

Common Tasks

- Browser Settings for Agent and Supervisor Desktop, on page 1
- Change Your State, on page 1
- Sign In to Cisco Finesse Desktop, on page 2
- Accept Security Certificates, on page 5
- Accept Certificates for Multi-session Chat and Email, on page 9
- Sign Out of the Finesse Desktop, on page 9
- Desktop Chat, on page 10
- Edit Call Variables, on page 15
- Live Data Reports, on page 16
- View My History, on page 17
- View Team Message, on page 18
- Drag-and-Drop and Resize Gadget or Component, on page 18

Browser Settings for Agent and Supervisor Desktop

To ensure that all features of the Cisco Finesse agent and supervisor desktop work properly, you must disable popup blockers from the following supported browsers:

• Internet Explorer v11.345.17134 or later in Native Mode.

Apart from disabling popup blockers, to configure the privacy and advanced settings in Internet Explorer, go to **Tools** > **Internet Options** > **Privacy**. Enter the domain name of Side A and B Finesse servers, and click **Allow**.

- Google Chrome v76.0.3809 or later.
- Firefox Extended Supported Release (ESR) 68 and later ESRs.
- Microsoft Edge v41.16299.15.0 or later.

Change Your State

When you sign in to Cisco Finesse desktop, by default your state is set to Not Ready. This is applicable to both voice and digital channels.

You can set your state to Ready or you can choose from one of the configured Not Ready reasons.

While you are on a call, chat or replying to an email, you can select and apply a state when you complete the task.

Change Your State for Voice Channels

When you sign in to Cisco Finesse desktop, by default your state is set to Not Ready. To accept incoming call, you must set your state to Ready.

When you answer a call, you can change your state after you complete the call. If Wrap-Up is required, when a call ends you transition to Wrap-Up state. While in Wrap-Up state, you can complete any after call work. If Wrap-Up is optional, you can select Wrap-Up while on call to transition to Wrap-Up state when the call ends.

To end the Wrap-Up state, you must select your new state from the drop-down or wait for the preconfigured timer to expire.

Procedure

Step 1 Click the drop-down besides your current state.

Step 2 Select the appropriate state from the list.

Your agent state changes to reflect your new selected state. If you select change of state while you are still on call, the state change will reflect after you complete the call.

Change Your State for Digital Channels

When you sign in to the Finesse desktop, your state is set to Not Ready by default.

If you are in Ready state, you can set your state to Not Ready.

To accept incoming chat and email contacts, you must set your state to Ready.

Procedure

Step 1 Click the drop-down arrow beside your current state.

Step 2 Select the appropriate state from the list.

Sign In to Cisco Finesse Desktop

Cisco Finesse Release 12.5(1) supports custom security banner message for Finesse desktop users. If your administrator has defined the custom banner message, then it is displayed in the desktop **Sign In** page.

Extension Mobility brings a user-specific phone profile (including configured extensions for that user) to the phone being logged in from. After logging in to Cisco Unified Communications Manager with Extension Mobility, agents can log in to Unified CCX using Finesse.

If you log in to any other Extension Mobility device when you are still logged in to one Extension Mobility device and Finesse Desktop, you are automatically logged off from the first Extension Mobility device. However, you have to log out and log in again to Finesse Desktop.

Procedure

- Step 1 Sign in to the administration console on the primary UCCX server using the URL: https://FQDN of Unified CCX server:8445/desktop, where FQDN is the fully qualified domain name of your primary server.
- **Step 2** If your contact center has installed a language pack for Cisco Finesse, on first login, a language selector screen appears on the desktop. From the language selector drop-down, choose the language that you want to appear on the desktop. Click **Next**.
 - **Note** You can also select a language by passing the locale as part of the URL (for example, https://FQDN of Primary Server:8445/desktop?locale=fr_FR) or by changing your browser preferred language. The default language is English (en_US).

If your contact center does not have a language pack installed for Cisco Finesse, the desktop locale is English only.

- **Step 3** In the Username field, enter your agent ID or username.
 - Agent IDs are case-sensitive and can contain letters, numbers, hyphens (-), underscores (_), and periods (.). Agent IDs are assigned to you by your administrator. Agent IDs cannot begin or end with a period or contain two periods in a row.
 - Cisco Finesse agent usernames are restricted to 7-bit printable ASCII characters (any of the 94 characters with the numeric values from 33 to 126). The supported characters are: **A-Z and 0-9**,,,-,!, ~,`,\$,^,&,(,),",',{,},@,.. The following characters are not supported: /, \, [,],:,;,], =,,,+, *,?, <, >.
 - The Username (desktop Sign In page) in Unified CCX deployment refers to the AgentID.
- **Step 4** In the **Password** field, enter your password.
- **Step 5** In the **Extension** field, enter the extension of your phone.
- Step 6 Click Sign In.
 - Note
 The Sign In button is enabled once the username, password, and extension fields are entered. If any field is incomplete, the Sign In button remains disabled.
 - If sign in fails due to device errors the desktop attempts to automatically sign in again. An alert is displayed detailing the number of remaining retries and the time left for the next retry attempt.
- **Step 7** To change the language that appears on your desktop, use the **Change the Language** link. On the language selector screen, choose the language.

You are signed in to the Cisco Finesse desktop and your status is set to Not Ready. On clicking the user options on the top right corner, your role (agent or supervisor), agent name, agent ID, extension, and mobile number appear in the drop-down.

Note When you log in to the Finesse desktop for the first time, you are prompted to set your preference for notifications. Choose the option to always receive or allow toaster notifications. Toaster notifications will not appear if your browser is set to private mode that is **New incognito window** in Chrome, or **New private window** in Firefox.

Sign In to Cisco Finesse Desktop Single Sign-On Mode

Cisco Finesse Release 12.5(1) supports custom security banner message for Finesse desktop users. If your administrator has defined the custom banner message, then it is displayed in the desktop **Sign In** page.

Procedure

- Step 1Sign in to the administration console on the primary UCCX server using the URL: https://FQDN of Unified
CCX server:8445/desktop, where FQDN is the fully qualified domain name of your primary server.
- **Step 2** If your contact center has installed a language pack for Cisco Finesse, on first sign-in, a Language Selector screen appears on the desktop. From the language selector drop-down, choose the language that you want to appear on the desktop. Click Next.
 - **Note** You can also select a language by passing the locale as part of the URL (for example, https://FQDN of Primary Server:8445/desktop?locale=fr_FR) or by changing your browser preferred language. The default language is English (en_US).

If your contact center does not have a language pack installed for Cisco Finesse, the desktop locale is English only.

- **Step 3** On the IdP page, enter your operating system Username and Password, and click Sign in.
- **Step 4** In the Extension field, enter your extension and click Submit.
 - If sign in fails due to device errors the desktop attempts to automatically sign in again. An alert is displayed detailing the number of remaining retries and the time left for the next retry attempt.
- **Step 5** To change the language that appears on your desktop, use the **Change the Language** link. On the language selector screen, choose the language.

You are signed in to the Cisco Finesse desktop and your status is set to Not Ready. On clicking the user options on the top right corner, your role (agent or supervisor), agent name, agent ID, extension, and mobile number appear in the drop-down.

Note On first sign-in, you are prompted to set your preference for notifications. On the sign-in page, Username field is auto populated and disabled. Choose the option to always receive or allow toaster notifications. Toaster notifications will not appear if your browser is set to private mode that is New incognito window in Chrome, or New private window in Firefox.

Account Locked After Five Failed Sign In Attempts

If you try to sign in to Finesse with the wrong password for five times in a row, Finesse blocks access to your account for five minutes. For security reasons, if you try to sign in again during that time, Finesse does not alert you that your account is locked. You must wait five minutes and try again. Do not attempt to sign in again when your account is locked, otherwise the lockout timer resets, and you must wait an additional five minutes.

This restriction applies to all the sign in methods.

Accept Security Certificates

The first time you sign in to the Finesse desktop, you may be prompted to accept security certificates before you can continue. These certificates allow the Finesse desktop to communicate over a secure connection with the Unified CCX server. The certificate error appears every time you sign in. To avoid the certificate error appearing every time you sign in, you must add the certificate to the trust store.

Ensure that the pop-ups are enabled for the Finesse desktop.

After you enter the Finesse desktop URL in your browser, the procedure to add a certificate is as follows:

Install certificates on Windows operating system:

The procedure to add a certificate varies for each browser. The procedure for each browser is as follows:

Internet Explorer

Note If you are using a Windows client, signed in as a Windows user, you must run Internet Explorer as an administrator to install the security certificates. In your **Start** menu, right-click Internet Explorer and select **Run as administrator**.

Contact your administrator if you do not have the required permissions to install the security certificates.

- 1. A page appears that states there is a problem with the website's security certificate. Click **Continue to this website (not recommended)** link to open the Finesse sign in page. The Finesse sign in screen appears with a certificate error in the address bar.
- 2. Click on the certificate error that appears in the address bar and then click View Certificates.
- 3. In the Certificate dialog box, click Install Certificate to open the Certificate Import Wizard.
- 4. Select **Current User** to install the certificate for the current user only, or select **Local Machine** to install the certificate for all Windows users.
- 5. On the Certificate Import Wizard, click Next.
- 6. Select Place all certificates in the following store and click Browse.
- 7. Select Trusted Root Certification Authorities and click OK.
- 8. Click Next and then click Finish. A Security Warning dialog box appears.
- 9. Click Yes to install the certificate. The Certificate Import dialog box appears.
- 10. Click OK and close the Certificate Import dialog box.

11. Close the browser tab. The accepted certificate link is removed from the SSL Certificate Not Accepted dialog box.

Repeat the preceding steps for all the certificate links. After you accept all the certificates, the sign in process is complete.

Note To remove the certificate error from the desktop, you must close and reopen your browser.

Microsoft Edge

- 1. A page appears that states the site is not secure. Click **Details** and then click the **Go on to the website** (not recommended) link to open the Finesse sign in page.
- 2. Enter your agent ID or username, password, and extension, and click Sign In.
- 3. In the SSL Certificate Not Accepted dialog box, click the certificate link. A new browser tab opens for the certificate that you must accept. A certificate error appears in the address bar.
- 4. To open the certificate information, click on the certificate error and select View Certificates.
- 5. In the **Certificate Information** column, click **Export to file**, browse to any location on your computer and save the certificate.
- 6. Open the Manage user certificates tool.
- 7. In Manage user certificates, under Certificates Local Computer, right-click Trusted Root Certification Authorities and select All Tasks > Import. The Certificate Import Wizard appears.
- 8. Click Next.
- **9.** Click **Browse**, navigate to the location where you exported the certificate, select the certificate, and click **Open**.
- 10. Follow the on-screen instructions by clicking Next and click Finish.
- 11. Close the browser tab. The accepted certificate link is removed from the SSL Certificate Not Accepted dialog box.

Repeat the preceding steps for all the certificate links. After you accept all the certificates, the sign in process is complete.

Note To remove the certificate error from the desktop, you must close and reopen your browser.

Firefox

1. On Your connection is not secure page, click Advanced > Add Exception.

Note Ensure that the **Permanently store this exception** box is checked.

2. Click Confirm Security Exception.

- 3. On the Finesse sign in page, enter your agent ID or username, password, and extension, and click Sign In.
- 4. In the SSL Certificate Not Accepted dialog box, click the certificate link. A browser tab opens for the certificate that you must accept.
- 5. On the browser tab, click I Understand the Risks > Add Exception. Ensure that the Permanently store this exception box is checked.
- 6. Click **Confirm Security Exception**. The browser tab closes after you accept the certificate and the accepted certificate link is removed from the **SSL Certificate Not Accepted** dialog box. Close the browser tab if it does not automatically close.

Repeat the preceding steps for all the certificate links. After you accept all the certificates, the sign in process is complete.

Chrome

- 1. A page appears that states your connection is not private. Click Advanced > Proceed to Finesse FQDN to open the Finesse Sign in page.
- 2. Enter your agent ID or username, password, and extension, and then click Sign In.
- 3. In the SSL Certificate Not Accepted dialog box, click the certificate link. A browser tab opens for the certificate that you must accept.
- 4. On the browser tab, click Advanced > Proceed to <Hostname> (Unsafe). The browser tab closes after you accept the certificate and the accepted certificate link is removed from the SSL Certificate Not Accepted dialog box. Close the browser tab if it does not automatically close.

Note If you click the certificate link and do not accept it, the certificate link stays enabled in the **SSL Certificate Not Accepted** dialog box. The certificate error appears every time you sign in. The procedure to permanently accept the certificate is as follows.

- 5. Click on the certificate error that appears in the address bar and then click **Certificate (Invalid)**. The **Certificate** dialog box appears.
- 6. In the **Details** tab, click **Copy to File**. The **Certificate Export Wizard** appears.
- 7. Click Next.
- 8. Keep the default selection **DER encoded binary X.509 (.CER)** and click **Next**.
- 9. Click **Browse** and select the folder in which you want to save the certificate, enter a recognizable file name and click **Save**.
- **10.** Browse to the folder where you have saved the certificate (.cer file), right-click on the file, and click **Install Certificate**. The **Certificate Import Wizard** appears.
- 11. Keep the default selection Current User and click Next.
- 12. Select Place all certificates in the following store and click Browse. The Select Certificate Store dialog box appears.
- 13. Select Trusted Root Certification Authorities and click OK.

- 14. Click Next and then click Finish. A Security Warning dialog box appears that asks if you want to install the certificate.
- 15. Click Yes. A Certificate Import dialog box that states the import was successful appears.

Close the browser and sign in to Finesse. The security error does not appear in the address bar.

Install certificates on macOS:

The procedure to download a certificate varies for each browser. The procedure for each browser is as follows:

Chrome

- 1. A warning page appears which states that your connection is not private.
- 2. Click Advanced and then click Proceed to <Hostname> (unsafe) to open the Finesse Sign in page.
- **3.** Click on the certificate error that appears in the address bar and then click **Certificate (Invalid)**. A certificate dialog box appears with the certificate details.
- 4. Drag the **Certificate** icon to the desktop.
- 5. Double-click the certificate. The Keychain Access application opens.
- 6. In the right pane of Keychains dialog, browse to the certificate, right-click on the certificate, and select **Get Info** from the options that are listed. A dialog appears with more information about the certificate.
- 7. Expand Trust. From the When using this certificate drop-down, select Always Trust.
- 8. Close the dialog box that has more information about the certificate. A confirmation dialog box appears.
- 9. Authenticate the modification of Keychains by providing a password.
- 10. The certificate is now authorized, and the certificate error does not appear on the address bar.

Firefox

- 1. In your Firefox browser, enter the Finesse desktop URL. A warning page appears which states that there is a security risk.
- 2. Click Advanced and then click View Certificate link. The Certificate Viewer dialog box appears.
- 3. Click **Details** and then click **Export**. Save the certificate (.crt file) in a local folder.

Note If .crt file option is not available, select .der option to save the certificate.

- 4. From the menu, select **Firefox** > **Preferences**. The **Preferences** page is displayed.
- 5. In the left pane, select Privacy & Security.
- 6. Scroll to the Certificates section and click View Certificates The Certificate Manager window is displayed.
- 7. Click Import and select the certificate.
- 8. The certificate is now authorized, and the certificate error does not appear on the address bar.

Accept Certificates for Multi-session Chat and Email

Before you can join a chat room or handle email contacts, you may be required to accept certificates in the Manage Chat and Email gadget on the Finesse desktop. When you sign in to Finesse, select Manage Chat and Email gadget from the left pane to check whether you must accept any certificates and ensure that the gadget loads properly.

After you log in to Finesse and click Manage Chat and Email a warning page Click Launch Certificate and accept certificate to use Chat and Email appears.

Click Launch Certificate.

Procedure

Step 1 In Internet Explorer:

- a) A warning page appears that states the site is not secure.
- b) Click **More Information** and then click **Go on to the webpage (Not recommended)** link. The page that states this site is not secure automatically closes and the multi-session gadget loads.

Step 2 In Microsoft Edge:

- a) A warning page appears that states the site is not secure.
- b) Click Details and then click Go on to the webpage (Not recommended) link. The page that states this site is not secure automatically closes and the multi-session gadget loads.

Step 3 In Firefox:

- a) A warning page appears that states your connection is not private.
- b) Click Advanced and then click Accept the Risk and Continue. The page that states this connection is not private automatically closes and the multi-session gadget loads.

Step 4 In Chrome:

- a) A warning page appears that states your connection is not private.
- b) Click Advanced and then click Proceed to <Hostname> (unsafe) link.

The page that states this connection is not private automatically closes and the multi-session gadget loads.

The Launch Certificate error may appear multiple times. Follow the same procedure to load the multi-session gadget.

Sign Out of the Finesse Desktop

Important

Do not close your browser to sign out of the Finesse desktop. Finesse can take up to 120 seconds to detect that your browser is closed and an additional 60 seconds to sign you out. Finesse may continue to route contacts to you during this time.

You cannot sign out of the Finesse desktop when your Voice or Digital Channels are in the Ready state.

	Procedure			
Step 1	Ensure your state is set to Not Ready. Click the user options icon on the top-right corner of your screen. The Sign Out option is displayed with a drop-down list of Sign Out reason.			
	Note	If you handle chat and email contacts, you must ensure that your status is set to Not Ready in both the Call Control gadget and the Chat and Email Control gadget.		
Step 2	Select the appropriate Sign Out reason code to sign out.			
	Note	If no Sign Out reason are configured for your team, Finesse signs you out when you click Sign Out.		
Step 3	On the Sign Out screen, you can choose to exit the browser or click the Sign In link to be redirected to Finesse login screen.			

Desktop Chat

Desktop Chat interface is hosted by the Finesse browser desktop and requires a separate login. This feature provides chat functionalities required for agents and supervisors to chat with each other or with other Subject Matter Experts in the organization. Desktop Chat will be available on your Finesse desktop only if the administrator has configured this feature for you.

Note

- Desktop Chat does not support Single Sign-On. It requires an explicit login for both SSO and non SSO platforms.
- Desktop Chat requires the Cisco IM and Presence EC certificates (supported format: imphostname-EC.domain.com) to be trusted to start the Desktop Chat without experiencing an exception.

Desktop Chat users are identified with a unique identity which is in the form of username@FQDN.com.

The agent state in the Desktop Chat is separate from the Voice or Digital Channels state and can be controlled by the user.

The Desktop Chat state is reflected in the user's combined presence. For example, If you are logging into Desktop Chat, you are seen as available in Jabber or other connected chat tools.

While accepting the Desktop Chat certificates, if you accept one certificate and skip the rest, you will lose your Desktop Chat status during a failover. Ensure to accept all certificates to preserve the Desktop Chat login and status after a failover. Depending on the failover type, you may either lose or retain all your Desktop chat sessions.

Sign In to Desktop Chat

Procedure

- **Step 1** In the Finesse desktop, click the Desktop Chat icon ().
- Step 2 Enter your username and password in the appropriate fields and click Sign In.
- Step 3 Note If you are using self signed certificates, you get the certificate acceptance window.

Click the certificate link. A new browser tab opens for the certificate you need to accept. A certificate error appears in the address bar.

To accept the certificates in Internet Explorer, refer to the section *Accept Security Certificates* > *Step 2* > *Substep d* onwards.

To accept the certificates in Edge, refer to the section *Accept Security Certificates > Step 3 > Substep d* onwards.

To accept the certificates in Firefox, refer to the section Accept Security Certificates > Step 4 onwards.

To accept the certificates in Chrome, refer to the section Accept Security Certificates > Step 5 onwards.

Add Contact

If you have Cisco Jabber on your desktop, then the first time you sign in to Desktop Chat, you will see your Cisco Jabber contact list in the Desktop Chat window. If you do not have Cisco Jabber, your contact list will be empty.

10	To add a contact:				
	• In the e	empty contact list, enter the agent name or ID in the Search field.			
	Note	When you enter the text to search, the Search field pre populates relevant results in a drop-down.			
		From the results list, hover over the required contact and click the $\textcircled{f t}$ icon.			
	• In the e	existing contact list, click the ••• icon at the end of the group and click Add.			
	• From t	he Recent Chats group, click the ••• icon at the end of the required chat and click Add .			
In	the Add	Contact window, you can choose to change the display name.			
	om the Ac	ld to Group drop-down, either choose an existing group or create a new group to add the contact.			

Edit Contact

Use this option to change the contact name or contact group.

Procedure

Step 4	Click Save.	
	While modifying the group for the contact, you can either add the contact to existing groups or create a new group.	
Step 3	In the Edit Contact window, modify the display name or the group.	
Step 2	From the drop-down, click Edit.	
Step 1	In the Contact list, click the ••• icon at the end of the required contact.	

Move Contact

Use this option to move a contact to a different group.

Procedure

Step 1 To move a single Contact:

- a) Click the ••• icon at the end of the required contact.
- b) From the drop-down, click Move.
- c) In the Select Destination window, select an existing group or create a new group.
- d) Click Move.

Step 2 To move multiple contacts:

- a) Press and hold the Ctrl key and select the required contacts.
- b) On the Contact list header, click Move.
- c) In the Select Destination window, select existing groups or create a new group.
- d) Click Move.

Delete Contact

Use this option to delete a contact. If the contact is part of multiple groups, it is removed only from that group and not from the other groups.

Procedure

Step 1 To delete a single contact:

a) In the Contact list, click the ••• icon at the end of the required contact.

- b) From the drop-down, click Delete.
- c) In the confirmation prompt, click **Delete** to remove the contact from that group.

Step 2 To delete multiple contacts:

- a) Press and hold the Ctrl key and select the required contacts.
- b) On the Contact list header, click **Delete**.
- c) In the confirmation prompt, click **Delete** to remove the contact from that group.

Edit Group

Use this option to change the group name.

Procedure

Step 1	In the contact list, click the ••• icon at the end of the required group.
Step 2	From the drop-down list, click Edit.
Step 3	In the Group window, modify the group name.
Step 4	Click Save.

Delete Group

Use this option to delete a group.

Procedure

Step 1	In the Contact list, click the ••• icon at the end of the required group.
Step 2	From the drop-down, click Delete .
Step 3	In the confirmation prompt, click Delete . The group is removed with all the contacts in it.

Chat Window

When you receive an incoming chat request, a chat window pops up with the display name of the agent in the chat window header. If the Finesse desktop window or tab is inactive, Finesse displays a notification with the chat details. Click the toaster notification to restore the Finesse desktop.

You can move the chat window to any location on the screen but cannot maximize it to the full screen.

You can chat with agents who are logged into the Desktop Chat. You cannot send messages to the signed out agents.

The Desktop Chat window provides the following functionalities:

- Typing area: Type your message in the typing area. Right-click to perform basic clipboard operations.
- The typing awareness indicator shows when the other participant is typing.
- Multiple chats:
 - All agents are displayed in the chat tabs at the bottom of the chat window.

 - For each chat tab, the unread chat notification is shown in a badge next to the display name. The badge disappears when that chat tab is active.
 - When you hover over the status on any chat tab next to the display name, you get the option to close that chat tab.
- Click the chat window header to minimize or maximize the chat window.
 - When minimized, the chat window header shows the total number of chats that have unread messages.
 - Click X on the chat window header and confirm to close all chats.
- Chat history: The Desktop Chat window stores the chat history only for a particular session. If you sign out or the browser is refreshed or closed, the chat history is lost.
- Resize chat window: Click the 🖆 button on the chat window header to increase the chat window frame size and the 🖺 button to restore the frame size.
- Attachments:

Note The administrator should have enabled attachment support for you to send and receive attachments.

- To send an attachment:
 - 1. Click the Send a file button and navigate to the file you want to send.
- 2. Click OK.
- When you receive an attachment, you are prompted to Accept and Decline the attachment. Click **Accept** to download the attachment or click **Decline** to reject it.
 - The file name and file size are displayed in the attachment header.
 - The attachments are downloaded in the downloads folder of the browser.

- You cannot open the attachment from the chat window.
- The supported file types and maximum attachment size are configured by your administrator.

Note You can send or receive attachments only from the users using Desktop Chat.

Change Your Desktop Chat State

When you sign in to the Desktop Chat, your state is set to Available by default. To change your state:

Procedure

Step 1 Click the drop-down arrow beside your current state in the Desktop Chat window.Step 2 Choose the appropriate state from the list.

Note

If your status in set to Do Not Disturb and you receive a chat message, the message is displayed only if your chat window is active. If the chat window is closed or minimized, the Desktop Chat icon blinks and you will only see the minimized chat window header with the number of chat tabs that have unread messages.

Sign Out of Desktop Chat

When you sign out of the Desktop Chat, you will only be signed out from the Desktop Chat and not the Voice or Digital channels. Your Voice and Digital Channels state remains the same. To sign out:

Procedure

Step 1 Click the drop-down arrow beside your current state in the Desktop Ch	nat window
---	------------

Step 2 From the displayed list, click **Sign Out**.

Edit Call Variables

You can edit the call variable values if the administrator has configured the call variable as editable. You can edit the values during an active call or in the wrap-up state.

Note Call variables edit operation updates the values of the variables within the particular call. All entities listening to dialog events receive the updated call variables through the Cisco Finesse notifications. If any CTI clients are connected to the same CTI server, they also receive notifications of the changed call data though CTI call events. However, application scripts or databases that are used to populate the call variables are not directly affected by this edit.

Procedure

- **Step 1** In the Finesse desktop, expand the call control gadget to display the call variables.
- **Step 2** Click in the text box to edit the values as required.
 - **Note** In the following scenarios the changes made to the call variable by a user is overwritten:
 - When multiple users edit the same field at the same time. For example, when two users (User A and User B) are editing the same field at the same time and if User A saves the edited values. Then, the changes that are made by User B are overwritten and User B is notified with a message.
 - When there is a script change in the CTI server and during this period a user is editing the values. Then, the changes that are made by the user are overwritten and the user is notified with a message.

Step 3 Click Save.

To retrieve the previously saved values, click Revert.

Note The unsaved field values are overwritten during conflict.

Live Data Reports

Access Live Data

Cisco Finesse agent and supervisor desktops provide Live Data gadget.

Live Data gadget displays information about the current state of the contact center. This gadget receives data from the real-time data source at frequent intervals.

This feature provides the following access:

- Agents can access the Live Data agent reports.
- Supervisors can access the Live Data agent and supervisor reports.

To access reports, the administrator must add and configure them in the Cisco Finesse administration console.

In Cisco Finesse agent desktop, click the My Statistics tab to access the reports.

In Cisco Finesse supervisor desktop, click the Team Data tab and Queue Data tab to access the reports.

View Multiple Live Data Report Views

Cisco Finesse allows you to view multiple Live Data reports or views on a single gadget. You can select the desired view to display from a drop-down list on the gadget toolbar, which lists up to five report views in **Report Name - View Name** format. Your administrator determines which views are available for you to select.

Note

When you upgrade from an earlier version of Unified CCX 10.x to Unified CCX 11.0 version you can view the multiple live data reports on a single gadget only.

From the Live Data report toolbar, you can also do the following:

- Pause and resume event updates in the Live Data gadget using the pause and play button. (If the button is paused when there are updates available on the gadget, a notification appears over the button.)
- Hide and restore the toolbar using the arrow in the center of the toolbar.
- Access help for the relevant reporting gadgets by clicking the help button.

View My History

Use the **My History** tab on the Agent or Supervisor desktop to view your recent call history and state history.

Recent Call History

On clicking the **My History** tab on the desktop, you can view the following details of the your calls since midnight:

- Type: Indicates if the call was an Inbound or Outbound call.
- Number: Indicates the phone number of the Inbound or Outbound call.
- **Disposition**: Indicates the action taken for the call.
- Wrap-Up Reason: Indicates the call reason category for the call.
- Queue: Indicates the queue associated with the call.
- Start-Time: Indicates the start time of the call.
- Duration: Indicates the duration of the call.
 - For Inbound calls it includes the ring time, talk time and hold time.
 - For Outbound calls it includes dial tone, ring back, talk time, and hold time.
- Make Call: Click on the call icon to initiate an outgoing call when in Ready or Not Ready state.

Recent State History

On clicking the **My History** tab on the desktop, you can view the following details of your call state history since midnight:

- Start Time: Indicates the time when agent state was initiated.
- State: Indicates the ACD agent state.
- Reason: Indicates the reason for the current agent state.
- Duration: Indicates the duration of the agent state.

View Team Message

On logging in to the Finesse desktop, you can view the Team Message banner which broadcasts the active team updates sent by your supervisor in real-time. The total number of active messages sent by your supervisor is displayed in the banner. By clicking the number, you can view the latest message with the name of the supervisor and the timestamp being displayed against each message.

You can toggle between the active messages (note that messages expire after a time frame, as set by the Supervisor).

If the Finesse desktop is inactive, a toaster notification appears when a new team message is sent by the Supervisor. You can click the notification to view the message.

Note

During failover, the team message banner and the failover banner will be displayed together.

Drag-and-Drop and Resize Gadget or Component

The administrator can configure the drag-and-drop and resize gadget or component features for the agents and supervisors to customize their Finesse desktop.

- The drag-and-drop feature allows the agents or supervisors to drag (and drop) the gadget or the component to the required position on the desktop layout.
- The resize feature allows the agents or supervisors to shrink or expand the gadget or the component to a custom size on the desktop layout.

The Finesse desktop retains your choices when you access the browser again. For more information on resetting to default layout, see *Reset Layout*.

Note These features are also applicable for third-party gadgets.

Restrictions and Limitations

Following are the restrictions and limitations for drag and drop or resize feature:

- Rearranging and resizing action that is performed on a gadget or component is specific to the logged in user, the browser used, to the respective tab, and the device used.
- Rearranging and resizing actions are not applicable for header and page-level gadgets and components. For example, Agent State for Voice and Dialer Component.

If the administrator modifies the default layout, then the changes that are made by you are overwritten with default settings. The changes are reflected when you refresh or sign in again.

Drag-and-Drop a Gadget or Component

Before you begin

This feature is available on your Finesse desktop only if the administrator has configured this feature for you.

Procedure

- **Step 1** Sign in to the Cisco Finesse desktop.
- **Step 2** Place the pointer on the gadget or component title header. When the pointer changes to \bigoplus , click and drag the gadget or component to the required position on the desktop layout.

The drag-and-drop action that is performed on a gadget or component is specific to the logged in user, the browser used, to the respective tab, and the device used.

Note You can arrange a maximum of 12 gadgets or components side by side in a specific tab.

Resize a Gadget or Component

Before you begin

This feature is available on your Finesse desktop only if the administrator has configured this feature for you.

Procedure

- **Step 1** Sign in to the Cisco Finesse desktop.
- **Step 2** Place the pointer on the gadget or component border. When the pointer changes to \mathcal{I} , then click and drag the \mathcal{I} to resize the gadget or component on the desktop layout.

The resize action that is performed on a gadget or component is specific to the logged in user, the browser used, to the respective tab, and the device used.

- \uparrow indicates vertical resizing and \leftrightarrow indicates horizontal resizing.
- The maximum length of the gadget is restricted to the screen length. The minimum length of the gadget is restricted to a 12th of the screen length.

Reset Layout

If you have modified the desktop layout using the drag-and-drop and resize features, then the layout can be reset to the default view using **Reset Layout** option. The **Reset Layout** option is available in the user options icon drop-down list.

Note You can also clear your browser cache to reset the layout to the default view.

Procedure

- **Step 1** Click the user options icon on the top-right corner of the screen.
- Step 2 Click Reset Layout.
- **Step 3** Click **Ok** in the confirmation dialog box.

Restores the default view across all tabs.
