About Streaming Telemetry

The streaming telemetry feature of the Cisco Nexus 3000 and 9000 switches continuously streams data out of the network and notifies the client, providing near-real-time access to monitoring data.

Guidelines and Limitations

Following are the guideline and limitations for streaming telemetry:

- The telemetry feature is available in Cisco Nexus 3000 and 9000 switches.
- Switches with less than 8 GB of memory do not support telemetry. The Cisco Nexus 3500-XL has 16 GB of memory and therefore supports telemetry.

Data Available for Telemetry

For each component group, the distinguished names (DNs) in the appendix of the [NX-API DME Model Reference](#) can provide the listed properties as data for telemetry.
