About Cisco Show and Share and Cisco Digital Media Manager

Cisco Show and Share administration depends on services provided by Cisco Digital Media Manager (DMM). The software that provides these additional features and services is called *Cisco DMS Administration* (DMS-Admin). For example, although you assign user roles in the Cisco Show and Share administration screens, users are defined in DMS-Admin.

Because of these dependencies, your Cisco Digital Media Manager must always be reachable from Cisco Show and Share for Cisco Show and Share to function properly. See [Ports Used by Digital Media Suite, page A-1](#) for information about communication between the components of the Cisco Digital Media Suite.

This chapter provides a brief overview of the areas in Cisco Digital Media Manager that pertain to Cisco Show and Share. For more information, see the [User Guide for Cisco Digital Media Manager](#) and the [Cisco Show and Share Release Notes for Release 5.6](#) on Cisco.com.

Health and Activity Dashboard

Navigation Path (in DMM)

Administration > Dashboard

The screenshot displays the Health and Activity Dashboard in Cisco Digital Media Manager. It features several key sections:

- Alerts:** Shows notification counts for Email (0), SNMP (0), and Syslog (0). A callout states: "All Cisco DMS notifications delivered in the past hour".
- Status:**
 - Digital Media Players:** Shows 5 DMPs (Up: 2, Down: 3).
 - Show and Share:** Shows 1 Show and Share Appliance (Up: 1, Down: 0). A callout states: "Appliance reachability and publishing jobs in progress".
 - Internal Operations:** Shows 0 scheduled publishes and 1114 publishing complete jobs.
- System Information:**
 - Digital Media Manager Version: 5.3.0
 - Appliance Serial Number: 2UX081015C
 - Disk Space:** A table showing usage for DMM and Show and Share.

Category	Used	Free
DMM	1.2 GB	14.89 GB
Show and Share	1.28 GB	415.9 GB

A callout states: "Disk space usage".
 - License Features:** A table listing various modules and their license constraints.

Module	License Constraints
Digital Media Manager Base License	No constraints on license
SNMP Notifications Module	No constraints on license
Proof of Play Module	No constraints on license
Show and Share Live Event Module	No constraints on license
Digital Signa Module	No constraints on license
Show and Share Module	No constraints on license
Capd Module	No constraints on license
Digital Media Player Pack	Limit: 1000 elements
Show and Share Content Author Pack	Limit: 1000 elements

A callout states: "Installed Licenses".
- Users Logged In:** Shows 4 users logged in in the past one hour. A callout states: "Logged-in users".

User Authentication

Navigation Path (in DMM)

Administration > Security > Authentication

The screenshot shows the User Authentication configuration page in Cisco Digital Media Manager. The page includes a navigation menu with options like Dashboard, Follow, Settings, Security, Users, Alerts, Services, and Licenses. The main content area is titled "Authentication" and contains instructions for configuring authentication modes, such as "Select Mode", "Define Filter", "Synchronize Users", and "Manage Attributes".

Alert Reports

Navigation Path (in DMM)

Administration > Alerts > Alert Reports

Identifier	Type	Source	Description	Time
2374	DeploymentSuccessEvent	Show and Share endpoint: 'PrimaryVP'	This automated email confirms your content published.	10/22/2011 9:58:45 AM PDT
2372	DeploymentSuccessEvent	Show and Share endpoint: 'PrimaryVP'	This automated email confirms your content published.	10/22/2011 9:58:40 AM PDT
2370	DeploymentSuccessEvent	Show and Share endpoint: 'PrimaryVP'	This automated email confirms your content published.	10/22/2011 9:58:36 AM PDT
2368	DeploymentSuccessEvent	Show and Share endpoint: 'PrimaryVP'	This automated email confirms your content published.	10/22/2011 9:58:32 AM PDT

Services Monitor

Navigation Path (in DMM)

Administration > Services > Show and Share

Data Server (1)	Application	Name	Status	Hardware
Show and Share Server (1)	Show and Share	Active MQ	running	Show and Share Server
	Show and Share	Postgresql	running	Show and Share Server
	Show and Share	Scheduled backup service	stopped	Show and Share Server
	Show and Share	Streaming Server	running	Show and Share Server
	Show and Share	Tomcat	running	Show and Share Server

Feature Licenses and Author Packs

Verify Which Licenses are Installed

Navigation Path (in DMM)

Administration > Licenses > View Licenses

Install New Licenses

Navigation Path (in DMM)

Administration > Licenses > Install/Upgrade Licenses
