## Search for Bugs

### Bug Classification

Known defects, or bugs, have a severity level that indicates the priority of the defect. Development managers define the bug severity. Severity helps the product team focus on bug fixes for future releases and prioritize fixes.

The following table describes the bug severity levels:

Severity level		Description
1	Catastrophic	Reasonably common circumstances cause the entire system to fail, or a major subsystem to stop working, or other devices on the network to be disrupted. No workarounds exist.
2	Severe	Important functions are unusable and workarounds do not exist. Other functions and the rest of the network is operating normally.
3	Moderate	Failures occur in unusual circumstances, or minor features do not work at all, or other failures occur but low-impact workarounds exist. This is the highest level for documentation bugs.
4	Minor	Failures occur under very unusual circumstances, but operation essentially recovers without intervention. Users do not need to install any workarounds and performance impact is tolerable.
5	Cosmetic	Defects do not cause any detrimental effect on system functionality.
6	Enhancement	Requests for new functionality or feature improvements.

### Search for Bugs

To search for bugs, do the following:

- 1 Go to <https://tools.cisco.com/bugsearch>
- 2 Sign in with your Cisco.com user ID and password.
- 3 Enter a bug ID or specify search parameters.

For more information, select **Help** in the top right of the **Bug Search** page.

## Open in this Release

Identifier	Headline
CSCuo60253	Jabber client fails to check or download client updates from the cloud
CSCuo16868	Lync video call window adjustments ignored by client over Expressway
CSCuo17109	Client fails to connect to deskphone if device name is mixed case
CSCul58570	The top Jabber menu appears behind apps that are in full screen mode
CSCuo17322	Lost audio after 20 mins (decreasing bandwidth causes codec switch)
CSCuo19469	Incorrect server name displayed in invalid certificate dialog
CSCuo04615	Client connecting over Expressway even though user is connected via VPN
CSCum35214	Font size discrepancy between sent and received IMs
CSCun57226	Username & password not visible in client for admin created meeting site
CSCuj34427	File transfer fails with a message "initiator cancelled the transfer"

## Resolved Caveats

Identifier	Headline
CSCul32173	Failed to connect Microsoft AD through SSL port 636
CSCul35635	The client is slow to connect to CCM/Unity over wired Thunderbird
CSCun39505	Jabber Mac should support extensions starting with pound "#"
CSCul31695	Customer's LDAP server password is written to console log
CSCun79499	Switch from photo server (UDS) to blobs (AD) results in loss of photos
CSCun18501	Duplicate message received in group chat
CSCul90593	Directory results not yielding correct jid
CSCuj71895	Avatar photos disappear in group chat window when participant leaves
CSCui69916	Cannot paste DTMF tones into a call window

Identifier	Headline
CSCum71608	Contacts are not sorted correctly in the title menu contact list
CSCun60421	Meetings didn't "spring forward" to observe daylight savings

## Closed Caveats

Identifier	Headline
CSCui31144	PHD doesn't work if plugged in while other camera is on
CSCul09086	Cannot connect to edge when there is a delay validating the certificate
CSCum34434	Many audio gaps in speech during a webex call on OSX 10.9
CSCum17021	Localization - Desktop sharing window and menus not localized
