1)SM3(1.1a)

First Published: June 8, 2015

This document provides the following Microsoft compatibility information for the Cisco Nexus 1000V:

- [Information About Upgrading and Software Compatibility, page 1](#)
- [Information About Server Compatibility, page 1](#)
- [Cisco Nexus 1000V Software Release Compatibility, page 2](#)
- [Identifying the Build Number on Your Host Server, page 2](#)
- [Related Documentation, page 3](#)
- [Obtaining Documentation and Submitting a Service Request, page 3](#)

Information About Upgrading and Software Compatibility

For information about upgrading the Cisco Network Service Provider (Cisco VSEM), see the *Cisco Nexus 1000V for Microsoft Hyper-V Release Notes, Release 5.2(1)SM3(1.1a)*. For information about upgrading other components, see the *Cisco Nexus 1000V for Microsoft Hyper-V Installation and Upgrade Guide, Release 5.2(1)SM3(1.1)*.

Information About Server Compatibility

The servers running the Cisco Nexus 1000V Virtual Supervisor Module (VSM) and Virtual Ethernet Module (VEM) must be in the Windows server catalog. For information on the Windows server catalog, see <http://windowsservercatalog.com/>.

The Cisco Nexus 1000V is compatible with any upstream physical access layer switch that is Ethernet-standard compliant, including Catalyst 6500 series switches, Cisco Nexus switches, and switches from other network vendors.

Cisco Nexus 1000V Software Release Compatibility

Table 1 shows the software compatibility for the Cisco Nexus 1000V Release 5.2(1)SM3(1.1a) that is supported by Microsoft System Center Virtual Machine Manager (SCVMM) releases.

Table 1 *Microsoft Hyper-V and Cisco Nexus 1000V Software Compatibility for Release 5.2(1)SM3(1.1a)*

| Windows Server Versions | Cisco Nexus 1000V Release | | | | | |
|--|---------------------------|----------------|-----------------|-----------------|----------------|----------------|
| | 5.2(1)SM3(1.1a) | 5.2(1)SM3(1.1) | 5.2(1)SM1(5.2b) | 5.2(1)SM1(5.2a) | 5.2(1)SM1(5.2) | 5.2(1)SM1(5.1) |
| SCVMM 2012 SP1 UR3 (3.1.6027.0) and later | | | | | | |
| Windows Server 2012 (build 9200) | Unsupported | Unsupported | Compatible | Compatible | Compatible | Compatible |
| SCVMM 2012 R2 (3.2.7510.0) and later | | | | | | |
| Windows Server 2012 (build 9200) | Unsupported | Unsupported | Compatible | Compatible | Compatible | Unsupported |
| SCVMM 2012 R2 (3.2.7510.0) and later | | | | | | |
| Windows Server 2012 R2 (build 9600) | Unsupported | Unsupported | Compatible | Compatible | Compatible | Unsupported |
| SCVMM 2012 R2 (3.2.7768.0) and later | | | | | | |
| Windows Server 2012 R2 (build 9600) | Compatible | Compatible | Compatible | Compatible | Compatible | Unsupported |

Identifying the Build Number on Your Host Server

This section includes the following topics:

- [Identifying the Version Number for SCVMM, page 2](#)
- [Identifying the Windows Server Operating System Version, page 3](#)

Identifying the Version Number for SCVMM

To obtain the version number for SCVMM, perform the following steps:

-
- Step 1** Open the SCVMM R2 console.
 - Step 2** On the top-left ribbon menu, click **About**.
 - Step 3** The version number is displayed in the following format: *3.2.7768.0*.
 - Step 4** (Optional) Click the PowerShell icon and enter the **(Get-SCVMMServer -ComputerName scvmm_server_name).ProductVersion** command in the PowerShell window.
-

Identifying the Windows Server Operating System Version

To obtain the version of the Windows server operating system, open a command prompt on a Windows host and enter the **winver** command.

The output displays the name and build number of the Windows server operating system.
