

CHAPTER 1

Introducing Cisco Unified Videoconferencing Manager

Overview

Cisco Unified Videoconferencing Manager is a single-installation product that contains the following components:

- Resource Manager is a simple-to-use, web-based application for managing visual communications in multi-site organization deployments. It provides resource management of network devices for video and audio meetings as well as scheduling, call-routing, and conference control functionalities.

Resource Manager includes an internal ITU-T H.323 version4-compliant gatekeeper to provide call control for IP telephony and multimedia communication networks and an internal SIP User Agent to provide management and call control for IP telephony and multimedia communication on the SIP network.

- Network Manager provides a central management interface, enabling network administrators to easily and intuitively control, configure, and maintain collaborative Cisco Unified Videoconferencing deployments.
