Bug Severity Levels

Known problems (bugs) are graded according to severity level. The following table describes bug severity levels:

Severity Level		Description
1	Catastrophic	Reasonably common circumstances cause the entire system to fail, or a major subsystem to stop working, or other devices on the network to be disrupted. No workarounds exist.
2	Severe	Important functions are unusable and workarounds do not exist. Other functions and the rest of the network is operating normally.
3	Moderate	Failures occur in unusual circumstances, or minor features do not work at all, or other failures occur but low-impact workarounds exist. This is the highest level for documentation bugs.
4	Minor	Failures occur under very unusual circumstances, but operation essentially recovers without intervention. Users do not need to install any workarounds and performance impact is tolerable.
5	Cosmetic	Defects do not cause any detrimental effect on system functionality.
6	Enhancement	Requests for new functionality or feature improvements.

Search for Bugs

To search for bugs, do the following:

Procedure

- Step 1** Go to <https://tools.cisco.com/bugsearch/search>.
 - Step 2** Sign in with your Cisco.com user ID and password.
 - Step 3** Enter the bug ID or specify search parameters.
-

What to Do Next

For more information, select **Help** on the **Bug Search** page.

Open Caveats

No new open caveats in this release.

Closed Caveats

No new caveats have been closed in this release.

Resolved Caveats

No new caveats have been resolved in this release.
