- [Cisco Product Security Overview, on page iv](#)

Purpose

This document describes the steps to change the IP address and hostname of Cisco Unified Communications Manager nodes, as well as IM and Presence Service nodes. Additional procedures to configure the domain name and node name of IM and Presence Service nodes are also provided.

Audience

This document is intended for administrators who are responsible for administering Cisco Unified Communications Manager deployments and IM and Presence Service software.

Organization

The following table shows how this guide is organized.

Chapter	Description
Chapter 1	“IP address, hostname, and other network identifier changes” Provides an overview of how to change the IP address and hostname for nodes in your deployment, as well as where to go for more information to perform other changes to network identifiers. A high-level workflow diagram is included.

Chapter	Description
Chapter 2	“Pre-change tasks and system health checks” Provides instructions to complete the tasks that you must perform before you change an IP address, hostname, or other network identifiers.
Chapter 3	“IP address and hostname changes” Provides instructions to change the IP address and hostname of nodes in your deployment.
Chapter 4	“Domain name and node name changes” Provides instructions to change the network-level DNS default domain name and node name of an IM and Presence Service node.
Chapter 5	“Post-change tasks and verification” Provides instructions to complete the tasks that you must perform after you change an IP address, hostname, or other network identifiers. Post-change tasks for security-enabled Cisco Unified Communications Manager clusters are included.
Chapter 6	“Troubleshooting” Provides instructions to help you troubleshoot IP address and hostname changes.

Conventions

This document uses the following conventions:

Convention	Description
boldface font	Commands and keywords are in boldface .

Convention	Description
<i>italic</i> font	Arguments for which you supply values are in <i>italics</i> .
[]	Elements in square brackets are optional.
{ x y z }	Alternative keywords are grouped in braces and separated by vertical bars.
[x y z]	Optional alternative keywords are grouped in brackets and separated by vertical bars.
string	A nonquoted set of characters. Do not use quotation marks around the string or the string will include the quotation marks.
screen font	Terminal sessions and information the system displays are in screen font.
boldface screen font	Information you must enter is in boldface screen font.
<i>italic screen</i> font	Arguments for which you supply values are in <i>italic screen</i> font.
	This pointer highlights an important line of text in an example.
^	The symbol ^ represents the key labeled Control—for example, the key combination ^D in a screen display means hold down the Control key while you press the D key.
< >	Nonprinting characters, such as passwords, are in angle brackets.

Notes use the following conventions:

Note Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the publication.

Tips use the following conventions:

Tip Means the information contains useful tips.

Caution Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.
