

# **PostInstallation Tasks**

Access Unified CCX Administration web interface to perform initial system configurations after you install Unified CCX.

- Configure First Node, on page 1
- Configure Second Node, on page 2
- Switch Network Deployment from LAN to WAN, on page 2
- Install Unified CCX Clients, on page 3

### **Configure First Node**

#### Before you begin

Verify that the following users are added in Unified Communications Manager application:

- Unified CM Users These are end users in Unified Communications Manager that are assigned in Unified CCX as administrators. Using administrator credentials, you can login to the following components for Unified CCX:
  - Unified CCX Application Administration
  - Cisco Unified CCX Serviceability
  - Cisco Finesse Administration
  - Cisco Unified Intelligence Center Administration
  - Cisco Identity Service

These users are required to integrate Unified Communications Manager with Unified CCX. For information on adding Unified CM users, see topic "Adding Users to a User Group" under the "User Management Configuration" section and "User Group Configuration" sub section in the *Cisco Unified Communications Manager Administration Guide* at:

https://www.cisco.com/c/en/us/support/unified-communications/unified-communications-manager-callmanager/products-maintenance-guides-list.html.

	Procedure Log in to Cisco Unified CCX Administration page on the first node to initiate the configuration using the following URL format:				
Step 1					
	http:// <servername address="" ip="" or="">/appadmin</servername>				
	Note	Use the credentials entered for <b>Application User Name</b> and <b>Application User</b> <b>Password</b> during installation.			
Step 2	Follow instructions on the screen to complete the configurations.				
	Note	Use the credentials of the Unified Communications Manager End User having administrator privileges in Unified CCX to configure the application users (AXL users).			

What to do next

Add Second Node

## **Configure Second Node**

#### Procedure

Step 1	Log in to Cisco Unified CCX Administration page of the second node to initiate the configuration.				
	Note	Use the credentials entered for <b>Application User Name</b> and <b>Application User</b> <b>Password</b> during installation.			
Step 2	In the Welcome to Unified CCX Replication Wizard page, enter values for all the fields and click Next.				
Step 3	In the Component Activation page, wait until all the components get activated and then click Next.				
	If you have selected <b>Network Deployment Type</b> as LAN, the <b>Cisco Unified CCX Setup Result Information</b> page gets displayed.				
Step 4	If you l Config	have selected <b>Network Deployment Type</b> as WAN, enter appropriate values in <b>Cisco Unified CM</b> <b>uration</b> page. Follow instructions on the screen to complete the configurations.			

### Switch Network Deployment from LAN to WAN

You can change a LAN-based two-node setup to work over WAN. To change the network deployment from LAN to WAN for a two-node setup, do the following:

#### Procedure

Step 1	Log in to the first no	ode using the Unified	d CCX Administration	web interface.
--------	------------------------	-----------------------	----------------------	----------------

- **Step 2** Choose System > Server, and delete the second node from the list.
- **Step 3** Add the second node details again on the first node. See Add Second Node.
- Step 4 Reinstall node 2. See Install Unified CCX on Second Node
- Step 5 Configure the second node, and select the Network Deployment Type as WAN. See Configure Second Node.
- **Step 6** Add or configure new Unified Communications Manager Telephony Call Control Groups for the second node.

For more information, see the "Unified CM Telephony Call Control Group configuration" section of the *Cisco Unified Contact Center Express Administration and Operations Guide*, available here:

http://www.cisco.com/en/US/products/sw/custcosw/ps1846/products\_installation\_and\_configuration\_guides\_list.html

### Install Unified CCX Clients

#### Before you begin

You must configure the DNS client on your local machine to access Unified CCX Editor.

If your local machine is not in the domain where Unified CCX resides, enter the hostnames in the local host file for the machines that house Unified CCX nodes.

#### Procedure

Step 1 Select Tools > Plug-ins.

Step 2 Select Cisco Unified CCX Editor to install Unified CCX Editor.

**Step 3** Select Cisco Unified Real-Time Monitoring Tool for Windows or Cisco Unified Real-Time Monitoring Tool for Linux as required to install Unified RTMT.

#### What to do next

Add Second Node for high availability.
