

## Phone Resets and Restarts

---

This chapter provides information to reset or restart devices without updating any attributes. Use this procedure if a problem arises, and you must reset or restart the phones with a bulk transaction. You can locate phones that you want to reset using either a query or a custom file.

- [Reset or Restart Phone Using Query, on page 1](#)

### Reset or Restart Phone Using Query

You can create a query to locate phones that you want to reset or restart.

#### Procedure

---

**Step 1** Choose **Bulk Administration > Phones > Reset/Restart Phones > Query**. The **Reset/Restart Phones Configuration** window displays.

**Step 2** From the first **Find Phones where** drop-down list box, choose one of the following criteria:

- Device Name
- Description
- Directory Number
- Calling Search Space
- Device Pool
- Device Type
- Call Pickup Group
- LSC Status
- Authentication String
- Device Protocol
- Security Profile
- Common Device Configuration

From the second **Find Phone where** drop-down list box, choose one of the following criteria:

- begins with

- contains
- is exactly
- ends with
- is empty
- is not empty

**Step 3** Specify the appropriate search text, if applicable.

**Tip** To find all phones that are registered in the database, click **Find** without entering any search text.

**Step 4** To further define your query, you can choose AND or OR to add multiple filters and repeat [Step 2, on page 1](#) and [Step 3, on page 2](#).

**Step 5** Click **Find**.

A list of discovered templates displays by

- Device Name
- Description
- Device Pool
- Device Protocol
- Status
- IP Address

**Step 6** From the list of records, click the device name that matches your search criteria.

**Step 7** Click one of the following options:

- Reset—To reset (power-cycle) the phones
- Restart—To reset phones without power-cycling
- Apply Config—To reset only the settings that have changed since the last reset

**Step 8** In the Job Information area, enter the Job description.

**Step 9** Choose an insert method. Do one of the following:

- Click **Run Immediately** to insert phone records immediately.
- Click **Run Later** to insert phone records at a later time.

**Step 10** To create a job for inserting the phone records, click **Submit**.

To schedule this job, activate this job, or both, use the **Job Configuration** window.

## Reset or Restart Phone Using Custom File

You can create a custom file of phones that you want to reset or restart using a text editor. You can use either device names or directory numbers in the custom file.

### Before you begin

1. Create a text file that lists one of these details for the phones that you want to reset or restart:
  - Device names
  - Description
  - Directory numbers

---

**Note** Put each item on a separate line in the text file.

---

2. Upload the file to the first node of Unified Communications Manager.

### Procedure

---

- Step 1** Choose **Bulk Administration > Phones > Reset/Restart Phones > Custom File**. The **Reset/Restart Phones Custom Configuration** window displays.
- Step 2** In the **Update Phones where** drop-down list box, choose the type of custom file that you have created from one of the following criteria:
- Device Name
  - Directory Number
  - Description
- Step 3** In the list of custom files, choose the filename of the custom file for this update and then click **Find**.
- Caution** If no information is entered into the query text box, the system resets or restarts all phones.
- Step 4** Click one of the following
- Reset—To reset (power-cycle) the phones
  - Restart—To reset phones without power-cycling
  - Apply Config—To reset only the settings that have changed since the last reset
- Step 5** In the **Job Information** area, enter the Job description.
- Step 6** Choose an insert method. Do one of the following:
- a) Click **Run Immediately** to insert phone records immediately.
  - b) Click **Run Later** to insert phone records at a later time.
- Step 7** To create a job for inserting the phone records, click **Submit**.  
To schedule and/or activate this job, use the **Job Configuration** window.

# Wipe or Lock Phones Using Query

You can create a query to locate phones that you want to wipe and/or lock.

**Caution**

The wipe operation cannot be undone. You should only perform this operation when you are sure you want to reset the phone to its factory settings.

**Procedure****Step 1**

Choose **Bulk Administration > Phones > Wipe and Lock Phones > Query**.  
The **Wipe and Lock Phones Configuration** window displays.

**Step 2**

From the first **Find Phones where** drop-down list box, choose one of the following criteria:

- Device Name
- Description
- Directory Number
- Calling Search Space
- Device Pool
- Device Type
- Call Pickup Group
- LSC Status
- Authentication String
- Device Protocol
- Security Profile
- Common Device Configuration

From the second **Find Phone where** drop-down list box, choose one of the following criteria:

- begins with
- contains
- is exactly
- ends with
- is empty
- is not empty

**Step 3**

Specify the appropriate search text, if applicable.

**Tip** To find all phones that are registered in the database, click **Find** without entering any search text.

**Step 4**

To further define your query, you can choose AND or OR to add multiple filters and repeat [Step 2](#) and [Step 3](#).

**Step 5**

Click **Find**.

A list of discovered templates displays by

- Device Name
- Description
- Device Pool

- Device Protocol
- Status
- IP Address

**Step 6** From the list of records, click the device name that matches your search criteria.

**Step 7** Click one of the following options:

- Lock—To lock the phones
- Wipe—To wipe the phones
- Wipe and Lock—To wipe and lock the phones

**Note** If a phone does not support the functionality you have chosen, the transaction will fail for that phone. It will also fail if the functionality has already been requested for the phone.

**Step 8** In the Job Information area, enter the Job description.

**Step 9** Choose an insert method. Do one of the following:

- a) Click **Run Immediately** to wipe or lock phones immediately.
- b) Click **Run Later** to wipe or lock phones at a later time.

**Step 10** To create a job for locking and/or wiping the phones, click **Submit**.

To schedule and/or activate this job, use the **Job Configuration** window.

---

## Wipe or Lock Phones Using Custom File

You can create a custom file of phones that you want to wipe and/or lock using a text editor. You can use either device names or directory numbers in the custom file.

### Before you begin

---

**Caution** The wipe operation cannot be undone. You should only perform this operation when you are sure you want to reset the phone to its factory settings.

---

1. Create a text file that lists one of these details for the phones that you want to wipe and/or lock:
  - Device names
  - Description
  - Directory numbers

---

**Note** Put each item on a separate line in the text file.

---

2. Upload the file to the first node of Unified Communications Manager.

## Procedure

---

- Step 1** Choose **Bulk Administration > Phones > Wipe and Lock Phones > Custom File**. The **Wipe and Lock Phones Configuration** window displays.
- Step 2** In the **Update Phones where** drop-down list box, choose the type of custom file that you have created from one of the following criteria:
- Device Name
  - Directory Number
  - Description
- Step 3** In the list of custom files, choose the filename of the custom file for this update and then click **Find**.
- Caution** If no information is entered into the query text box, the system wipes or locks all phones.
- Step 4** Click one of the following:
- Lock—To lock the phones
  - Wipe—To wipe the phones
  - Wipe and Lock—To wipe and lock the phones
- Note** If a phone does not support the functionality you have chosen, the transaction will fail for that phone. It will also fail if the functionality has already been requested for the phone.
- Step 5** In the **Job Information** area, enter the Job description.
- Step 6** Choose an insert method. Do one of the following:
- a) Click **Run Immediately** to wipe or lock phones immediately.
  - b) Click **Run Later** to wipe or lock phones at a later time.
- Step 7** To create a job for locking and/or wiping the phones, click **Submit**. To schedule and/or activate this job, use the **Job Configuration** window.
