# Known issues

# Known issues in Release 6.0(1.260006) — None

# Known issues in Release 6.0(2.260045)

This section provides a brief description of the known issues.

| Defect ID | Description | Workaround | First Version Affected |
|-----------|-------------|------------|------------------------|
| CSCwr50750 | On Cisco UCS Fabric Interconnects Series 6600, 6500, 6400, and X-Series Direct Fabric Interconnects, when the management interface is configured with IPv6, a syslog message is displayed if the device receives a Router Advertisement (RA) packet containing an ICMPv6 MTU option greater than 1500 bytes. This message indicates an MTU mismatch but does not impact functionality. | No workaround is required; the syslog message can be safely ignored. | 6.0(1.250223) |
