

Supported MIBs

This appendix lists the supported management information base (MIBs) for this release on the Catalyst 2960 and 2960-S switches. It contains these sections:

- [MIB List, page 1-1](#)
- [Using FTP to Access the MIB Files, page 1-4](#)

Note

Stacking is supported only on Catalyst 2960-S switches running the LAN base image.

MIB List

- BRIDGE-MIB

Note

The BRIDGE-MIB supports the context of a single VLAN. By default, SNMP messages using the configured community string always provide information for VLAN 1. To obtain the BRIDGE-MIB information for other VLANs, for example VLAN x, use this community string in the SNMP message: configured community string @x.
