Accessing the Intersight Managed Mode Transition Tool

Accessing the Intersight Managed Mode Transition Tool

You can access the user interface of the Cisco IMM Transition Tool through browser window, to generate transition readiness report, and convert UCS domain into IMM configuration.

1. Launch a Web browser window.

2. Enter `http://<VM IP address>` or `https://<VM IP address>`. VM IP address is the IP address of the VM where you have deployed Cisco IMM Transition Tool OVA.

   IMM Transition Tool, Release 1.0.2 and above, provides HTTPS support. All the `http` URLs get redirected to `https`.

3. In the Login dialog box, enter the user name and password.

   Note   User name: admin

   Password: Enter the password set on the Customize template page during installation.

4. Click **Sign In**.

   To end the user session, click **Log Out** from the user settings in the top-right corner.

   Note   **Session Timeout**—In IMM Transition Tool, Release 1.0.2 onwards, if you remain inactive for 30 min, you are automatically logged out of the session. You have to relogin to use the application again.
