## Introduction

Cisco Unified Communications Manager Device Package Release 15.0(1.12004-1) provides database and firmware updates for Cisco Unified Communications Manager 15.

For information about all released Cisco Unified Communications Manager device packages, see the [Cisco Unified Communications Manager Device Package Compatibility Matrix](#).

For information about how to install Cisco Unified Communications Manager device packages, see the [Cisco Unified Communications Manager Device Package Installation Guide](#).

**Caution** Installing the Device Package on the Publisher causes all of the device XML data to be reloaded into the database. This can cause high CPU on the Subscribers while these changes are being processed. It is recommended that Device Package installations occur during a maintenance window to minimize the impact of the database updates.

## Cisco Unified Communications Device Package 15

**Caution** After applying the device package COP file, make sure that any future full upgrades are to a version that contains the device package fixes natively. Otherwise, some of the functionality added by the device package may be lost following the upgrade. If an upgrade to a version that does not contain the fixes natively is necessary, install the appropriate device package COP file to restore functionality.
