

HTTP Allow List Formats

This appendix contains information that can be used to generate and test HTTP Allow Lists.

- Allow List Rules File Reference, on page 1
- Allow List Tests File Reference, on page 2

Allow List Rules File Reference

You can define rules using a CSV file. This topic provides a reference to acceptable data for each rule argument and demonstrates the format of the CSV rules.

Argument index	Parameter name	Required/ Optional	Sample value
0	Url	Required	<pre>protocol://host[:port][/path]</pre>
			Where:
			• protocol is http or https
			• host may be a DNS name or IP address
			• :port is optional, and may only be : followed by one number in the range 0-65535, for example: 8443
			• /path is optional and must conform to HTTP specification
1	Deployment	Optional	Name of the deployment that uses this rule. Required when you have more than one deployment, otherwise supply an empty argument.
2		Optional	Comma-delimited list of HTTP methods, optionally in double-quotes, for example: "GET, PUT"
3		Optional	exact or prefix. Default is prefix.
4		Optional	Text description of the rule. Enclose with double quotes if there are spaces.

Example List Rules CSV File

Url,Deployment,HttpMethods,MatchType,Description https://myServer1:8443/myPath1,myDomain1,GET,,"First Rule" http://myServer2:8000/myPath2,myDomain200,"GET,PUT",exact, https://myServer3:8080/myPath3,myDomain1,,prefix,"Third Rule" https://myServer4/myPath4,myDomain1,,prefix,"Fourth Rule" http://myServer5/myPath5,myDomain1,,prefix,"Fifth Rule"

- List the parameter names (as shown) in the first line of the file
- One rule per line, one line per rule
- · Separate arguments with commas
- Correctly order the rule values as shown in the table above
- · Enclose values that have spaces in them with double quotes

Allow List Tests File Reference

You can define tests using a CSV file. This topic provides a reference to acceptable data for each test argument and demonstrates the format of the CSV tests.

Table 2: Allow List Test Arguments

Argument index	Parameter name	Required/	Sample value
		Optional	
0	Url	Required	<pre>protocol://host[:port][/path]</pre>
			Where:
			• protocol is http or https
			• host may be a DNS name or IP address
			• :port is optional, and may only be : followed by one number in the range 0-65535
			• /path is optional and must conform to HTTP specification
1	ExpectedResult	Required	allow or block . Specifies whether the test expects that the rules should allow or block the specified URL.
2	Deployment	Optional	Name of the deployment to test with this URL. If you omit this argument, the test will use the default deployment.
3	Description	Optional	Text description of the rule. Enclose with double quotes if there are spaces.
4	HttpMethod	Optional	Specify one HTTP method to test for example, PUT . Defaults to GET if not supplied.

Example List Tests CSV File

```
Url,ExpectedResult,Deployment,Description,HttpMethod
https://myServer1:8443/myPath1,block,"my deployment","a block test",GET
http://myServer2:8000/myPath2,allow,"my deployment","an allow test",PUT
https://myServer4/myPath4,allow,,,GET
http://myServer4/myPath4,block,,POST
```

- List the parameter names (as shown) in the first line
- One test per line, one line per test
- · Separate arguments with commas
- Correctly order the test values as shown in the table above
- Enclose values that have spaces in them with double quotes
