

Preface ix

Document Revision History	ix
Audience	x
Objective	x
Document Organization	x
Document Conventions	xi
Related Publications	xi
Obtaining Documentation and Submitting a Service Request	xii

CHAPTER 1

Product Overview 1-1

Overview	1-1
Introduction	1-1
VDS-SB Components	1-2
Videoscape Distribution Suite Manager (VDSM)	1-4
Authentication, Authorization, and Accounting	1-4
Resiliency and Redundancy	1-5
VDSM Redundancy	1-5

CHAPTER 2

Getting Started 2-1

Initially Configuring the Devices	2-1
Logging In to the VDSM	2-1
Activating and Synchronizing the Devices	2-2
Activating and Setting NTP for Each Device	2-3
Navigating the VDSM	2-4
Devices, Services, and Other Tables	2-4
Devices Home Page	2-5
Task Bar	2-5
Configuring Primary and Standby VDSMs	2-7
Changing a Standby to a Primary VDSM	2-8
Recovering from Two Primary VDSMs	2-9
Typical Configuration Workflow	2-10

CHAPTER 3

Configuring Devices 3-1

- Configuring Locations 3-1
- Configuring the Service Broker 3-2
 - Activating a Service Broker 3-2
 - Broker Settings 3-4
 - Enabling Geo Location Service for Service Broker 3-4
 - Access Policy Settings for Service Broker 3-5
- General Settings 3-5
 - Login Access Control 3-6
 - Authentication 3-13
 - Setting Storage Handling 3-18
 - Network Settings 3-19
 - Configuring Notification and Tracking 3-36
 - Configuring Troubleshooting 3-52
 - Configuring URL Signing 3-52
- Configuring the VDSM 3-54

CHAPTER 4

Configuring Services 4-1

- Configuring Broker Fully Qualified Domain Names (BFQDNs) 4-1
 - Creating BFQDNs 4-1
 - Configuring BFQDN Policy 4-2
 - Creating new BFQDN Policy via GUI 4-2
 - Unassigning BFQDN from BFQDN Policy 4-16
 - Assigning Service Brokers to BFQDN 4-17
 - Assigning BFQDN Policy Settings for BFQDN 4-17
- Configuring Content Delivery Network (CDN) 4-19
 - Creating Content Delivery Networks 4-19
 - Configuring CDN Selection Policy 4-23
 - Setting Global CDN Selection Policy 4-23
 - Creating new CDN Selection Policy via GUI 4-24
 - Configuring CDN Adaptation Policy 4-25
 - Creating new CDN Adaptation Policy via GUI 4-25
 - Unassigning CDN from CDN Adaptation Policy 4-28
 - Assigning CDN Adaptation Policy for CDN 4-28

CHAPTER 5

Configuring the System 5-1

- Configuring AAA 5-1
 - Creating, Editing, and Deleting Users 5-2
 - Creating, Editing, and Deleting Roles 5-5

Creating, Editing, and Deleting Domains	5-6
Changing a Password	5-7
Configuring System Settings	5-8
System Properties	5-8
Configuring Device Offline Detection	5-9
Service Broker Policy Files	5-10
Configuring Service Broker Policy File	5-10
Configuring BFQDN Policy File	5-11
Configuring CDN Selection Policy File	5-12
Configuring CDN Adaptation Policy File	5-13
Configuring CDN IP Network File	5-14
Configuring the VDSM to Communicate with an External System	5-15
Viewing or Downloading XML Schema Files	5-17

CHAPTER 6**Monitoring the VDS-SB 6-1**

System Monitoring	6-1
System Status	6-1
Device Alarms	6-3
Service Alarms	6-4
Geo Location Server Monitoring	6-4
System Home Page	6-5
System Audit Logs	6-6
System Port Numbers	6-6
Device Monitoring	6-7
Devices Table	6-7
Devices Home Page	6-9
Using show and clear Commands	6-10
Using the VDSM show or clear Command Tool	6-10
Core Dump Files	6-13
Log Files	6-13
Transaction Logs	6-14
Usage Guidelines for Log Files	6-14
Working Logs	6-14
Archive Working Log	6-15
Exporting Log Files	6-15
Service Broker Transaction Log Fields	6-17
Service Monitor Transaction Logs	6-19

CHAPTER 7

Maintaining the VDS-SB 7-1

- Software Upgrade 7-1
 - Getting a Software File from Cisco.com 7-1
 - Finding the Software Version of the Devices 7-2
 - Configuring the Software Image Settings 7-2
 - Upgrading the Software 7-4
 - Downgrading the Software 7-4
 - Interoperability Considerations 7-4
 - Software Upgrades by Device 7-6
- Rebooting Devices 7-6
- Deleting a Device 7-7
 - Deleting a Warm Standby VDSM 7-9
- Replacing a Device 7-9
 - Replacing a VDSM 7-9
 - Replacing a VDS-SB 7-10
- Backup and Recovery Procedures 7-11
 - Performing Backup and Restore on the VDSM Database 7-12
 - Using the Cisco VDS-SB Software Recovery CD-ROM 7-13
 - System Software Components 7-13
 - Getting the Cisco VDS-SB Software Recovery File from Cisco.com 7-13
 - Installing the Software Using the Recovery CD-ROM 7-14
 - Recovering a Lost Administrator Password 7-14
 - Recovering VDS-SB Network Device Registration Information 7-15

APPENDIX A

CDN-IP Network Configuration A-1

- CDN-IP Configuration File A-1

APPENDIX B

URL Signing and Validation B-1

- Introduction B-1
- Configuring the Velocix CDN for URL Signing B-1
 - Example for Velocix CDN URL Signing Procedure B-3
 - Assumptions made in the Velocix CDN URL Signing Procedure B-3
- Configuring the Level 3 CDN for URL Signing B-3
 - Example for Level 3 CDN URL Signing Procedure B-4
- Configuring the Limelight CDN for URL Signing B-5
 - Example for Limelight CDN URL Signing Procedure B-6
- Configuring the Cisco CDN for URL Signing B-7

APPENDIX C**Software Licensing Information C-1**

Notices C-1

OpenSSL/Open SSL Project C-1

License Issues C-1
