Initial Release of Document for Release 12.6(1)		May 2021

## About This Guide

This document describes how to configure and administer using CLI commands for Cisco Virtualized Voice Browser.

## Audience

This guide helps the administrator to configure Cisco VVB server using Serviceability portal and CLI.

## Related Documents

Cisco VVB provides the following documentation:

- *Solution Design Guide for Cisco Unified Customer Voice Portal*
- *Configuration Guide for Cisco Unified Customer Voice Portal*
- *Solution Port Utilization Guide for Cisco Virtualized Voice Browser*

- *Operations Guide for Cisco Virtualized Voice Browser*
- *Developer Guide for Cisco Virtualized Voice Browser*

## Communications, Services, and Additional Information

- To receive timely, relevant information from Cisco, sign up at [Cisco Profile Manager](#).
- To get the business impact you're looking for with the technologies that matter, visit [Cisco Services](#).
- To submit a service request, visit [Cisco Support](#).
- To discover and browse secure, validated enterprise-class apps, products, solutions and services, visit [Cisco Marketplace](#).
- To obtain general networking, training, and certification titles, visit [Cisco Press](#).
- To find warranty information for a specific product or product family, access [Cisco Warranty Finder](#).

### Cisco Bug Search Tool

[Cisco Bug Search Tool](#) (BST) is a web-based tool that acts as a gateway to the Cisco bug tracking system that maintains a comprehensive list of defects and vulnerabilities in Cisco products and software. BST provides you with detailed defect information about your products and software.
