Create Default Service Profile

Overview of service profile

Figure 1: Service profiles workflow
1. Create UC services.

2. Associate the UC Service with the Service Profile.

3. Associate the User with the Service Profile.

Create default service profile

Create a service profile to add the UC services.

Procedure

Step 1 Open the **Cisco Unified CM Administration** interface.

Step 2 Select **User Management** > **User Settings** > **Service Profile**.
The **Find and List Service Profiles** window opens.

Step 3 Select **Add New**.
The **Service Profile Configuration** window opens.

Step 4 Enter a name for the service profile in the **Name** field.

Step 5 Select **Make this the default service profile for the system** if you want the service profile to be the default for the cluster.

> **Note** On Cisco Unified Communications Manager release 9.x only, users who have IM only capabilities must use the default service profile. For this reason, select **Use Default**.

Step 6 Select **Save**.

What to do next

Create the UC services for your deployment.
