Introduction

The commands in this section are specific to Cisco Prime License Manager. For platform-specific commands, see the [Command Line Interface Guide for Cisco Unified Communications Solutions](#).

license file

This command asks to select a license file from a list.

license file {**diagnose**|**get**}

Syntax Description

Parameters	Description
diagnose	Prints diagnostic information of the selected file.
get	Creates a TAR file of the license file(s) on the system and transfers the TAR file to a remote area.

Command Modes

Administrator (admin:)

Requirements

Command privilege level: 1

Allowed during upgrade: No

Applies to: Enterprise License Manager, Cisco Prime License Manager

license management change user name

This command takes parameters interactively and changes the username of the administrator.

license management change user {name}

Syntax Description

Parameters	Description
name	Specifies the administrator username.

Command Modes

Administrator (admin:)

Requirements

Command privilege level: 1

Allowed during upgrade: No

Applies to: Enterprise License Manager, Cisco Prime License Manager

license management reset user password

This command takes parameters interactively and changes the password of the administrator.

license management reset user {password}

Syntax Description	Parameters	Description
	<code>password</code>	Specifies the administrator password.

license management list users

Command Modes	Administrator (admin:)
Requirements	<p>Command privilege level: 1</p> <p>Allowed during upgrade: No</p> <p>Applies to: Enterprise License Manager, Cisco Prime License Manager</p>

license management product re-register all

This command forces re-registration of all product instances associated with this Enterprise License Manager/Cisco Prime License Manager server. This command may take some time for re-registration and synchronization with all product instances to complete.

license management product re-register all

Command Modes	Administrator (admin:)
Requirements	<p>Command privilege level: 1</p> <p>Allowed during upgrade: No</p>

Applies to: Enterprise License Manager, Cisco Prime License Manager

license management reset

This command resets the identity, store data, and essentially removes all the installed licenses. It also restarts the Cisco Prime License Manager server process to make the changes effective.

license management reset {identity| registration}

Syntax Description

Parameters	Description
identity	Resets the identity
registration	Resets the registration

Command Modes

Administrator (admin:)

Requirements

Command privilege level: 1

Allowed during upgrade: No

Applies to: Enterprise License Manager, Cisco Prime License Manager

license management security update

This command downloads Cisco Prime License Manager security update from the specified remote server location and installs the contents of the specified security update file.

license management security update

Requirements

Command privilege level: 1

Allowed during upgrade: No

Applies to: Enterprise License Manager, Cisco Prime License Manager

license management service

This command activates or deactivates a given service on the Cisco Prime License Manager server.

license management service {activate| deactivate}

Syntax Description

Parameters	Description
activate	Activates a given service on the Cisco Prime License Manager server.
deactivate	Deactivates a given service on the Cisco Prime License Manager server.

Command Modes

Administrator (admin:)

Requirements

Command privilege level: 1

Allowed during upgrade: No

Applies to: Enterprise License Manager, Cisco Prime License Manager

license management set log level

license management set log level core_services

This command sets the log level for core services.

```
license management set log level core_services {error| warning| info| debug}
```

Syntax Description

Parameters	Description
error	Provides runtime errors or unexpected conditions that could be critical.
warning	Provides messages about potential problems.
info	Provides general information that may be useful. This parameter is set by default.
debug	Provides detailed information about the flow of the process. We recommend that you use set this parameter on an as needed basis only.

Command Modes

Administrator (admin:)

Requirements

Command privilege level: 1

Allowed during upgrade: No

Applies to: Cisco Prime License Manager.

license management set log level product_instances

This command sets the log level for product instances.

license management set log level product_instances {error| warning| info| debug}

Syntax Description
