Managing VM Annotations

This chapter contains the following sections:

About VM Annotations

Annotations are a part of the VM summary that is used to describe a virrtual machine. An annotation consists of notes and Custom attributes. Custom attributes can be of the following two types:

- Virtual machine -- This is a custom attribute that can be applied to all the VMs in the inventory.

- Global -- This is a custom attribute that can be applied to all VMs and hosts in the inventory.

Cisco UCS Director allows you to customize the annotations of a virtual machine during VM provisioning.

Defining VM Annotations

Procedure

Step 1 On the menu bar, choose **Policies** > **Virtual/Hypervisor Policies** > **Service Delivery**.

Step 2 Click the **VMware System Policy** tab.

Step 3 Choose the policy for which you want VM annotations to be defined.

Step 4 Click **Edit**.

Step 5 In the **System Policy Information** dialog box, complete the fields to define VM annotations and add custom attributes.

Step 6 Click **Submit**.

Once you define annotations using this procedure, those values are saved in the VMware System Policy.
