

User Device Profile File Format Addition

This chapter provides information to associate the user device file format with the text-based CSV data file. After you have entered all the values into the text-based CSV data file in the order that the file format specified, you need to upload the text-based CSV data file to the first node in Cisco Unified Communications Manager. You must then associate the file format with the text-based CSV data file.

Add User Device Profile File Format

Use BAT to associate the file format with the text-based CSV data file.

Procedure

- Step 1** Choose **Bulk Administration > User Device Profile > UDP File Format > Add File Format**. The **Add File Format Configuration** window displays.
- Step 2** In the **File Name** field, choose the CSV data file that you created for this bulk transaction.
- Step 3** In the **File Format Name** field, choose the file format that you created for this type of bulk transaction.
- Step 4** To add the matching file format with the CSV data file, click **Submit**.
- A job is created in the Job Scheduler option in the **Bulk Administration** menu. Use **Job Configuration** window to modify the job schedule.
