Purpose of this Guide

The *Cisco Jabber Planning Guide* includes the following information to assist you in planning the deployment and installation of Cisco Jabber.

- A product overview describing the features available in the product for this release
- Planning considerations for service discovery, encryption, and contact sources (Enhanced Directory Integration [EDI] and Basic Directory Integration [BDI]).
- Information about how you are going to deploy the client, whether it's an on-premises or cloud deployment.
- Requirements for hardware, software, network, and certificates.

To deploy and install Cisco Jabber, use the *Cisco Jabber Deployment and Installation Guide*.

About Cisco Jabber

Cisco Jabber is a suite of Unified Communications applications that allow seamless interaction with your contacts from anywhere. Cisco Jabber offers IM, presence, audio and video calling, voicemail, and conferencing.

The applications in the Cisco Jabber family of products are:

- Cisco Jabber for Android
- Cisco Jabber for iPhone and iPad
- Cisco Jabber for Mac
- Cisco Jabber for Windows

For more information about the Cisco Jabber suite of products, see <https://www.cisco.com/go/jabber>.
