ap dot11 media-stream multicast-direct

To configure multicast-direct for 2.4-GHz/5-GHz band, use the **ap dot11 media-stream multicast-direct** command.

ap dot11 {24ghz | 5ghz} media-stream {multicast-direct {admission-besteffort | client-maximum value | radio-maximum value} | video-redirect}

multicast-direct admission-besteffort	Configure multicast-direct for 802.11 band Admits media stream to best-effort queue.		
admission-besteffort	Admits media stream to best-effort queue.		
	1		
client-maximum value	<i>ue</i> Specifies the maximum number of streams allowed on a client.		
radio-maximum value	<i>e</i> Specifies the maximum number of streams allowed on a 2.4-GHz or a 5-GHz band.		
video-redirect	Redirect non Multicast-direct video to BestEffort queue over the air.		
None			
config			
Release	Modification		
Cisco IOS XE 3.2SE	This command was introduced.		
	video-redirect None config Release		

Command History	Release	Modification
	7.6	This command was introduced in a release earlier than Release 7.6.
Usage Guidelines	Before you con network is none	figure the media stream multicast-direct parameters on a 802.11 network, ensure that the operational.
	Examples	
	The following	example shows how to configure multicast-direct for the 2.4-GHz band.
	Enter configu	oller) >Device#configure terminal aration commands, one per line. End with CNTL/Z. g)# ap dot11 24ghz media-stream multicast-direct
	Related Topics wireless m	nedia-stream multicast-direct, on page 4
show ap (dot11	
-	To display 802	11 band parameters use the show an dot11 command

To display 802.11 band parameters, use the **show ap dot11** command.

	Cisco IOS XE	3.2SE	This command was introduced.
Command History	Release	Modification	
	7.6	This command was introduced	in a release earlier than Release 7.6.
Usage Guidelines		nulticast-direct requires load based Cal needs to be set to either gold or platinur	l Admission Control (CAC) to run. WLAN quality of n.

Examples

The following example shows how to configure multicast-direct for a wireless LAN media stream.

```
Device#configure terminal
Enter configuration commands, one per line. End with CNTL/Z.
Device(config)#wireless media-stream multicast-direct
```

wireless media-stream

To configure various parameters, use the wireless media-stream command.

wireless media-stream group groupName [startipAddr endipAddr]

wireless media-stream group{ avg-packet-size default exit max-bandwidth no
policy qos}

wireless media-stream {multicast-direct | message [{phone phone | URL URL | Notes Notes | Email Email}]}

Syntax Description group Name		Configure multicast-direct status for a group.	
	startipAddr	Specifies the start IP Address for the group.	
	endipAddr	Specifies the End IP Address for the group.	

	group avg-packet-size	Configure average packet size.	
	group default	Set a command to its defaults.	
	group exit	Exit sub-mode.	
	group max-bandwidth	Configure maximum expected stream bandwidt	h in Kbps.
	group no	Negate a command or set its defaults.	
	group policy	Configure media stream admission policy.	
	group qos	Configure over the air QoS class, <'video'> ON	LY.
	multicast-direct	Configure multicast-direct status.	
	message	Configure Session Announcement Message.	
	phone phone	Configure Session Announcement Phone numb	er.
	URL URL	Configure Session Announcement URL.	
	Notes Notes	Configure Session Announcement notes.	
	Email Email	Configure Session Announcement Email.	
Command Default	Disabled		
Command Modes	config		
Command History	Release	Μ	lodification
	Cisco IOS XE 3.2SE	Т	his command was introduced.
Command History		odification	
	7.6 Th	nis command was introduced in a release earlier th	an Release 7.6.
Usage Guidelines	Media-stream multicast-	direct requires load-based Call Admission Control	(CAC) to run.
	Examples		
	-	hows how to configure each modio stream and its	noromotora liko ovnostad

The following example shows how to configure each media stream and its parameters like expected multicast destination addresses, stream bandwidth consumption and stream priority parameters.

Device#configure terminal Enter configuration commands, one per line. End with CNTL/Z. Device(config)#wireless media-stream group GROUP1 231.1.1.1 231.1.1.10
