FIPS 140-2 Mode Setup

This chapter provides information about FIPS 140-2 mode setup.

FIPS Mode Not Supported in 12.x

Releases 12.0(1) and 12.5(1) of Cisco Unified Communications Manager and the IM and Presence Service do not support FIPS mode. If you are upgrading from an earlier release with FIPS mode, Enhanced Security Mode, or Common Criteria Mode enabled, you must disable them prior to the upgrade. TFTP and other services will not work in 12.0(1) or 12.5(1) with FIPS mode enabled.

FIPS Mode Not Supported in 12.x
