Release Notes for Cisco Catalyst 3850 Series Switches, Cisco IOS XE Everest 16.5.1a

First Published: May 31, 2017

This release note gives an overview of the features for the Cisco IOS XE Everest 16.5.1a software on the Cisco Catalyst 3850 Series Switches.

Unless otherwise noted, the terms switch and device refer to a standalone switch and to a switch stack.

Note
- For information about unsupported features, see Important Notes, page 4.
- For information about software and hardware restrictions and limitations, see Limitations and Restrictions, page 47.
- For information about open issues with the software and past opens that are resolved now, see Caveats, page 49.

Introduction

Cisco Catalyst 3850 Series Switches are the next generation of enterprise class stackable access layer switches, with the new and improved 480-Gbps StackWise-480 and Cisco StackPower. Security and application visibility and control are natively built into the switch.

Cisco Catalyst 3850 Series Switches also support full IEEE 802.3 at Power over Ethernet Plus (PoE+), modular and field replaceable network modules, redundant fans, and power supplies. Cisco Catalyst 3850 Series Switches enhance productivity by enabling applications such as IP telephony and video for a true borderless network experience.

Cisco IOS XE, Cisco IOS XE Denali 16.x.x, and now Cisco IOS XE Everest 16.x.x, represent the continuing evolution of the preeminent Cisco IOS operating system. The Cisco IOS XE architecture and well-defined set of APIs extend the Cisco IOS software to improve portability across platforms and extensibility outside the Cisco IOS environment. The Cisco IOS XE software retains the same look and feel of the Cisco IOS software, while providing enhanced future-proofing and improved functionality.
# Whats New in Cisco IOS XE Everest 16.5.1a

## Software Features in Cisco IOS XE Everest 16.5.1a

<table>
<thead>
<tr>
<th>Feature Name</th>
<th>Description and License Level Information</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>New in Wired Switching</strong></td>
<td></td>
</tr>
<tr>
<td>Cisco TrustSec: SxPv4 in LAN Base</td>
<td>Introduces support for Cisco TrustSec on LAN Base licenses. See SGT Exchange Protocol over TCP (SXP) (LAN Base, IP Base, and IP Services)</td>
</tr>
<tr>
<td>Easy QoS: match-all attributes</td>
<td>QoS group-based classification supports the match-all filter in class-maps for identifying data packets. See Configuring QoS (LAN Base, IP Base, and IP Services)</td>
</tr>
<tr>
<td>Flexible Netflow (FNF): IPv4 and IPv6 flow-monitor on the same interface</td>
<td>Enables you to associate multiple monitors of different traffic types, to an interface in the same direction. See Configuring Flexible NetFlow (Apply a Flow to an Interface) (IP Base and IP Services)</td>
</tr>
<tr>
<td>Multi-Gig (mGig) Ethernet: Auto-Speed Detection</td>
<td>mGig Ethernet supports multi-rate speeds where the ports exchange auto-negotiation pages to establish a link at the highest supported speed by both channels. See Configuring Interface Characteristics (Multigigabit Ethernet) (LAN Base, IP Base, and IP Services)</td>
</tr>
<tr>
<td>3 VRF</td>
<td>Starting with this release, the 3 VRF feature is available at the IP Base license level. It was previously available only at the IP Services license level. (IP Base and IP Services)</td>
</tr>
</tbody>
</table>
Programmability:

- Preboot Execution Environment Client (iPXE)
- Zero-Touch Provisioning (ZTP)
- Guest Shell
- Python Scripting
- Data model changes

Introduces the following capabilities and enhancements for Programmability in this release:

- iPXE—An open Preboot eXecution Environment (PXE) client that allows a device to boot from a network boot image.
  (LAN Base, IP Base, and IP Services)
- ZTP—Open Zero Touch Provisioning (ZTP) interface to allow devices to be provisioned and configured automatically, eliminating most of the manual labor involved with adding them to a network.
  (LAN Base, IP Base, and IP Services)
- Guest Shell—A secure LXC container that is an embedded Linux environment and enables you to develop and run Linux and custom Python applications for automated control and management of Cisco switches. Guest Shell is bundled with the software image (cat3k_caa-guestshell.<release name>.SPA.pkg) and can be installed using the guestshell enable command.
- Python Scripting—Supports Python v2.7 in both interactive and non-interactive (script) modes and is available in the Guest Shell.
  The Python scripting capability gives programmatic access to YANG data models and the device’s command-line interface (CLI) to perform various tasks such as Zero Touch Provisioning (ZTP) and Embedded Event Manager (EEM) actions.
  (LAN Base, IP Base, and IP Services)
- Data model changes—Starting with this release, the Cisco IOS XE YANG models are available in the form of individual feature modules with new module names, namespaces and prefixes. Revision statements embedded in the YANG files indicate if there has been a model revision.
  Navigate to https://github.com/YangModels/yang > vendor > cisco > xe > 1651, to see the new, main cisco-IOS-XE-native module and individual feature modules attached to this node.
  The README.md file in the above Github location highlights these and other changes.

Trust Worthy Systems (TWS):
Attack Surface Reduction: Display Active TCP Ports

Introduces support for the show ip ports all privilege EXEC command, to display all the open ports on a device.

See IP Commands
(LAN Base, IP Base, and IP Services)
### Important Notes

- Starting with Cisco IOS XE Denali 16.1.x, a DHCP client that includes option 61 (used by DHCP clients to specify their unique client identifier) in their DHCP discover/offer packet must accept the response message with option 61 from the DHCP server/relay. A client that fails to accept the response message with option 61, is not in compliance with RFC 6842 and requires a firmware upgrade.

- Converged Access (CA) is not supported beyond Cisco IOS XE Denali 16.3.x.

  On the Cisco Catalyst 3850 Series Switches, CA is supported in the Cisco IOS XE Denali 16.3.x software release, which has extended support for 40 months.

- Starting with Cisco IOS XE Denali 16.3.x, Secure Shell (SSH) Version 1 is deprecated. Use SSH Version 2 instead.

- Cisco Discovery Protocol (CDP) Bypass is available in Cisco IOS XE Release 3.6.3E, but is not supported in Cisco IOS XE Everest 16.5.1a.

- Cisco Plug-In for OpenFlow (OpenFlow 1.0 and 1.3) is available in Cisco IOS XE Release 3.7.3E, but is not supported in Cisco IOS XE Everest 16.5.1a.

- Cisco StackWise Virtual is available in the Cisco IOS XE Denali 16.3.x release train, starting with Cisco IOS XE Denali 16.3.3, but the feature is not supported in Cisco IOS XE Everest 16.5.1a.

- 256-bit AES MACsec (IEEE 802.1AE) host link encryption with MACsec Key Agreement (MKA) is available in the Cisco IOS XE Denali 16.3.x release train, starting with Cisco IOS XE Denali 16.3.1, but the feature is not supported in Cisco IOS XE Everest 16.5.1a.

- The following features are not supported in Cisco IOS XE Everest 16.5.1a:
  - 802.1x Configurable username and password for MAB
  - AAA: TACACS over IPv6 Transport
  - Auto QoS for Video endpoints

### New on the Web User Interface

<table>
<thead>
<tr>

| Web UI support for Enhanced Interior Gateway Routing Protocol (EIGRP) and troubleshooting | Features introduced and updated on the Web UI in this release: |
|                                                                                       | - EIGRP |
|                                                                                       | - Troubleshooting connectivity problems and packet loss using Ping and Traceroute, and monitoring device health and performance using web server logs, syslogs and packet captures. |
|                                                                                       | **Note** Beginning in Cisco IOS XE Everest 16.5.1a, the Web UI does not support wireless features. |
- Cisco Group Management Protocol (CGMP)
- Cisco TrustSec 802.1x
- Cisco TrustSec Critical Auth
- Cisco TrustSec for IPv6
- CNS Config Agent
- Command Switch Redundancy
- Device classifier for ASP
- DHCP snooping ASCII circuit ID
- DHCPv6 Relay Source Configuration
- DVMRP Tunneling
- Dynamic Access Ports
- EX SFP Support (GLC-EX-SMD)
- Fallback bridging for non-IP traffic
- Fast SSID support for guest access WLANs
- IEEE 802.1X-2010 with 802.1AE support
- Improvements in QoS policing rates
- Ingress Strict Priority Queuing (Expedite)
- Ingress/egress Shared Queues
- IP-in-IP (IPIP) Tunneling
- IPsec
- IPSLA Media Operation
- IPv6 IKEv2 / IPSecv3
- IPv6 Ready Logo phase II - Host
- IPv6 Static Route support on LAN Base images
- IPv6 Strict Host Mode Support
- Layer 2 Tunneling Protocol Enhancements
- Link-State Tracking
- Mesh, FlexConnect, and OfficeExtend access point deployment
- Medianet
- MSE 8.x is not supported with Cisco IOS XE Denali 16.x.x.
- Passive Monitoring
- Per VLAN Policy & Per Port Policer
- Performance Monitor (Phase 1)
- Port Security on EtherChannel
- Pragmatic General Multicast (PGM)
- RFC 4292 IP-FORWARD-MIB (IPv6 only)
- RFC 4293 IP-MIB (IPv6 only)
- RFC4292/RFC4293 MIBs for IPv6 traffic
- RFC5460 DHCPv6 Bulk Leasequery
- Trust Boundary Configuration
- UniDirectional Link Routing (UDLR)
- VACL Logging of access denied
- VRF-Aware Web-Based Authentication
- Web-Based Authentication without SVI
- Weighted Random Early Detect (WRED)

### Supported Hardware

**WS-C3850-48T-S**
- IP Base
- Cisco Catalyst 3850 Stackable 48 10/100/1000 Ethernet ports, with 350-WAC power supply 1 RU, IP Base feature set

**WS-C3850-24P-S**
- IP Base
- Cisco Catalyst 3850 Stackable 24 10/100/1000 Ethernet PoE+ ports, with 715-WAC power supply 1 RU, IP Base feature set

**WS-C3850-48P-S**
- IP Base
- Cisco Catalyst 3850 Stackable 48 10/100/1000 Ethernet PoE+ ports, with 715-WAC power supply 1 RU, IP Base feature set

**WS-C3850-48F-S**
- IP Base
- Cisco Catalyst 3850 Stackable 48 10/100/1000 Ethernet PoE+ ports, with 1100-WAC power supply, 1 RU.

**WS-C3850-24PW-S**
- IP Base
- Cisco Catalyst 3850 24-port PoE IP Base with 5-access point license

**WS-C3850-48PW-S**
- IP Base
- Cisco Catalyst 3850 48-port PoE IP Base with 5-access point license

**WS-C3850-12S-S**
- IP Base
- 12 SFP module slots, 1 network module slot, 350-W power supply

**WS-C3850-24S-S**
- IP Base
- 24 SFP module slots, 1 network module slot, 350-W power supply

**WS-C3850-12XS-S**
- IP Base
- Catalyst 3850 12-port SFP+ transceiver, 1 network module slot, support for up to 10 G SFP+, 350 W power supply

**WS-C3850-16XS-S**
- IP Base
- Catalyst 3850 16-port SFP+ transceiver, 1 network module slot, support for up to 10 G SFP+, 350 W power supply.

16 ports are available when the C3850-NM-4-10G network module is plugged into the WS-C3850-12XS-S switch.

**WS-C3850-24XS-S**
- IP Base
- Catalyst 3850 24-port SFP+ transceiver, 1 network module slot, support for up to 10 G SFP+, 715 W power supply.

**WS-C3850-32XS-S**
- IP Base
- Catalyst 3850 32-port SFP+ transceiver, 1 network module slot, support for up to 10 G SFP+, 715 W power supply.

32 ports are available when the C3850-NM-8-10G network module is plugged into the WS-C3850-24XS-S switch.

**WS-C3850-48XS-S**
- IP Base
- Standalone Cisco Catalyst 3850 Switch, that supports SFP+ transceivers, 48 ports that support up to 10G, and 4 QSFP ports that support up to 40G, and 750WAC front-to-back power supply. 1 RU.

Optics Modules

Catalyst switches support a wide range of optics. Because the list of supported optics is updated on a regular basis, consult the tables at this URL for the latest (SFP) compatibility information:

---

1. For patches, go to Prime Infrastructure Patches.
2. For maintenance release patches, go to Prime Infrastructure Software. For the latest device pack, go to Prime Infrastructure Device Pack.
3. The Cisco IOS XE Denali 16.2.1 features are not available with 3.0.2, but 3.0.2 is compatible with Cisco IOS XE Denali 16.2.1.
4. Cisco 5700 (with Cisco IOS XE Release 03.06.03E/Cisco IOS XE Release 03.07.02E) inter-operates as a Peer MC with Catalyst 3850 running Cisco IOS XE Denali 16.1.1.
5. Because of SHA-2 certificate implementation, MSE 7.6 is not compatible with Cisco IOS XE Release 3.6E and later. Therefore, we recommend that you upgrade to MSE 8.0.
6. If MSE is deployed on your network, we recommend that you upgrade to Cisco Prime Infrastructure 2.1.2.
7. Cisco WLC Release 7.6 is not compatible with Cisco Prime Infrastructure 2.0.
8. Prime Infrastructure 2.0 enables you to manage Cisco WLC 7.5.102.0 with the features of Cisco WLC 7.4.110.0 and earlier releases. Prime Infrastructure 2.0 does not support any features of Cisco WLC 7.5.102.0 including the new AP platforms.

Web UI System Requirements

Hardware Requirements

Table 4  **Minimum Hardware Requirements**

<table>
<thead>
<tr>
<th>Processor Speed</th>
<th>DRAM</th>
<th>Number of Colors</th>
<th>Resolution</th>
<th>Font Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>233 MHz minimum</td>
<td>512 MB</td>
<td>256</td>
<td>1024 x 768</td>
<td>Small</td>
</tr>
</tbody>
</table>

1. We recommend 1 GHz.
2. We recommend 1 GB DRAM.
Software Requirements

- Operating Systems
  - Windows 7
  - Mac OS X 10.9.5
- Browsers
  - Google Chrome—Version 38 and later (On Windows)
  - Microsoft Internet Explorer—Versions 10 and later (On Windows)
  - Mozilla Firefox—Version 33 and later (On Windows and Mac)
  - Safari—Version 7 and later (On Mac)

Finding the Software Version and Feature Set

The package files for the Cisco IOS XE software are stored on the system board flash device (flash:).
You can use the show version privileged EXEC command to see the software version that is running on your switch.

Note
Although the show version output always shows the software image running on the switch, the model name shown at the end of this display is the factory configuration and does not change if you upgrade the software license.

You can also use the dir filesystem: privileged EXEC command to see the directory names of other software images that you might have stored in flash memory.

Upgrading the Switch Software

This section covers the following scenarios:
- Automatic Boot Loader Upgrade
- Automatic Microcode Upgrade
- Upgrading from Cisco IOS XE 3.xE to Cisco IOS XE Denali 16.x.x, or Cisco IOS XE Everest 16.5.1a in Install Mode
- Upgrading from Cisco IOS XE 3.xE to Cisco IOS XE Denali 16.x.x, or Cisco IOS XE Everest 16.5.1a in Bundle Mode
- Upgrading from Cisco IOS XE Denali 16.x.x to Cisco IOS XE Everest 16.5.1a in Install Mode
- Upgrading from Cisco IOS XE Everest 16.5.1a to Cisco IOS XE 16.x.x in Install Mode
- Downgrade from Cisco IOS XE 16.x.x to Cisco IOS XE 3.xE in Install Mode
- Downgrade from Cisco IOS XE 16.x.x to Cisco IOS XE 3.xE in Bundle Mode
- Upgrading RTU Licenses
You cannot use the Web UI to install, upgrade to, or downgrade from Cisco IOS XE Denali 16.x.x or Cisco IOS XE Everest 16.x.x.

</tr>
</tbody>
</table>

### Automatic Boot Loader Upgrade

When you upgrade from any prior IOS 3.xE release to an IOS XE 16.x.x release for the first time, the boot loader may be automatically upgraded, based on the hardware version of the switch. If the boot loader is automatically upgraded, it will take effect on the next reload. If you go back to an IOS 3.xE release, your boot loader will not be downgraded. The updated boot loader supports all previous IOS 3.xE releases.

For subsequent IOS XE 16.x.x releases, if there is a new bootloader in that release, it may be automatically upgraded based on the hardware version of the switch when you boot up your switch with the new image for the first time.
Upgrading the Switch Software

Caution
Do not power cycle your switch during the upgrade.

<table>
<thead>
<tr>
<th>Scenario</th>
<th>Automatic Boot Loader Response</th>
</tr>
</thead>
</table>
| If you boot Cisco IOS XE Everest 16.5.1a the first time | The boot loader may be upgraded to version 4.58. For example:  
BOOTLDR: CAT3K_CAA Boot Loader (CAT3K_CAA-HBOOT-M) Version 4.58, RELEASE SOFTWARE (P)  
If the automatic boot loader upgrade occurs while booting Cisco IOS XE Everest 16.5.1a, you will see the following on the console:  
%IOSXEBOOT-Boot-###: (rp/0): Nov 2 20:46:19 Universal 2016 PLEASE DO NOT POWER CYCLE ### BOOT LOADER UPGRADING  
%IOSXEBOOT-loader-boot: (rp/0): upgrade successful |

Automatic Microcode Upgrade

During an IOS image upgrade or downgrade on a PoE or UPoE switch, the microcode is updated to reflect applicable feature enhancements and bug fixes. Do not restart the switch during the upgrade or downgrade process.

With the Cisco IOS XE Denali 16.x.x and the Cisco IOS XE Everest 16.x.x releases, it takes approximately an additional 4 minutes to complete the microcode upgrade in addition to the normal reload time. The microcode update occurs only during an image upgrade or downgrade on PoE or UPoE switches. It does not occur during switch reloads or on non-PoE switches.

The following console messages are displayed during microcode upgrade:

Front-end Microcode IMG MGR: found 4 microcode images for 1 device.
Image for front-end 0: /tmp/microcode_update/front_end/fe_type_6_0

Upgrading the Switch Software

Upgrading from Cisco IOS XE 3.xE to Cisco IOS XE Denali 16.x.x, or Cisco IOS XE Everest 16.5.1a in Install Mode

Follow these instructions to upgrade from Cisco IOS XE 3.xE to Cisco IOS XE Denali 16.x.x or Cisco IOS XE Everest 16.5.1a in install mode:

Copy New Image to Stack

When you expand the image, if you point to the source image on your TFTP server, you can skip this section and go to Software Install Image to Flash, page 18.

---

**Step 1** Make sure your tftp server is reachable from IOS via GigabitEthernet0/0.

```
Switch# show run | i tftp
ip tftp source-interface GigabitEthernet0/0
ip tftp blocksize 8192
Switch# show run | i ip route vrf
ip route vrf Mgmt-vrf 5.0.0.0 255.0.0.0 5.30.0.1
Switch# show run int GigabitEthernet0/0
Building configuration...
```

Current configuration : 115 bytes

```
interface GigabitEthernet0/0
vrf forwarding Mgmt-vrf
ip address 5.30.12.121 255.255.0.0
negotiation auto
end
Switch# ping vrf Mgmt-vrf ip 5.28.11.250
Type escape sequence to abort.
Sending 5, 100-byte ICMP Echos to 5.28.11.250, timeout is 2 seconds:
!!!!!!
Success rate is 100 percent (5/5), round-trip min/avg/max = 1/1/2 ms
```

**Step 2** Copy the image from your tftp server to flash.

```
Switch# copy tftp://5.28.11.250/cat3k_caa-universalk9.16.05.01a.SPA.bin flash:
Destination filename [cat3k_caa-universalk9.16.05.01a.SPA.bin]?
Accessing tftp://5.28.11.250/cat3k_caa-universalk9.16.05.01a.SPA.bin...
Loading cat3k_caa-universalk9.16.05.01a.SPA.bin from 5.28.11.250 (via GigabitEthernet0/0):
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
!!!!!
[OK - 373203016 bytes]

373203016 bytes copied in 80.662 secs (4626927 bytes/sec)
Switch#
```

**Step 3** Use the `dir flash` command to confirm that the image has been successfully copied to flash.

```
Switch#dir flash:*.bin
Directory of flash:

```
Upgrading the Switch Software

Software Image Install to Flash

Step 4  Use the `software install` command with the ‘new’ and ‘force’ options to expand the target image to flash. You can point to the source image on your TFTP server or in flash if you have it copied to flash.

Switch# software install file flash:/cat3k_caa-universalk9.16.05.01a.SPA.bin new force

[1 2 3 4]: Creating pending provisioning file
[1 2 3 4]: Finished installing software. New software will load on reboot.
[1 2 3 4]: Committing provisioning file

[1 2 3 4]: Do you want to proceed with reload? [yes/no]: yes
[1 2 3 4]: Reloading

Switch#

Note: Old files listed in the logs should be removed using the `request platform software package clean switch all` command, after reload

Reload

Step 5
If you said ‘Yes’ to the prompt in software install and your switches are configured with auto boot, the stack will automatically boot up with the new image. If not, you can manually boot flash:packages.conf

switch: boot flash:packages.conf

Note: When you boot the new image, it will automatically update the boot loader.

Step 6
When the new image boots up, you can verify the version of the new image, by checking `show version`

Switch# show version
Cisco IOS XE Software, Version 16.05.01a
Cisco IOS Software [Everest], Catalyst L3 Switch Software (CAT3K_CAA-UNIVERSALK9-M),
Version 16.5.1a, RELEASE SOFTWARE (fc2)
Technical Support: http://www.cisco.com/techsupport
Copyright (c) 1986-2017 by Cisco Systems, Inc.
Compiled Tue 30-May-17 00:59 by mcpre

Step 7
After you have successfully installed the image, you no longer need the .bin image and the file can be deleted from flash of each switch if it was copied to flash.

Switch#delete flash:/cat3k_caa-universalk9.16.05.01a.SPA.bin
Delete filename [cat3k_caa-universalk9.16.05.01a.SPA.bin]? n
Delete flash:/cat3k_caa-universalk9.16.05.01a.SPA.bin? [confirm]
Switch#
Upgrading from Cisco IOS XE 3.xE to Cisco IOS XE Denali 16.x.x, or Cisco IOS XE Everest 16.5.1a in Bundle Mode

Follow these instructions to upgrade from Cisco IOS XE 3.xE to Cisco IOS XE Denali 16.x.x, or Cisco IOS XE Everest 16.5.1a in bundle mode:

Copy New Image to Stack

Note
You cannot boot Cisco IOS XE Denali 16.x.x or Cisco IOS XE Everest 16.x.x via TFTP for the first time with a Cisco IOS XE 3.xE boot loader. The Cisco IOS XE 3.xE boot loaders have a limitation, which prevents the booting of an image larger than 400MB via the TFTP server. Since Cisco IOS XE Denali 16.x.x and Cisco IOS XE Everest 16.x.x images are larger than 400MB, you must boot the image via flash.

Step 1
Make sure your TFTP server is reachable from IOS via GigabitEthernet0/0.

```
Switch# show run | i tftp
ip tftp source-interface GigabitEthernet0/0
ip tftp blocksize 8192
Switch#
Switch# show run | i ip route vrf
ip route vrf Mgmt-vrf 5.0.0.0 255.0.0.0 5.30.0.1
Switch#
Switch#show run int GigabitEthernet0/0
Building configuration...
Current configuration : 115 bytes
!
interface GigabitEthernet0/0
vrf forwarding Mgmt-vrf
ip address 5.30.12.121 255.255.0.0
negotiation auto
end
Switch#
Switch# ping vrf Mgmt-vrf ip 5.28.11.250
Type escape sequence to abort.
Sending 5, 100-byte ICMP Echos to 5.28.11.250, timeout is 2 seconds:
!!!!!
Success rate is 100 percent (5/5), round-trip min/avg/max = 1/1/2 ms
```

Step 2
Copy the image from your TFTP server to flash.

```
Switch#copy tftp://5.28.11.250/cat3k_caa-universalk9.16.05.01a.SPA.bin flash:
Destination filename [cat3k_caa-universalk9.16.05.01a.SPA.bin]?
Accessing tftp://5.28.11.250/cat3k_caa-universalk9.16.05.01a.SPA.bin...
Loading cat3k_caa-universalk9.16.05.01a.SPA.bin from 5.28.11.250 (via GigabitEthernet0/0):
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
!!!!!!
[OK - 373203016 bytes]

373203016 bytes copied in 80.662 secs (4626927 bytes/sec)
Switch#
```
Upgrading the Switch Software

Note

If you have a stack, you must copy the image to the flash of each switch in your stack.

Step 3

Use the `dir flash` command to confirm that the image has been successfully copied to flash.

```
Switch#dir flash:*.bin
Directory of flash://

32339 -rw- 373217171 May 26 2017 13:52:53 -07:00
cat3k_caa-universalk9.16.05.01a.SPA.bin

1562509312 bytes total (731021312 bytes free)
Switch#
```

Edit the Boot variable

Step 4

Clear the boot variable

```
Switch(config)# no boot system
```

Step 5

Edit the boot variable to point to the new image.

```
Switch(config)# boot system flash:cat3k_caa-universalk9.16.05.01a.SPA.bin
```

Step 6

Use the `write memory` command to save the configuration change.

```
Switch# write memory
```

Step 7

Use the `show boot` command to confirm that your boot variable is pointing to the new image.

```
Switch#show boot
---------------------------
Switch 1
---------------------------
Current Boot Variables:
BOOT variable = flash:cat3k_caa-universalk9.16.05.01a.SPA.bin;

Boot Variables on next reload:
BOOT variable = flash:cat3k_caa-universalk9.16.05.01a.SPA.bin;
Allow Dev Key = yes
Manual Boot = yes
Enable Break = yes
Switch#
```

Reload

Step 8

Reload the switch

```
Switch# reload
```

Step 9

If your switches are configured with auto boot, the stack will automatically boot up with the new image. If not, you can manually boot flash: cat3k_caa-universalk9.16.05.01a.SPA.bin

```
switch:boot flash:cat3k_caa-universalk9.16.05.01a.SPA.bin
```

Note

When you boot the new image, it will automatically update the boot loader.
Step 10  When the new image boots up, you can verify the version of the new image, by checking `show version`

```
Switch# show version
Cisco IOS XE Software, Version 16.05.01a
Cisco IOS Software [Everest], Catalyst L3 Switch Software (CAT3K_CAA-UNIVERSALK9-M),
Version 16.5.1a, RELEASE SOFTWARE (fc2)
Technical Support: http://www.cisco.com/techsupport
Copyright (c) 1986-2017 by Cisco Systems, Inc.
Compiled Tue 30-May-17 00:59 by mcpre
```

Move from Cisco IOS XE Everest 16.x.x Bundle Mode to Install Mode

Step 11  Ensure you have enough space in flash to expand a new image by cleaning up old installation files. This command will erase your Cisco IOS XE Everest 16.x.x bin image file, so ensure that you copy it to your Active again.

**Note**  Use the `switch all` option to clean up all switches in your stack.

```
Switch#request platform software package clean switch all file flash:
Running command on switch 1
Cleaning up unnecessary package files
  Scanning boot directory for packages ... done.
  Preparing packages list to delete ... done.

Running command on switch 2
Cleaning up unnecessary package files
  Scanning boot directory for packages ... done.
  Preparing packages list to delete ... done.

Running command on switch 3
Cleaning up unnecessary package files
  Scanning boot directory for packages ... done.
  Preparing packages list to delete ... done.

Running command on switch 4
Cleaning up unnecessary package files
  Scanning boot directory for packages ... done.
  Preparing packages list to delete ... done.

The following files will be deleted:
[1]:
  /flash/cat3k_caa-base.SPA.03.07.02E.pkg
  /flash/cat3k_caa-drivers.SPA.03.07.02E.pkg
  /flash/cat3k_caa-infra.SPA.03.07.02E.pkg

Switch#
Step 12  Copy the image from your tftp server to flash

```
Switch#copy tftp://5.28.11.250/cat3k_caa-universalk9.16.05.01a.SPA.bin flash:
Destination filename [cat3k_caa-universalk9.16.05.01a.SPA.bin]?
Accessing tftp://5.28.11.250/cat3k_caa-universalk9.16.05.01a.SPA.bin...
Loading cat3k_caa-universalk9.16.05.01a.SPA.bin from 5.28.11.250 (via
GigabitEthernet0/0):
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
[OK - 373203016 bytes]
373203016 bytes copied in 80.662 secs (4626927 bytes/sec)
Switch#
```

Step 13  Use the `request platform software package expand switch all file flash:image.bin auto-copy` command to expand the target image to flash and move from bundle mode to install mode. You can point to the source image on your TFTP server or in flash if you have it copied to flash.

Note  Use the `switch all` option to upgrade all switches in your stack. Use the `auto-copy` option to copy the .bin image from flash: to all other switches in your stack.

```
Switch# request platform software package expand switch all file flash:cat3k_caa-universalk9.16.05.01a.SPA.bin auto-copy
[1]: Copying flash:cat3k_caa-universalk9.16.05.01a.SPA.bin from switch 1 to switch 2 3 4
[2 3 4]: Finished copying to switch 2 3 4
[1 2 3 4]: Expanding file
[1 2 3 4]: Finished expanding all-in-one software package in switch 1 2 3 4
SUCCESS: Finished expanding all-in-one software package.
Switch#
```

Edit the Boot variable

Step 14  Clear the boot variable

```
Switch(config)#no boot system
```

Step 15  Edit the boot variable to point to the new image.

```
Switch(config)#boot system flash:packages.conf
```

Step 16  Use the `write memory` command to save the configuration change.

```
Switch#write memory
```

Step 17  Use the `show boot` command to confirm that your boot variable is pointing to the new image.

```
Switch# show boot
---------------------------
Switch 1
---------------------------
Current Boot Variables:
BOOT variable = flash:packages.conf;

Boot Variables on next reload:
BOOT variable = flash:packages.conf;
Manual Boot = yes
Enable Break = yes
Switch#
```
Reload

**Step 18**  
Reload the switch  
Switch# reload

**Step 19**  
If your switches are configured with auto boot, the stack will automatically boot up with the new image. If not, you can manually boot flash:packages.conf  
switch:boot flash:packages.conf

**Step 20**  
When the new image boots up, you can verify the version of the new image, by checking `show version`  
Switch# show version  
Cisco IOS XE Software, Version 16.05.01a

Switch#

Upgrading from Cisco IOS XE Denali 16.x.x to Cisco IOS XE Everest 16.5.1a in Install Mode

Follow these instructions to upgrade from Cisco IOS XE Denali 16.x.x to Cisco IOS XE Everest 16.5.1a in install mode. In order to do a software image upgrade, you must be booted into IOS using the `boot flash:packages.conf`.

Clean Up

**Step 1**  
Ensure you have enough space in flash to expand a new image by cleaning up old installation files.

**Note**  
Use the `switch all` option to clean up all switches in your stack.

Switch#request platform software package clean switch all file flash:  
Running command on switch 1

File is in use, will not delete.
packages.conf
File is in use, will not delete.
done.

SUCCESS: No extra package or provisioning files found on media. Nothing to clean.

Running command on switch 4
Cleaning up unnecessary package files
Scanning boot directory for packages ... done.
Preparing packages list to delete ...
packages.conf
File is in use, will not delete.
cat3k_caa-rpbase.16.01.01.SPA.pkg
File is in use, will not delete.
cat3k_caa-srdriver.16.01.01.SPA.pkg
File is in use, will not delete.
cat3k_caa-wcm.16.01.01.SPA.pkg
File is in use, will not delete.
cat3k_caa-webui.16.01.01.SPA.pkg
File is in use, will not delete.
done.

SUCCESS: No extra package or provisioning files found on media. Nothing to clean.
Copy New Image to Stack

Step 2  Copy the new image to flash: (or skip this step if you want to use the new image from your TFTP server).

Switch#copy tftp://5.28.11.250/cat3k_caa-universalk9.16.05.01a.SPA.bin flash:
Destination filename [cat3k_caa-universalk9.16.05.01a.SPA.bin]?
Accessing tftp://5.28.11.250/cat3k_caa-universalk9.16.05.01a.SPA.bin...
Loading cat3k_caa-universalk9.16.05.01a.SPA.bin from 5.28.11.250 (via GigabitEthernet0/0):
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
[OK - 373203016 bytes]
373203016 bytes copied in 80.662 secs (4626927 bytes/sec)
Switch#

Step 3  Use the dir flash command to confirm that the image has been successfully copied to flash.

Switch# dir flash:*.bin
Directory of flash: /
32339 -rw- 373217171 May 26 2017 13:52:53 -07:00 cat3k_caa-universalk9.16.05.01a.SPA.bin
1562509312 bytes total (731021312 bytes free)
Switch#

Software Install Image to Flash

Step 4  Use the request platform software package install switch all file flash: new auto-copy command to install the target image to flash. We recommend copying the image to a TFTP server or the flash drive of the active switch.

If you point to an image on the flash or USB drive of a member switch (instead of the active), you must specify the exact flash or USB drive - otherwise installation fails. For example, if the image is on the flash drive of member switch 3:

request platform software package install switch all file flash-3:cat3k_caa-universal9k.16.03.05.SPA.bin new auto-copy
<output truncated>
Expanding image file: flash-3: cat3k_caa-universal9k.16.03.05.SPA.bin [3]: Copying flash-3: cat3k_caa-universal9k.16.03.05.SPA.bin from switch 3 to switch 1 2 4
<output truncated>

Note  Use the switch all option to upgrade all switches in your stack
You must use the new option when you upgrade from Cisco IOS XE Denali 16.1.x, 16.2.x or 16.3.1 to Cisco IOS XE Everest 16.5.1a. (There are packaging changes in the different 16.x.x releases.)
Use the auto-copy option to copy the .bin image from flash: to all other switches in your stack

Note  When you execute the command, the following message is displayed:
Unknown package type 21
This is expected and does not affect the upgrade. See CSCux82059
Switch# request platform software package install switch all file flash:cat3k_caa-universalk9.16.05.01a.SPA.bin new auto-copy

Switch#
```
Upgrading the Switch Software

Switch#

Step 6  After you have successfully installed the image, you no longer need the.bin image. If you copied the file to flash, you can delete it from the flash of each switch.

Switch# delete flash:cat3k_caa-universalk9.16.05.01a.SPA.bin
Delete filename [cat3k_caa-universalk9.16.05.01a.SPA.bin]?
Delete flash:/ cat3k_caa-universalk9.16.05.01a.SPA.bin? [confirm]
Switch#

Reload

Step 7  Reload the switch.

Switch# reload

Step 8  If the switch is configured with auto boot, then the stack automatically boots up with the new image. If not, you can manually boot flash:packages.conf

switch:boot flash:packages.conf

Step 9  When the new image boots up, you can verify the version of the new image, by using the `show version` command:

Switch# show version
Cisco IOS XE Software, Version 16.05.01a
Cisco IOS Software [Everest], Catalyst L3 Switch Software (CAT3K_CAA-UNIVERSALK9-M),
Version 16.5.1a, RELEASE SOFTWARE (fc2)
Technical Support: http://www.cisco.com/techsupport
Copyright (c) 1986-2017 by Cisco Systems, Inc.
Compiled Tue 30-May-17 00:59 by mcpre

Upgrading from Cisco IOS XE Everest 16.5.1a to Cisco IOS XE 16.x.x in Install Mode

Follow these instructions to upgrade from Cisco IOS XE Everest 16.5.1a to a future IOS XE 16.x.x release in Install mode. In order to do a software image upgrade, you must be booted into IOS via “boot flash:packages.conf.”

Clean Up

Step 1  Ensure you have enough space in flash to expand a new image by cleaning up old installation files.

Note  Use the `switch all` option to clean up all switches in your stack.

Switch# request platform software package clean switch all file flash:
Running command on switch 1
Cleaning up unnecessary package files
Scanning boot directory for packages ... done.
Preparing packages list to delete ...
packages.conf
  File is in use, will not delete.
cat3k_caa-rpbase.16.05.01a.SPA.pkg
File is in use, will not delete.
cat3k_caa-rpcore.16.05.01a.SPA.pkg
File is in use, will not delete.
cat3k_caa-srdriver.16.05.01a.SPA.pkg
File is in use, will not delete.
cat3k_caa-guestshell.16.05.01a.SPA.pkg
File is in use, will not delete.
cat3k_caa-webui.16.05.01a.SPA.pkg
File is in use, will not delete.
done.

SUCCESS: No extra package or provisioning files found on media. Nothing to clean.
Running command on switch 2
Cleaning up unnecessary package files
Scanning boot directory for packages ... done.
Preparing packages list to delete ...
packages.conf
  File is in use, will not delete.
cat3k_caa-rpbase.16.05.01a.SPA.pkg
  File is in use, will not delete.
cat3k_caa-rpcore.16.05.01a.SPA.pkg
  File is in use, will not delete.
cat3k_caa-srdriver.16.05.01a.SPA.pkg
  File is in use, will not delete.
cat3k_caa-guestshell.16.05.01a.SPA.pkg
  File is in use, will not delete.
cat3k_caa-webui.16.05.01a.SPA.pkg
  File is in use, will not delete.
done.

SUCCESS: No extra package or provisioning files found on media. Nothing to clean.
Running command on switch 3
Cleaning up unnecessary package files
Scanning boot directory for packages ... done.
Preparing packages list to delete ...
packages.conf
  File is in use, will not delete.
cat3k_caa-rpbase.16.05.01a.SPA.pkg

cat3k_caa-srdriver.16.05.01a.SPA.pkg
  File is in use, will not delete.
cat3k_caa-guestshell.16.05.01a.SPA.pkg
  File is in use, will not delete.
**Upgrading the Switch Software**

Copy New Image to Stack

**Step 2**  Copy the new image to flash: (or skip this step if you want to use the new image from your TFTP server)

```
Switch# copy tftp://5.28.11.250/cat3k_caa-universalk9.16.06.01.SPA.bin flash:cat3k_caa-universalk9.16.06.01.SPA.bin
Destination filename [cat3k_caa-universalk9.16.06.01.SPA.bin]?
Accessing tftp://5.28.11.250/cat3k_caa-universalk9.16.06.01.SPA.bin...
Loading cat3k_caa-universalk9.16.06.01.SPA.bin from 5.28.11.250 (via GigabitEthernet0/0):
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! 1621966848 bytes total (137928704 bytes free)
Switch#
Upgrading the Switch Software

Step 6 After you have successfully installed the image, you do not need the .bin image and the file can be deleted from the flash of EACH switch if you had it copied to flash.

```
Switch# delete flash:cat3k_caa-universalk9.16.06.01.SPA.bin
Delete filename [cat3k_caa-universalk9.16.06.01.SPA.bin]? [confirm]
Switch#
```

Reload

Step 7 Reload the switch

```
Switch# reload
```

Step 8 If your switches are configured with auto boot, then the stack will automatically boot up with the new image. If not, you can manually boot flash:packages.conf

```
switch: boot flash:packages.conf
```

Note When you boot the new image, it will automatically update the boot loader.

Step 9 When the new image boots up, you can verify the version of the new image, using the `show version` command:

```
Switch# show version
Cisco IOS XE Software, Version 16.06.1
Cisco IOS Software [Everest], Catalyst L3 Switch Software (CAT3K_CAA-UNIVERSALK9-M),
Version 16.06.1, RELEASE SOFTWARE (fc1)
Technical Support: http://www.cisco.com/techsupport
Copyright (c) 1986-2017 by Cisco Systems, Inc.
Compiled Thu 25-May-17 16:39 by mcpre
```

Downgrade from Cisco IOS XE 16.x.x to Cisco IOS XE 3.xE in Install Mode

Follow these instructions to downgrade from Cisco IOS XE 16.x.x to older Cisco IOS XE 3.xE releases in Install Mode.

Clean Up

Step 1 Ensure you have enough space in flash to expand a new image by cleaning up old installation files.

Note Use the `switch all` option to clean up all switches in your stack.

```
Switch# request platform software package clean switch all file flash:
Running command on switch 1
Cleaning up unnecessary package files
  Scanning boot directory for packages ... done.
Preparing packages list to delete ...
cat3k_caa-rpbase.16.05.01a.SPA.pkg
  File is in use, will not delete.
cat3k_caa-rpcore.16.05.01a.SPA.pkg
  File is in use, will not delete.
```

Switch#

Copy New Image to Stack

Step 2 Copy the target Cisco IOS XE 3.xE image to flash: (you can skip this step if you want to use the image from your TFTP server).

Switch# copy tftp://5.28.11.250/cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin flash:
cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin
Destination filename [cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin]?
Accessing tftp://5.28.11.250/cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin...
Loading cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin from 5.28.11.250 (via GigabitEthernet0/0):
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
[OK - 311154824 bytes]
311154824 bytes copied in 68.781 secs (4523849 bytes/sec)
Switch#

Step 3 Use the dir flash command to confirm that the image has been successfully copied to flash.

Switch# dir flash:/*.bin
Directory of flash:/
47718 -rw-  311154824  Nov 25 2015 18:17:21 +00:00
cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin
3458338816 bytes total (2468995072 bytes free)
Switch#

Downgrade Software Image

Step 4 Use the request platform software package install command with the new option to downgrade your stack. You can point to the source image on your tftp server or in flash if you have it copied to flash.

Note Use the switch all option is needed to upgrade all switches in your stack.
Use the auto-copy option to copy the .bin image from flash: to all other switches in your stack.

Switch# request platform software package install switch all file flash:cat3k_caa-
universalk9.SPA.03.07.02.E.152-3.E2.bin new auto-copy

[4]: Finished install successful on switch 4
Checking status of install on [1 2 3 4]
[1 2 3 4]: Finished install in switch 1 2 3 4
SUCCESS: Finished install: Success on [1 2 3 4]

Note
The old files listed in the logs should be removed using the `software clean` command, after reload

Step 5
After you have successfully installed the image, you no longer need the .bin image and the file can be deleted from flash of each switch if you copied it to flash.

Switch# delete flash: cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin
Delete filename [cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin]?
Delete flash:/ cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin? [confirm]
Switch#

Reload

Step 6
Reload the switch
Switch# reload

Step 7
If your switches are configured with auto boot, then the stack will automatically boot up with the new image. If not, you can manually boot flash:packages.conf

Switch: boot flash:packages.conf

Note
When you downgrade to a Cisco IOS XE 3.xE image, your boot loader will not automatically downgrade. It will remain updated. The new boot loader can support booting both Cisco IOS XE 3.xE releases as well as Cisco IOS XE Denali 16.x.x and Cisco IOS XE Everest 16.x.x releases.

Downgrade from Cisco IOS XE 16.x.x to Cisco IOS XE 3.xE in Bundle Mode

Follow these instructions to downgrade from Cisco IOS XE 16.x.x in Bundle mode to an older Cisco IOS XE 3.xE release in Bundle mode.

Copy New Image to Stack

Step 1
Make sure your TFTP server is reachable from IOS via GigabitEthernet0/0.

Switch# show run | i tftp
ip tftp source-interface GigabitEthernet0/0
ip tftp blocksize 8192
Switch# show run | i ip route vrf
ip route vrf Mgmt-vrf 5.0.0.0 255.0.0.0 5.30.0.1
Switch# show run int GigabitEthernet0/0
Building configuration...

Switch# show run int GigabitEthernet0/0
Current configuration : 115 bytes
interface GigabitEthernet0/0
  vrf forwarding Mgmt-vrf
  ip address 5.30.12.121 255.255.0.0
  negotiation auto
end
Switch# show run
Building configuration...
Current configuration : 115 bytes
interface GigabitEthernet0/0
  vrf forwarding Mgmt-vrf
  ip address 5.30.12.121 255.255.0.0
  negotiation auto
end
Switch# ping vrf Mgmt-vrf ip 5.28.11.250
Type escape sequence to abort.
Sending 5, 100-byte ICMP Echos to 5.28.11.250, timeout is 2 seconds:
!!!!!
Success rate is 100 percent (5/5), round-trip min/avg/max = 1/1/2 ms

Step 2 Copy the image from your TFTP server to flash.

Switch# copy tftp://5.28.11.250/cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin flash:
flash: Destination filename [cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin]?
Accessing tftp://5.28.11.250/cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin...
Loading cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin from 5.28.11.250 (via GigabitEthernet0/0):
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
!!!!!!!!!!!!!!!!!
[OK - 311154824 bytes]
311154824 bytes copied in 68.781 secs (4523849 bytes/sec)
Switch#

Note If you have a stack, you must copy the image to the flash of each switch in your stack.

Step 3 Use the dir flash command to confirm that the image has been successfully copied to flash.

Switch# dir flash:/*.bin
Directory of flash:/

Directory of flash:/
47718 -rw- 311154824 Nov 25 2015 18:17:21 +00:00
cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin

3458338816 bytes total (2468995072 bytes free)
Switch#

Edit the Boot variable

Step 4 Clear the boot variable

Switch(config)# no boot system
Step 5  Edit the boot variable to point to the new image.

Switch(config)# boot system flash:cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin

Step 6  Use the write memory command to save the configuration change.

Switch# write memory

Step 7  Use the show boot command to confirm that your boot variable is pointing to the new image.

Switch# show boot
---------------------------
Switch 1
---------------------------
Current Boot Variables:
BOOT variable = flash:cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin;

Boot Variables on next reload:
BOOT variable = flash:cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin;
Allow Dev Key = yes
Manual Boot = yes
Enable Break = yes
Switch#

Reload

Step 8  Reload the switch

Switch# reload

Step 9  If your switches are configured with auto boot, the stack will automatically boot up with the new image.
If not, you can manually boot flash:cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin

switch:boot flash:cat3k_caa-universalk9.SPA.03.07.02.E.152-3.E2.bin

Note  When you downgrade to a Cisco IOS XE 3.xE image, your boot loader will remain updated, and will automatically be downgraded. The new boot loader can support booting both Cisco IOS XE 3.x releases as well as Cisco IOS XE Denali 16.x.x and Cisco IOS XE Everest 16.x.x releases.

Step 10  When the new image boots up, you can verify the version of the new image, by checking show version

Switch# show version
Cisco IOS Software, IOS-XE Software, Catalyst L3 Switch Software (CAT3K_CAA-UNIVERSALK9-M), Version 03.07.02E RELEASE SOFTWARE (fc1)
Technical Support: http://www.cisco.com/techsupport

Compiled Tue 21-Jul-15 12:51 by prod_rel_team

Move from Cisco IOS XE 3.xE Bundle Mode to Install Mode

Step 11  Ensure you have enough space in flash to expand a new image by cleaning up old installation files. This command will erase your Cisco IOS XE 3.xE bin image file, so ensure that you copy it to your Active again.

Switch# software clean file flash:
Preparing clean operation ...
[1 2 3 4]: Cleaning up unnecessary package files
[1 2 3 4]: Preparing packages list to delete ...

Note  When you downgrade to a Cisco IOS XE 3.xE image, your boot loader will remain updated, and will automatically be downgraded. The new boot loader can support booting both Cisco IOS XE 3.x releases as well as Cisco IOS XE Denali 16.x.x and Cisco IOS XE Everest 16.x.x releases.
Upgrading the Switch Software

Upgrading RTU Licenses

The EXEC mode Right to Use License command allows you to activate or deactivate feature set licenses. This command provides options to activate or deactivate any license supported on the platform.

```
license right-to-use [activate | deactivate] [ lanbase | ipbase | ipservices] [ evaluation] [ all | slot switch-id] [ acceptEULA ]
```

Configuration Examples:

### Upgrading an IP Base SKU to IP Services License

<table>
<thead>
<tr>
<th>Step</th>
<th>Command</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>license right-to-use activate ipservices slot switch-ID acceptEULA</td>
<td>Activate IP Services license. Enter the switch ID. Enter acceptEULA to indicate acceptance.</td>
</tr>
<tr>
<td>2</td>
<td>show license right-to-use summary</td>
<td>Check the reboot license level is ipservices.</td>
</tr>
<tr>
<td>3</td>
<td>reload</td>
<td>Reboot the switch to boot with ipservices.</td>
</tr>
</tbody>
</table>

### Evaluating IP Services License on IP Base SKU

<table>
<thead>
<tr>
<th>Step</th>
<th>Command</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>license right-to-use activate ipservices evaluation slot switch-ID acceptEULA</td>
<td>Activate IP Services evaluation license. Enter the switch ID. Enter acceptEULA to indicate acceptance.</td>
</tr>
<tr>
<td>2</td>
<td>show license right-to-use summary</td>
<td>Check the reboot license level is ipservices eval.</td>
</tr>
<tr>
<td>3</td>
<td>reload</td>
<td>Reboot the switch to boot with ipservices eval.</td>
</tr>
</tbody>
</table>

### Deactivating Evaluation IP Services License on IP Base SKU

<table>
<thead>
<tr>
<th>Step</th>
<th>Command</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>license right-to-use deactivate ipservices evaluation slot switch-ID</td>
<td>Deactivates IP Services evaluation license.</td>
</tr>
<tr>
<td>2</td>
<td>show license right-to-use summary</td>
<td>Check the reboot license level is ipbase.</td>
</tr>
<tr>
<td>3</td>
<td>reload</td>
<td>Reboot the switch to boot with ipbase.</td>
</tr>
</tbody>
</table>
Upgrading LAN Base Stack to IP Base Stack

<table>
<thead>
<tr>
<th>Step</th>
<th>Command</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>license right-to-use activate ipbase all</td>
<td>Activate IP Base license on all the switches in the stack.</td>
</tr>
<tr>
<td></td>
<td>acceptEULA</td>
<td>Enter acceptEULA to indicate acceptance.</td>
</tr>
<tr>
<td>2</td>
<td>show license right-to-use</td>
<td>Check the reboot license level is ipbase for all the switches.</td>
</tr>
<tr>
<td>3</td>
<td>reload</td>
<td>Reboots the switch to boot with ipbase.</td>
</tr>
</tbody>
</table>

Changing the License Level of License Mismatch Switch from Active’s Console

If the license mismatch switch has a lower license level than other switches in the stack, and the stack is running at IP Services and the mismatch switch is booted with IP Base license.

<table>
<thead>
<tr>
<th>Step</th>
<th>Command</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>show switch</td>
<td>Get the switch number in license mismatch state.</td>
</tr>
<tr>
<td>2</td>
<td>show license right-to-use mismatch</td>
<td>Check the license level of the license mismatch switch.</td>
</tr>
</tbody>
</table>
| 3    | license right-to-use activate ipservices     | Activate IP Services license on all the mismatch switches in the stack.
|      | slot switch-id acceptEULA                    | Enter acceptEULA to indicate acceptance.                               |
| 4    | reload slot switch-id                       | Reboot the license mismatch switch to boot with ipservices and join the stack. |

If the license mismatch switch has a higher license level than other switches in the stack, and the stack is running at IP Base and the mismatch switch is booted with IP Services license.

Feature Sets

The Cisco Catalyst 3850 Series Switches supports three different feature sets:
LAN Base feature set—Provides basic Layer 2+ features, including access control lists (ACLs) and quality of service (QoS), and up to 255 VLANs.

IP Base feature set—Provides Layer 2+ and basic Layer 3 features (enterprise-class intelligent services). These features include access control lists (ACLs), quality of service (QoS), static routing, EIGRP stub routing, IP multicast routing, Routing Information Protocol (RIP), basic IPv6 management, the Open Shortest Path First (OSPF) Protocol (for routed access only), and support for wireless controller functionality. The license supports up to 4094 VLANs.

IP Services feature set—Provides a richer set of enterprise-class intelligent services and full IPv6 support. It includes IP Base features plus Layer 3 routing (IP unicast routing and IP multicast routing). The IP Services feature set includes protocols such as the Enhanced Interior Gateway Routing Protocol (EIGRP), the Open Shortest Path First (OSPF) Protocol, and support for wireless controller functionality. The license supports up to 4094 VLANs.

For more information about the features, see the product data sheet at this URL:

### Scaling Guidelines

**Table 7** Scaling Guidelines

<table>
<thead>
<tr>
<th>System Feature</th>
<th>Maximum Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of HTTP session redirections system-wide</td>
<td>Up to 100 clients per second</td>
</tr>
<tr>
<td>Number of HTTPS session redirections system-wide</td>
<td>Up to 20 clients per second</td>
</tr>
</tbody>
</table>

### Limitations and Restrictions

- Limitations for YANG data modeling—A maximum of 20 simultaneous NETCONF sessions are supported.
- Restrictions for QoS:
  - When configuring QoS queuing policy, the sum of the queuing buffer should not exceed 100%.
  - For QoS policies, only switched virtual interfaces (SVI) are supported for logical interfaces.
  - QoS policies are not supported for port-channel interfaces, tunnel interfaces, and other logical interfaces.
- Starting with Cisco IOS XE Denali 16.3.1, Centralized Management Mode (CMM) is no longer supported.
- You cannot configure NetFlow export using the Ethernet Management port (g0/0).
- Smart Install — Although the commands are visible on the CLI, the Smart Install feature is not supported and will be deprecated in a later release. Enter the `no vstack` command in global configuration mode and disable the feature. Use the Cisco Plug-n-Play feature instead.
- Flex Links are not supported. We recommend that you use spanning tree protocol (STP) as the alternative.
- Outdoor access points are supported only when they are in Local mode.
- Restrictions for Cisco TrustSec:
- Dynamic SGACL download is limited to 6KB per destination group tag (DGT).
- Cisco TrustSec can be configured only on physical interfaces, not on logical interfaces.
- Cisco TrustSec cannot be configured on a pure bridging domain with IPSG feature enabled. You must either enable IP routing or disable the IPSG feature in the bridging domain.

- Restriction for VLAN: It is advisable to have well-defined segregation while defining data and voice domain during switch configuration and to maintain a data VLAN different from voice VLAN across the switch stack. If the same VLAN is configured for data and voice domains on an interface, the resulting high CPU utilization might affect the device.

- When a logging discriminator is configured and applied to a device, memory leak is seen under heavy syslog or debug output. The rate of the leak is dependent on the quantity of logs produced. In extreme cases, the device may crash. As a workaround, disable the logging discriminator on the device.

- For the WS-C3850-12X48U-L, WS-C3850-12X48U-S and WS-C3850-12X48U-E switch models, a maximum of 28 ports are available for UPoE connections.

- When the device is running SCP (Secure Copy Protocol) and SSH cryptographic operations, expect high CPU until the SCP read process is completed. SCP supports file transfers between hosts on a network and uses SSH for the transfer.

Since SCP and SSH operations are currently not supported on the hardware crypto engine, running encryption and decryption process in software causes high CPU. The SCP and SSH processes can take up to 40 or 50 percent of CPU memory, but they do not cause the device to shutdown.
Caveats

Caveats describe unexpected behavior in Cisco IOS releases. Caveats listed as open in a prior release are carried forward to the next release as either open or resolved.

- Open Caveats in Cisco IOS XE Everest 16.5.1a, page 49
- Resolved Caveats in Cisco IOS XE Everest 16.5.1a, page 50

Cisco Bug Search Tool

The Bug Search Tool (BST), which is the online successor to Bug Toolkit, is designed to improve the effectiveness in network risk management and device troubleshooting. The BST allows partners and customers to search for software bugs based on product, release, and keyword, and aggregates key data such as bug details, product, and version. The tool has a provision to filter bugs based on credentials to provide external and internal bug views for the search input.

To view the details of a caveat listed in the open and resolved lists in this section, click on the identifier. To access the BST (use your Cisco user ID and password) go to https://tools.cisco.com/bugsearch/. Enter the bug ID in the Search For: field.

Open Caveats in Cisco IOS XE Everest 16.5.1a

The following are the open caveats in Cisco IOS XE Everest 16.5.1a. Click on the identifier to view the details of a caveat in the BST.
