

Cisco Unity Connection Provisioning Interface (CUPI) API -- Enumeration Types API

- [Explanation of Data Field, on page 1](#)

Explanation of Data Field

Name	Value	Description
SystemGreeting	0	System greeting - Cisco Unity Connection plays a prerecorded greeting along with the recorded name of the subscriber (for example, "Sorry, <subscriber name> is not available"). If the subscriber does not have a recorded name, Cisco Unity Connection plays the subscriber extension instead. When a greeting is enabled but not recorded, Cisco Unity Connection plays a prerecorded system greeting.
RecordedGreeting	1	Recorded greeting - use a personal recording for the call handler (or subscriber). This can be recorded over the phone or from the Cisco Unity Connection Administration and CPCA administrative interfaces on the call handler/subscriber.
NoGreeting	2	No greeting is played.
