Restarting Cisco UCS Director

This chapter contains the following sections:

Restarting Cisco UCS Director

If you see errors after installing Cisco UCS Director, log in to the Secure Shell (SSH) client and run scripts to verify whether services are running or not.

Step 1 Using the Cisco UCS Director IP address, log in with the following credentials:

a) User—shelladmin
b) Password—changeme

If you have already logged into the shelladmin and changed the default password, use your new password instead.

After you have logged in, you can choose `Change shelladmin password` to change the default password.

Step 2 To display the status of all services, choose `Display services status`.
If this option is not available, you can use SSH to restart the services.

Step 3 Verify that the following services appear:

```
1. Broker
2. Controller
3. Eventmgr
4. Client
5. Idaccessmgr
6. Inframgr
7. Websock
8. Tomcat
9. Flashpolicyd
```

Note   Services that start in the background do not appear in the window.

Step 4   Choose `Stop services.`

Step 5   To verify that all services are stopped, choose `Display services status.`

Step 6   To restart services, choose `Start services.`
