

Release Notes for Cisco UCS Virtual Interface Card Drivers, Release 2.5

First Published: April 07, 2015

Introduction

This release note discusses the new features, known limitations, and open caveats for Cisco UCS Virtual Interface Card (VIC) Drivers, Release 2.5. It does not cover new features, resolved and open caveats for third-party drivers, and known limitations.

Note

We sometimes update the documentation after original publication. Therefore, you should also review the documentation on Cisco.com for any updates.

Use this document in conjunction with the document listed in the Related Documentation section.

[Table 1](#) shows the online change history for this document.

Table 1 **Online Revision History**

Revision	Revision Date	Description

System Requirements

For a complete list of supported hardware and software, see the *Hardware and Software Interoperability Matrix* for this release located at:

<http://www.cisco.com/c/en/us/support/servers-unified-computing/unified-computing-system/products-technical-reference-list.html>.

Americas Headquarters:
Cisco Systems, Inc., 170 West Tasman Drive, San Jose, CA 95134-1706 USA

New Software Features in Release 2.5

Release 2.5(1a) does not add support for any new feature.

Operating System Support

For complete information about the operating systems that Release 2.5 supports, see the *Hardware and Software Interoperability for UCSM Managed Servers* document for each Release 2.5 release located here:

<http://www.cisco.com/c/en/us/support/servers-unified-computing/unified-computing-system/products-technical-reference-list.html>

Resolved Caveats

There are no resolved caveats in Release 2.5(1a).

Open Caveats

Table 2 lists the open caveats in Release 2.5(1a).

Table 2 Open Caveats

Bug ID	Description
CSCus67247	<p>sNIC is always the first vNIC on each host. If it was not previously there and was added later, it will shift the BDF of all other vNICs, including the iSCSI overlay vNIC.</p> <p>According to Microsoft, if the BDF location changes then the Windows PNP Manager for iSCSI does not know how to load the driver on the new vNIC, and will not work. The only alternative is to reinstall the OS.</p> <p>http://support.microsoft.com/en-us/kb/976042/en-us provides more information about this issue.</p>

Known Limitations and Behaviors

There are no known limitations in Release 2.5(1a).
