1. Cisco posts to the Software Center regular IOS Image rebuilds that contain DDTs fixes only. It is recommended that the latest (highest number) Cisco IOS Software rebuild be used when choosing a new version. For details regarding Cisco IOS software releases, go to

[http://www.cisco.com/en/US/partner/products/sw/iosswrel/ios\\_abcs\\_ios\\_networking\\_the\\_enterprise\\_listing.html](http://www.cisco.com/en/US/partner/products/sw/iosswrel/ios_abcs_ios_networking_the_enterprise_listing.html).

2. The version numbers for Unified CME 3.3 or later GUI files can be found in either “Help About” within Internet Explorer or in the CME\_gui\_readme.txt file downloaded with the Cisco IOS release.

3. Specifications provide details about supported platforms and IP phone firmware version information.

4. Only the features Idle URL and New Phone Support (8821/8845/8865) for Unified CME Release 12.0 are supported on the 15.7(3)M version of T-train.

## Obtain Documentation and Submit a Service Request

For information on obtaining documentation, using the Cisco Bug Search Tool (BST), submitting a service request, and gathering additional information, see [What's New in Cisco Product Documentation](#).

To receive new and revised Cisco technical content directly to your desktop, you can subscribe to the [What's](#) New in Cisco Product Documentation RSS feed. The RSS feeds are a free service.
