Note: Cisco Workforce Optimization is End-of-Life as on August 1, 2020. For more information, refer to Cisco Unified Contact Center Express - End-of-Sale and End-of-Life Announcement for Cisco Unified Workforce Optimization - Cisco.

Note: Cisco Workforce Optimization licenses are not supported with Smart Licensing. Consequently, customers who upgrade to 12.5 must continue with Classic Licensing if they want to continue using Cisco WFO.

— Desktop-based monitoring and recording is not supported in WoW64 mode.

■ [FN 2] Cisco AQM has direct dependencies upon Cisco Unified Communications Manager for CTI and SIP events. Therefore, AQM compatibility with Unified CM is limited to the current Unified CM version at the time of release and at least one prior version. Previous versions of AQM are not generally updated for compatibility

with new versions of Unified CM. Therefore, when you plan an upgrade, consult the appropriate AQM Installation Guide for Unified CM compatibility. See footnote on individual AQM versions to identify the Unified Communications Manager versions that are supported by that AQM.

■ (FN 3) All associated Service Updates are supported with compatible versions of WFM.

- (FN 4) Telepresence CE software does not support Transfer or Conference operations from Finesse.

- (FN 5) If Cisco Finesse IPPA agents use 78xx series phone, you must either disable the Cisco Finesse IPPA Inactivity Timeout feature or increase the timeout to be within the range of 120 seconds to one day (86400seconds), so that the agent does not get logged out of Cisco Finesse IPPA even if the agent is on any other screen.

- (FN 6) Cisco Finesse IP Phone Agent is not supported over Mobile and Remote Access (MRA).

- (FN 7) Unified CCX is compatible with those Jabber versions that are compatible with the CUCM version being used with Unified CCX. The minimum supported Cisco Jabber version is 12.5.

- (FN 8) For minimum supported versions of CUCM and Expressway (for MRA deployments) to support Webex, see the Supported Unified CM Releases and the Supported Expressway Releases tables at https://www.cisco.com/c/en/us/td/docs/voice_ip_comm/cloudCollaboration/wbxt/ucmcalling/unified-cm-wbx-teams-deployment-guide/unified-cm-wbx-teams-deployment-guide_chapter_011.html.

Jabber:

- MRA support for Jabber requires minimum Cisco Jabber version 12.5 and Expressway 12.5. If you have VPN split-tunneling configured, you can use Jabber with MRA and the Finesse desktop on the same client machine. See https://www.cisco.com/c/en/us/support/security/anyconnect-secure-mobility-client/products-installation-and-configuration-guides-list.html for Cisco AnyConnect Mobility Client split-tunneling configuration.

- If VPN split-tunneling is not available, you can run Jabber with MRA and the Finesse desktop after splitting them onto two clients.

  — A remote agent who runs Jabber with MRA on one client machine and the Finesse desktop with a VPN connection on a second client machine.

  — A remote agent who runs a Jabber softphone on a laptop that is connected over MRA and runs the Finesse desktop as a Xenapp thin client.

- Jabber for VDI is not supported in Video Contact Center deployments.

- For Cisco Jabber software compatibility details, see the Planning guide for Cisco Jabber at https://www.cisco.com/c/en/us/support/unified-communications/jabber-windows/products-installation-guides-list.html.

- For Home Agent with Extend and Connect, set Jabber to Extend Mode so that the agents can select or edit the remote destination number.
