About Inbound and Outbound Calling

This part describes how to set up the inbound and outbound calling for your system.

Inbound and Outbound Calling Configuration

Complete the following task flows to configure Inbound and Outbound Calling for your system.

Procedure

	Command or Action	Purpose
Step 1	Gateway Configuration Task Flow	Add gateways to your system.
Step 2	SIP Normalization and Transparency Configuration Task Flow	Optional. Configure SIP Normalization and transparency scripts that you can assign to SIP trunks or SIP devices in order to resolve SIP interoperability issues.
Step 3	Configure SDP Transparency Profile	Optional. If your SIP deployment requires support for SDP attributes that are not natively supported by Unified Communications Manager, set up an SDP transparency profile that includes the non-supported attributes.
Step 4	SIP Profile Overview	Configure SIP profiles for your SIP trunks and SIP devices.
Step 5	IPv6 Configuration Task Flow	Optional. If your SIP deployment requires support for IPv6 devices, configure dual stack IPv6 support in your system. Dual stack can be configured for SIP deployments only.

	Command or Action	Purpose
Step 6	SIP Trunk Configuration Task Flow	Configure SIP trunks for your system.
Step 7	H.323 Trunk Overview	Configure H.323 trunks for your system.
Step 8	Survivable Remote Site Telephony Configuration Task Flow	Configure your system for SRST.
