### New and Changed Information

The following table provides an overview of the significant changes to the features in this guide up to this current release. The table does not provide an exhaustive list of all changes made to the guide or of the new features up to this release.

**Table 1: New Features and Changed Behavior in Unified Communications Manager and IM and Presence Service**

Feature or Change	Description	See	Date
Initial Release of Document for Release 14	—	—	March 31, 2021
Enable SIP OAuth for 78xx and 88xx Phones	SIP OAuth provides end to end secure signaling and media encryption without CAPF on-premises as well as over MRA and by default, TFTP is secure for SIP phones when SIP OAuth is enabled.	<ul style="list-style-type: none"> <li>• <a href="#">SIP OAuth Mode Configuration Task Flow</a></li> <li>• <a href="#">Enable OAuth Access Token for Devices</a></li> </ul>	March 31, 2021
Headset and Accessories Inventory Download	This feature enables an administrator to download a detailed report of Headsets and Accessories in the deployment into a CSV file from the Unified Communications Manager user interface.	<a href="#">Headset and Accessories Inventory</a>	March 31, 2021
MRA Failover with Lightweight Keepalives	The MRA High-Availability for endpoint registration feature allows Cisco Webex and Cisco Jabber clients to quickly detect any failure of network elements like Cisco Expressway-E, Cisco Expressway-C, or Unified Communications Manager in the path and take corrective action to re-register using a new path.	<a href="#">MRA Failover with Lightweight Keepalives</a>	March 31, 2021

Feature or Change	Description	See	Date
Native Phone Migration using IVR and Phone Services	Using this feature, an end user or an administrator can easily migrate all the settings from an old phone to a new phone with a simple user interface.	<a href="#">Native Phone Migration using IVR and Phone Services Overview</a>	March 31, 2021
Oracle JRE Removal from Manager Assistant	The Oracle Java Runtime Environment (JRE) is no longer included in the Cisco Unified Communications Manager Assistant plug-in.	<a href="#">Manager Assistant Prerequisites</a>	March 31, 2021
Initial Release of Document for Release 14SU1	—	—	October 27, 2021
Support for Meraki Access Points	Unified Communications Manager supports <b>Location Awareness</b> for wireless endpoints connecting through Meraki Access Points.	<a href="#">Location Awareness Overview</a>	October 27, 2021
TFTP Proxy Support for OAuth	Unified Communications Manager supports TFTP Proxy in SIP OAuth deployments.	<a href="#">Enable SIP OAuth Mode</a>	October 27, 2021
Wi-Fi to LTE Call Handoff	Unified Communications Manager provides flexibility for Cisco Webex users to switch between Wi-Fi and LTE networks without disconnecting any active calls that the user may be while switching network.	<a href="#">Wi-Fi to LTE Call Handoff</a>	October 27, 2021
Initial Release of Document for Release 14SU2	—	—	June 16, 2022
RedSky E911 Location Services Support	The RedSky solutions integrated with Unified Communications Manager allow the clients to have an active location URI for 9-1-1 emergency calling coverage for their entire workforce, whether on campus or remote, and send the calls to emergency responders.	<a href="#">Emergency Call Handling with RedSky</a>	June 16, 2022
Secure Call Support for Parking Lot	Unified Communications Manager handles the originating SRTP-only call as a secure call throughout, irrespective of the SRTP fallback option status.	<a href="#">Secure Call Queuing</a>	June 16, 2022
