## Change History

Change	See	Date
<b>Initial Release of Document for Release 12.5</b>		February, 2020
Information on how to configure Cisco Webex Experience Management	Cisco Webex Experience Management Integration chapter	
Information on how to configure Customer Virtual Assistant feature	Customer Virtual Assistant chapter	

## About This Guide

This guide explains features you can use in conjunction with Cisco Hosted Collaboration Solution for Contact Center for Contact Center. For each feature, there is a description, procedures for initial setup, and details on the functionality the feature provides.

## Audience

This document is prepared for:

- Contact center administrators who configure and run the contact center, manage agents and supervisors, and address operational issues.

- Contact center supervisors, who lead agent teams and are responsible for team performance

This document is written with the understanding that your system has been deployed by a partner or service provider who has validated the deployment type, virtual machines, and database and has verified that your contact center can receive and send calls.

## Communications, Services, and Additional Information

- To receive timely, relevant information from Cisco, sign up at [Cisco Profile Manager](#).
- To get the business impact you're looking for with the technologies that matter, visit [Cisco Services](#).
- To submit a service request, visit [Cisco Support](#).
- To discover and browse secure, validated enterprise-class apps, products, solutions and services, visit [Cisco Marketplace](#).
- To obtain general networking, training, and certification titles, visit [Cisco Press](#).
- To find warranty information for a specific product or product family, access [Cisco Warranty Finder](#).

### Cisco Bug Search Tool

[Cisco Bug Search Tool](#) (BST) is a web-based tool that acts as a gateway to the Cisco bug tracking system that maintains a comprehensive list of defects and vulnerabilities in Cisco products and software. BST provides you with detailed defect information about your products and software.

# Field Notice

Cisco publishes Field Notices to notify customers and partners about significant issues in Cisco products that typically require an upgrade, workaround, or other user action. For more information, see *Product Field Notice Summary* at <https://www.cisco.com/c/en/us/support/web/tsd-products-field-notice-summary.html>.

You can create custom subscriptions for Cisco products, series, or software to receive email alerts or consume RSS feeds when new announcements are released for the following notices:

- Cisco Security Advisories
- Field Notices
- End-of-Sale or Support Announcements
- Software Updates
- Updates to Known Bugs

For more information on creating custom subscriptions, see *My Notifications* at <https://cway.cisco.com/mynotifications>.

# Documentation Feedback

To provide comments about this document, send an email message to the following address: [contactcenterproducts\\_docfeedback@cisco.com](mailto:contactcenterproducts_docfeedback@cisco.com)

We appreciate your comments.

# Conventions

This document uses the following conventions:

Convention	Description
<b>boldface font</b>	<p>Boldface font is used to indicate commands, such as user entries, keys, buttons, folder names, and submenu names.</p> <p>For example:</p> <ul style="list-style-type: none"><li>• Choose <b>Edit &gt; Find</b>.</li><li>• Click <b>Finish</b>.</li></ul>

Convention	Description
<i>italic font</i>	Italic font is used to indicate the following: <ul style="list-style-type: none"><li>• To introduce a new term. Example: A <i>skill group</i> is a collection of agents who share similar skills.</li><li>• A syntax value that the user must replace. Example: IF (<i>condition, true-value, false-value</i>)</li><li>• A book title. Example: See the <i>Cisco Unified Contact Center Enterprise Installation and Upgrade Guide</i>.</li></ul>
window font	Window font, such as Courier, is used for the following: <ul style="list-style-type: none"><li>• Text as it appears in code or that the window displays. Example: <code>&lt;html&gt;&lt;title&gt;Cisco Systems, Inc. &lt;/title&gt;&lt;/html&gt;</code></li></ul>
< >	Angle brackets are used to indicate the following: <ul style="list-style-type: none"><li>• For arguments where the context does not allow italic, such as ASCII output.</li><li>• A character string that the user enters but that does not appear on the window such as a password.</li></ul>
