- [Open Caveats, on page 3](#)

Caveats

Caveats describe unexpected behavior in a product. The Open Caveats section lists open caveats that apply to the current release and may apply to previous releases. A caveat that is open for a prior release and is still unresolved applies to all future releases until it is resolved.

To view the details of the software bugs pertaining to your product, perform the following task:

- Click the Caveat ID/Bug ID number in the table.

The corresponding **Bug Search Tool** window is displayed with details of the Caveat ID/Bug ID.

The Bug Search Tool (BST), which is the online successor to the Bug Toolkit, is designed to improve the effectiveness in network risk management and device troubleshooting. The BST allows partners and customers to search for software bugs based on product, release, and keyword, and aggregates key data, such as bug details, product, and version. The tool has a provision to filter bugs based on credentials to provide external and internal bug views for the search input.

To view the details of a caveat whose ID you do not have, perform the following procedure:

1. Access the BST using your Cisco user ID and password at:
<https://tools.cisco.com/bugsearch/>
2. In the **Bug Search** window that is displayed, enter the necessary information in the corresponding fields.

For more information about how to use the Cisco Bug Search Tool effectively, including how to set email alerts for bugs and to save bugs and searches, see [Bug Search Tool Help & FAQ](#).

This chapter lists the Open and Resolved Caveats in Cisco DCNM, and contains the following section:

Resolved Caveats

The following table lists the Resolved bugs for Cisco DCNM, Release 11.1(1).

Caveat ID Number	Description
CSCvk11305	LAN Fabric: Fail to change channel mode if po has > 1 member
CSCvm05536	LAN Fabric: BGP neighbors not detected on leaf switches after NXOS image upgrade
CSCvm62784	DCNM SAN Client gets timeout error when enabling FC-SP on ISLs between 2 9700s
CSCvn52673	LAN Fabric: After Brownfield migration, Refresh L2 / L3 migrated networks does not seem to work
CSCvn58071	LAN Fabric: TRM Flooding occurs in fabric resulting from missing BGP peers between BorderSpine nodes
CSCvn64425	LAN Fabric: No diff if name-server is changed from default vrf to management vrf
CSCvn68148	when we delete and add Vcenter too quick , VMM app is not running
CSCvn68243	LAN Fabric: vPC entry created with trunk_host policy should be deletable
CSCvn72577	LAN Fabric: Restore backup do not remove all freeform configs
CSCvn73214	No operational heat-map table visible after inline upgrade. (Aragon to Aragon MR S21)
CSCvn86194	Limit in UCS FI switch dashboard blades tab
CSCvn60045	LAN Fabric: MSD tabular view should not allow update device credentials and rediscover switch
CSCvn69463	LAN Fabric: Attach pop-up UI issue on changing VRF tabs
CSCvn70067	LAN Fabric: Failed to Load Topology error if pop-up is closed during import in External fabric
CSCvo92748	Openwsman process_connection() Remote Denial of Service Vulnerability
CSCvi25521	DCNM: Getting Java.lang.NullPointerException error from multiple places.
CSCvo62346	Out of order cli for interface speed command
CSCvo77421	Special handling for Nxapi http port 80 upgrade from nxos.7.0.3.17.5a - > 7.0.3.17.6
CSCvo79435	brownfield: deploy failed with \"command running on the device beyond timeout period\"
CSCvo99226	Cannot login in DCNM GUI when connecting with IPv6 address.
CSCvp07873	Caveats when adding device via bootstrap with AAA authentication
CSCvp75809	Seen TCAM config missing after ascii replay while write-erase/reload on T2 N9504

Open Caveats

The following table lists the Open bugs for Cisco DCNM, Release 11.1(1).

Caveat	Description
CSCvk03946	Auto-populated dot1q release does not happen if it is edited with used value and cancelled
CSCvk11305	Fail to change channel mode if po has > 1 member
CSCvk19306	LAN Fabric: FEX will show up in fabric builder topology even if cleaned up
CSCvk21156	Scale: Outlier detection gets stuck in loading the scatter plot. Needs multiple waits to load data.
CSCvk22938	Elasticsearch-database: Spike in IOPS at midnight
CSCvk31375	LAN Fabric: unreachable switch will be shown as in sync during deploy
CSCvm05536	BGP neighbors not detected on leaf switches after NXOS image upgrade
CSCvm62784	Cisco DCNM SAN Client gets timeout error when enabling FC-SP on ISLs between two Cisco MDS 9700 series switches.
CSCvm90923	Configure: Display warning upon configuring different query types on switches in the same fabric
CSCvn24439	FEX GUI remains in the topology and associated HIF ports info dangling in the link page after deletion
CSCvn36807	Unable to import switch via bootstrap due to inadvertent assignment of ip address
CSCvn52673	After NFM migration, Refresh L2 / L3 migrated networks does not seem to work
CSCvn55041	BROWNFIELD:Spine switches get out of migration mode with some diff after Save&Deploy
CSCvn58071	TRM: Flooding occurs in fabric resulting from missing BGP peers between BorderSpine nodes
CSCvn60044	ES-DB: ECT is non-zero when IOPS metric is zero
CSCvn60045	LAN Fabric: MSD tabular view should not allow update device credentials and rediscover switch
CSCvn64425	No diff if name-server is changed from default vrf to management vrf
CSCvn68148	When you delete and add vCenter too quick, VMM app is not running
CSCvn68243	vPC entry created with trunk_host policy should be deletable
CSCvn69463	LAN Fabric: Attach pop-up UI issue on changing VRF tabs

Caveat	Description
CSCvn69775	Failed to fetch running config after re-adding switch back into the fabric
CSCvn70067	Failed to Load Topology error if the Add Switch pop-up is closed during the switch import in External fabric
CSCvn71460	LAN Fabric: Attach/unattach of network and deploy without preview puts the network in pending state
CSCvn72577	Restore backup does not remove all freeform configurations
CSCvn73161	When you click on the topology page, popup window appears 2 times.
CSCvn73214	No operational heat-map table visible after inline upgrade. (DCNM 11.0(1) to DCNM 11.1(1))
CSCvn73354	LAN Fabric: delete switch from fabric prior to upgrade from 10.4(2) could result in topdown failures
CSCvn86194	Cisco DCNM Web Client does not show any blades in the switch dashboard blades tab if Cisco UCS has more than 16 blades.
CSCvn95975	LAN Fabric: Brownfield: Save and Deploy gets stuck when fabric has multiple of 10 devices
CSCvp15046	After you migrate an NFM-managed VXLAN fabric to DCNM, if you perform a write erase and a reload operation, then the SNMP user may be deleted. To address this issue, manually create the SNMP user.
CSCvq03395	Real time job failing for default vrf for group level jobs
CSCvq08970	Unable to modify the repeat interval for created archive jobs
CSCvq61767	\ is getting replaced by " and \ is getting removed during template save
CSCvt42395	DCNM 11.3.1 and earlier version extremely slow with Chrome version 80 and above.
