

## APPENDIX **B**

# Configuration Limits for Cisco NX-OS Interfaces

---

The features supported by Cisco NX-OS have maximum configuration limits. For some of the features, we have verified configurations that support limits less than the maximum. [Table B-1](#) lists the Cisco verified limits and maximum limits for switches running Cisco Nexus 7000 Series NX-OS Release 4.1.

**Table B-1** Cisco NX-OS Release 4.1 Configuration Limits

Feature	Maximum Limit
VLANs per VDC	4000
Port channels per device	192
vPCs per device	192 Beginning with Release 4.1(4)
