

Do Not Call Table

- [Do_Not_Call Table](#) , on page 1

Do_Not_Call Table

The Do_Not_Call table includes all the phone numbers and extensions that, when matched exactly, are not dialed during an Outbound Option campaign.

The following table lists the Do_Not_Call table column names and provides their descriptions.

Column Name	Type	Description
Phone	VARCHAR(20)	The Do Not Call phone number.
PhoneExt	VARCHAR(8)	The extension for the Do Not Call phone number. Note Although the phone number extension is imported into the table, it is currently not used for any dialing operations.

Do Not Call Considerations

Consider the following for the Do Not Call feature:

- When you upgrade to or downgrade from Cisco Unified CCE, Release 11.6(1), the Do Not Call table is not available. Therefore, import the Do Not Call table again after upgrade or downgrade.
- Do not configure multiple Do Not Call import rules.
- A customer number is dialed even if the number is listed in the Do Not Call table. This occurs when:
 - the Campaign Manager restarts.
 - one of the routers is not available during the import of the Do Not Call records.
- Do not perform manual operations on database including database replication.
