

Phone Settings page

The Phone Settings page displays the basic phone settings that can be configured by an end user, such as phone description and language settings. The phone settings that are displayed depends on which phone you are configuring.

This chapter contains the following topics:

- [Change phone settings, page 1](#)
- [Download phone user guide, page 1](#)

Change phone settings

To change a phone setting, click **Phone Settings** in the toolbar to open the Phone Settings page. Enter the new text, and click **Save**.

Download phone user guide

Cisco Unified CM User Options gives users the ability to download the user guide for their specific phone model. To download the phone user guide, from the Phone Settings page, click **Download User Guide**.
