Networking Checklist for a System with Public Access and Non-Split-Horizon DNS

During the deployment of your system, we display a page with links to the networking checklists. These checklists provide a summary of the DNS server, firewall, and other networking changes that are required for a successful deployment. Be sure to make these necessary changes prior to starting the deployment, as we do a network connectivity check near the end of the deployment process.

Note

The non-split horizon DNS is the most common DNS configuration for companies. For more information about non-split horizon DNS, see the *Cisco WebEx Meetings Server Planning Guide*.

Note

If you are deploying a large system, then you must choose a manual deployment.

Select the correct checklist in the *Cisco WebEx Meetings Server Planning Guide*.

- Automatic deployment: see "Networking Checklist For an Installation or Expansion With Automatic Deployment, Public Access, and a Non-Split-Horizon DNS"
- Manual deployment: see "Networking Checklist For an Installation or Expansion With Manual Deployment, Public Access, and a Non-Split Horizon DNS"
