Adding NTP Server and Configuring Time Zone

You must add an NTP server to your Cisco Unified SIP Proxy system and configure the time zone to ensure that system processes have the correct date and time associated with them.

Adding an NTP Server

Restriction You can have a maximum of three NTP servers.

Procedure

- Step 1** Choose **System > Network Time & Time Zone Settings**.
The system displays the Network Time & Time Zone Settings page.
- Step 2** Click **Add**.
The system displays the Add a NTP Server page.
- Step 3** Enter the hostname or IP address of the NTP server. To make it the primary NTP server, check the **Preferred** check box.
- Step 4** Click **Add**.

The system displays the Network Time and Time Zone Settings page with the new server listed in the table.

What to do next

Save the configuration. See [Managing the System Configuration](#).

Reload the configuration. See [Using the Administration Control Panel](#).
