New and Changed Information

This chapter provides release-specific information for each new and changed feature in the Cisco Nexus 3000 Switch NX-OS Unicast Routing Configuration Guide, Release 9.2(x). The latest version of this document is available at the following Cisco website:

http://www.cisco.com/c/en/us/support/switches/nexus-3000-series-switches/products-installation-and-configuration-guides-list.html

To check for additional information, see the Cisco Nexus 3000 Switch NX-OS Release Notes, Release 9.2(x) available at the following Cisco website:

http://www.cisco.com/c/en/us/support/switches/nexus-3000-series-switches/products-release-notes-list.html

New and Changed Information

The following table provides an overview of the significant changes made to this configuration guide. The table does not provide an exhaustive list of all changes to this guide or all new features in a particular release.

Table 1: New and Changed Features Information

Feature	Description	Changed in Release	Where Documented
	Changed the document title from 9.x to 9.2(x)		Title page
BGP best-path algorithm	Added the option to ignore the Interior Gateway Protocol (IGP) metric for next hop during best-path selection.	9.2(2)	Tuning BGP
Unicast routing	No updates since Cisco NX-OS Release 7.x	9.2(1)
