

Cisco UCS Equivalency Matrix for Cisco Intersight, Cisco IMC, and Cisco UCS Manager

First Published: 2025-08-21

Last Modified: 2025-08-25

Overview

The matrix provided below outlines the release timeline for Cisco Intersight, Cisco Integrated Management Controller (IMC), and Cisco UCS Manager (UCSM). It includes essential information such as the date each patch was posted, the specific patch version, and the platforms that are supported by each release. By referring to this matrix, you can identify the appropriate firmware and software versions required for your servers before migrating them to Intersight. This ensures that your server infrastructure remains supported and operates efficiently during and after the transition.

Understanding the release compatibility is also vital for maintaining system stability and taking advantage of new features and improvements. The matrix will assist you in planning your upgrade strategy, whether you are performing routine maintenance or preparing for a significant infrastructure shift.

Note Releases marked as "Deprecated" have been retracted and are no longer available or recommended for use. If you are running a deprecated release, we recommend that you move to a supported release.

For release notes specific to each product, see the following links:
