

## **Registering Devices With the Cisco Prime NSC**

This chapter contains the following sections:

- Registering a Cisco VSG, page 1
- Registering a Cisco Nexus 1000V VSM, page 2
- Registering vCenter, page 3

## **Registering a Cisco VSG**

I

You can register a Cisco VSG with the Cisco PNSC. Registration enables communication between the Cisco VSG and the Cisco PNSC.

Step 1	Copy the nsc-vsgpa.2.1.3i.bin file into the Cisco VSG bootflash: vsg# copy ftp://guest@172.18.217.188/nlkv/nsc-vsgpa.2.1.3i.bin bootflash
Step 2	On the command line, enter configuration mode. vsg# configure
Step 3	Enter the config-nsc-policy-agent mode. vsg (config) # nsc-policy-agent
Step 4	Set the Cisco PNSC registration IP address. vsg (config-nsc-policy-agent)# registration-ip 209.165.200.225
Step 5	<pre>Specify the shared-secret of Cisco PNSC. vsg (config-nsc-policy-agent)# shared-secret *******</pre>
Step 6	Install the policy agent. vsg (config-nsc-policy-agent)# policy-agent-image bootflash: nsc-vsgpa.2.1.3i.bin
Step 7	Exit all modes. vsg (config-nsc-policy-agent)# end
Step 8	On the Cisco VSG command line, enter the <b>show nsc-pa status</b> command: vsg# <b>show nsc-pa status</b> If registration was successful, you should see the following message:

"NSC Policy-Agent status is - Installed Successfully. Version 2.1(3i)-vsg"
The Cisco VSG registration is complete.
Step 9 Save the change persistently through reboots and restarts by copying the running configuration to the startup configuration:
vsg# copy running-config startup-config
Executing this command ensures that the registration becomes part of the basic configuration

### **Registering a Cisco Nexus 1000V VSM**

You can register a Cisco Nexus 1000V with the Cisco PNSC. Registration enables communication between the Cisco Nexus 1000V VSM and Cisco PNSC.

Step 1	Copy the vsmcpa.3.2.3a.bin file into the VSM bootflash: vsm# copy ftp://guest@172.18.217.188/n1kv/vsmcpa.3.2.3a.bin bootflash:
Step 2	On the command line, enter configuration mode. vsm# configure
Step 3	Enter config-nsc-policy-agent mode. vsm(config)# nsc-policy-agent
Step 4	Set the Cisco PNSC registration IP address. vsm(config-nsc-policy-agent)# registration-ip 209.165.200.226
Step 5	Specify the shared-secret of Cisco PNSC. vsm(config-nsc-policy-agent)# <b>shared-secret</b> ********
Step 6	Install the policy agent. vsm(config-nsc-policy-agent)# <b>policy-agent-image bootflash:vsmcpa.3.2.3a.bin</b>
Step 7	Exit all modes. vsm(config-nsc-policy-agent)# <b>top</b>
Step 8	On the command line, enter the following command: vsm# show nsc-pa status If registration was successful, you should see the following message: nsc Policy-Agent status is - Installed Successfully. Version 3.2(3a)-vsm The Cisco Nexus 1000V VSM registration is complete.
Step 9	On the command line, enter the following command: vsm# copy running-config startup-config Executing this command ensures that the registration becomes part of the basic configuration.

#### What to Do Next

See the *Cisco Prime Network Services Controller CLI Configuration Guide* for detailed information about configuring the Cisco PNSC using the CLI.

# **Registering vCenter**

I

Step 1	Log into Cisco PNSC.
Step 2	Choose Resource Management > VM Managers.
Step 3	In the Navigation pane, right-click VM Managers.
Step 4	Choose Export vCenter Extension.
Step 5	In the dialog box that appears, choose the appropriate extension, and click Save.
Step 6	Log into vSphere.
Step 7	In your vSphere client, log into vCenter.
Step 8	Choose Plug-ins > Manage Plug-ins.
Step 9	Right-click the empty space and click New Plug-in.
Step 10	Browse to the Cisco PNSC vCenter extension file, and then click Register Plug-in.
Step 11	Click <b>Ignore</b> for any security warning. You should see a message that reports a successful registration.
Step 12	Log into the Cisco PNSC and choose <b>Resource Management</b> > <b>VM Managers</b> .
Step 13	In the Navigation pane, right-click VM Managers.
Step 14	Click Add VM Manager.
Step 15	<ul> <li>Enter the vCenter name and IP address information and click OK.</li> <li>Note The Successful Addition State field should display the word Enabled, and the Operational State field should display the version information.</li> <li>vCenter is registered.</li> </ul>
