Preface

For information about supported software upgrade paths and software upgrade instructions, system limitations, important notes, and open and resolved caveats, see the Release Notes on Cisco.com.

See these sections for release specific features and general information:

New in Cisco TelePresence Content Server Release 6.2

These are the new Content Server Release 6.2 features:

- This release supports integration with Cisco Unified Communications Manager (CUCM) that provide services such as session management, voice, video, messaging, mobility, and web conferencing.
- This release also supports the Cisco Business Edition 6000 (BE6K) solution.
